PREFACE

This sixth in the series of detailed reports on salaries and qualifications of Canadian university teachers has again been planned in consultation with the Canadian Association of University Business Officers, the Canadian Association of University Teachers, the Canadian Universities Foundation and other interested agencies. The data were supplied by university and college business officers. Their assistance is greatly appreciated.

Similar reports were issued for 1956-57, 1957-58, 1958-59, 1960-61, and 1962-63. For 1959-60 a survey covering 17 institutions was published, which in addition provided data for these same 17 institutions from 1937-38. Table 2 in this publication gives summary data from 1937-38 to 1963-64 for these 17 institutions. A short survey was issued for 1961-62. It is planned to continue publishing detailed surveys every second year, so that this DBS survey may be conducted in conjunction with the university salary survey undertaken biennially by the Pay Research Bureau of the Civil Service Commission. The next detailed DBS survey will be published for 1965-66, unless other considerations arise to warrant the detailed annual report. A shorter survey is planned for 1964-65.

As well as being used by the Pay Research Bureau, data collected for the DBS university salary survey are also used in reports issued by the National Research Council and by the Canadian Association of University Teachers.

The present report shows the relationship between salary and rank, faculty, field, subject, region, size of institution, control of institution, highest earned university degree, and years since award of first and highest earned degree for 66 institutions. In a number of the cross-classifications, data are given separately for men and women. There are, as well, figures on the age of university teachers in 68 institutions, related to rank, field, subject and highest degree.

Later in 1964 it is planned that a publication will be issued giving additional 1963-64 data on the level of degrees held by staff in the various faculties and teaching fields, and an analysis of age at which first and highest degrees were received. Such data should be of use to those engaged in planning future university staff requirements, and may be of some help in giving basic data to answer such questions as whether the Ph.D. is in fact held by most teachers in the various fields, and whether higher degrees are earned more quickly by those in pure and applied science fields.

Questions concerning the content of this publication or suggestions for further analyses should be sent to Dr. F.E. Whitworth, Director, or R.D. Mitchener, Chief of the Higher Education Section, Education Division.

WALTER E. DUFFETT,
Dominion Statistician.

PRÉFACE

Le présent rapport est le sixième d'une série de rapports détaillés sur les traitements et la qualification des professeurs des universités canadiennes. Cette fois encore, il a été rédigé avec le concours de la *Canadian Association of University Business Officers*, de l'Association canadienne des professeurs d'université, de la Fondation des universités canadiennes et d'autres organismes intéressés. Les données proviennent des représentants des universités et collèges et leur collaboration est très appréciée.

Des rapports semblables ont paru pour 1956-1957, 1957-1958, 1958-1959, 1960-1961 et 1962-1963. Le rapport de 1959-1960 embrassait 17 institutions et donnait leurs statistiques chronologiques à partir de 1937-1938. Le tableau 2 de la présente publication donne les chiffres récapitulatifs de ces 17 institutions de 1937-1938 à 1963-1964. Un court rapport a paru au sujet de 1961-1962. On se propose de continuer à publier des rapports détaillés tous les deux ans, de façon que l'enquête du B.F.S. puisse être faite de concert avec celle qui porte sur les traitements universitaires, faite tous les deux ans par le Bureau d'étude des traitements de la Commission du service civil. La prochaine enquête détaillée du B.F.S. sera publiée au sujet de 1965-1966, à moins que d'autres facteurs motivent un rapport annuel détaillé. On projette une courte enquête à propos de 1964-1965.

En plus de servir au Bureau d'étude des traitements, les données recueillies pour l'enquête du B.F.S. sur les traitements universitaires servent aussi aux rapports publiés par le Conseil national de recherches et l'Association canadienne des professeurs d'université.

Le présent rapport indique la relation entre les traitements et le rang professoral, la faculté, la discipline choisie, la matière, la région, l'importance de l'institution, sa direction, le plus haut grade universitaire obtenu et les années depuis l'obtention du premier et du dernier grade à l'égard de 66 institutions. Certains tableaux donnent une ventilation selon le sexe. D'autres établissent la relation entre l'âge des professeurs d'université de 68 institutions et leur rang professoral, la discipline, la matière et le plus haut grade.

On se propose de publier, plus tard en 1964, d'autres chiffres de 1963-1964 sur le niveau des grades obtenus par le personnel des différentes facultés et de divers domaines d'enseignement, ainsi qu'une analyse de l'âge auquel le premier grade et les grades les plus élevés ont été obtenus. De telles données pourront servir à ceux qui projettent les besoins futurs en personnel universitaire et pourront être de quelque secours pour répondre à ceux qui désirent savoir si la plupart des professeurs des différentes disciplines ont leur D. Ph. et si les professeurs de sciences pures et appliquées peuvent obtenir plus rapidement les grades les plus élevés.

Toute question relative au contenu de la présente publication ou toute proposition d'analyses supplémentaires doit être adressée à M. F. E. Whitworth, directeur, ou à R. D. Mitchener, chef de la Section de l'enseignement supérieur, Division de l'éducation.

WALTER E. DUFFETT,
Statisticien du Dominion.

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

.. figures not available.

... figures not appropriate or not applicable.

— nil or zero.

n.e.c. not elsewhere classified.

SIGNES CONVENTIONNELS

Voici la signification des signes conventionnels employés dans les tableaux du présent rapport:

.. nombres indisponibles.

... n'ayant pas lieu de figurer.

— néant ou zéro.

n.d.a. non dénommé ailleurs.

HIGHLIGHTS

- The median salary for staff paid at rates applicable to lay teaching personnel (all medians used in these "highlights" refer to this group) was \$8,890 for all full-time staff included in the 1963-64 survey. Medians by rank ranged from a high of \$15,397 for deans to \$6,471 for lecturers and instructors.
- The median salary for men in 1963-64 was \$9,115, higher by \$1,779 than that for women.
- Median regional salaries, 1963-64, for all staff surveyed, were highest for Ontario (\$9,236), with the Western Provinces (\$8,897) and Quebec (\$8,875) being almost identical. The median for the Atlantic Provinces (\$7,807), while appreciably lower, showed the highest percentage increase over 1962-63.
- The median salary tended to decrease as size of institution decreased. For all staff at institutions with 5,000 and over full-time students it was \$9,244 in 1963-64. The median for institutions with enrolments of 2,000 to 4,999 was \$8,752, for those with 1,000 to 1,999 students \$8,387, 500 to 999 students \$8,750, and for institutions with less than 500 full-time students \$7,428.
- The median salary for staff at state (provincial or federal) institutions was \$9,113 in 1963-64, slightly higher than that of \$8,999 for all independent institutions, with the median for church-related institutions being \$8,256. Since 1956-57, the medians for state and independent institutions have been quite close and have been considerably higher than the median for church-related institutions.
- As in past years, the median salary for staff in the biological sciences (including medicine) was higher than that for other teaching fields. This 1963-64 median, \$9,954, may be compared with other teaching fields: e.g. \$9,015 for the physical sciences, \$8,618 for the social sciences, and \$7,852 for the humanities. The median for those engaged primarily in faculty administration was \$15,243.
- In 1963-64, of the total of 9,125 teachers included from 68 reporting institutions, 88.4 p.c. were men. In 1957-58, 89.3 p.c. of a total of 4,881 staff members included from 58 reporting institutions were men.
- Full-time staff at a selected group of 17 institutions from 1956-57 to 1963-64 increased 86.9 p.c., from 2,979 to 5,567. The increase from 1962-63 to 1963-64 was 11.0 p.c., or from 5,016 to 5,567.

FAITS SAILLANTS

- Le traitement médian du personnel rémunéré au barème des laïcs (toutes les médianes de ces faits saillants réfèrent à ce groupe) était de \$8,890 pour tout le personnel à plein temps inclus dans le relevé de 1963-1964. Les médianes selon le rang professoral ont varié de \$15,397 pour les doyens à \$6,471 pour les chargés de cours.
- Le traitement médian des hommes en 1963-1964 était de \$9,115, soit \$1,779 de plus que celui des femmes.
- Les traitements médians régionaux, en 1963-1964, de tout le personnel observé étaient le plus élevés en Ontario (\$9,236), dans les provinces de l'Ouest (\$8,897) et au Québec (\$8,875). La médiane dans les provinces Atlantiques (\$7,807), bien que sensiblement inférieure, a marqué la plus forte hausse procentuelle en 1962-1963.
- Le traitement médian diminuait en même temps que l'importance de l'institution. Dans les institutions comptant 5,000 étudiants et plus à plein temps, la médiane de tout le personnel était de \$9,244 en 1963-1964; dans les institutions de 2,000 à 4,999 étudiants, elle était de \$8,752, dans celles de 1,000 à 1,999 étudiants, de \$8,387, dans celles de 500 à 999 étudiants, de \$8,750, et dans celles de moins de 500 étudiants à plein temps, de \$7,428.
- Dans les institutions provinciales ou fédérales, le traitement médian était de \$9,113 en 1963-1964, soit un peu plus élevé que la médiane de toutes les institutions indépendantes (\$8,999), et celui des institutions religieuses, de \$8,256. Depuis 1956-1957, les médianes des institutions d'État et indépendantes ont été assez semblables et ont surpassé considérablement celle des institutions religieuses.
- Comme dans le passé, le traitement médian du personnel des sciences biologiques (y compris la médecine) a été plus élevé que celui du personnel des autres disciplines. La médiane de 1963-1964 (\$9,954) peut être comparée à celles des autres disciplines: e-g- \$9,015 dans les sciences physiques, \$8,618 dans les sciences sociales et \$7,852 dans les humanités. La médiane du personnel préposé surtout à l'administration des facultés était de \$15,243.
- En 1963-1964, sur les 9,125 instituteurs inclus dans les 68 institutions qui ont fait rapport, 88.4 p. 100 étaient des hommes. En 1957-1958, 89.3 p. 100 d'un total de 4,881 dans 58 institutions étaient des hommes.
- Le personnel de plein temps d'un groupe de 17 institutions, de 1956-1957 à 1963-1964, a augmenté de 86.9 p. 100, de 2,979 à 5,567. L'accroissement de 1962-1963 à 1963-1964 a été de 11 p. 100, soit de 5,016 à 5,567.

- Some 1.6 p.c. (145 of 9,125) of the 1963-64 staff of all 68 institutions included, were aged 65 or over and 458 (5.0 p.c.) were 60 or over. The median age for all staff reported in this 1963-64 survey was 39 years compared with 41 years for 1956-57.
- The median passage of time since the award of the first degree was 14 years for 1963-64 staff. It was 16 years in 1956-57.
- Where highest earned university degree for 1963-64 staff members is considered, 44.4 p.c. were reported with doctorates, 34.6 p.c. master's degrees, 6.7 p.c. a first professional degree beyond a first baccalaureate, 12.8 p.c. a first baccalaureate, and 1.5 p.c. no university degree. The percentage of staff with doctorates has risen slightly since 1957-58, when it was 41.1 p.c.
- Almost one-third (32.6 p.c.) of the total 1963-64 staff which were reported as having a master's or doctorate as the highest earned university degree had received them in the five-year period from 1959 to 1963.
- The oldest of the 9,125 persons included in the present survey was 79 in 1963. This person was a layman. Two others, both priests, were 77.
- Environ 1.6 p. 100 (145 sur 9,125) du personnel de 1963-1964 dans toutes les 68 institutions incluses étaient âgés de 65 ans et plus et 458 (5 p. 100) de 60 ans et plus. L'âge médian de tout le personnel observé lors du relevé de 1963-1964 était de 39 ans (41 ans en 1956-1957).
- Le nombre médian d'années depuis l'obtention du premier grade était de 14 ans pour le personnel de 1963-1964 (16 en 1956-1957).
- L'examen du plus haut grade universitaire obtenu par le personnel de 1963-1964 révèle que 44.4 p. 100 détenaient un doctorat, 34,6 p. 100 une maîtrise, 6,7 p. 100 un premier grade professionnel en deçà d'un premier baccalauréat, 12,8 p. 100 un premier baccalauréat et 1,5 p. 100 aucun grade. La proportion du personnel ayant un doctorat a augmenté légèrement depuis 1957-1958 alors que 41,1 p. 100 étaient docteurs.
- Près du tiers (32,6 p. 100) de tout le personnel de 1963-1964 dont le grade le plus élevé était une maîtrise ou un doctorat l'ont reçu entre 1959 et 1963.
- La plus âgée des 9,125 personnes observées dans la présente enquête, un laïc, avait 79 ans en 1963. Deux autres, prêtres, avaient 77 ans.

INTRODUCTION

Scope of data

This report is based on questionnaire forms for the 1963-64 academic year sent to 74 universities and colleges. Returns were received from 68 (listed in Note 2, following the last table) with enrolment equalling about 83.8 p.c. of the total enrolment of full-time undergraduate and graduate students in Canadian institutions of higher education. Of these 68 institutions, 40 employed lay teachers only or reported their religious teachers as being paid on the same scale as lay staff, 2 employed religious teachers only, and the remaining 26 reported both lay staff and religious staff paid on a scale below that applying to lay staff. All but one of the salary tables are limited to data relating to lay teachers and religious teachers paid on the same scale as lay teachers: the exception is Table 3. Tables showing non-salary data include both lay and religious teachers.

Data are presented for a total of 9,125 teachers, all of them full-time and with academic ranks of lecturer or instructor or higher. These include 8,622 in receipt of salaries based on scales applying to lay personnel and 503 religious teachers in receipt of allowances below the scales applying to lay personnel.

Cautions in interpreting data

1. Not all Canadian institutions of higher education are included. At the beginning of the 1963-64 academic year there were about 370 institutions offering courses of university grade. Those omitted are almost all small (with less than 500 enrolment) and many of them employ religious personnel paid on a salary scale less than that for lay persons. As nearly as can be determined, all institutions with 1,000 or more full-time university-grade students are included.

2. Figures for the separate years are not strictly comparable as a few institutions are not included for all these years in all tables. The data in Table 2 are comparable.

3. The median is not the arithmetic average, but is the theoretical point in a distribution for which 50 p.c. of the cases are higher and 50 p.c. lower.

4. The range between the 1st and 3rd quartiles includes 50 p.c. of all cases. Thus 25 p.c. are below the 1st quartile and 25 p.c. are above the 3rd.

5. Fluctuations in numbers of institutions by size of enrolment are due in part to movement from one enrolment category to another during the years under review.

6. All salary data refer to basic annual salary rates. Many teachers receive extra income for teaching evening, extension or summer classes, and many earn income from non-university sources. Such extra income was not included in this report.

Portée du rapport

Le présent rapport se fonde sur les questionnaires envoyés à 74 universités et collèges pour l'année scolaire 1963-64. Les inscriptions des 68 qui ont répondu (en voir la liste au renvoi 2 après le dernier tableau) représentaient environ 83.8 p. 100 de tous les étudiants à temps plein inscrits aux institutions canadiennes d'enseignement supérieur. Sur ces 68 institutions, 40 n'employaient que des professeurs laïcs ou ont déclaré que leur personnel religieux était rémunéré au barème des laïcs, 2 n'employaient que des religieux et les 26 autres ont déclaré un personnel mixte rémunéré à une échelle inférieure à celle des laïcs. A l'exception du tableau 3, tous les tableaux des traitements ne visent que les professeurs laïcs et les professeurs religieux rémunérés à l'échelle laïque. Les tableaux qui n'ont pas trait aux traitements portent sur les professeurs tant laïques que religieux.

Les données visent 9,125 professeurs, tous à plein temps et ayant au moins le rang de chargé de cours. Sur ce nombre, 8,622 reçoivent un traitement conforme à l'échelle des laïcs et 503 professeurs religieux reçoivent un traitement inférieur.

Interprétation prudente des données

1. Le rapport n'envisage pas toutes les institutions canadiennes d'enseignement supérieur. Au début de l'année scolaire 1963-1964, environ 370 institutions donnaient des cours à l'échelon universitaire. La plupart des institutions omises étaient de petites institutions (moins de 500 étudiants); plusieurs d'entre elles employaient des religieux dont l'échelle des traitements était inférieure à celle des laïques. Autant qu'on a pu le constater, toutes les institutions de 1,000 étudiants universitaires à plein temps ou plus sont représentées.

2. Les chiffres des différentes années ne sont pas strictement comparables, car quelques institutions sont omises certaines années dans les tableaux. Les données du tableau 2 sont comparables.

3. La médiane n'est pas la moyenne arithmétique mais bien le point théorique d'une série de valeurs dont la moitié sont supérieures et l'autre moitié inférieures à ce point.

4. L'écart entre le 1er et le 3e quartile comprend la moitié de tous les cas, de sorte que le quart des cas sont en-deçà du 1er quartile et le quart au-dessus du 3e.

5. La fluctuation du nombre d'institutions selon le nombre des inscriptions tient en partie au passage d'une catégorie d'inscriptions à une autre durant les années observées.

6. Tous les traitements indiqués sont les traitements annuels de base. Plusieurs professeurs grossissent leur revenu en enseignant aux cours du soir, d'extension ou d'été et plusieurs ont un revenu extra-universitaire. Ces suppléments ne paraissent pas dans le présent rapport.

Effective Data of Salary Figures Reported

All salary data refer to basic annual salary rates in the fall of 1963.

Medians and the Situation at the End of the Academic Year**Salaries**

Information was asked for to the nearest dollar. The salary distributions used in this report are \$1,000 except for data in Table 2 where a \$500 interval was used so that the figures would be consistent with those published in *University Teachers' Salaries, 1937-1960*. Medians were calculated to the nearest whole dollar within the interval used.

Although salary scales for the ensuing year are generally set prior to the start of that academic year, the medians should relatively accurately reflect the situation at the end of the academic year.

Age

The form used asked for the year of birth of each staff member. In the tables used here, age is considered as that attained by each individual during the calendar year 1963. These ages are grouped in five-year intervals. Thus all persons born in 1900, for example, were 63 years of age some time in 1963, and were all 63 and not yet 64 at the end of the year. These persons would be included in the interval 60-64.

A median or quartile reported as 63, for example, indicates that the point falls anywhere from 63.0 to 63.9 in the distribution.

If one assumes that there was an even distribution of birthdays throughout each month of each year, half of the persons would be, to use 1900 again as an example, 63 years of age at June 30, 1963. It could then be assumed that at December 31, 1963 the median age would be 63.5 years, and at June 30, 1964, 64 years. While the medians were not calculated in this manner in this report, one might add one year to each median year of age given to arrive at approximate figures for the end of the academic year 1963-64, assuming that it is June 30.

Years Since Award of First Degree

Information was requested on the year in which the first degree was obtained. As with age, the number of years was measured in relation to the calendar year 1963, and distributed in five year intervals. Medians and quartiles were calculated in the same manner as were those for age.

Date de référence des traitements déclarés

Toutes les données sur les traitements se fondent sur la rémunération annuelle de base en vigueur à l'automne de 1963.

Les médianes et la situation à la fin de l'année scolaire**Traitements**

Les traitements, qu'on devait déclarer à un dollar près, sont groupés ici par intervalles de \$1,000, sauf au tableau 2 où on a choisi un intervalle de \$500 pour que les chiffres correspondent à ceux qui ont paru dans *Traitements des professeurs d'université, 1937-1960*. On a calculé la médiane à un dollar près dans l'intervalle utilisé.

Même si l'échelle des traitements pour l'année à venir est normalement établie avant le commencement de l'année scolaire, les médianes doivent refléter de façon relativement précise la situation à la fin de l'année scolaire.

Âge

Le questionnaire demandait l'année de naissance de chaque membre du personnel. Dans les tableaux, l'âge est celui qu'a atteint le nombre au cours de l'année civile 1963. Les âges sont groupés par intervalles de cinq ans. Ainsi, les personnes nées en 1900 ont atteint 63 ans en 1963 et, à la fin de l'année, elles avaient toutes 63 ans révolus, mais non encore 64 ans. Ces personnes sont comprises dans le groupe de 60-64 ans.

La médiane ou le quartile de 63, par exemple, indique que le point se situe entre 63.0 et 63.9 dans la série.

Si les dates de naissance se répartissaient également entre les douze mois de chaque année, la moitié des personnes nées en 1900, pour reprendre l'exemple, auraient atteint leur 63^e année le 30 juin 1963. Il en découle qu'au 31 décembre 1963 l'âge médian serait de 63.5 ans et, au 30 juin 1964, de 64 ans. Dans le présent rapport, l'âge médian n'a pas été calculé de cette manière, mais il suffit d'ajouter un an à chaque âge médian indiqué pour avoir l'âge approximatif à la fin de l'année scolaire (30 juin) 1963-1964.

Nombre d'années depuis le premier grade

L'année d'obtention du premier grade a été déclarée. Comme pour l'âge, le nombre d'années a été calculé par rapport à l'année civile 1963, et le classement fait par groupes quinquennaux. Les médianes et quartiles ont été calculés comme ceux de l'âge.

If the assumption is made that all degrees were received at regular spring convocations (even if actually some would be received at other times during the year), one year could be added to the medians reported to give the picture at the end of the academic year (June 30).

Si l'on suppose que tous les grades ont été obtenus au printemps (même si certains l'ont été à d'autres époques de l'année), il suffit d'ajouter un an aux médianes indiquées pour connaître la situation à la fin de l'année scolaire (30 juin).

SUMMARY

Salaries (Tables 1-17)

Rank

For the 8,622 university teachers with academic rank, reported as receiving salary at rates applicable to lay personnel, the median salary in 1963-64 was \$8,890, 2.4 p.c. higher than the median for 1962-63. For deans it was \$15,397, for professors \$13,401, for associate professors \$10,067, for assistant professors \$7,996, for ungraded professors \$7,030, and for lecturers and instructors \$6,471. The 1963-64 median for ungraded professors (a small and heterogeneous group) was 2.2 p.c. lower than for 1962-63. For other ranks the increase ranged from 4.3 p.c. for professors to 0.8 p.c. for deans. (See Tables A and 1, and Chart 1.)

Sex

For all ranks combined the median salary for women was \$1,779 lower than that for men. Women were concentrated in the more junior ranks, as will be noted later, and hence the median for them was less. Even for the higher ranks the median for women tended to be lower. However, equality in salaries was closest for the higher ranks. (See Tables 1, 7-11, 12, 17.)

Field

Those engaged primarily in faculty administration (all deans and 27 others were so classified) had a median salary of \$15,243, 0.6 p.c. above that for 1962-63. Of the others, teachers in the biological sciences (including medicine) had the highest median salary—\$9,954, followed by those in the physical sciences—\$9,015, the social sciences—\$8,618, and the humanities—\$7,852. In these four teaching fields, percentage increases ranged from 1.7 p.c. in the humanities to 3.1 p.c. in the physical sciences. (See Tables A, 1 and 12, and Chart 1.)

Religious Teachers

The bases on which allowances were reported for religious teachers varied widely. Some figures given were estimates of average expenses, some were amounts actually paid, some were nominal book entries. Data on 503 such teachers show that 137 of them received no allowance. Median allowance for the other 366 was \$1,681 (\$1,617 for men and \$4,000 for women.) The median of allowances reported in 1962-63 was \$1,448, but this figure is not comparable with the 1963-64 median due to different institutions being included in the two years and different methods of reporting the allowances. (See Table 3.)

SOMMAIRE

Traitements (tableaux 1-17)

Rang professoral

Le traitement médian des 8,622 professeurs d'université de rang professoral rémunérés au barème laïc a été de \$8,890 en 1963-1964 et dépassait de 2.4 p. 100 la médiane de 1962-1963. Il était de \$15,397 pour les doyens, de \$13,401 pour les professeurs titulaires, de \$10,067 pour les professeurs agrégés, de \$7,996 pour les professeurs adjoints, de \$7,030 pour les professeurs non classés et de \$6,471 pour les chargés de cours. La médiane de 1963-1964 pour les professeurs non classés (petit groupe hétérogène) était 2.2 p. 100 inférieure à celle de 1962-1963. L'augmentation des autres rangs variait de 4.3 p. 100 pour les professeurs à 0.8 p. 100 pour les doyens. (Voir tableaux A et 1, et graphique 1.)

Sexe

Dans l'ensemble des rangs professoraux, le traitement médian des femmes était inférieur de \$1,779 à celui des hommes. Les femmes se trouvaient surtout aux rangs inférieurs, comme on le soulignera plus loin, ce qui a baissé leur médiane; mais même aux rangs supérieurs, le traitement médian des femmes était en général moins élevé. L'égalité de traitement était plus apparente aux rangs les plus élevés. (Voir tableaux 1, 7-11, 12, 17.)

Discipline

Les professeurs qui s'occupaient surtout de l'administration des facultés (tous les doyens et 27 autres) ont touché un traitement médian de \$15,243, augmentation de 0.6 p. 100 sur 1962-1963. Chez les autres, le plus haut traitement médian a été celui des professeurs de sciences biologiques (y compris la médecine), soit \$9,954; venaient ensuite celui des professeurs de sciences physiques, \$9,015, des sciences sociales, \$8,618, et des humanités, \$7,852. Dans ces quatre domaines, l'augmentation procentuelle allait de 1.7 dans les humanités à 3.1 dans les sciences physiques. (Voir tableaux A, 1 et 12 et graphique 1.)

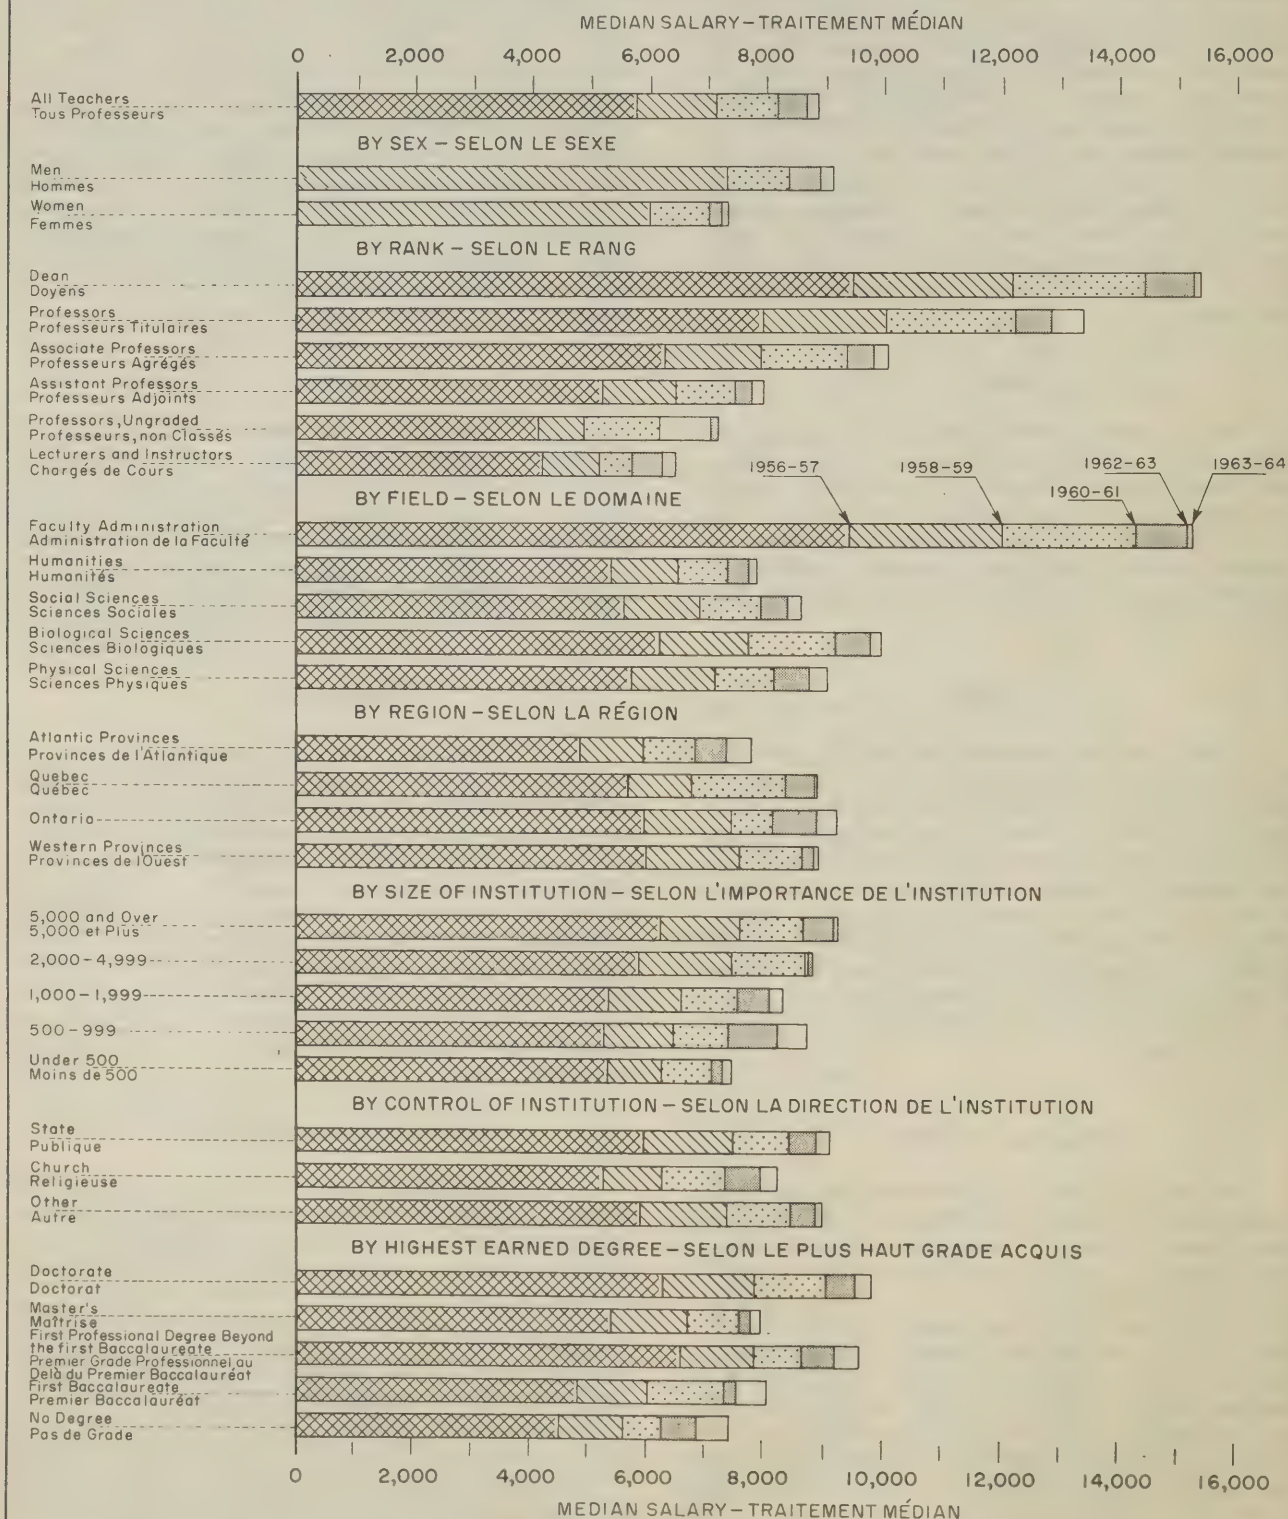

Professeurs religieux

La rémunération des professeurs religieux a été déclarée selon des fondements très variés. Certains chiffres étaient des estimations des dépenses moyennes, d'autres donnaient le montant effectivement payé et d'autres étaient un poste purement comptable. Les données sur 503 professeurs indiquent que 137 d'entre eux ne recevaient pas de rémunération. La rémunération médiane des 366 autres était de \$1,681 (\$1,617 pour les hommes et \$4,000 pour les femmes). En 1962-1963, cette médiane était de \$1,448, mais ce chiffre n'est pas comparable à la médiane de 1963-1964 parce que des institutions différentes étaient incluses les deux années et que des méthodes différentes servaient à déclarer la rémunération. (Voir tableau 3.)

CHART-I

GRAPHIQUE-I

**MEDIAN SALARIES OF UNIVERSITY TEACHERS
1956-57 TO 1963-64**
**TRAITEMENTS MÉDIANS DES PROFESSEURS D'UNIVERSITÉ
1956-57 À 1963-64**

Historical Comparisons

The DBS publication *University Teachers' Salaries, 1937-1960* allows historical comparisons to be made of median salaries paid in 17 major institutions. The median for all ranks in this group for 1963-64 was \$9,103 (\$213 higher than for all personnel included in the present report). It exceeded the median for 1962-63 by \$209 (2.3 p.c.) and for 1961-62 by \$457 (5.3 p.c.), and was over two and a half times above that for 1937-38. (See Table 2 and Chart 2.)

Region

For 1962-63, median salaries of all staff included from Quebec, Ontario, and the Western Provinces were almost identical (\$8,870, \$8,876, and \$8,866 respectively), with that for the Atlantic Provinces (\$7,339) much lower. The highest median in 1963-64 was for Ontario (\$9,236), with the Western Provinces (\$8,897) and Quebec (\$8,875) being almost identical. The 1963-64 median salary for all staff included from the Atlantic Provinces was \$7,807. Comparing the 1963-64 and 1962-63 medians, the increase for the Atlantic Provinces was 6.4 p.c., for Ontario 4.1 p.c., for the Western Provinces 0.3 p.c., and for Quebec 0.1 p.c. (See Tables A, 4 and 13, and Chart 1.)

Size of Institution

As in 1962-63, eight institutions in 1963-64 had full-time enrolments of over 5,000. The 2,000-4,999 category increased in 1963-64 to 12 institutions from 7 in 1962-63, while 11 institutions with 1,000-1,999 students were included in 1963-64 as compared with 16 in 1962-63. The number of institutions with 500-999 students doubled from 5 to 10 from 1962-63 to 1963-64 and 25 institutions in 1963-64 reported less than 500 students as contrasted with 27 in 1962-63.

Although a few institutions which reported in 1963-64 were not included in 1962-63, the main reason for these changes was increased enrolment.

As in 1962-63, the median for all staff combined was highest for the 5,000 and over group (\$9,244 in 1963-64). Next highest for 1963-64 was the 2,000-4,999 group (\$8,752) followed closely by the 500-999 category (\$8,750). Next were institutions with 1,000-1,999 students (\$8,387) and finally institutions with less than 500 students (\$7,428).

Increases from 1962-63 to 1963-64 for all ranks combined ranged from -0.6 p.c. for institutions with 2,000-4,999 students to 6.7 p.c. for institutions with 500-999 students. (See Tables A, 5 and 14, and Chart 1.)

Comparaisons chronologiques

La publication du B.F.S., *Traitements des professeurs d'université, 1937-1960*, permet de comparer chronologiquement les traitements médians dans 17 grandes institutions. La médiane de tous les rangs professoraux de ce groupe, en 1963-1964, a été de \$9,103 (\$213 de plus que celle de tout le personnel compris dans le présent rapport). Elle dépassait de \$209 (2.3 p. 100) la médiane de 1962-1963 et de \$457 (5.3 p. 100) celle de 1961-1962; elle était plus de deux fois et demie celle de 1937-1938. (Voir tableau 2 et graphique 2.)

Région

En 1962-1963, les traitements médians de tout le personnel inclus du Québec, de l'Ontario et des provinces de l'Ouest étaient presque identiques (\$8,870, \$8,876 et \$8,866 respectivement), mais celui des provinces Atlantiques était bien moindre (\$7,339). Les médianes les plus élevées en 1963-1964 ont été celles de l'Ontario (\$9,236), des provinces de l'Ouest (\$8,897) et du Québec (\$8,875). Le traitement médian de tout le personnel inclus des provinces Atlantiques était de \$7,807 en 1963-1964. Si l'on compare les médianes de 1963-1964 et de 1962-1963, la hausse dans les provinces Atlantiques a été de 6.4 p. 100, en Ontario, de 4.1 p. 100, dans les provinces de l'Ouest, de 0.3 p. 100 et au Québec, de 0.1 p. 100 (voir tableaux A, 4 et 13 et le graphique 1).

Taille de l'institution

Comme en 1962-1963, huit institutions en 1963-64 comptaient plus de 5,000 étudiants à plein temps. Douze institutions (7 en 1962-1963) en comptaient 2,000-4,999 et 11 (16), 1,000-1,999. Le nombre d'institutions comptant 500-999 étudiants a doublé de 5 à 10 d'une année à l'autre et 25 (27) ont déclaré moins de 500 étudiants.

Bien que certaines institutions qui ont fait rapport en 1963-1964 n'aient pas été incluses en 1962-1963, la principale raison de ces changements a été l'accroissement des inscriptions.

Comme en 1962-1963, la médiane de tout le personnel réuni a été la plus élevée dans les institutions de 5,000 étudiants et plus (\$9,244 en 1963-1964). Viennent ensuite celles de 2,000-4,999 étudiants (\$8,752), de 500-999 étudiants (\$8,750), de 1,000-1,999 étudiants (\$8,387) et de moins de 500 étudiants (\$7,428).

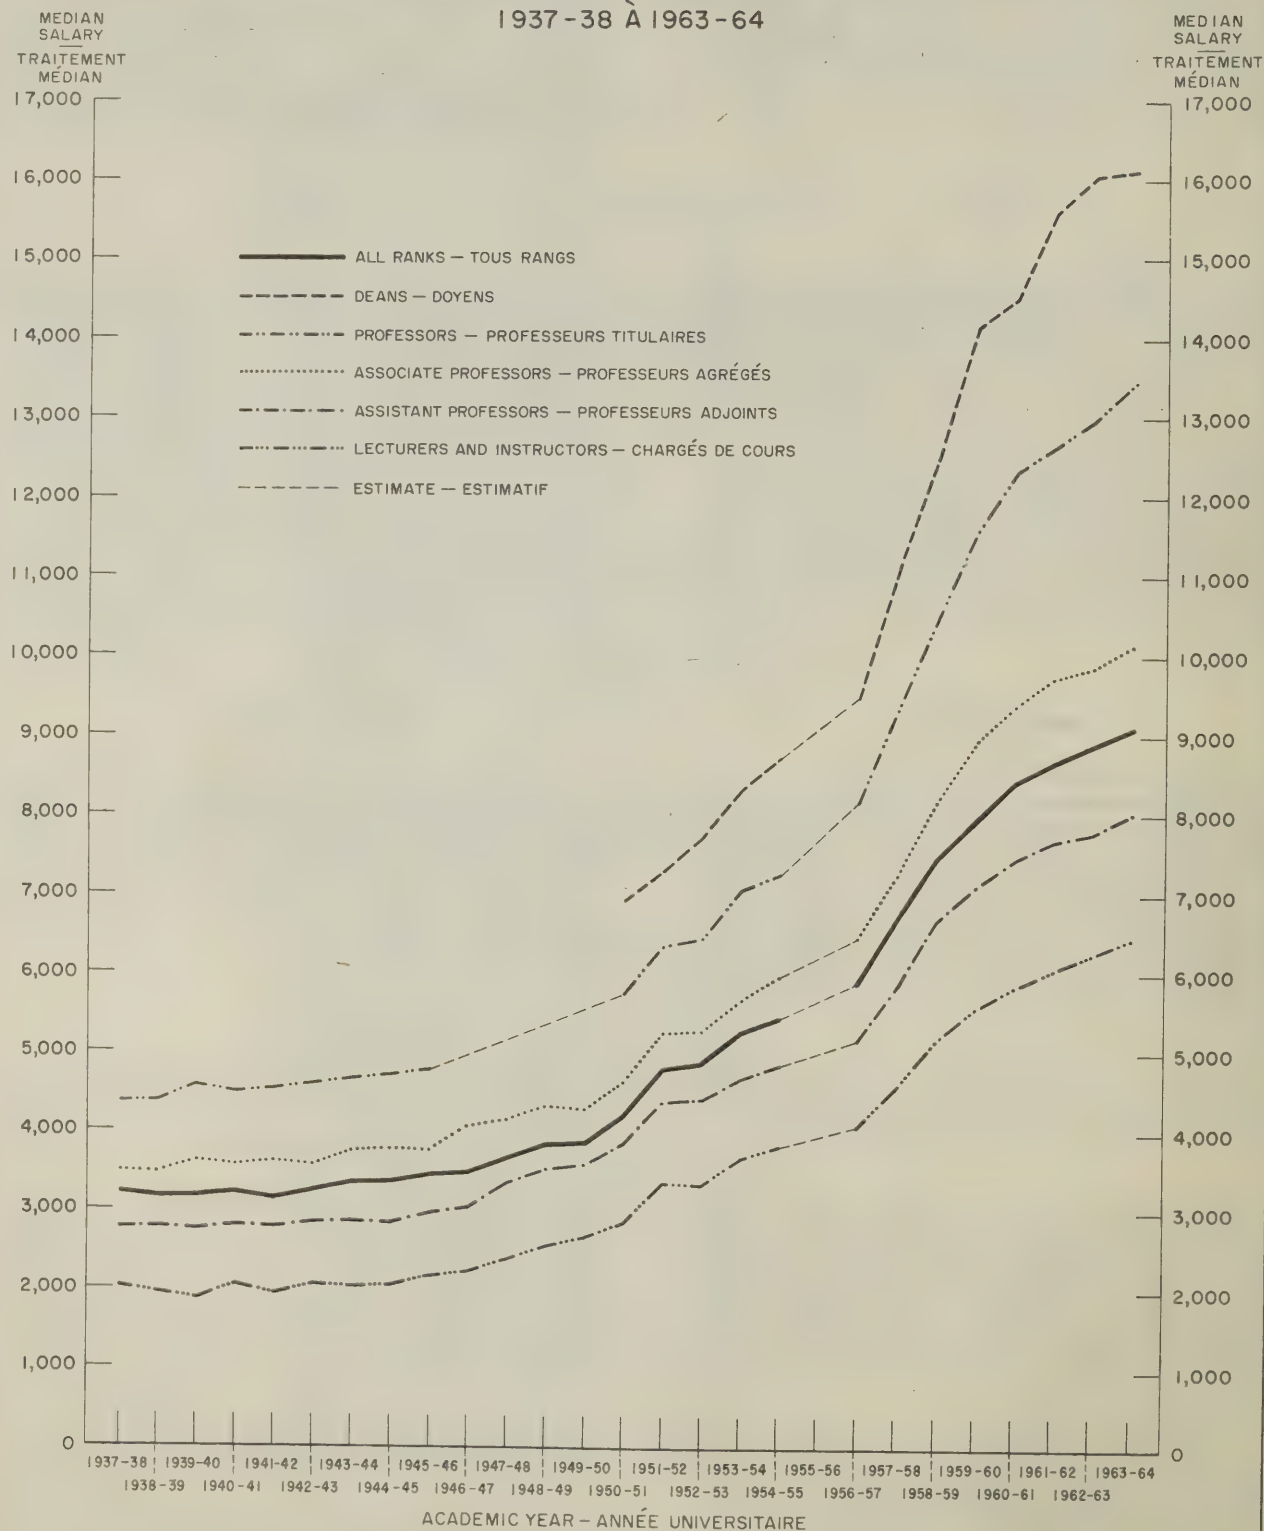

Les hausses de 1962-1963 à 1963-1964 pour tous les rangs professoraux réunis ont varié de -0.6 p. 100 pour les institutions de 2,000-4,999 à 6.7 p. 100 pour celles de 500-999 étudiants (voir tableaux A, 4 et 14 et graphique 1.)

CHART - 2

GRAPHIQUE - 2

MEDIAN SALARIES OF TEACHERS AT 17 UNIVERSITIES BY RANK
1937-38 TO 1963-64

TRAITEMENTS MÉDIANS DES PROFESSEURS DE 17 UNIVERSITÉS SELON LE RANG
1937-38 À 1963-64

Control of Institution

Since the first survey in 1956-57, medians for all staff combined, at independent and at state institutions, have been quite close, and have been considerably higher than the medians for church-related institutions. This situation again prevailed for 1963-64, the median for state institutions (\$9,113) being only slightly higher than that for independent institutions (\$8,999). Although the median for church-related institutions was lower at \$8,256, its increase over 1962-63 (3.2 p.c.) was greater than the increase for state (2.5 p.c.) or independent (1.3 p.c.) institutions. (See Tables 6 and 15, and Chart 1.)

Faculty

There is no uniformity in the organization of universities into faculties, schools and institutes, so data grouped in this way are only relatively significant. A tabulation is presented, however, which indicates that highest salaries were paid in faculties of dentistry (median \$11,844), followed by faculties of medicine (\$10,923), agriculture (\$10,115), and law (\$9,947). Other faculties for which information is available with median salaries over \$9,000 included, in descending order, theology, pharmacy, education, and engineering. Those with medians below \$8,000 were, again in descending order, architecture, commerce and business administration, social work, arts and science, music, physical and health education, household science, nursing, and physiotherapy and occupational therapy.

As in previous years, the faculties with a larger proportion of women were among those with the lowest median salaries. Between 1962-63 and 1963-64, increases in median salaries ranged from -3.9 in music to 7.9 p.c. in theology. (See Table 7.)

Subject

If the four teaching fields of humanities, social sciences, biological sciences, and physical sciences are subdivided into "pure" and "applied" areas and by subject (ignoring faculty organization), further comparisons of salaries may be made.

In the **humanities**, median salaries by subject were in this order: theology, \$9,000; fine arts, \$8,611; classical languages and literature, \$8,395; philosophy, \$8,281; fine and applied art, \$7,700; modern languages and literature (including English and French) \$7,636; and music, \$7,250. Increases in median salaries between 1962-63 and 1963-64 varied from -3.3 p.c. for music to 6.8 p.c. for theology. (See Table 8.)

Direction de l'institution

Depuis le premier relevé en 1956-1957, les médianes de tout le personnel réuni, dans les institutions indépendantes et les institutions d'État, ont été assez semblables et considérablement plus élevées que celles des institutions religieuses. La situation est demeurée la même en 1963-1964, la médiane des institutions d'État (\$9,113) ne surpassant que légèrement celle des institutions indépendantes (\$8,999). Bien que la médiane des institutions religieuses soit inférieure (\$8,256), sa hausse sur 1962-1963 (3.2 p. 100) a été plus considérable que celle des institutions d'État (2.5 p. 100) ou indépendantes (1.3 p. 100). (Voir tableaux 6 et 15 et graphique 1.)

Faculté

Vu le manque d'uniformité dans l'organisation des universités en facultés, écoles et instituts, les données ainsi groupées n'ont qu'une valeur relative. On a cependant dressé un tableau qui montre que le traitement médian le plus élevé était celui des facultés d'art dentaire (\$11,844), suivi de celui des facultés de médecine (\$10,923), d'agriculture (\$10,115) et de droit (\$9,947). Les autres facultés dont les données sont connues et dont les traitements médians surpassent \$9,000 étaient, par ordre descendant, la théologie, la pharmacie, la pédagogie et le génie. Celles dont les médianes étaient en-dessous de \$8,000 étaient, dans le même ordre, l'architecture, le commerce et les affaires, le service social, les arts et les sciences, la musique, la culture physique et l'hygiène, les sciences ménagères, les soins infirmiers, la physiothérapie et l'ergothérapie.

Comme par les années passées, les facultés comptant la plus grande proportion de femmes étaient celles qui avaient les traitements médians les plus bas. De 1962-1963 à 1963-1964, l'augmentation procentuelle du traitement médian a varié de -3.9 p. 100 en musique à 7.9 p. 100 en théologie. (Voir tableau 7.)

Matière

La division des humanités, sciences sociales, sciences biologiques et sciences physiques en sciences "pures" et "appliquées" et selon la matière (sans tenir compte de l'organisation en facultés) permet d'autres comparaisons de traitements.

Dans les **humanités**, les traitements médians par matière étaient les suivants: théologie, \$9,000; beaux-arts, \$8,611; langues et littératures classiques, \$8,395; philosophie, \$8,281; beaux-arts et arts industriels, \$7,700; langues et littératures modernes, dont l'anglais et le français, \$7,636; et musique, \$7,250. Les hausses de traitement médian de 1962-63 à 1963-64 ont varié de -3.3 p. 100 en musique à 6.8 p. 100 en théologie (Voir tableau 9.)

In the **social sciences**, the order was as follows: law, \$9,553; education, \$9,037; sociology and anthropology, \$8,848; psychology, \$8,671; commerce and business administration, \$8,663; economics and political science, \$8,587; social work, \$8,538; geography, \$8,476; history, \$7,875; physical and health education, \$7,846; and household science, \$7,735. Increases over 1962-63 medians ranged from -2.4 p.c. for social work to 7.8 p.c. for geography. (See Table 9.)

Median salaries in the **biological sciences** were: dentistry, \$11,618; medicine, \$11,112; agriculture, \$10,133; pure biological science (including botany and zoology), \$9,756; pharmacy, \$8,938; nursing, \$7,136; and physiotherapy and occupational therapy, \$6,625. Increases over 1962-63 medians ranged from -3.0 p.c. for nursing to 5.0 p.c. for physiotherapy and occupational therapy. (See Table 10.)

In the **physical sciences**, mining engineering led with a median salary of \$10,850; followed by chemical engineering, \$9,385; chemistry, \$9,276; geology, \$9,125; physics, \$9,039; civil engineering, \$8,988; architecture, \$8,925; electrical engineering, \$8,864; mechanical engineering, \$8,756; and mathematics, \$8,608. Increases over 1962-63 ranged from 1.1 p.c. for geology to 5.2 p.c. for mining engineering. (See Table 11.)

While some of the above medians may seem too high or too low in relation to others, it should be borne in mind that they are influenced by the distribution of faculty by rank in each subject area. Some areas may have a much larger proportion of junior staff to instruct greatly increasing enrolment in them. Other areas, especially professional, may require a larger proportion of highly paid senior staff.

Years since First Degree

As a substitute for a measure of teaching experience, universities and colleges were asked to report for each teacher the year in which he obtained his first university degree—from which was calculated the number of years since that award. The median salary of those less than five years away from the first degree was \$6,357. The greater the number of years since that award, the greater the median salary—up to the 35-39 years group (\$13,213). In 1962-63 the high group also represented those 35-39 years beyond the first degree, the median being \$12,683. (See Table 12, Chart 3.)

For men only, the highest median in 1963-64 was for those 35-39 years beyond the first degree (\$13,583). The highest median for women was for the 40-44 year group, it being \$11,500. (See Table 12 and Chart 3.)

Dans les **sciences sociales**, l'ordre était le suivant: droit, \$9,553; pédagogie, \$9,037; sociologie et anthropologie, \$8,848; psychologie, \$8,671; commerce et affaires, \$8,663; économie et sciences politiques, \$8,587; service social, \$8,538; géographie, \$8,476; histoire, \$7,875; culture physique et hygiène, \$7,846; et sciences ménagères, \$7,735. Les hausses de la médiane sur 1962-1963 ont varié de -2.4 p. 100 en service social à 7.8 p. 100 en géographie. (Voir tableau 9.)

Les traitements médians dans les **sciences biologiques** étaient les suivants: art dentaire, \$11,618; médecine, \$11,112; agriculture, \$10,133; sciences biologiques et sciences pures (dont la botanique et la zoologie), \$9,756; pharmacie, \$8,938; soins infirmiers, \$7,136; et physiothérapie et ergothérapie, \$6,625. Les hausses de la médiane sur 1962-1963 ont varié de -3 p. 100 en soins infirmiers à 5 p. 100 en physiothérapie et ergothérapie. (Voir tableau 10.)

Dans les **sciences physiques**, le génie minier se classe en tête avec une médiane de \$10,850; suivi du génie chimique, \$9,385; de la chimie, \$9,276; de la géologie, \$9,125; de la physique, \$9,039; du génie civil, \$8,988; de l'architecture, \$8,925; du génie électrique, \$8,864; du génie mécanique, \$8,756; et des mathématiques, \$8,608. Les hausses sur 1962-1963 ont varié de 1.1 p. 100 en géologie à 5.2 p. 100 en génie minier. (Voir tableau 11.)

Certaines de ces médianes peuvent sembler trop élevées ou trop basses par rapport aux autres, mais il faut se rappeler qu'elles reflètent la répartition de la faculté selon le rang professoral dans chaque domaine. Certains domaines peuvent avoir une proportion beaucoup plus forte de professeurs de rang inférieur pour instruire un nombre toujours croissant d'étudiants. D'autres domaines, particulièrement les domaines professionnels, peuvent exiger une plus grande proportion de personnel de rang élevé mieux rémunéré.

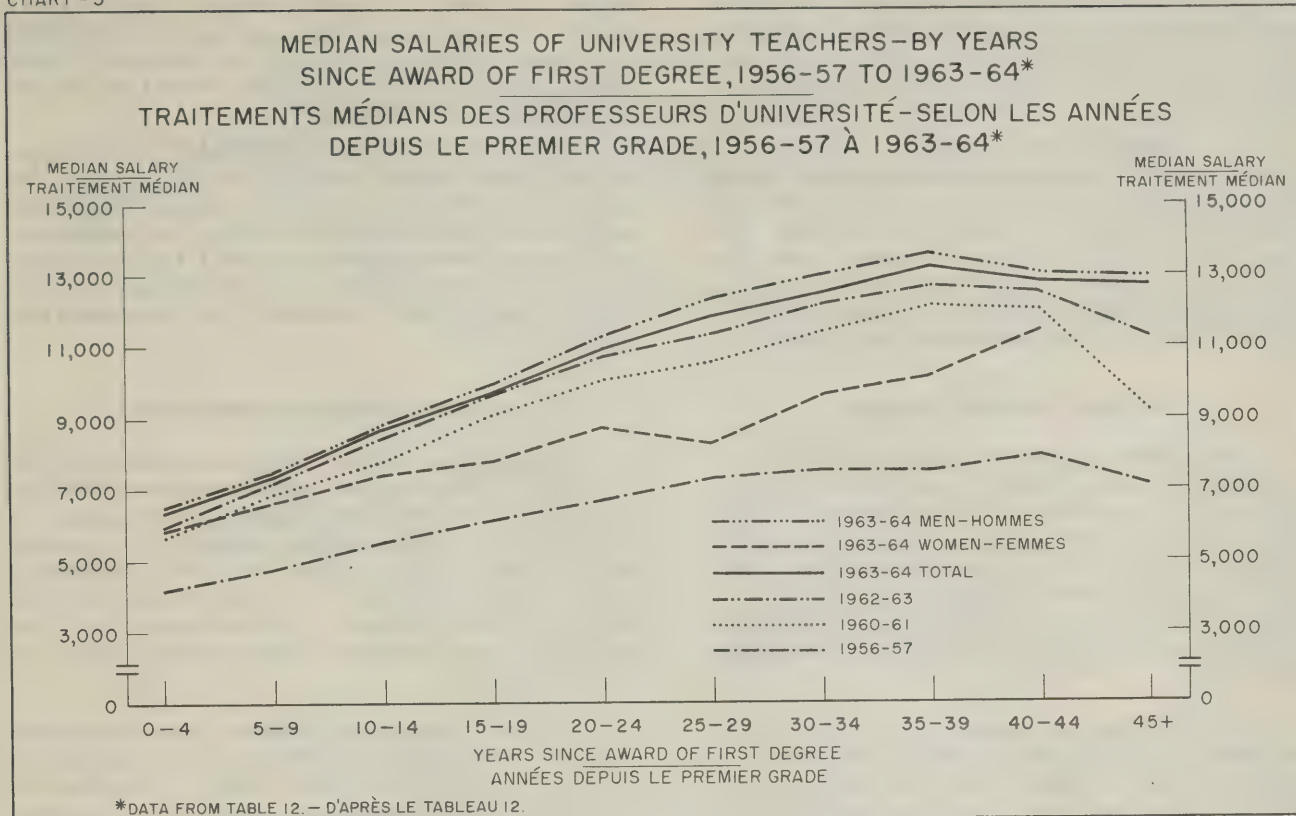

Années depuis le premier grade

A titre d'indice des années d'enseignement, les universités et collèges devaient déclarer l'année du premier grade universitaire de chaque professeur, ce qui a permis de calculer le nombre d'années depuis le premier grade. Le traitement médian de ceux qui comptaient moins de 5 ans depuis le premier grade était de \$6,357. Il augmentait ensuite avec le nombre d'années depuis le premier grade, jusqu'au groupe de 35-39 ans (\$13,213). En 1962-1963, le groupe qui avait le traitement médian le plus élevé (\$12,683) était celui des personnes qui avaient obtenu leur premier grade 35-39 ans auparavant. (Voir tableau 12 et graphique 3.)

Chez les hommes, la médiane la plus élevée en 1963-1964 était celle du groupe de 35-39 ans depuis le premier grade (\$13,583). Chez les femmes, c'était celle du groupe de 40-44 ans (\$11,500). (Voir tableau 12 graphique 3.)

CHART - 3

GRAPHIQUE - 3

Although the number of those engaged primarily in faculty administration who had received their first degrees less than 20 years previously rose from 19 out of a total of 173 in 1962-63 to 32 out of 210 in 1963-64, the proportion remained small. Median salaries ranged from \$14,750 for those 20-24 years beyond that date to \$16,500 for those 40-44 years beyond. In the humanities, median salaries ranged from \$6,203 for those less than 5 years beyond the first degree to \$12,444 for those 35-39 years beyond. Comparable figures for the social sciences were \$6,333 and \$12,900 (40-44 years); for the biological sciences \$6,532 and \$13,875 (35-39 years); and for the physical sciences \$6,536 and \$13,125 (40-44 years). Medians for women were in all cases lower than those for men. (See Table 12.)

In the Atlantic Provinces the median salary for those less than 5 years beyond the first degree was \$6,035 and the highest median, \$10,667, was for those 35-39 years beyond that award. In Quebec the range was from \$6,434 to \$13,389 (in the 35-39 years group); in Ontario \$6,414 to \$13,767 (35-39 years group); and the Western Provinces \$6,398 to \$12,917 (in the 40-44 years group). (See Table 13.)

Comparison by size of institution reveals that in universities with enrolment over 5,000 the range of median salaries was from \$6,516 for those less than 5 years beyond the first degree to \$13,781 for those 35-39 years beyond. The range for institutions with 2,000-4,999 students was from \$6,277 to \$12,929 (35-39 years group);

Bien que le nombre des administrateurs de facultés qui aient obtenu leur premier grade moins de 20 ans auparavant ait augmenté de 19 sur un total de 173 en 1962-1963 à 32 sur 210 en 1963-1964, la proportion est restée négligeable. Les traitements médians variaient de \$14,750 pour ceux de 20-24 ans à \$16,500 pour le groupe de 40-44 ans. Dans les humanités, ils variaient de \$6,203 pour le groupe de moins de 5 ans depuis le premier grade à \$12,444 pour ceux de 35-39 ans. Voici les chiffres comparables des autres facultés: sciences sociales, \$6,333 et \$12,900 (40-44 ans); sciences biologiques, \$6,532 et \$13,875 (35-39 ans); et sciences physiques \$6,536 et \$13,125 (40-44 ans). Dans tous les cas, les médianes des femmes étaient inférieures à celles des hommes. (Voir tableau 12.)

Dans les provinces Atlantiques, les traitements médians des professeurs de moins de 5 ans depuis le premier grade étaient de \$6,035 et la plus haute médiane, de \$10,667 pour ceux de 35-39 ans depuis ce grade. Au Québec, l'écart était de \$6,434 à \$13,389 (pour le groupe de 35-39 ans); en Ontario, il était de \$6,414 à \$13,767 (35-39 ans); et dans les provinces de l'Ouest, de \$6,398 à \$12,917 (40-44 ans). (Voir tableau 13.)

La comparaison selon l'importance de l'institution révèle que, dans celles de 5,000 étudiants et plus, l'écart du traitement médian allait de \$6,516 pour les professeurs de moins de 5 ans depuis le premier grade à \$13,781 pour ceux de 35-39 ans. Dans les institutions de 2,000 à 4,999 étudiants, l'écart était de \$6,277 à \$12,929 (35-39 ans); dans

for those with 1,000-1,999 students, \$6,220 to \$11,000 (35-39 years group); 500-999 students \$6,194 to \$13,500 (40-44 years group); and under 500 students \$6,185 to \$9,000 (35-39 years group). (See Table 14.)

In institutions under state (provincial or federal) control median salaries ranged from \$6,433 for teachers less than 5 years beyond the first degree to \$13,567 (35-39 years beyond). For church-related institutions the range was from \$5,981 to \$13,000 (45 and more years beyond), and for independent institutions it was from \$6,522 to \$13,028 (35-39 years beyond). (See Table 15.)

Highest University Degree

The median salary of teachers with a Ph.D. or equivalent degree (\$9,827) was higher than the median for those with a first professional degree beyond the first baccalaureate (e.g. usually such degrees as M.D., D.D.S., D.V.M., B.L.S., B.Ed., B.S.W.)—\$9,352, and it in turn was higher than that for those with a master's degree (\$7,964) and a first baccalaureate (\$7,669). (See Table 16 and Chart 1).

Another form of salary comparison among professions is to relate salaries to the number of years that have elapsed since the award of the highest earned university degree. For those with a doctorate, the range was from \$8,047 for the 0-4 years group to \$13,962 for those 35-39 years beyond the Ph.D. or equivalent degree. Ranges for other degrees were: masters—\$6,815 (0-4) to \$12,750 (35-39); first professional degree beyond the first baccalaureate—\$6,610 (0-4) to \$14,333 (35-39); and first baccalaureate—\$6,214 (0-4) to \$12,000 (40-44). (See Table 16A and Chart 4.)

The median salary for men with a Ph.D. degree was \$9,899, and that for women was \$8,500. For those with a master's degree the medians were \$8,076 for men and \$7,457 for women. Medians were higher for men than for women in each of the other degree groups. (See Tables 16A and 17.)

Age (Tables 18-23)

The median age for staff in various categories has not changed appreciably since the survey for 1956-57. The fact that the median has not gone up, as would normally be the case if there were few additions to staff, implies that a large number of young teachers are being added to the staff complement. This is borne out by an examination of data for recent years.

The median age of the 9,125 lay and religious teachers in the 68 universities and colleges reporting was 39 years. (In 1962-63 it was 39 years). Of those for whom data on age were given, 2.0 p.c. were under 25 (1.9 p.c. in 1962-63) and 1.6 p.c. were at age 65 or over (1.7 p.c. in 1962-63). Those 55 years and over, most of whom might be expected to retire within 10 years, equalled 10.9 p.c. (11.7

celles de 1,000 à 1,999 étudiants, de \$6,220 à \$11,000 (35-39 ans); dans celles de 500 à 599 étudiants, de \$6,194 à \$13,500 (40-44 ans); et dans celles de moins de 500 étudiants, de \$6,185 à \$9,000 (35-39 ans). (Voir tableau 14.)

Dans les institutions provinciales ou fédérales, le traitement médian variait de \$6,433 pour les professeurs de moins de 5 ans depuis le premier grade à \$13,567 (35-39 ans). Dans les institutions religieuses, l'écart allait de \$5,981 à \$13,000 (45 ans et plus au-delà) et dans les institutions indépendantes, de \$6,522 à \$13,028 (35-39 ans). (Voir tableau 15.)

Le plus haut grade universitaire

Le traitement médian des professeurs qui détenaient un Ph.D. ou un grade équivalent (\$9,827) dépassait celui des professeurs qui détenaient un premier grade professionnel supérieur au premier baccalauréat (D.M., D.D.S., D.V.M., B.Biblio., B.Péd., B.S.S.) (\$9,352). Ce dernier dépassait celui des professeurs détenant une maîtrise (\$7,964) et un premier baccalauréat (\$7,669). (Voir tableau 16 et graphique 1.)

Une autre façon de comparer les traitements parmi les professions est de relier les traitements au nombre d'années écoulées depuis l'obtention du plus haut grade universitaire. Pour ceux qui avaient un doctorat, l'écart allait de \$8,047 pour le groupe de 0-4 ans à \$13,962 pour celui des 35-39 ans après l'obtention du doctorat ou d'un grade équivalent. Voici les écarts des autres grades: maîtrise, \$6,815 (0-4) à \$12,750 (35-39); premier grade professionnel après le premier baccalauréat, \$6,610 (0-4) à \$14,333 (35-39); et premier baccalauréat, \$6,214 (0-4) à \$12,000 (40-44). (Voir tableau 16A et graphique 4.)

Le traitement médian des professeurs détenant un Ph.D. a été de \$9,899 chez les hommes et de \$8,500 chez les femmes. Pour ceux qui avaient une maîtrise, les médianes ont été de \$8,076 et de \$7,457. Les médianes pour les hommes étaient plus élevées que celles des femmes dans chacun des autres groupes de grade. (Voir tableaux 16A et 17.)

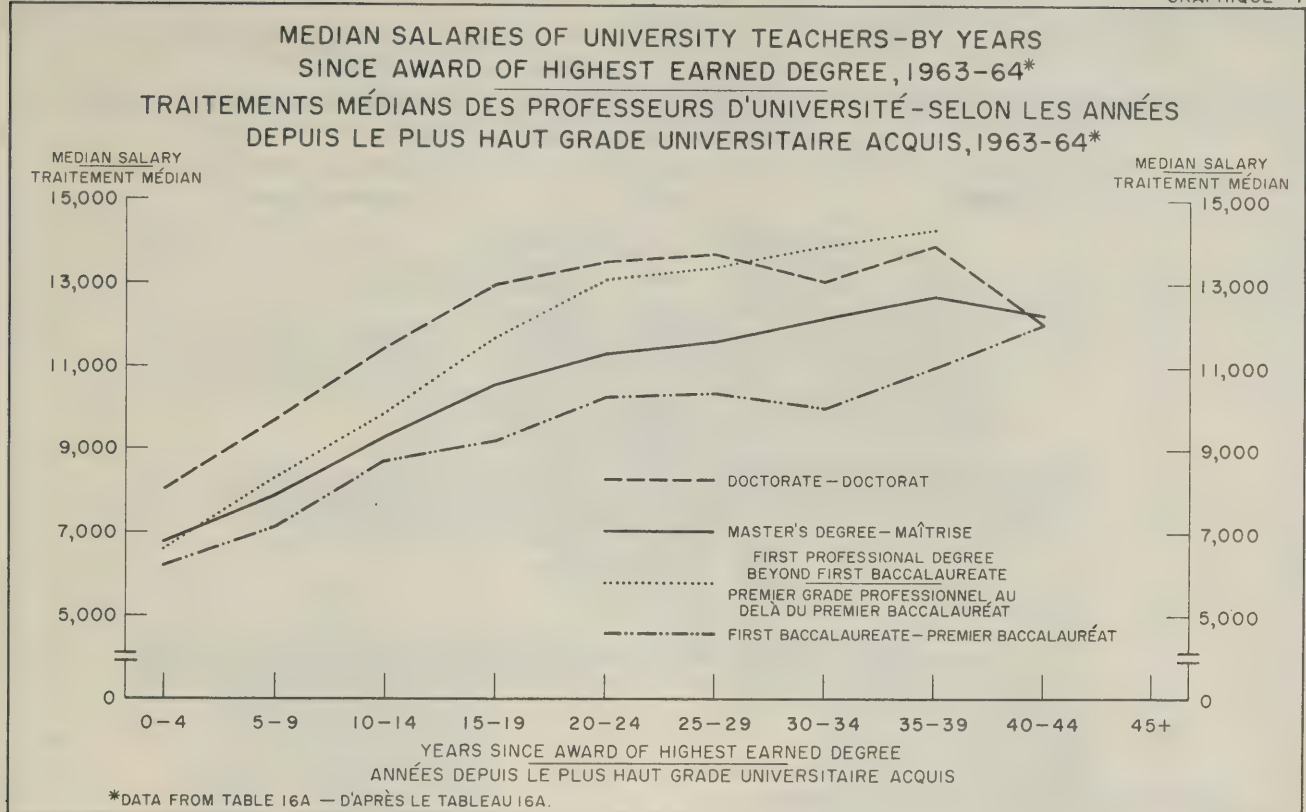

Âge (tableaux 18-23)

L'âge médian du personnel des diverses catégories n'a guère changé depuis le rapport de 1956-1957. La médiane n'ayant pas monté, comme il serait normal si peu de professeurs s'ajoutaient au personnel, il s'ensuit que le professorat s'enrichit d'un grand nombre de jeunes professeurs. C'est ce que révèle l'examen des données des récentes années.

L'âge médian des 9,125 professeurs laïcs et religieux des 68 universités et collèges observés était de 39 ans (comme en 1962-1963). Parmi ceux dont les données sur l'âge sont connues, 2 p. 100 avaient moins de 25 ans (1.9 p. 100 en 1962-1963) et 1.6 p. 100 avaient 65 ans et plus (1.7 p. 100 en 1962-1963). Ceux de 55 ans et plus, dont la plupart prendront sans doute leur retraite d'ici 10 ans, repré-

CHART - 4

GRAPHIQUE - 4

p.c. in 1962-63). Those engaged in faculty administration (almost all of them deans) had a median age of 51 years; in the humanities, 39; in the social sciences, 38; in the biological sciences, 41; and in the physical sciences, 37 years. (See Table 18.)

The median age of teachers with a doctorate was 40 years; a master's degree, 37 years; a first professional degree beyond a first baccalaureate, 39 years; a first baccalaureate, 37 years; and no university degree 44 years. (See Table 19.)

Comparison of the age distributions of those teaching various subjects reveals that the median age of teachers of fine arts, classics, theology, education, household science, social work, dentistry, medicine, nursing, physiotherapy and occupational therapy, architecture and mining engineering was 3 or more years above the median age for all teachers; while it was 3 or more years below for teachers of geography, commerce and business administration, law, physical and health education, physics, and chemical and electrical engineering. (See Tables 20-23.)

Years since Award of First Degree (Table 24)

For the 8,807 teachers in all 68 institutions the median passage of time since award of the first degree was 14 years (compared with 14 years in 1962-63). For deans (1962-63 medians in parenthesis) it was 28 (29), for professors 26 (27), associate professors 17 (17), assistant professors 11 (11), ungraded professors 15 (13), and lecturers and instructors 7 (7).

sentaient 10.9 p. 100 (11.7 p. 100 en 1962-1963). L'âge médian des administrateurs de facultés (la plupart doyens) était de 51 ans; dans les humanités, de 39 ans; dans les sciences sociales, de 38 ans; dans les sciences biologiques, de 41 ans; et dans les sciences physiques, de 37 ans. (Voir tableau 18.)

L'âge moyen des professeurs détenant un doctorat était de 40 ans; une maîtrise, 37 ans; un premier grade professionnel au-delà du premier baccalauréat, 39 ans; un premier baccalauréat, 37 ans; et aucun grade universitaire, 44 ans. (Voir tableau 19.)

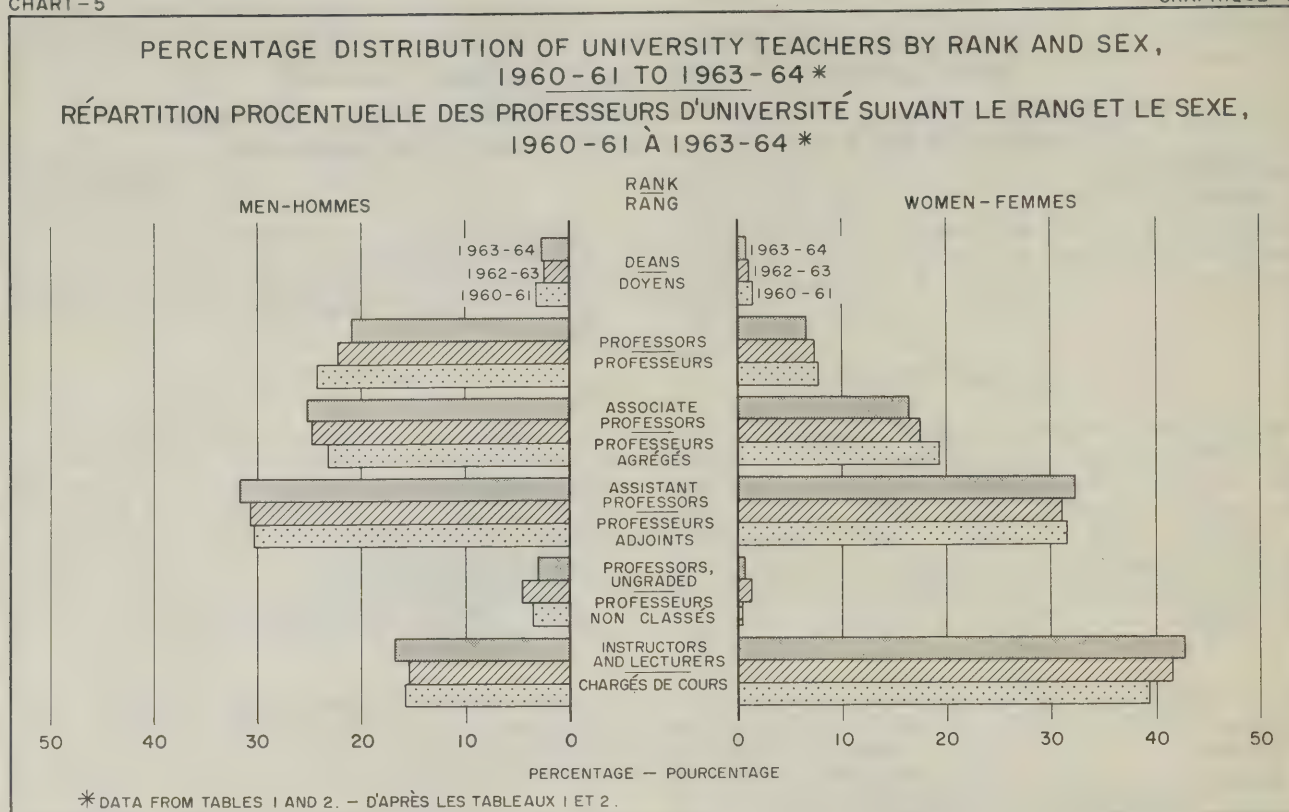

La comparaison de l'âge des professeurs selon les matières enseignées révèle que l'âge médian des professeurs de beaux-arts, de classiques, de théologie, de pédagogie, de sciences ménagères, de service social, d'art dentaire, de médecine, de soins infirmiers, de physiothérapie et d'ergothérapie, d'architecture et de génie minier était de 3 ans ou plus au-dessus de l'âge médian de tous les professeurs, tandis qu'il était de 3 ans ou plus en-dessous dans le cas des professeurs de géographie, de commerce et des affaires, de droit, de culture physique et d'hygiène, de physique, et de génie chimique et électrique. (Voir tableaux 20-23.)

Années depuis le premier grade (tableau 24)

Pour les 8,807 professeurs des 68 institutions, le nombre médian d'années depuis le premier grade était de 14 ans (comme en 1962-1963); pour les doyens, il était de 28 (29); pour les professeurs titulaires, 26 (27); pour les professeurs agrégés, 17 (17); pour les professeurs adjoints, 11 (11); pour les professeurs non classés, 15 (13); et pour les chargés de cours, 7 (7).

CHART - 5

GRAPHIQUE - 5

Comparison by field shows that, on the average, those engaged in faculty administration had obtained the first university degree 28 years earlier. In the humanities the median was 14, in the social sciences 13, in the biological sciences 16, and in the physical sciences 13. (See Table 24.)

La comparaison par domaine indique que, en moyenne, les administrateurs de faculté avaient obtenu leur premier grade universitaire 28 ans auparavant. Dans les humanités, la médiane était de 14; dans les sciences sociales, 13; dans les sciences biologiques, 16; et dans les sciences physiques, 13. (Voir tableau 24.)

Distribution of University Teachers by Rank, Sex and Field

Rank

Of the 8,662 teachers (excluding deans and ungraded professors) reported in the four main teaching categories, 20 p.c. were "full" professors, 25 p.c. associate professors, 34 p.c. assistant professors, and 21 p.c. instructors and lecturers. The percentages in 1962-63 were 22, 26, 33, and 19. (See Table 18.)

Degree

By highest earned university degree, 8,937 teachers (excluding 188 for whom no information was reported) were distributed as follows: doctorate 44.4 p.c., master's degree 34.6 p.c., first professional degree beyond the first baccalaureate 6.7 p.c., baccalaureate 12.8 p.c., and no university degree 1.5 p.c. In 1962-63 the percentages were 44.7, 33.1, 7.1, 13.6 and 1.5. (See Table 19 and Chart 6.)

Répartition des professeurs selon le rang, le grade, le sexe et le domaine

Rang professoral

Sur les 8,662 professeurs (à l'exclusion des doyens et des professeurs non classés) déclarés dans les quatre rangs principaux, 20 p. 100 étaient titulaires, 25 p. 100 agrégés, 34 p. 100 adjoints et 21 p. 100 chargés de cours. Les pourcentages en 1962-1963 étaient de 22, 26, 33 et 19. (Voir tableau 18.)

Grade

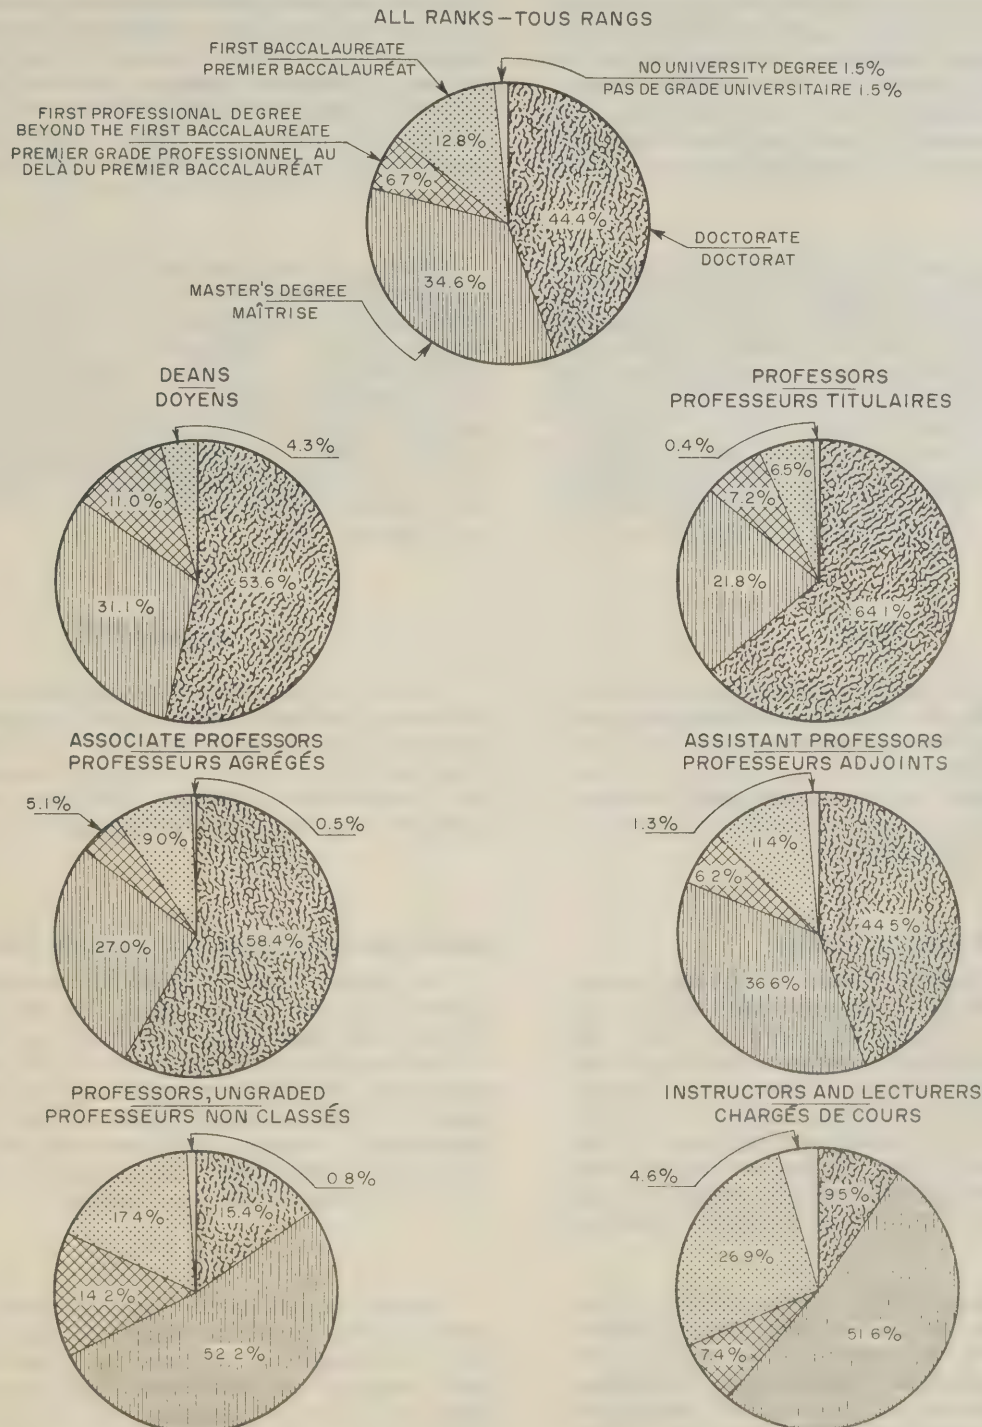

Voici la répartition procentuelle des 8,937 professeurs (à l'exclusion de 188 pour lesquels aucun renseignement n'a été reçu) selon le plus haut grade universitaire: doctorat, 44.4 maîtrise, 34.6, premier grade professionnel au-delà du premier baccalauréat, 6.7, baccalauréat, 12.8, et aucun grade universitaire, 1.5. En 1962-1963, les pourcentages étaient 44.7, 33.1, 7.1, 13.6 et 1.5, (Voir tableau 19 et graphique 6.)

CHART-6

GRAPHIQUE-6

PERCENTAGE DISTRIBUTION OF UNIVERSITY TEACHERS
BY HIGHEST EARNED DEGREE, 1963-1964*

RÉPARTITION PROCENTUELLE DES PROFESSEURS D'UNIVERSITÉ
SUIVANT LE PLUS HAUT GRADE UNIVERSITAIRE ACQUIS, 1963-1964*

* DATA FROM TABLE 19. — D'APRÈS LE TABLEAU 19.

EXCLUDES STAFF FOR WHOM NO INFORMATION WAS REPORTED — SANS LE PERSONNEL AU SUJET DUQUEL IL N'Y A PAS EU DE RAPPORT

Sex

Of the total of 9,125 full-time teachers reported in 1963-64, men numbered 8,063 (88.4 p.c.) and women 1,062 (11.6 p.c.). In 1962-63 the percentages were 88.7 and 11.3.

Of the men, 2.5 p.c. were deans; of the women, 0.9 p.c. The proportions in the other ranks were: professor, 20.9 p.c. of the men and 6.6 p.c. of the women; associate professor, 25.1 p.c. and 16.4 p.c.; assistant professor, 31.7 p.c. and 32.4 p.c.; ungraded professors, 3 p.c. and 0.8 p.c.; and lecturer or instructor, 16.8 p.c. and 42.9 p.c. (See Tables 1 and 3, and Chart 5.)

The proportions of the 7,468 men and the 971 women paid on a basis applicable to lay personnel, holding the various university degrees (excluding 142 men and 41 women for whom no information on degrees was reported) was as follows: doctorate 47.8 p.c. of the men and 23.7 p.c. of the women; master's degree, 32.6 p.c. and 43.7 p.c.; first professional degree beyond the first baccalaureate, 6.9 p.c. and 5.5 p.c.; first baccalaureate, 11.6 p.c. and 21.7 p.c.; no university degree, 1.1 p.c. and 5.4 p.c. (See Table 17.)

Field

Division of the 9,125 teachers by field was as follows for 1963-64 (1962-63 percentages shown in parentheses): faculty administration 2.7 p.c. (2.5 p.c.), humanities 23.9 p.c. (23.5 p.c.), social sciences 27.3 p.c. (26.3 p.c.) biological sciences 18.0 p.c. (18.5 p.c.), and physical sciences 28.1 p.c. (29.2 p.c.) (See Table 18.)

Teacher-Student Ratio (Table 25)

Estimated total enrolment of full-time undergraduate and graduate students, 1963-64 in the 68 institutions on which this report is based was 132,650. If this figure is compared with that of the 9,125 teachers with ranks of instructor and lecturer or higher reported as being full-time, it would appear that for all institutions included in this survey the ratio of such teachers to students was 1:14.5 (1:14.5 in 1962-63). Region variations were between 1:12.7 in Ontario and 1:15.5 in Quebec.

As it is known that a certain number of full-time staff below the rank of instructor or lecturer were omitted in the returns made, and as the teacher-student ratio may vary in those institutions not included, estimates for the total number of full-time teachers in all Canadian institutions have not been made.

Sexe

Les 9,125 professeurs à plein temps déclarés en 1963-1964 comprenaient 8,063 (88.4 p. 100) hommes et 1,062 (11.6 p. 100) femmes. En 1962-1963, les pourcentages étaient 88.7 et 11.3.

Chez les hommes, 2.5 p. 100 étaient doyens, et chez les femmes, 0.9 p. 100. Les proportions des autres rangs étaient les suivantes: professeurs titulaires, 20.9 p. 100 des hommes et 6.6 p. 100 des femmes; professeurs agrégés, 25.1 et 16.4 p. 100; professeurs adjoints, 31.7 et 32.4 p. 100; professeurs non classés, 3 et 0.8 p. 100 et chargés de cours, 16.8 et 42.9 p. 100 (Voir tableaux 1 et 3 et graphique 5.)

Voici les pourcentages des 7,468 hommes et 971 femmes rémunérés à l'échelle laïque, selon les divers grades universitaires (à l'exclusion de 142 hommes et de 41 femmes dont les données relatives aux grades ne sont pas disponibles): doctorat, 47.8 p. 100 des hommes et 23.7 p. 100 des femmes; maîtrise, 32.6 et 43.7 p. 100; premier grade professionnel au-delà du premier baccalauréat, 6.9 et 5.5 p. 100; premier baccalauréat, 11.6 et 21.7 p. 100; aucun grade universitaire, 1.1 et 5.4 p. 100. (Voir tableau 17.)

Domaine

Voici la répartition procentuelle des 9,125 professeurs en 1963-1964, selon le domaine: administration de faculté, 2.7 (2.5 en 1962-1963); humanités, 23.9 (23.5); sciences sociales, 27.3 (26.3); sciences biologiques, 18 (18.5); et sciences physiques, 28.1 (29.2). (Voir tableau 18.)

Rapport des professeurs aux étudiants (tableau 25)

Le nombre total d'étudiants sous-diplômes et diplômés à plein temps dans les 68 institutions observées ici était d'environ 132,650 en 1963-1964. Si l'on compare ce chiffre aux 9,125 personnes à plein temps qui ont au moins le rang de chargées de cours, il semble que pour l'ensemble des institutions observées il y avait un professeur pour 14.5 étudiants (1:14.5 en 1962-1963). La proportion variait de 1:12.7 en Ontario à 1:15.5 au Québec.

Comme on sait qu'un certain nombre de professeurs à plein temps de rang inférieur à celui de chargé de cours ont été omis dans les réponses et que le rapport des professeurs aux étudiants peut varier dans les institutions omises, on n'a pas estimé le nombre total de professeurs à plein temps dans toutes les institutions canadiennes.

Highest Earned University Degree

Of the total of 8,937 persons included in this survey for whom information on degrees was reported, 44.4 p.c. had a doctorate (44.7 p.c. in 1962-63). The percentages of doctorates held by all staff ranged from 50.3 p.c. in Ontario and 48.0 p.c. in the Western Provinces to 35.9 p.c. in Quebec and 33.0 p.c. in the Atlantic Provinces. The Western Provinces had the highest percentage of deans and full professors with doctorates (61.1 p.c. and 68.6 p.c. respectively) while Ontario had the highest percentage of associate professors and assistant professors with a PH.D. or equivalent degree (67.7 p.c. and 51.1 p.c.). Among lecturers and instructors, the highest percentage of doctorates was in Quebec (12.2 p.c.). (See Table 26.)

About one-third of the staff reported with doctorates (30.4 p.c.) or master's degrees (35.5 p.c.) earned them in the five-year period from 1959-1963. Although the majority of these persons were new additions to the teaching staff during the five years, others included in this group were older teachers who completed advanced degree requirements either while on leave or in addition to their teaching duties. (See Table 16A.)

Plus haut grade universitaire obtenu

Sur les 8,937 professeurs observés, 44.4 p. 100 avaient un doctorat (44.7 p. 100 en 1962-1963). Les pourcentages de doctorats détenus par tout le personnel variaient de 50.3 en Ontario et 48 dans les provinces de l'Ouest à 35.9 p. 100 au Québec et 33 dans les provinces Atlantiques. Les provinces de l'Ouest avaient le plus fort pourcentage de doctorats chez les doyens et les professeurs titulaires (61.1 et 68.6 p. 100 respectivement) et l'Ontario avait le plus haut pourcentage de doctorats chez les professeurs agrégés et les professeurs adjoints (67.7 et 51.1 p. 100). Le plus haut pourcentage de doctorats chez les chargés de cours (12.2) a été marqué au Québec. (Voir tableau 26.)

Environ le tiers du personnel ayant un doctorat (30.4 p. 100) ou une maîtrise (35.5 p. 100) les ont obtenus au cours des cinq ans de 1959 à 1963. Bien que la majorité d'entre eux fussent de nouvelles recrues à l'enseignement durant les cinq années, les autres comprenaient des professeurs plus âgés qui ont répondu aux exigences en vue d'un grade supérieur soit à la faveur d'un congé ou pendant qu'ils enseignaient. (Voir tableau 16A.)

Notes follow this table.

Les notes sont données après ce tableau.

NOTES RELATED TO TABLES

- ¹ Including lay teachers, and religious teachers paid on the same scale as lay teachers.
- ² Data included for 66 institutions—all of the following 68 except Collège de l'Immaculée-Conception and Collège de Lévis, the two employing religious teachers only:

Atlantic Provinces

Memorial University of Newfoundland, St. John's
 St. Dunstan's University, Charlottetown
 Nova Scotia Technical College, Halifax
 Dalhousie University, Halifax
 University of King's College, Halifax
 Mount Saint Vincent College, Halifax
 Acadia University, Wolfville
 St. Francis Xavier University, Antigonish
 St. Mary's University, Halifax
 Université de Moncton, Moncton
 Mount Allison University, Sackville
 St. Thomas' University, Chatham
 University of New Brunswick, Fredericton
 Collège de Bathurst, Bathurst

Quebec

Séminaire de Rimouski, Rimouski
 Séminaire de Chicoutimi, Chicoutimi
 Collège de Lévis, Lévis
 Université Laval, Québec
 Séminaire de Québec, Québec
 Externat Classique St-Jean-Eudes, Québec
 Bishop's University, Lennoxville
 Université de Sherbrooke, Sherbrooke
 Université de Montréal, Montréal
 École Polytechnique, Montréal
 Collège Jean-de-Brébeuf, Montréal
 Collège de l'Immaculée-Conception, Montréal
 Collège Sainte-Marie, Montréal
 Faculté de Commerce (Laval), Québec
 Collège St-Paul, Montréal
 McGill University, Montréal
 Sir George Williams University, Montréal
 Collège Stanislas, Outremont
 Collège de Rouyn, Rouyn
 École des sciences domestiques (U. Laval), Québec
 Séminaire St-Joseph, Mont-Laurier
 Loyola College, Montréal
 Marianopolis College, Montréal

Ontario

Université d'Ottawa, Ottawa
 St. Patrick's College, Ottawa
 Carleton University, Ottawa
 Queen's University at Kingston, Kingston
 Royal Military College, Kingston
 University of Toronto, Toronto
 Victoria University, Toronto
 Trinity College, Toronto
 St. Michael's College, Toronto
 Osgoode Hall Law School, Toronto
 McMaster University, Hamilton
 McMaster Divinity College, Hamilton
 Federated Colleges, Guelph (Ontario Agricultural College, Ontario Veterinary College, and Macdonald Institute)
 University of Western Ontario, London
 University of Windsor, Windsor
 York University, Toronto
 Ontario College of Education, Toronto
 Laurentian University of Sudbury, Sudbury
 University of Waterloo, Waterloo
 Waterloo Lutheran University, Waterloo
 Lakehead College of Arts, Science and Technology, Port Arthur

NOTES CONCERNANT LES TABLEAUX

- ¹ Sont compris les professeurs laïcs et les professeurs religieux rémunérés à l'égal des laïcs.
- ² Chiffres portant sur 66 institutions, à savoir toutes les 68 institutions suivantes (sauf deux: Collège de l'Immaculée-Conception et Collège de Lévis, qui n'emploient que des professeurs religieux):

Provinces de l'Atlantique

Memorial University of Newfoundland, St. John's
 St. Dunstan's University, Charlottetown
 Nova Scotia Technical College, Halifax
 Dalhousie University, Halifax
 University of King's College, Halifax
 Mount Saint Vincent College, Halifax
 Acadia University, Wolfville
 St. Francis Xavier University, Antigonish
 St. Mary's University, Halifax
 Université de Moncton, Moncton
 Mount Allison University, Sackville
 St. Thomas' University, Chatham
 University of New Brunswick, Fredericton
 Collège de Bathurst, Bathurst

Québec

Séminaire de Rimouski, Rimouski
 Séminaire de Chicoutimi, Chicoutimi
 Collège de Lévis, Lévis
 Université Laval, Québec
 Séminaire de Québec, Québec
 Externat Classique St-Jean-Eudes, Québec
 Bishop's University, Lennoxville
 Université de Sherbrooke, Sherbrooke
 Université de Montréal, Montréal
 École Polytechnique, Montréal
 Collège Jean-de-Brébeuf, Montréal
 Collège de l'Immaculée-Conception, Montréal
 Collège Sainte-Marie, Montréal
 Faculté de Commerce (Laval), Québec
 Collège St-Paul, Montréal
 McGill University, Montréal
 Sir George Williams University, Montréal
 Collège Stanislas, Outremont
 Collège de Rouyn, Rouyn

³ Excluding associate deans, assistant deans, directors of schools and institutes. Including some principals of constituent colleges.

⁴ Including (when holding the rank of professor) associate deans, assistant deans, directors of schools and institutes.

⁵ In some small colleges the ranks of associate professor and assistant professor are not used; all above the rank of lecturer or instructor are classed as professors.

⁶ The median salary was not calculated if the number of persons in any distribution was less than 10, or unless there were more than 2 institutions in a distribution. As a result, per cent increases for such distributions could not be calculated. Quartiles were not calculated unless the number of persons in any distribution was 30 or more.

⁷ Including all deans, and others concerned primarily with faculty administration.

⁸ Excluding deans, and others concerned primarily with faculty administration.

⁹ Institutions included: **West**—British Columbia, Alberta, Saskatchewan, Manitoba; **Central**—Western Ontario, McMaster, Toronto, Victoria, Trinity, Queen's, McGill, Bishop's; **Maritimes**—New Brunswick, Mount Allison, St. Francis Xavier, Acadia, Dalhousie. Part-time teachers and religious teachers paid on a scale less than that applying to lay staff have been excluded.

¹⁰ Includes 13 ungraded professors not included elsewhere (1 in the Maritimes, 10 in Central Canada, and 2 in the West).

¹¹ Excluding religious teachers paid on the same scale as lay teachers. Data included for 28 institutions.

¹² For those receiving some allowance, i.e. excluding those reported as receiving no allowance.

¹³ This footnote has been deleted in this edition.

¹⁴ Including letters, social science, Islamic studies, mediaeval studies.

¹⁵ Including faculties teaching both pure and applied science.

¹⁶ In cases where there were 1 or 2 in one group, detail of the distribution is not shown.

¹⁷ Including psychology and education combined, and child study.

¹⁸ Including medical research, medical technology.

¹⁹ Including canon law.

²⁰ Including faculties or schools of fine and applied arts, forestry, hygiene and public health, journalism, library science, philosophy, secretarial science, veterinary science and graduate studies.

²¹ History and appreciation—including art, archaeology, architecture, drama, music.

²² Including Greek, Latin, mediaeval literature, oriental languages.

²³ Including Russian, Spanish, Italian, Portuguese, Icelandic, such combinations as modern languages, romance languages, Slavic languages, and also letters and linguistics.

³ Ne sont pas compris les vice-doyens, les directeurs d'écoles et d'instituts. Sont compris quelques directeurs de collèges constituants.

⁴ Sont compris (s'ils ont le rang de professeur titulaire) les vice-doyens, les directeurs d'écoles et d'instituts.

⁵ Dans quelques petits collèges, le rang de professeur agrégé et celui de professeur adjoint n'existent pas; tous sont classés professeurs s'ils ne sont pas simplement chargés de cours.

⁶ Le traitement médian n'a pas été calculé lorsqu'une série comprenait moins de 10 personnes ou à moins qu'elle ne comptât plus de 2 institutions. Il en résulte que les augmentations procentuelles relatives à ces répartitions n'ont pu être calculées. Les quartiles ne sont pas calculés là où, dans une répartition le nombre de personnes est de 30 ou plus.

⁷ Sont compris tous les doyens et les autres personnes s'occupant avant tout de l'administration de la faculté.

⁸ Ne sont pas compris les doyens ni les autres personnes s'occupant avant tout de l'administration de la faculté.

⁹ Voici les institutions intéressées: **Ouest**—British Columbia, Alberta, Saskatchewan, Manitoba; **Centre**—Western Ontario, McMaster, Toronto, Victoria, Trinity, Queen's, McGill, Bishop's; **Maritimes**—New Brunswick, Mount Allison, St. Francis Xavier, Acadia, Dalhousie. On a exclu les professeurs à temps partiel et les professeurs religieux dont l'échelle de traitements était inférieure à celle du personnel laïc.

¹⁰ Comprend 13 professeurs non classés, non inclus ailleurs (1 dans les Maritimes, 10 dans le centre du Canada et 2 dans l'Ouest).

¹¹ Ne sont pas compris les professeurs religieux rémunérés à l'égal des laïcs. Chiffres portant sur 28 institutions.

¹² Pour ceux qui reçoivent une allocation c.-à-d. sans ceux déclarés comme ne recevant aucune allocation.

¹³ Ce renvoi a été supprimé de la présente édition.

¹⁴ Y compris lettres, sciences sociales, études islamiques, études médiévales.

¹⁵ Y compris les facultés de sciences pures et appliquées.

¹⁶ La ventilation n'est pas faite quant le groupe ne comprend qu'un ou deux professeurs.

¹⁷ Y compris la psychologie et la pédagogie réunies, et la psychologie de l'enfant.

¹⁸ Y compris recherche médicale, technologie médicale.

¹⁹ Y compris droit canonique.

²⁰ Y compris les facultés et les écoles de beaux-arts et d'arts appliqués, de sylviculture, d'hygiène et de santé publique, de journalisme, de bibliothéconomie, de philosophie, de science secrétariale, de science vétérinaire et d'études supérieures.

²¹ Histoire et appréciation—y compris art, archéologie, architecture, théâtre, musique.

²² Y compris le grec, le latin, la littérature médiévale et les langues orientales.

²³ Y compris le russe, l'espagnol, l'italien, le portugais, l'islandais, les groupements tels que les langues modernes, les langues romanes, les langues slaves, les lettres et la linguistique.

- ²⁴ Including ethics, logic, natural theology.
- ²⁵ Including East Asiatic studies, Islamic studies, Slavic studies, religion, Asian studies, Celtic studies, Near Eastern studies.
- ²⁶ Including drama, elocution.
- ²⁷ Including journalism, library science.
- ²⁸ Economics and political science combined.
- ²⁹ Including accounting, industrial relations.
- ³⁰ Including child study.
- ³¹ Including dietetics.
- ³² Including secretarial science, public administration.
- ³³ Including anatomy, histology, embryology, entomology, palaeontology, physiology.
- ³⁴ Including botany and zoology combined as biology, and also genetics, natural history.
- ³⁵ Including medical technology.
- ³⁶ Including rehabilitation.
- ³⁷ Including forestry, hygiene and public health, veterinary science, optometry.
- ³⁸ Including biochemistry.
- ³⁹ Including mineralogy.
- ⁴⁰ Including astronomy, geodesy, statistics.
- ⁴¹ Including biophysics, geophysics, mathematical physics.
- ⁴² Including town planning.
- ⁴³ Including agricultural engineering, architectural engineering, forest engineering, structural engineering.
- ⁴⁴ Including geological engineering, metallurgical engineering, petroleum engineering.
- ⁴⁵ Including aerophysics, applied mathematics, applied physics.
- ⁴⁶ Comparable data for 1956-57 not available.
- ⁴⁷ Excluding M.D., D.D.S., D.V.M.
- ⁴⁸ Including licence.
- ⁴⁹ Including M.D., D.D.S., D.V.M. and second baccalaureate.
- ⁵⁰ Including first professional degree if it is the first baccalaureate.
- ⁵¹ Including both lay and religious teachers.
- ⁵² Data included for all 68 institutions listed in Note 2.
- ⁵³ Excludes staff with no degree and staff for whom no information was reported and hence totals do not equal those in Table 18.
- ⁵⁴ Excludes staff for whom no information was reported.
- ⁵⁵ Excludes staff with no degree.
- ⁵⁶ Estimated, for institutions included in this survey, on basis of returns made as of December 1 for university grant purposes together with enrolments reported in the salary survey.
- ²⁴ Y compris morale, logique, théologie naturelle.
- ²⁵ Y compris études oriento-asiatiques, études islamiques, études slaves, religion, études asiatiques, études celtiques, études du Proche-Orient.
- ²⁶ Y compris théâtre, élocution.
- ²⁷ Y compris journalisme, bibliothéconomie.
- ²⁸ Sciences économiques et science politique réunies.
- ²⁹ Y compris comptabilité, relations industrielles.
- ³⁰ Y compris psychologie de l'enfant.
- ³¹ Y compris diététique.
- ³² Y compris science secrétariale, administration publique.
- ³³ Y compris anatomie, histologie, embryologie, entomologie, paléontologie, physiologie.
- ³⁴ Y compris botanique et zoologie réunies sous biologie, et aussi génétique et histoire naturelle.
- ³⁵ Y compris technologie médicale.
- ³⁶ Y compris réhabilitation.
- ³⁷ Y compris sylviculture, hygiène et santé publique, science vétérinaire, optométrie.
- ³⁸ Y compris biochimie.
- ³⁹ Y compris minéralogie.
- ⁴⁰ Y compris astronomie, géodésie, statistique.
- ⁴¹ Y compris biophysique, géophysique, physique mathématique.
- ⁴² Y compris urbanisme.
- ⁴³ Y compris génie agricole, génie architectural, génie forestier, génie des charpentes.
- ⁴⁴ Y compris génie géologique, génie métallurgique, génie pétrolier.
- ⁴⁵ Y compris aérophysique, mathématiques appliquées, physique appliquée.
- ⁴⁶ Données comparables pour 1956-1957 non disponibles.
- ⁴⁷ Non compris M.D., D.D.S., D.M.V.
- ⁴⁸ Y compris licence.
- ⁴⁹ Y compris M.D., D.D.S., D.M.V. et second baccalauréat.
- ⁵⁰ Y compris premier grade professionnel s'il s'agit du premier baccalauréat.
- ⁵¹ Y compris les professeurs laïcs et religieux.
- ⁵² Données portant sur les 68 institutions énumérées à la note 2.
- ⁵³ Ne comprend pas les professeurs sans grade, ni le personnel au sujet duquel il n'y a pas eu de rapport; c'est pourquoi les totaux ne correspondent pas à ceux du tableau 18.
- ⁵⁴ Sans le personnel au sujet duquel il n'y a pas eu de rapport.
- ⁵⁵ A l'exclusion du personnel sans grade.
- ⁵⁶ Estimation portant sur les institutions étudiées dans le présent rapport et fondée sur les déclarations du 1er décembre pour la subvention universitaire, ainsi que sur les inscriptions déclarées au cours de l'enquête sur les traitements.

SALARIES AND QUALIFICATIONS OF TEACHERS IN UNIVERSITIES AND COLLEGES

TRAITEMENTS ET QUALIFICATION DES PROFESSEURS DES UNIVERSITÉS ET COLLÈGES 1964-65

INTRODUCTION

As mentioned in the preface to the 1963-64 edition of this publication, DBS is now issuing a detailed report on salaries and qualifications of university teachers every two years so that it may be undertaken in conjunction with the university salary survey conducted biennially by the Pay Research Bureau of the Civil Service Commission. A detailed report was published by DBS for 1963-64; the next is planned for 1965-66. The present 1964-65 report gives limited data on salaries at the 17 institutions¹ which DBS has surveyed since 1937-38.

Persons interested in salary trends since 1937-38 should consult the DBS publication "University Teachers' Salaries, 1937-1960" for more detail of salary distributions for those years. Details of salary distributions at the 17 institutions for the years after 1959-60 appear in appropriate tables of the annual "Salaries and Qualifications of Teachers in Universities and Colleges". Tables 4 and 5 in the present publication repeat historical data on median salaries and staff numbers that were included in the above-noted publications, while Charts 1 and 2 present these data in graphic form.

Review of 1964-65 Data

Salaries

Median salaries for all academic ranks at the 17 institutions showed higher percentage increases from 1963-64 to 1964-65 than for the two years previous to 1963-64, as shown in Table 1. The 1964-65 median for deans was \$17,361 (up 7.7 per cent over 1963-64), for full professors \$14,163 (5.2 per cent), for associate professors \$10,634 (5.2 per cent), for assistant professors \$8,390 (4.8 per cent), and for instructors and lecturers \$6,747 (5.1 per cent). For all full-time teaching staff at the 17 institutions, including a small group of ungraded professors, the 1964-65 median was \$9,668, up 6.2 per cent over the figure of \$9,103 for 1963-64, 8.7 per cent over the 1962-63 median of \$8,894, and 11.8 per cent over the median of \$8,646 for 1961-62.

¹ Institutions included:

Atlantic Provinces:

Acadia, Dalhousie, St. Francis Xavier,
Mount Allison, New Brunswick;

Central Canada:

Bishop's, McGill, Queen's, Toronto, Trinity,
Victoria, McMaster, Western Ontario;

Western Provinces:

Manitoba, Saskatchewan, Alberta, British
Columbia.

Comme l'indique la préface de l'édition de 1963-64 de la présente publication, le B.F.S. publie tous les deux ans un rapport détaillé sur les traitements et la qualification des professeurs d'université; la rédaction de ce rapport peut ainsi se faire en même temps que l'enquête sur les traitements universitaires qui est faite tous les deux ans par le Bureau d'étude des traitements de la Commission du service civil. Le B.F.S. a publié un rapport détaillé pour 1963-64 et il en publiera un autre pour 1965-66. Le présent rapport (1964-65) fournit certains chiffres au sujet des traitements dans les 17 institutions¹ que le B.F.S. a observées depuis 1937-38.

Les personnes intéressées à la courbe des traitements depuis 1937-38 voudront bien consulter la publication du B.F.S. intitulée "Traitements des professeurs d'université, 1937-1960" afin d'obtenir plus de détails sur la répartition des traitements durant ces années. Les détails relatifs à la répartition des traitements dans les 17 institutions pour les années postérieures à 1959-60 paraissent dans les tableaux appropriés du rapport annuel intitulé "Traitements et qualification des professeurs des universités et collèges". Les tableaux 4 et 5 de la présente publication donnent de nouveau les données chronologiques concernant les traitements médians et le personnel qui ont été incluses dans les publications précitées, tandis que les graphiques 1 et 2 donnent ces données sous une forme graphique.

Revue des données de 1964-65

Traitements

Les traitements médians des professeurs à tous les échelons dans les 17 institutions ont marqué des gains procentuels plus élevés de 1963-64 à 1964-65 qu'au cours des deux années antérieures à 1963-64, comme l'indique le tableau 1. En 1964-65, la médiane des doyens était de \$17,361 (+ 7.7 p. 100 sur 1963-64), celle des professeurs titulaires, \$14,163 (5.2 p. 100), celle des professeurs agrégés, \$10,634 (5.2 p. 100), celle des professeurs adjoints, \$8,390 (4.8 p. 100), et celle des chargés de cours, \$6,747 (5.1 p. 100). Le traitement médian de tout le personnel enseignant de plein temps dans les 17 institutions, y compris un petit groupe de professeurs non classés, était de \$9,668, hausse de 6.2 p. 100 sur les \$9,103 de 1963-64, de 8.7 p. 100 sur la médiane de 1962-63 (\$8,894), et de 11.8 p. 100 sur celle de 1961-62 (\$8,646).

¹ Institutions comprises:

Provinces Atlantiques:

Acadia, Dalhousie, St. Francis Xavier,
Mount Allison, Nouveau-Brunswick;

Canada central:

Bishop's, McGill, Queen's, Toronto, Trinity,
Victoria, McMaster, Western Ontario;

Provinces de l'Ouest:

Manitoba, Saskatchewan, Alberta, Colombie-
Britannique.

The median salary for all staff included from institutions in Central Canada was \$9,959 (up 5.4 per cent from 1963-64), in the Western Provinces \$9,766 (7.9 per cent), and in the Atlantic Provinces \$8,419 (6.3 per cent). Although median salaries for the institutions in the Atlantic Provinces were still appreciably lower than those for the other two regions, they have increased at a greater rate in recent years, being up 20.4 per cent from 1961-62, as against an increase of 12.1 per cent for Central Canada and 10.0 per cent for the Western Provinces.

The 1964-65 figures were increased due mainly to at least 9 of the 17 institutions (3 in the West, 4 in Central Canada, and 2 in the Atlantic Provinces) raising the minimums of their salary scales. For 1964-65, 9 of the 17 institutions (Alberta, Manitoba, McGill, McMaster, Queen's, Saskatchewan, Toronto, Trinity, and Victoria) had floors of at least \$13,000 for full professors, \$9,500 for associate professors, and \$7,500 for assistant professors. In 1963-64, only Toronto, Trinity and Victoria had floors at these levels.

Number of Staff

Table 2 indicates the expansion in full-time teaching staff at 16 of the 17 institutions. Data for St. Francis Xavier University have not been included as, in addition to lay staff, this institution has religious staff paid on a lower scale than that applying to lay staff. Data on such religious staff are not included in this report.

The increase in full-time teaching staff for all 16 institutions considered together has kept pace with the rapid rise in their student enrolment over the past 10 years. The staff-student ratio for the 16 institutions, which was 1:14.3 in 1954-55, has remained quite constant. For 1964-65, it was 1:14.4.

There have been, however, some variations in the ratio for the three regions. While the groups of institutions included from both Central Canada and the Western Provinces have maintained a fairly constant ratio from 1959-60 to 1964-65, the ratio for Central Canada has decreased from the 1954-55 figure, while it has increased for the Western Provinces during the ten-year period. It will be noted from Table 2 that the greatest increase in enrolment has been in Western Canada, and as a result one could reasonably expect that it would be more difficult to parallel this enrolment increase with a corresponding increase in teaching staff. A somewhat similar situation is noticeable in the Atlantic Provinces where the large enrolment increase has not been quite matched by a corresponding increase in staff.

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.

Le traitement médian de tout le personnel des institutions du centre du pays atteignait \$9,959 (+5.4 p. 100 sur 1963-64), celui des institutions des provinces de l'Ouest, \$9,766 (+7.9 p. 100) et celui des institutions des provinces de l'Atlantique, \$8,419 (+6.3 p. 100). Bien que ce dernier soit bien inférieur aux deux autres, il a monté à un rythme plus rapide ces dernières années, soit de 20.4 p. 100 1961-62 au regard de gains de 12.1 p. 100 dans les institutions du Centre et de 10 p. 100 dans celles de l'Ouest.

Les traitements de 1964-65 ont augmenté surtout parce que neuf des 17 institutions (3 dans l'Ouest, 4 dans le Centre et 2 dans les provinces de l'Atlantique) ont élevé leurs traitements minimums. Dans ces neuf institutions (universités de l'Alberta, du Manitoba, de la Saskatchewan, de Toronto, McGill, McMaster, Queen's, et les collèges Trinity et Victoria) les traitements minimums débutaient à \$13,000 pour les professeurs titulaires, à \$9,500 pour les professeurs agrégés et à \$7,500 pour les professeurs adjoints. En 1963-64, seules les institutions de Toronto, Trinity et Victoria accusaient de tels minimums.

Personnel

Le tableau 2 indique l'augmentation du personnel enseignant de plein temps dans 16 des 17 universités. On n'a pas inclus les données relatives à l'Université Saint-François-Xavier, car en plus de son personnel laïc, cette institution compte un personnel religieux qui reçoit un traitement inférieur à celui du personnel laïc. Les données concernant les religieux ne paraissent donc pas dans le présent rapport.

Le personnel enseignant à plein temps, pour l'ensemble des 16 institutions, a augmenté au même rythme que les inscriptions qui se sont accrues rapidement au cours de la dernière décennie. Le rapport personnel-étudiants qui était de 1:14.3 en 1954-55 est demeuré très stable. En 1964-65, il s'est établi à 1:14.4.

Ce rapport a toutefois varié dans trois régions. De 1959-60 à 1964-65, il n'a pas beaucoup changé dans les groupes d'institutions situées dans le Canada central et dans les provinces de l'Ouest, mais il a diminué sur 1954-55 dans le Canada central et augmenté dans l'Ouest au cours de la décennie. Le tableau 2 indique que l'Ouest a accusé la plus forte avance et par conséquent, on peut avec raison s'attendre qu'il serait plus difficile à établir le même niveau d'augmentation pour les inscriptions et les professeurs. On remarque qu'une situation quelque peu semblable existe dans les provinces Atlantiques où l'augmentation du personnel ne rejoint pas encore la hausse considérable des inscriptions.

SIGNES CONVENTIONNELS

Signification des signes utilisés dans les tableaux de la présente publication:

PREFACE

This seventh in the series of detailed reports on salaries and qualifications of Canadian university teachers has again been planned in consultation with the Canadian Association of University Business Officers, the Canadian Association of University Teachers, the Association of Universities and Colleges of Canada and other interested agencies. The data were supplied by university and college business officers. Their assistance is greatly appreciated.

Similar reports were issued for 1956-57, 1957-58, 1958-59, 1960-61, 1962-63 and 1963-64. For 1959-60 a survey covering 17 institutions was published, which in addition provided data for these same 17 institutions from 1937-38. Table 2 in this publication gives summary data from 1943-44 to 1965-66 for these 17 institutions. A short survey was issued for 1961-62. It is planned to continue publishing detailed surveys every second year, so that this DBS survey may be conducted in conjunction with the university salary survey undertaken biennially by the Pay Research Bureau of the Public Service Commission. The next detailed DBS survey will be published for 1967-68, unless other considerations arise to warrant the detailed annual report.

As well as being used by the Pay Research Bureau, data collected for the DBS university salary survey are also used in reports issued by the National Research Council and by the Canadian Association of University Teachers.

The present report shows the relationship between salary and rank, faculty, field, subject, region, size of institution, control of institution, highest earned university degree, and years since award of first and highest earned degree for 76 institutions. In a number of the cross-classifications, data are given separately for men and women. There are, as well, figures on the age of university teachers, related to rank, field, subject and highest degree.

Questions concerning the content of this publication or suggestions for further analyses should be sent to Mr. N. LeSeigneur Acting Director, or Mr. Pierre Boulet, Chief of the Higher Education Section, Education Division.

WALTER E. DUFFETT,
Dominion Statistician.

PRÉFACE

Le présent rapport est le septième d'une série de rapports détaillés sur les traitements et la qualification des professeurs des universités canadiennes. Cette fois encore, il a été rédigé avec le concours de l'Association canadienne du personnel administratif universitaire, de l'Association canadienne des professeurs d'université, de l'Association des universités et collèges du Canada et d'autres organismes intéressés. Les données proviennent des représentants des universités et collèges et leur collaboration est très appréciée.

Des rapports semblables ont paru pour 1956-57, 1957-58, 1958-59, 1960-61, 1962-63 et 1963-64. Le rapport de 1959-60 comprenait 17 institutions et donnait leurs statistiques chronologiques à partir de 1937-38. Le tableau 2 de la présente publication donne les chiffres récapitulatifs de ces 17 institutions de 1943-44 à 1965-66. Un court rapport a paru au sujet de 1961-62. On se propose de continuer à publier des rapports détaillés tous les deux ans, de façon à ce que l'enquête du B.F.S. puisse être faite de concert avec celle qui porte sur les traitements universitaires, faite tous les deux ans par le Bureau d'étude des traitements de la Commission de la fonction publique. La prochaine enquête détaillée du B.F.S. sera publiée pour l'année 1967-68, à moins que d'autres facteurs motivent un rapport annuel détaillé.

En plus de servir au Bureau d'étude des traitements, les données recueillies pour l'enquête du B.F.S. sur les traitements universitaires servent aussi aux rapports publiés par le Conseil national de recherches et l'Association canadienne des professeurs d'université.

Le présent rapport indique la relation entre les traitements et le rang professoral, la faculté, la discipline choisie, la matière, la région, l'importance de l'institution et sa direction, le plus haut grade universitaire obtenu et les années depuis l'obtention du premier et du dernier grade à l'égard de 76 institutions. Certains tableaux donnent une ventilation selon le sexe. D'autres établissent la relation entre l'âge des professeurs d'université et leur rang professoral, la discipline, la matière et le plus haut grade.

Toute question relative au contenu de la présente publication ou toute proposition d'analyses supplémentaires doit être adressée à M.N. LeSeigneur, directeur suppléant, ou à M. Pierre Boulet, chef de la Section de l'enseignement supérieur, Division de l'éducation.

WALTER E. DUFFETT,
Statisticien fédéral.

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

.. figures not available.

... figures not appropriate or not applicable.

— nil or zero.

n.e.c. not elsewhere classified.

SIGNES CONVENTIONNELS

Voici la signification des signes conventionnels employés dans les tableaux du présent rapport:

.. nombres indisponibles.

... n'ayant pas lieu de figurer.

— néant ou zéro.

n.d.a. non dénommé ailleurs.

HIGHLIGHTS

The median salary for staff paid at rates applicable to lay teaching personnel (all medians used in these "highlights" refer to this group) was \$9,700 for all full-time staff included in the 1965-66 survey. Medians by rank ranged from a high of \$17,500 for deans to \$7,000 for lecturers and instructors.

The median salary for men in 1965-66 was \$10,000, higher by \$2,000 than that for women.

Median regional salaries, 1965-66, for all staff surveyed were for the Western Provinces (\$10,100), Ontario (\$10,000), Quebec (\$9,400) and the Atlantic Provinces (\$8,500). The Western Provinces showed the highest percentage increase from 1963-64 to 1965-66 (13.5 p.c.).

The median salary tended to decrease as size of institution decreased. For all staff at institutions with 5,000 and over full-time students it was \$10,400 in 1965-66. The median for institutions with enrolments of 2,000 to 4,999 was \$9,300, for those with 1,000 to 1,999 students \$8,700, 500 to 999 students \$8,500 and for institutions with less than 500 full-time students \$8,000.

The median salary for staff at state (provincial or federal) institutions was \$10,300 in 1965-66, \$9,500 for all independent institutions, with the median for church-related institutions being \$8,800. Since 1956-57, the medians for state and independent institutions have been quite close and have been considerably higher than the median for church-related institutions.

As in past years, the median salary for staff in the biological sciences (including medicine) was higher than that for other teaching fields. This 1965-66 median, \$10,900 may be compared with other teaching fields: e.g. \$10,000 for the physical sciences, \$9,500 for the social sciences, and \$8,500 for the humanities. The median for those engaged primarily in faculty administration was \$16,500.

In 1965-66, of the total of 12,085 teachers included from 76 reporting institutions, 87.3 p.c. were men. In 1957-58, 89.3 p.c. of a total of 4,881 staff members included from 58 reporting institutions were men.

Full-time staff at a selected group of 17 institutions from 1956-57 to 1965-66 increased 137.5 p.c., from 2,979 to 7,074. The increase from 1963-64 to 1965-66 was 26.7 p.c., or from 5,567 to 7,074.

FAITS SAILLANTS

Le traitement médian du personnel rémunéré au barème des laïcs (toutes les médianes de ces faits saillants réfèrent à ce groupe) était de \$9,700 pour tout le personnel à plein temps inclus dans le relevé de 1965-66. Les médianes selon le rang professoral ont varié de \$17,500 pour les doyens à \$7,000 pour les chargés de cours.

Le traitement médian des hommes en 1965-66 était de \$10,000 soit \$2,000 de plus que celui des femmes.

Les traitements médians régionaux, en 1965-66, de tout le personnel observé étaient dans les provinces de l'Ouest (\$10,100), en Ontario (\$10,000), au Québec (\$9,400) et dans les provinces Atlantiques (\$8,500). Les provinces de l'Ouest ont marqué la plus forte augmentation proportionnelle de 1963-64 à 1965-66 (13.5 p. 100).

Le traitement médian diminuait au même rythme que l'importance de l'institution. Dans les institutions comptant 5,000 étudiants et plus à plein temps, la médiane de tout le personnel était de \$10,400 en 1965-66, dans les institutions de 2,000 à 4,999 étudiants, elle était de \$9,300, dans celles de 1,000 à 1,999 étudiants, de \$8,700, dans celles de 500 à 999 étudiants, de \$8,500, et dans celles de moins de 500 étudiants à plein temps, de \$8,000.

Dans les institutions provinciales ou fédérales, le traitement médian était de \$10,300 en 1965-66 soit un peu plus élevé que la médiane de toutes les institutions indépendantes (\$9,500), et celui des institutions religieuses, de \$8,800. Depuis 1956-57, les médianes des institutions d'État et indépendantes ont été assez semblables et ont surpassé considérablement celle des institutions religieuses.

Comme dans le passé, le traitement médian du personnel des sciences biologiques (y compris la médecine) a été plus élevé que celui du personnel des autres disciplines. La médiane de 1965-66 (\$10,900) peut être comparée à celles des autres disciplines: e-g- \$10,000 dans les sciences physiques, \$9,500 dans les sciences sociales et \$8,500 dans les humanités. La médiane du personnel préposé surtout à l'administration des facultés était de \$16,500.

En 1965-66, sur les 12,085 instituteurs inclus dans les 76 institutions qui ont fait rapport, 87.3 p. 100 étaient des hommes. En 1957-58, 89.3 p. 100 d'un total de 4,881 dans 58 institutions étaient des hommes.

Le personnel de plein temps d'un groupe de 17 institutions, de 1956-57 à 1965-66, a augmenté de 137.5 p. 100, de 2,979 à 7,074. L'accroissement de 1963-64 à 1965-66 a été de 26.7 p. 100, soit de 5,567 à 7,074.

Some 1.4 p.c. (164 of 12,085) of the 1965-66 staff of all 76 institutions included, were aged 65 or over and 533 (4.4 p.c.) were 60 or over. The median age for all staff reported in this 1965-66 survey was 38 years compared with 41 years for 1956-57.

The median passage of time since the award of the first degree was 14 years for 1965-66 staff. It was 16 years in 1956-57.

Where highest earned university degree for 1965-66 staff members is considered, 44.8 p.c. were reported with doctorates, 34.1 p.c. master's degrees, 6.6 p.c. a first professional degree beyond a first baccalaureate, 12.0 p.c. a first baccalaureate, and 1.5 p.c. no university degree. The percentage of staff with doctorates has risen slightly since 1957-58, when it was 41.1 p.c.

Over one third (36.3 p.c.) of the total 1965-66 staff which were reported as having a master's or doctorate as the highest earned university degree had received them in the five-year period from 1961 to 1965.

Environ 1.4 p. 100 (164 sur 12,085) du personnel de 1965-66 dans toutes les 76 institutions incluses étaient âgés de 65 ans et plus et 533 (4.4 p. 100) de 60 ans et plus. L'âge médian de tout le personnel observé lors du relevé de 1965-66 était de 38 ans (41 ans en 1956-57).

Le nombre médian d'années depuis l'obtention du premier grade était de 14 ans pour le personnel de 1965-66 (16 en 1956-57).

L'examen du plus haut grade universitaire obtenu par le personnel de 1965-66 révèle que 44.8 p. 100 détenaient un doctorat, 34.1 p. 100 une maîtrise, 6.6 p. 100 un premier grade professionnel en deça d'un premier baccalauréat, 12.0 p. 100 un premier baccalauréat et 1.5 p. 100 aucun grade. La proportion du personnel ayant un doctorat a augmenté légèrement depuis 1957-58 alors que 41.1 p. 100 étaient docteurs.

Plus du tiers (36.3 p. 100) de tout le personnel de 1965-66 dont le grade le plus élevé était une maîtrise ou un doctorat l'ont reçu entre 1961 et 1965.

INTRODUCTION

Scope of Data

This report is based on questionnaire forms for the 1965-66 academic year sent to 89 universities and colleges. Returns were received from 76 (listed in Note 2, following the last table) with enrolment equalling about 94 p.c. of the total enrolment of full-time undergraduate and graduate students in Canadian institutions of higher education. All but one of the salary tables are limited to data relating to lay teachers and religious teachers paid on the same scale as lay teachers; the exception is Table 3. Tables showing non-salary data include both lay and religious teachers.

Data are presented for a total of 12,085 teachers, all of them full-time and with academic ranks of lecturer or instructor or higher. These include 11,662 in receipt of salaries based on scales applying to lay personnel and 423 religious teachers in receipt of allowances below the scales applying to lay personnel.

Cautions in Interpreting Data

1. Not all Canadian institutions of higher education are included. At the beginning of the 1965-66 academic year there were about 380 institutions offering courses of university grade. Those omitted are almost all small (with less than 500 enrolment) and many of them employ religious personnel paid on a salary scale less than that for lay persons. As nearly as can be determined, all institutions with 1,000 or more full-time university-grade students are included.

2. Figures for the separate years are not strictly comparable as a few institutions are not included for all these years in all tables. The data in Table 2 are comparable.

3. The median is not the arithmetic average, but is the theoretical point in a distribution for which 50 p.c. of the cases are higher and 50 p.c. lower.

4. The range between the 1st and 3rd quartiles includes 50 p.c. of all cases. Thus 25 p.c. are below the 1st quartile and 25 p.c. are above the 3rd.

5. Fluctuations in numbers of institutions by size of enrolment are due in part to movement from one enrolment category to another during the years under review.

6. All salary data refer to basic annual salary rates. Many teachers receive extra income for teaching evening, extension or summer classes, and many earn income from non-university sources. Such extra income was not included in this report.

Portée du rapport

Le présent rapport est basé sur les questionnaires envoyés à 89 universités et collèges pour l'année scolaire 1965-66. Les inscriptions des 76 qui ont répondu (en voir la liste au renvoi 2 après le dernier tableau) représentent environ 94 p. 100 de tous les étudiants à temps plein inscrits aux institutions canadiennes d'enseignement supérieur. A l'exception du tableau 3, tous les tableaux des traitements ne concernent que les professeurs laïcs et les professeurs religieux rémunérés à l'échelle des laïcs. Les tableaux qui n'ont pas trait aux traitements portent sur les professeurs tant laïques que religieux.

Les données se rapportent à 12,085 professeurs, tous à plein temps et ayant au moins le rang de chargé de cours. Sur ce nombre, 11,662 reçoivent un traitement conforme à l'échelle des laïcs et 423 professeurs religieux reçoivent un traitement inférieur à cette échelle.

Interprétation prudente des données

1. Le rapport n'envisage pas toutes les institutions canadiennes d'enseignement supérieur. Au début de l'année scolaire 1965-66, environ 380 institutions donnaient des cours à l'échelon universitaire. La plupart des institutions omises étaient de petites institutions (moins de 500 étudiants); plusieurs d'entre elles employaient des religieux dont l'échelle des traitements était inférieure à celle des laïques. Autant qu'on a pu le constater, toutes les institutions de 1,000 étudiants universitaires à plein temps ou plus sont représentées.

2. Les chiffres des différentes années ne sont pas strictement comparables, car quelques institutions sont omises pour certaines années dans les tableaux. Les données du tableau 2 sont comparables.

3. La médiane n'est pas la moyenne arithmétique mais bien le point théorique d'une série de valeurs dont la moitié sont supérieures et l'autre moitié inférieures à ce point.

4. L'écart entre le 1er et le 3e quartile comprend la moitié de tous les cas, de sorte que le quart des cas sont en-deça du 1er quartile et le quart au-dessus du 3e.

5. La fluctuation du nombre d'institutions selon le nombre des inscriptions tient en partie du passage d'une catégorie d'inscriptions à une autre durant les années observées.

6. Tous les traitements indiqués sont les traitements annuels de base. Plusieurs professeurs augmentent leur revenu en enseignant aux cours du soir, d'extension ou d'été et plusieurs ont un revenu para-universitaire. Ces suppléments ne paraissent pas dans le présent rapport.

Effective Data of Salary Figures Reported

All salary data refer to basic annual salary rates in the fall of 1965.

Medians and the Situation at the End of the Academic Year

Salaries

Information was asked for to the nearest dollar. The salary distributions used in this report are \$1,000 except for data in Table 2 where a \$500 interval was used so that the figures would be consistent with those published in "University Teachers' Salaries, 1937-1960." Medians were calculated to the nearest \$100.

Although salary scales for the ensuing year are generally set prior to the start of that academic year, the medians should relatively accurately reflect the situation at the end of the academic year.

Age

The form used asked for the year of birth of each staff member. In the tables used here, age is considered as that attained by each individual during the calendar year 1965. These ages are grouped in five-year intervals. Thus all persons born in 1902, for example, were 63 years of age some time in 1965, and were all 63 and not yet 64 at the end of the year. These persons would be included in the interval 60-64.

A median or quartile reported as 63, for example, indicates that the point falls anywhere from 63.0 to 63.9 in the distribution.

If one assumes that there was an even distribution of birthdays throughout each month of each year, half of the persons would be, to use 1902 again as an example, 63 years of age at June 30, 1965. It could then be assumed that at December 31, 1965, the median age would be 63.5 years, and at June 30, 1966, 64 years. While the medians were not calculated in this manner in this report, one might add one year to each median year of age given to arrive at approximate figures for the end of the academic year 1965-66, assuming that it is June 30.

Years Since Award of First Degree

Information was requested on the year in which the first degree was obtained. As with age, the number of years was measured in relation to the calendar year 1965, and distributed in five year intervals. Medians and quartiles were calculated in the same manner as were those for age.

If the assumption is made that all degrees were received at regular spring convocations (even if actually some would be received at other times during the year), one year could be added to the medians reported to give the picture at the end of the academic year (June 30).

Date de référence des traitements déclarés

Toutes les données sur les traitements sont basées sur la rémunération annuelle de base en vigueur à l'automne de 1965.

Les médianes et la situation à la fin de l'année scolaire

Traitements

Les traitements, qu'on devait déclarer à un dollar près, sont groupés ici par intervalles de \$1,000, sauf au tableau 2 où on a choisi un intervalle de \$500 pour que les chiffres correspondent à ceux qui ont paru dans "Traitements des professeurs d'université, 1937-1960". On a calculé la médiane à 100 dollars près.

Même si l'échelle des traitements pour l'année à venir est normalement établie avant le commencement de l'année scolaire, les médianes doivent refléter de façon relativement précise la situation à la fin de l'année scolaire.

Âge

Le questionnaire demandait l'année de naissance de chaque membre du personnel. Dans les tableaux, l'âge est celui qu'a atteint chaque individu au cours de l'année civile 1965. Les âges sont groupés par intervalles de cinq ans. Ainsi, les personnes nées en 1902 ont atteint 63 ans en 1965 et, à la fin de l'année, elles avaient toutes 63 ans révolus, mais non encore 64 ans. Ces personnes sont comprises dans le groupe de 60-64 ans.

La médiane ou le quartile de 63, par exemple, indique que le point se situe entre 63.0 et 63.9 dans la série.

Si les dates de naissance se répartissaient également entre les douze mois de chaque année, le moitié des personnes nées en 1902, pour reprendre l'exemple, auraient atteint leur 63^e année le 30 juin 1965. Il en découle qu'au 31 décembre 1965 l'âge médian serait de 63.5 ans et, au 30 juin 1966, de 64 ans. Dans le présent rapport, l'âge médian n'a pas été calculé de cette manière, mais il suffit d'ajouter un an à chaque âge médian indiqué pour avoir l'âge approximatif à la fin de l'année scolaire (30 juin) 1965-66.

Nombre d'années depuis l'obtention du premier grade

L'année d'obtention du premier grade a été demandée. Comme pour l'âge, le nombre d'années a été calculé par rapport à l'année civile 1965, et le classement fait par groupes quinquennaux. Les médianes et quartiles ont été calculés de la même façon que ceux de l'âge.

Si l'on suppose que tous les grades ont été obtenus au printemps (même si certains l'ont été à d'autres époques de l'année), il suffit d'ajouter un an aux médianes indiquées pour connaître la situation à la fin de l'année scolaire (30 juin).

² Médiane non calculée: nombre inférieur à 10.

SUMMARY

Salaries (Tables 1-17)

Rank

For the 12,085 university teachers with academic rank, reported as receiving salary at rates applicable to lay personnel, the median salary in 1965-66 was \$9,700, 9.1 p.c. higher than the median for 1963-64. For deans it was \$17,500, for professors 14,600, for associate professors \$11,200, for assistant professors \$8,800, for ungraded professors \$7,500, and for lecturers and instructors \$7,000. The 1965-66 median for ungraded professors (a small and heterogeneous group) was 6.7 p.c. higher than for 1963-64. For other ranks the increase ranged from 8.9 p.c. for professors to 13.7 p.c. for deans. (See Tables A and 1, and Chart 1.)

Sex

For all ranks combined the median salary for women was \$2,000 lower than that for men. Women were concentrated in the more junior ranks, as will be noted later, and hence the median for them was less. Even for the higher ranks the median for women tended to be lower. However, equality in salaries was closest for the higher ranks. (See Tables 1, 7-11, 12, 17.)

Field

Those engaged primarily in faculty administration (all deans and 65 others were so classified) had a median salary of \$16,500, 8.8 p.c. above that for 1963-64. Of the others, teachers in the biological sciences (including medicine) had the highest median salary—\$10,900, followed by those in the physical sciences—\$10,000, the social sciences—\$9,500, and the humanities—\$8,500. In these four teaching fields, percentage increases ranged from 8.3 p.c. in the humanities to 10.9 p.c. in the physical sciences. (See Tables A, 1 and 12, and Chart 1.)

Religious Teachers

The bases on which allowances were reported for religious teachers varied widely. Some figures given were estimates of average expenses, some were amounts actually paid, some were nominal book entries. Data on 423 such teachers show that 107 of them received no allowance. Median allowance for the other 316 was \$2,355 (\$2,068 for men, for women; see footnote 6). The median of allowances reported in 1963-64 was \$1,681, but this figure is not comparable with the 1965-66 median due to different institutions being included in the two years and different methods of reporting the allowances. (See Table 3.)

SOMMAIRE

Traitements (tableaux 1-17)

Rang professoral

Le traitement médian des 12,085 professeurs d'université de rang professoral rémunérés au barème laïc a été de \$9,700 en 1965-66 et dépassait de 9.1 p. 100 la médiane de 1963-64. Il était de \$17,500 pour les doyens, de \$14,600 pour les professeurs titulaires, de \$11,200 pour les professeurs agrégés, de \$8,800 pour les professeurs adjoints, de \$7,500 pour les professeurs non classés et de \$7,000 pour les chargés de cours. La médiane de 1965-66 pour les professeurs non classés (petit groupe hétérogène) était 6.7 p. 100 inférieure à celle de 1963-64. L'augmentation des autres rangs variait de 8.9 p. 100 pour les professeurs à 13.7 p. 100 pour les doyens. (Voir tableaux A et 1, et graphique 1.)

Sexe

Dans l'ensemble des rangs professoraux, le traitement médian des femmes était inférieur de \$2,000 celui des hommes. Les femmes se trouvaient surtout aux rangs inférieurs, comme on le soulignera plus loin, ce qui a baissé leur médiane; mais même aux rangs supérieurs, le traitement médian des femmes était en général moins élevé. L'égalité de traitement était plus apparente aux rangs les plus élevés. (Voir tableaux 1, 7-11, 12, 17.)

Domaine

Les professeurs qui s'occupaient surtout de l'administration des facultés (tous les doyens et 65 autres) ont touché un traitement médian de \$16,500 une augmentation de 8.8 p. 100 sur 1963-64. Chez les autres, le plus haut traitement médian a été celui des professeurs de sciences biologiques (y compris la médecine), soit \$10,900 venaient ensuite celui des professeurs de sciences physiques, \$10,000, des sciences sociales, \$9,500, et des humanités, \$8,500. Dans ces quatre domaines, l'augmentation procentuelle allait de 8.3 dans les humanités à 10.9 dans les sciences physiques. (Voir tableaux A, 1 et 12 et graphique 1.)

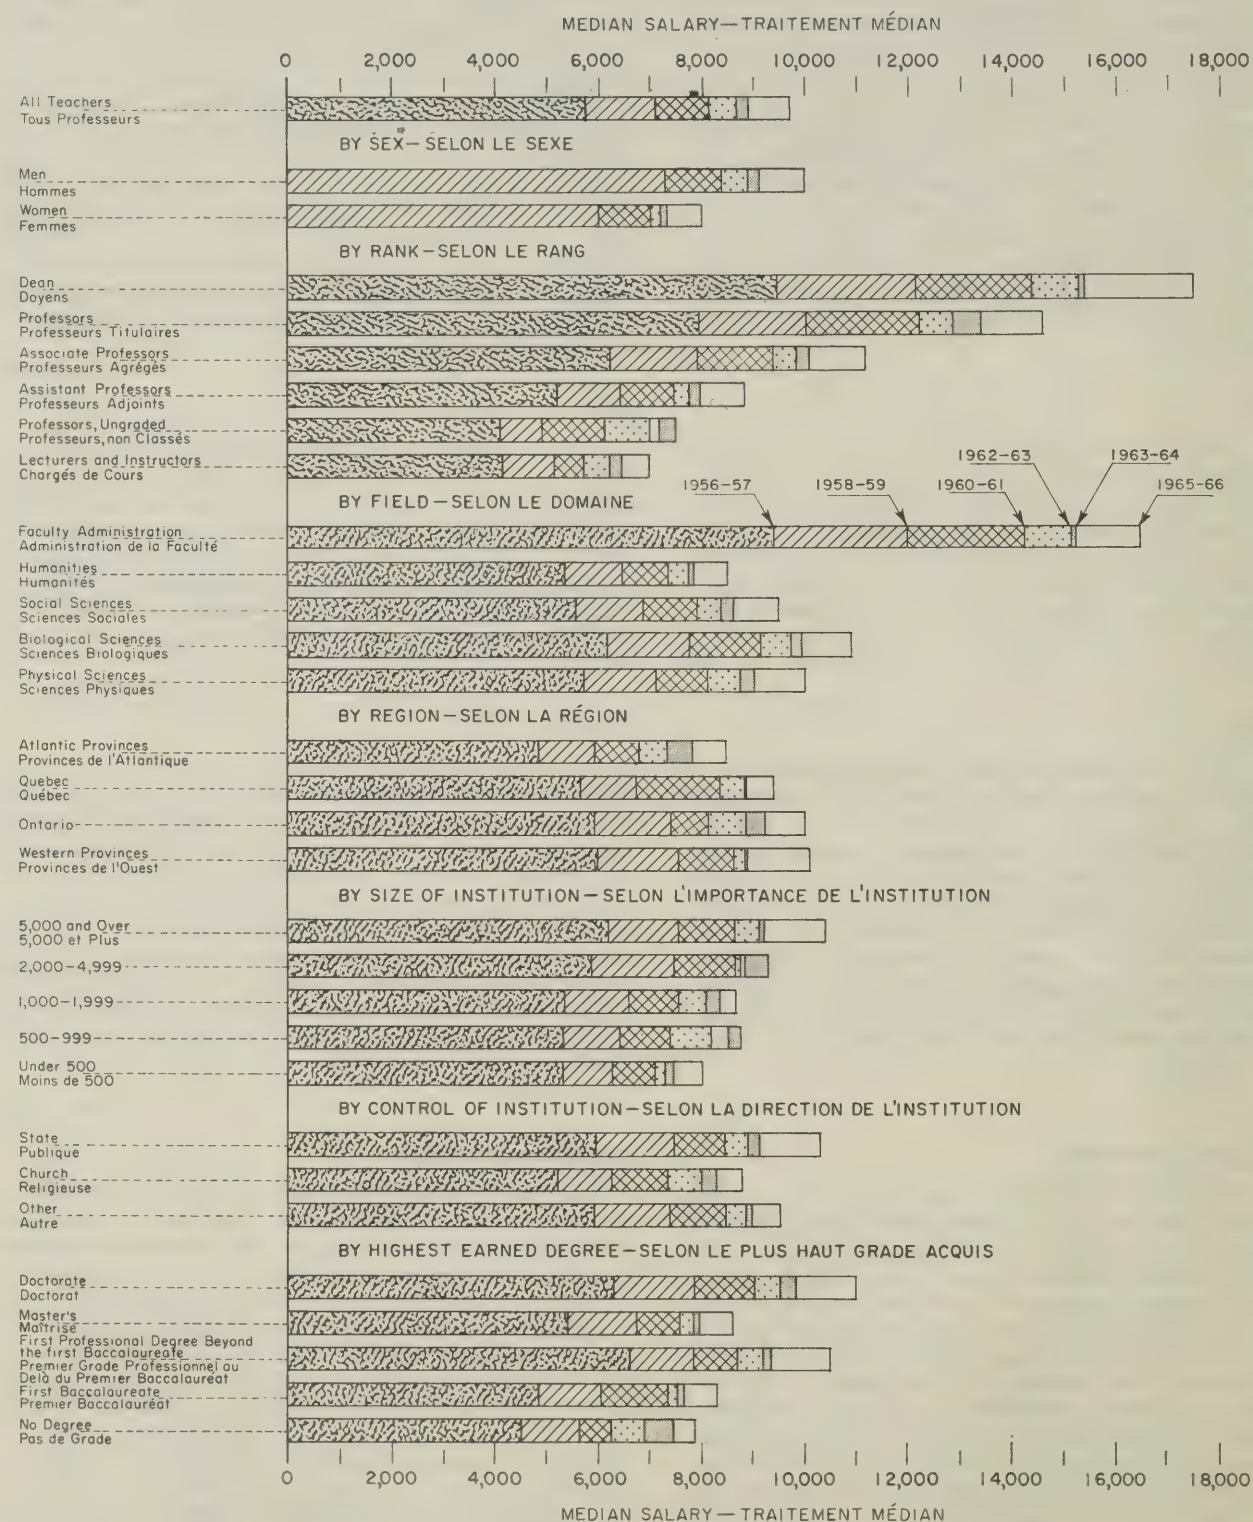

Professeurs religieux

La rémunération des professeurs religieux a été déclarée selon des fondements très variés. Certains chiffres étaient des estimations des dépenses moyennes, d'autres donnaient le montant effectivement payé et d'autres étaient un poste purement comptable. Les données sur 423 professeurs indiquent que 107 d'entre eux ne recevaient pas de rémunération. La rémunération médiane des 316 autres était de \$2,355 (\$2,068 pour les hommes, pour les femmes voir renvoi 6). En 1963-64, cette médiane était de \$1,681, mais ce chiffre n'est pas comparable à la médiane de 1965-66 parce que des institutions différentes ont été incluses pendant ces deux années et que des méthodes différentes ont servi à déclarer la rémunération. (Voir tableau 3.)

CHART-1

GRAPHIQUE-1

MEDIAN SALARIES OF UNIVERSITY TEACHERS
1956-57 TO 1965-66
TRAITEMENTS MÉDIANS DES PROFESSEURS D'UNIVERSITÉ
1956-57 À 1965-66

Historical Comparisons

The DBS publication "University Teachers' Salaries, 1937-1960," allows historical comparisons to be made of median salaries paid in 17 major institutions. The median for all ranks in this group for 1965-66 was \$10,250 (\$550 higher than for all personnel included in the present report). (See Table 2 and Chart 2.)

Region

For 1963-64, median salaries of all staff included from Ontario, Western Provinces, Quebec and the Atlantic Provinces were \$9,236, \$8,897, \$8,875 and \$7,839, respectively. The highest median in 1965-66 was for the Western Provinces (\$10,100), Ontario almost equal at (\$10,000), Quebec (\$9,400) and the Atlantic Provinces (\$8,500). Comparing the 1965-66 and 1963-64 medians, the increase for the Western Provinces was 13.5 p.c., for the Atlantic Provinces 8.9 p.c., for Ontario 8.3 p.c., and for Quebec 6.0 p.c. (See Tables A, 4 and 13, and Chart 1.)

Size of Institution

Nine institutions in 1965-66 had full-time enrolments of over 5,000. The 2,000-4,999 category increased in 1965-66 to 17 institutions from 12 in 1963-64, while 7 institutions with 1,000-1,999 students were included in 1965-66 as compared with 11 in 1963-64. The number of institutions with 500-999 students increased from 10 to 16 from 1963-64 to 1965-66 and 27 institutions in 1965-66 reported less than 500 students as contrasted with 25 in 1963-64.

Although a few institutions which reported in 1963-64 were not included in 1962-63, the main reason for these changes was increased enrolment.

In 1963-64, the median for all staff combined was highest for the 5,000 and over group (\$10,400 in 1965-66). Next highest for 1965-66 was the 2,000-4,999 group (\$9,300) followed by the 500-999 category (\$8,700). Next were institutions with 1,000-1,999 students (\$8,500) and finally institutions with less than 500 students (\$8,000).

Increases from 1963-64 to 1965-66 for all ranks combined ranged from 3.5 p.c. for institutions with 500-999 students to 12.5 p.c. for institutions with 5,000 students and over. (See Tables A, 5 and 14, and Chart 1.)

Control of Institution

Since the first survey 1956-57, medians for all staff combined, at independent and at state institutions have been higher than the medians for church-related institutions. This situation again prevailed for 1965-66, the median for state in-

Comparaisons chronologiques

La publication du B.F.S., "Traitements des professeurs d'université, 1937-1960", permet de comparer chronologiquement les traitements médians dans 17 grandes institutions. La médiane de tous les rangs professoraux de ce groupe, en 1965-66, a été de \$10,250 (\$550 de plus que celle de tout le personnel compris dans le présent rapport. (Voir tableau 2 et graphique 2.)

Région

En 1963-64, les traitements médians de tout le personnel (compris dans le présent rapport) de l'Ontario, des provinces de l'Ouest, du Québec et des provinces Atlantiques étaient de \$9,236, \$8,897, \$8,875 et \$7,839 respectivement. La médiane la plus élevée en 1965-66 était celle des provinces de l'Ouest (\$10,100), légèrement supérieure à celle de l'Ontario (\$10,000). La médiane du Québec a été de \$9,400 et celle des provinces Atlantiques, de \$8,500. Si l'on compare les médianes de 1965-66 et de 1963-64, l'augmentation a été de 13.5 p. 100 dans les provinces de l'Ouest, de 8.9 p. 100 dans les provinces Atlantiques, de 8.3 p. 100 en Ontario et de 6.0 p. 100 au Québec. (Voir tableaux A, 4 et 13 et graphique 1.)

Importance de l'institution

En 1965-66, neuf institutions comptaient plus de 5,000 étudiants à plein temps. Le nombre de celles qui ont entre 2,000 et 4,999 étudiants est passé de 12 à 17 entre 1963-64 et 1965-66, tandis que 7 institutions ayant de 1,000 à 1,999 étudiants étaient comprises en 1965-66, contre 11 en 1963-64. Le nombre d'institutions ayant de 500 à 999 étudiants est passé de 10 à 16 de 1963-64 à 1965-66; 27 ont déclaré avoir moins de 500 étudiants en 1965-66 contre 25 en 1963-64.

Bien que certaines institutions qui ont fait rapport en 1963-64 n'aient pas été incluses en 1962-63, la principale raison de ces changements a été l'accroissement des inscriptions.

En 1963-64, la médiane de tout le personnel réuni a été la plus élevée dans les institutions de 5,000 étudiants et plus (\$10,400 en 1965-66.) Viennent ensuite celles de 2,000-4,999 étudiants (\$9,300), de 500-999 étudiants (\$8,700) de 1,000-1,999 étudiants (\$8,500) et de moins de 500 étudiants (\$8,000).

Les hausses de 1963-64 à 1965-66 pour tous les rangs professoraux réunis ont varié de 3.5 p. 100 pour les institutions de 500-999 à 12.5 p. 100 pour celles de 5,000 étudiants et plus. (Voir tableaux A, 5, et 14 et graphique 1.)

Direction de l'institution

Depuis la première enquête (en 1956-57), les médianes de tout le personnel réuni, dans les institutions indépendantes et des institutions d'état, ont été plus élevées que celles des institutions religieuses. La situation est demeurée la même en

CHART-2

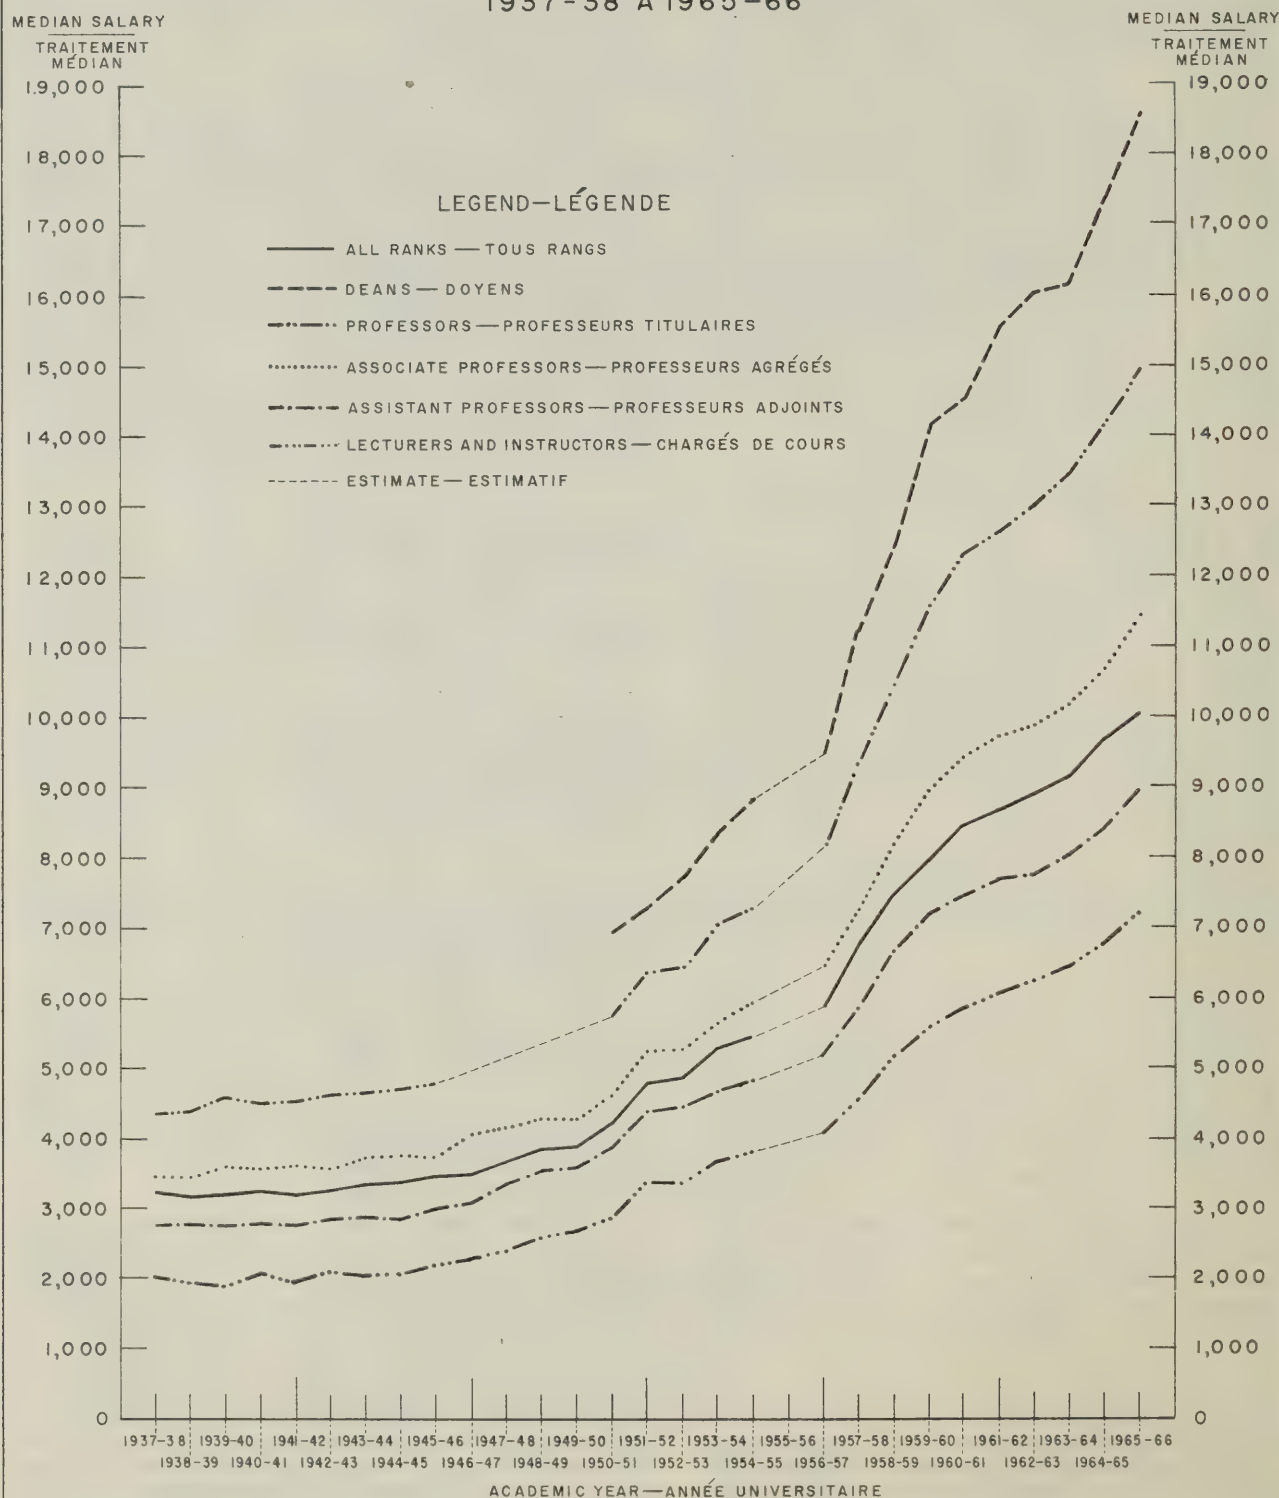

GRAPHIQUE-2

MEDIAN SALARIES OF TEACHERS AT 17 UNIVERSITIES BY RANK

1937-38 TO 1965-66

TRAITEMENTS MÉDIANS DES PROFESSEURS DE 17 UNIVERSITÉS SELON LE RANG

1937-38 A 1965-66

stitutions (\$10,300) being higher than that for independent institutions (\$9,500). The median for church related institutions was (\$8,800).

From 1963-64 to 1965-66, state institutions showed the greatest increase (13.0 p.c.). Increases for church-related and independent institutions were 6.6 p.c. and 5.6 p.c., respectively. (See Tables 6 and 15 and Chart 1.)

Faculty

There is no uniformity in the organization of universities into faculties, schools and institutes, so data grouped in this way are only relatively significant. A tabulation is presented, however, which indicates that highest salaries were paid in faculties of dentistry (median \$13,300), followed by faculties of medicine (\$12,000), agriculture (\$11,300) and law (\$12,000). Other faculties for which information is available with median salaries over \$10,000 included in descending order pharmacy, education and engineering with both theology and architecture at \$10,000. Those with medians below \$10,000 were again in descending order, commerce and business administration, social work, arts and sciences, household science, physical and health education, music, nursing and physiotherapy and occupational therapy.

Subject

If the four teaching fields of humanities, social sciences, biological sciences, and physical sciences are subdivided into "pure" and "applied" areas and by subject (ignoring faculty organization), further comparisons of salaries may be made.

In the **humanities**, median salaries by subject were in this order: theology \$9,600; fine arts \$9,300; fine and applied art \$9,200; classical languages and literature \$9,100; philosophy \$9,000; modern languages and literature (including English and French) \$8,300; and music \$8,300. (See Table 8.)

In the **social sciences**, the order was as follows: law, \$10,800; education, \$10,300; commerce and business administration, \$9,800; psychology, \$9,500; geography, \$9,500; economics and political science, \$9,400; social work, \$9,300; sociology and anthropology, \$9,100; history, \$8,700; physical and health education, \$8,500; and Household Science, \$8,500. (See Table 9.)

Median salaries in the **biological sciences** were: dentistry, \$13,100; medicine, \$12,200; agriculture, \$11,300; pure biological science (including botany and zoology), \$10,500; pharmacy,

1965-66, la médiane des institutions d'état (\$10,300) étant plus forte que celle des institutions indépendantes (\$9,500). La médiane des institutions religieuses a été de \$8,800.

De 1963-64 à 1965-66, les institutions d'état ont marqué la plus forte augmentation (13.0 p. 100). L'augmentation, dans le cas des institutions religieuses et des institutions indépendantes, a été de 6.6 p. 100 et de 5.6 p. 100 respectivement. (Voir tableaux 6 et 15 et graphique 1.)

Faculté

Vu le manque d'uniformité dans l'organisation des universités en facultés, écoles et instituts, les données ainsi groupées n'ont qu'une valeur relative. On a cependant dressé un tableau qui montre que les traitements médians les plus élevés ont été payés, suivant l'ordre décroissant, par les facultés d'art dentaire (\$13,300), de médecine (\$12,000), d'agriculture (\$11,300) et de droit (\$12,000). Les autres facultés pour lesquelles les données sont connues et où les traitements médians dépassent \$10,000, étaient, dans le même ordre, celles de pharmacie, de pédagogie et de génie, les traitements médians pour la théologie et l'architecture étant de \$10,000. Les facultés payant un traitement médian inférieur à \$10,000 étaient, dans le même ordre, celles de commerce et de gestion des affaires, de service social, des arts et des sciences, des sciences domestiques, d'éducation physique et d'hygiène, de musique, des sciences infirmières, de physiothérapie et d'ergothérapie.

Matière

La division des humanités, sciences sociales, sciences biologiques et sciences physiques en sciences "pures" et "appliquées" et selon la matière (sans tenir compte de l'organisation en facultés) permet d'autres comparaisons de traitements.

Dans les **humanités**, les traitements médians par matière étaient les suivants: théologie, \$9,600; beaux-arts, \$9,300; beaux-arts et arts industriels, \$9,200; langues et littérature classiques, \$9,100; philosophie, \$9,000; langues et littérature modernes (y compris les langues et la littérature anglaises et françaises), \$8,300; et musique, \$8,300. (Voir tableau 8.)

Dans les **sciences sociales**, l'ordre était le suivant: droit, \$10,800; pédagogie, \$10,300; commerce et affaires, \$9,800; psychologie, \$9,500; géographie, \$9,500; économie et sciences politiques, \$9,400; service social, \$9,300; sociologie et anthropologie, \$9,100; histoire, \$8,700; culture physique et hygiène, \$8,500; et sciences ménagères, \$8,500. (Voir tableau 9.)

Les traitements médians dans les **sciences biologiques** étaient les suivants: art dentaire \$13,100; médecine, \$12,200; agriculture, \$11,300; sciences biologiques et sciences pures (dont la botanique et

\$10,300; nursing, \$7,300; and physiotherapy and occupational therapy, \$7,300. (See Table 10.)

In the **physical sciences**, mining engineering led with a median salary of \$11,600; followed by chemical engineering, \$10,500; civil engineering, \$10,300; mechanical engineering, \$10,200; physics, \$10,200; geology, \$10,000; chemistry, \$10,000; architecture, \$9,900; electrical engineering, \$9,900; and mathematics, \$9,400. (See Table 11.)

While some of the above medians may seem too high or too low in relation to others, it should be borne in mind that they are influenced by the distribution of faculty by rank in each subject area. Some areas may have a much larger proportion of junior staff to instruct greatly increasing enrolment in them. Other areas, especially professional, may require a larger proportion of highly paid senior staff.

Years Since Award of First Degree

As a substitute for a measure of teaching experience, universities and colleges were asked to report for each teacher the year in which he obtained his first university degree—from which was calculated the number of years since that award. The median salary of those less than five years away from the first degree was \$6,700. The greater the number of years since that award, the greater the median salary—up to the 40-44 years group \$14,600. (See Table 12, Chart 3.)

For men only, the highest median in 1965-66 was for those 40-44 years beyond the first degree (\$15,000). The highest median for women was for the 35-39 year group, it being \$11,000. (See Table 12 and Chart 3.)

Although the number of those engaged primarily in faculty administration who had received their first degrees less than 20 years previously rose from 32 out of a total of 210 in 1963-64 to 62 out of 297 in 1965-66 the proportion remained small. Median salaries ranged from \$15,900 for those 20-24 years beyond that date to \$18,000 for those 35-39 years beyond. In the humanities, median salaries ranged from \$6,500 for those less than 5 years beyond the first degree to \$14,200 for those 35-39 years beyond. Comparable figures for the social sciences were \$7,000 and \$14,100 (40-44 years); for the biological sciences \$6,600 and \$15,200 (35-39 years); and for the physical sciences \$7,200 and \$14,300 (40-44 years). Medians for women were in all cases lower than those for men. (See Table 12.)

In the Atlantic Provinces the median salary for those less than 5 years beyond the first degree was \$6,500 and the highest median, \$12,200 was for those 35-39 years beyond that award. In Quebec the range was from \$6,600 to \$14,900 (in the 35-39

la zoologie), \$10,500; pharmacie, \$10,300; soins infirmiers, \$7,300; et physiothérapie et ergothérapie, \$7,300. (Voir tableau 10.)

Dans les **sciences physiques**, le génie minier se classe en tête avec un médiane de \$11,600; suivi du génie chimique, \$10,500; du génie civil, \$10,300; du génie mécanique, \$10,200; de la physique, \$10,200; de la géologie, \$10,000; de la chimie, \$10,000; de l'architecture \$9,900; du génie électrique, \$9,900; et des mathématiques, \$9,400. (Voir tableau 11.)

Certaines de ces médianes peuvent sembler trop élevées ou trop basses par rapport aux autres, mais il faut se rappeler qu'elles reflètent la répartition de la faculté selon le rang professoral dans chaque domaine. Certains domaines peuvent avoir une proportion beaucoup plus forte de professeurs de rang inférieur pour instruire un nombre toujours croissant d'étudiants. D'autres domaines, particulièrement les domaines professionnels, peuvent exiger une plus grande proportion de personnel de rang élevé mieux rémunéré.

Années depuis l'obtention du premier grade

A titre d'indice des années d'enseignement, les universités et collèges devaient déclarer l'année d'obtention du premier grade universitaire de chaque professeur, ce qui a permis de calculer le nombre d'années depuis ce premier grade. Le traitement médian de ceux qui comptaient moins de 5 ans depuis le premier grade était de \$6,700. Plus le nombre d'années depuis l'obtention du premier grade augmentait plus le traitement médian augmentait, jusqu'au groupe de 40-44 ans (\$14,600). (Voir tableau 12, et graphique 3.)

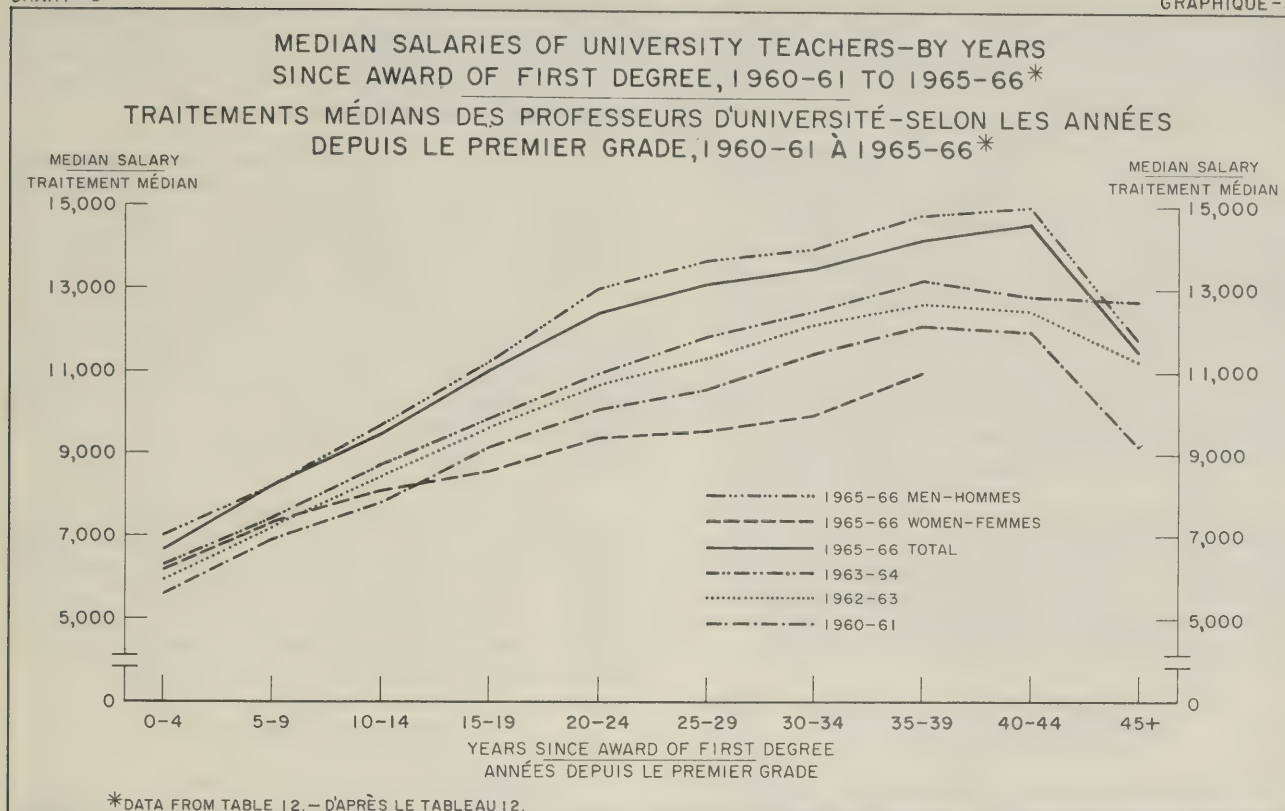

Chez les hommes, la médiane la plus élevée en 1965-66 était celle du groupe de 40-44 ans depuis le premier grade (\$15,000). Chez les femmes, c'était celle du groupe de 35-39 ans (\$11,000). (Voir tableau 12 graphique 3.)

Bien que le nombre des administrateurs de facultés qui aient obtenu leur premier grade moins de 20 ans auparavant ait augmenté de 32 sur un total de 210 en 1963-64 à 62 sur 297 en 1965-66, la proportion est restée négligeable. Les traitements médians variaient de \$15,900 pour ceux de 20-24 ans à \$18,000 pour le groupe de 35-39 ans. Dans les humanités, ils variaient de \$6,500 pour le groupe de moins de 5 ans depuis le premier grade à \$14,200 pour ceux de 35-39 ans. Voici les chiffres comparables des autres facultés: sciences sociales, \$7,000 et \$14,100 (40-44 ans); sciences biologiques, \$6,600 et \$15,200 (35-39 ans); et sciences physiques \$7,200 et \$14,300 (40-44 ans). Dans tous les cas, les médianes des femmes étaient inférieures à celles des hommes. (Voir tableau 12.)

Dans les provinces Atlantiques, les traitements médians des professeurs de moins de 5 ans depuis le premier grade étaient de \$6,500 et la plus haute médiane, de \$12,200 pour ceux de 35-39 ans depuis ce grade. Au Québec, l'écart était de \$6,600 à

CHART-3

GRAPHIQUE-3

years group); in Ontario \$6,800 to \$15,300 (40-44 years group); and the Western Provinces \$7,000 to \$15,800 (in the 35-39 years group). (See Table 13.)

Comparison by size of institution reveals that in universities with enrolment over 5,000 the range of median salaries was from \$7,000 for those less than 5 years beyond the first degree to \$15,400 for those 40-44 years beyond. The range for institutions with 2,000-4,999 students was from \$6,700 to \$13,900 (35-39 years group); for those with 1,000-1,999 students, \$6,500 to \$11,000 (20-24 years group); 500-999 students \$6,400 to \$12,300 (35-39 years group); and under 500 students \$6,000 to \$8,000 (15-19 years group). (See Table 14.)

In institutions under state (provincial or federal) control median salaries ranged from \$7,000 for teachers less than 5 years beyond the first degree to \$15,400 (40-44 years beyond). For church-related institutions the range was from \$6,200 to \$14,200 (40-44 years beyond), and for independent institutions it was from \$7,000 to \$14,200 (40-44 years beyond). (See Table 15.)

Highest University Degree

The median salary of teachers with a Ph.D. or equivalent degree (\$11,000) was higher than the median for those with a first professional degree beyond the first baccalaureate (e.g. usually such

\$14,900 (pour le groupe de 35-39 ans); en Ontario, il était de \$6,800 à \$15,300 (40-44 ans); et dans les provinces de l'Ouest, de \$7,000 à \$15,800 (35-39 ans). (Voir tableau 13.)

La comparaison selon l'importance de l'institution révèle que, dans celles de 5,000 étudiants et plus, l'écart du traitement médian allait de \$7,000 pour les professeurs de moins de 5 ans depuis le premier grade à \$15,400 pour ceux de 40-44 ans. Dans les institutions de 2,000 à 4,999 étudiants, l'écart était de \$6,700 à \$13,900 (35-39 ans); dans celles de 1,000 à 1,999 étudiants, de \$6,500 à \$11,000 (20-24 ans); dans celles de 500 à 599 étudiants, de \$6,400 à \$12,300 (35-39 ans); et dans celles de moins de 500 étudiants, de \$6,000 à \$8,000 (15-19 ans). (Voir tableau 14.)

Dans les institutions provinciales ou fédérales, le traitement médian variait de \$7,000 pour les professeurs de moins de 5 ans depuis le premier grade à \$15,400 (40-44 ans). Dans les institutions religieuses, l'écart allait de \$6,200 à \$14,200 (40-44 ans) et dans les institutions indépendantes, de \$7,000 à \$14,200 (40-44 ans). (Voir tableau 15.)

Le plus haut grade universitaire

Le traitement médian des professeurs qui détenaient un Ph.D. ou un grade équivalent (\$11,000) dépassait celui des professeurs qui détenaient un premier grade professionnel supérieur au premier

degrees as M.D., D.D.S., D.V.M., B.L.S., B.Ed., B.S.W.)—\$10,500 and it in turn was higher than that for those with a master's degree (\$8,600) and a first baccalaureate (\$8,300). (See Table 16 and Chart 1.)

Another form of salary comparison among professions is to relate salaries to the number of years that have elapsed since the award of the highest earned university degree. For those with a doctorate, the range was from \$9,000 for the 0-4 years group to \$14,800 for those 30-34 years beyond the Ph.D. or equivalent degree. Ranges for other degrees were: masters—\$7,500 (0-4) to \$13,600 (35-39); first professional degree beyond the first baccalaureate—\$7,000 (0-4) to \$15,100 (30-34); and first baccalaureate—\$6,500 (0-4) to \$13,900 (35-39). (See Table 16 A and Chart 4.)

The median salary for men with a Ph.D. degree was \$11,000, and that for women \$9,500. For those with a master's degree the medians were \$8,800 for men and \$7,900 for women. Medians were higher for men than for women in each of the other degree groups. (See Tables 16 A and 17.)

Age (Tables 18-23)

The median age for staff in various categories has not changed appreciably since the survey for 1956-57. The fact that the median has not gone up, as would normally be the case if there were few additions to staff, implies that a large number of young teachers are being added to the staff complement. This is borne out by an examination of data for recent years.

The median age of the 12,085 lay and religious teachers in the 76 universities and colleges reporting was 38 years (in 1963-64 it was 39 years). Of those for whom data on age were given, 2.2 p.c. were under 25 (2.0 p.c. in 1963-64) and 1.4 p.c. were at age 65 or over (1.6 p.c. in 1963-64). Those 55 years and over, most of whom might be expected to retire within 10 years, equalled 10.2 p.c. (10.9 p.c. in 1963-64). Those engaged in faculty administration (almost all of them deans) had a median age of 51 years; in the humanities, 38; in the social sciences, 37; in the biological sciences, 41; and in the physical sciences, 37 years. (See Table 18.)

The median age of teachers with a doctorate was 39 years; a master's degree, 36 years; a first professional degree beyond a first baccalaureate, 39 years; a first baccalaureate, 37 years; and no university degree 44 years. (See Table 19.)

Comparison of the age distributions of those teaching various subjects reveals that the median age of teachers of fine arts, music, theology, education, social work, agriculture, dentistry, medicine, nursing, physiotherapy and occupational therapy, architecture and mining engineering was 3 or more years above the median age for all

baccalauréat (D.M., D.D.S., D.V.M., B.Biblio., B.Péd., B.S.S.) (\$10,500). Ce dernier dépassait celui des professeurs détenant une maîtrise (\$8,600) et un premier baccalauréat (\$8,300). (Voir tableau 16 et graphique 1.)

Une autre façon de comparer les traitements parmi les professions est de relier les traitements au nombre d'années écoulées depuis l'obtention du plus haut grade universitaire. Pour ceux qui avaient un doctorat, l'écart allait de \$9,000 pour le groupe de 0-4 ans à \$14,800 pour celui des 30-34 ans après l'obtention du doctorat ou d'un grade équivalent. Voici les écarts des autres grades: maîtrise, \$7,500 (0-4) à \$13,600 (35-39); premier grade professionnel après le premier baccalauréat, \$7,000 (0-4) à \$15,000 (30-34); et premier baccalauréat, \$6,500 (0-4) à \$13,900 (35-39). (Voir tableau 16 A et graphique 4.)

Le traitement médian des professeurs détenant un Ph.D. a été de \$11,000 chez les hommes et de \$9,500 chez les femmes. Pour ceux qui avaient une maîtrise, les médianes ont été de \$8,800 et de \$7,900. Les médianes pour les hommes étaient plus élevées que celles des femmes dans chacun des autres groupes de grade. (Voir tableaux 16 A et 17.)

Âge (tableaux 18-23)

L'âge médian du personnel des diverses catégories n'a guère changé depuis le rapport de 1956-57. La médiane n'ayant pas monté, comme il serait normal si peu de professeurs s'ajoutaient au personnel, il s'ensuit que le professorat s'enrichit d'un grand nombre de jeunes professeurs. C'est ce que révèle l'examen des données des récentes années.

L'âge médian des 12,085 professeurs laïcs et religieux des 76 universités et collèges déclarants était de 38 ans (39 ans en 1963-64). Parmi ceux dont les données sur l'âge sont connues, 2.2 p. 100 avaient moins de 25 ans (2.0 p. 100 en 1963-64) et 1.4 p. 100 avaient 65 ans et plus (1.6 p. 100 en 1963-64). Ceux de 55 ans et plus, dont la plupart prendront sans doute leur retraite d'ici 10 ans, représentaient 10.2 p. 100 (10.9 p. 100 en 1963-64). L'âge médian des administrateurs de facultés (la plupart doyens) était de 51 ans; dans les humanités, de 38 ans; dans les sciences sociales, de 37 ans; dans les sciences biologiques, de 41 ans; et dans les sciences physiques, de 37 ans. (Voir tableau 18.)

L'âge moyen des professeurs détenant un doctorat était de 39 ans; une maîtrise, 36 ans; un premier grade professionnel au-delà du premier baccalauréat, 39 ans; un premier baccalauréat, 37 ans; et aucun grade universitaire, 44 ans. (Voir tableau 19.)

La comparaison de l'âge des professeurs selon les matières enseignées révèle que l'âge médian des professeurs de beaux-arts, de musique, de théologie, de pédagogie, de service social, d'agriculture d'art dentaire, de médecine, de soins infirmiers, de physiothérapie et d'ergothérapie, d'architecture et de génie minier était de 3 ans ou plus au-dessus

CHART-4

GRAPHIQUE-4

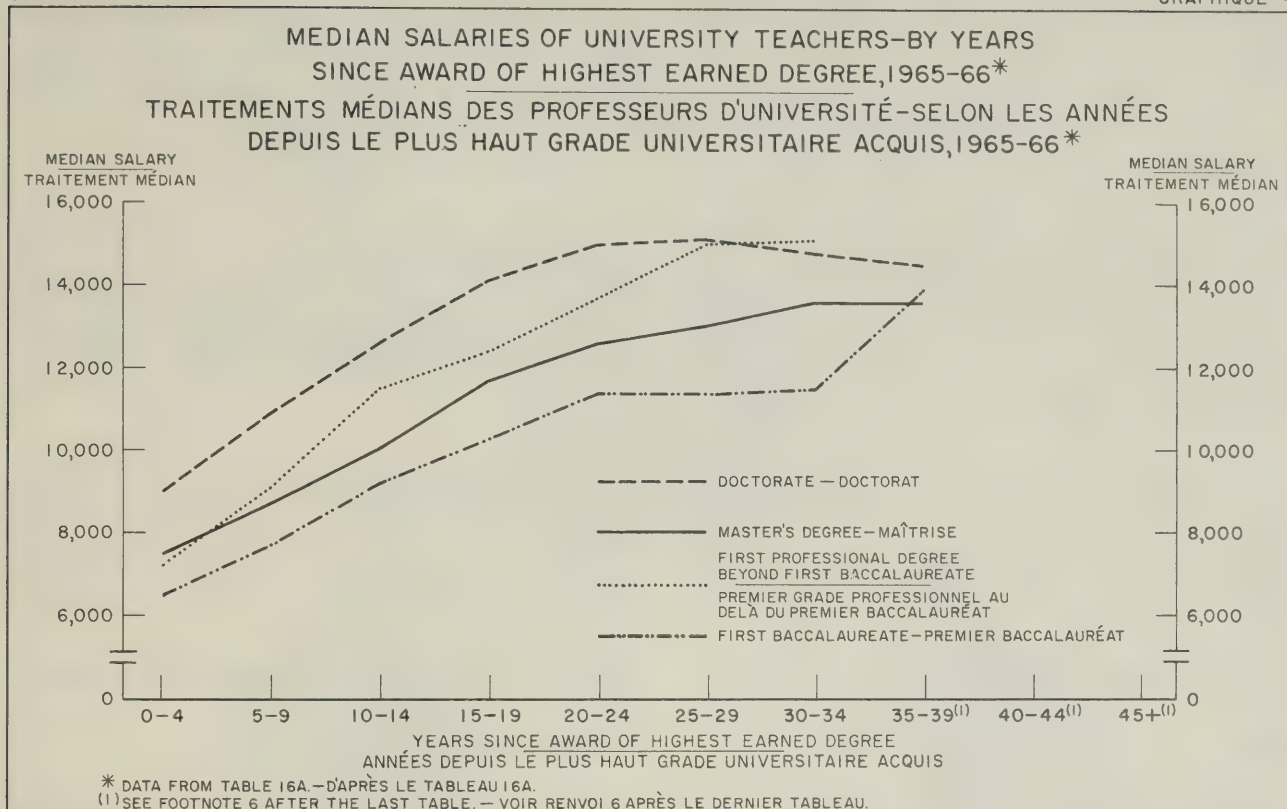

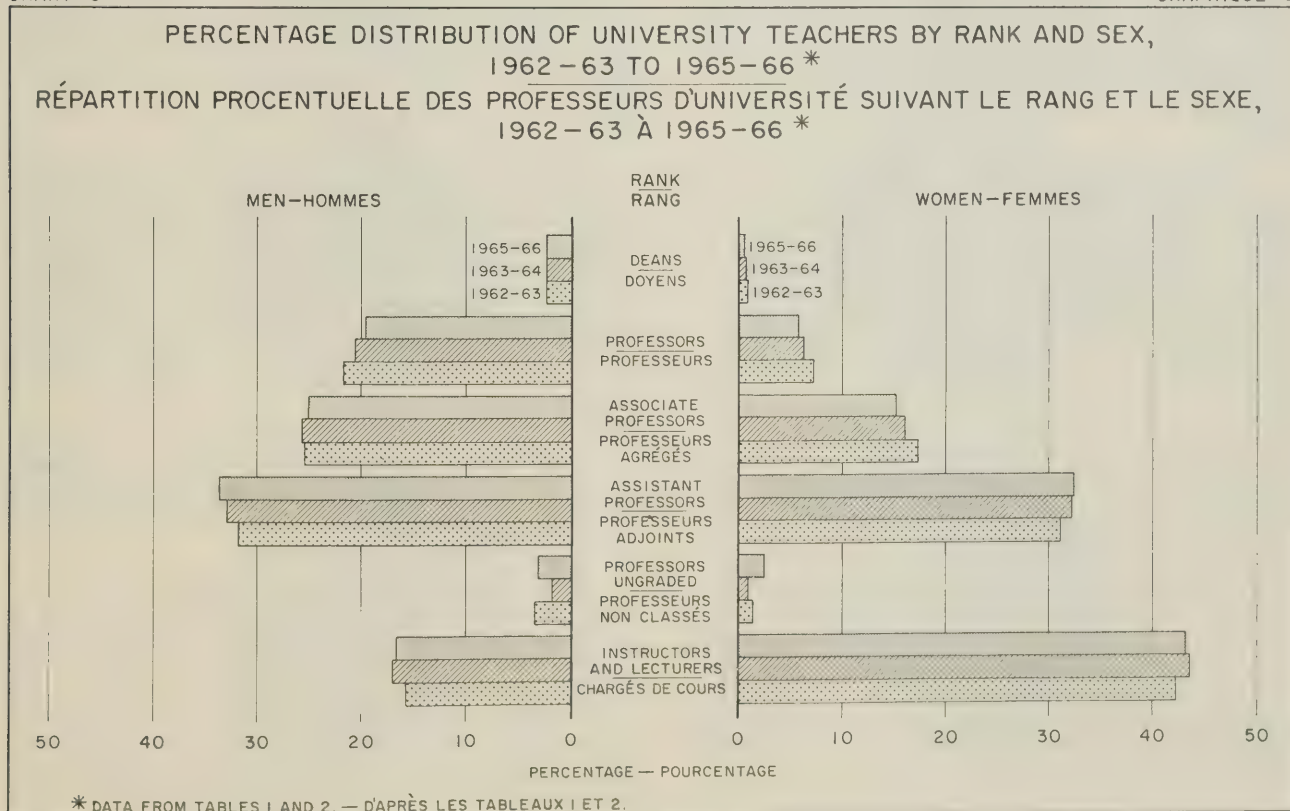

CHART-5

GRAPHIQUE-5

teachers; while it was 3 or more years below for teachers of political science, law, physical and health education, and mathematics. (See Tables 20-23.)

Years Since Award of First Degree (Table 24)

For the 12,085 teachers in all 76 institutions the median passage of time since award of the first degree was 14 years (compared with 14 years in 1963-64). For deans (1963-64 medians in parenthesis) it was 28 (28), for professors 25 (26), associate professors 16 (17), assistant professors 10 (11), ungraded professors 12 (15), and lecturers and instructors 6 (7).

Comparison by field shows that, on the average, those engaged in faculty administration had obtained the first university degree 28 years earlier. In the humanities the median was 14, in the social sciences 13, in the biological sciences 16, and in the physical sciences 13. (See Table 24.)

Distribution of University Teachers by Rank, Sex and Field

Rank

Of the 11,480 teachers (excluding deans and ungraded professors) reported in the four main teaching categories, 19 p.c. were "full" professors, 25 p.c. associate professors, 35 p.c. assistant professors, and 21 p.c. instructors and lecturers. The percentages in 1963-64 were 20, 25, 34, and 21. (See Table 18.)

Degree

By highest earned university degree, 11,971 teachers (excluding 114 for whom no information was reported) were distributed as follows: doctorate 44.8 p.c., master's degree 34.9 p.c., first professional degree beyond the first baccalaureate 6.7 p.c., baccalaureate 12.2 p.c., and no university degree 1.4 p.c. In 1963-64 the percentages were 44.4, 34.6, 6.7, 12.8 and 1.5. (See Table 19 and Chart 6.)

Sex

Of the total of 12,085 full-time teachers reported in 1965-66, men numbered 10,545 (87.3 p.c.) and women 1,540 (12.7 p.c.). In 1963-64 the percentages were 88.4 and 11.6.

Of the men, 2.3 p.c. were deans; of the women, 0.6 p.c. The proportions in the other ranks were: professor, 19.7 p.c. of the men and 5.9 p.c. of the women; associate professor, 25.0 p.c. and 15.2 p.c.; assistant professor, 33.5 p.c. and 32.5 p.c.; ungraded professors, 3 p.c. and 2.5 p.c.; and lecturer or instructor, 16.5 p.c. and 43.3 p.c. (See Tables 1 and 3, and Chart 5.)

The proportions of the 10,096 men and the 1,463 women paid on a basis applicable to lay personnel, holding the various university degrees

de l'âge médian de tous les professeurs, tandis qu'il était de 3 ans ou plus en-dessous dans le cas des professeurs de sciences politiques, de droit, d'éducation physique et d'hygiène et de mathématiques. (Voir tableaux 20-23.)

Années depuis l'obtention du premier grade (tableau 24)

Pour les 12,085 professeurs des 76 institutions, le nombre médian d'années depuis le premier grade était de 14 ans (comme en 1963-64); pour les doyens, il était de 28 (28); pour les professeurs titulaires, 25 (26) pour les professeurs agrégés, 16 (17); pour les professeurs adjoints, 10 (11); pour les professeurs non classés, 12 (15); et pour les chargés de cours, 6 (7).

La comparaison par domaine indique que, en moyenne, les administrateurs de faculté avaient obtenu leur premier grade universitaire 28 ans auparavant. Dans les humanités, la médiane était de 14; dans les sciences sociales, 13; dans les sciences biologiques, 16; et dans les sciences physiques, 13. (Voir tableau 24.)

Répartition des professeurs selon le rang, le grade, le sexe et le domaine

Rang professoral

Sur les 11,480 professeurs (à l'exclusion des doyens et des professeurs non classés) déclarés dans les quatre rangs principaux, 19 p. 100 étaient titulaires, 25 p. 100 agrégés, 35 p. 100 adjoints et 21 p. 100 chargés de cours. Les pourcentages en 1963-64 étaient de 20, 25, 34 et 21. (Voir tableau 18.)

Grade

Voici la répartition procentuelle des 11,971 professeurs (à l'exclusion de 114 pour lesquels aucun renseignement n'a été reçu) selon le plus haut grade universitaire: doctorat, 44.8 maîtrise, 34.9, premier grade professionnel au-delà du premier baccalauréat, 6.7, baccalauréat, 12.2, et aucun grade universitaire, 1.4. En 1963-64, les pourcentages étaient 44.4, 34.6, 6.7, 12.8 et 1.5, (Voir tableau 19 et graphique 6.)

Sexe

Les 12,085 professeurs à plein temps déclarés en 1965-66 comprenaient 10,545 (87.3 p. 100) hommes et 1,540 (12.7 p. 100) femmes. En 1963-64, les pourcentages étaient 88.4 et 11.6.

Chez les hommes, 2.3 p. 100 étaient doyens, et chez les femmes, 0.6 p. 100. Les proportions des autres rangs étaient les suivantes: professeurs titulaires, 19.7 p. 100 des hommes et 5.9 p. 100 des femmes; professeurs agrégés, 25.0 et 15.2 p. 100; professeurs adjoints, 33.5 et 32.5 p. 100; professeurs non classés, 3 et 2.5 p. 100 et chargés de cours, 16.5 et 43.3 p. 100 (Voir tableaux 1 et 3 et graphique 5.)

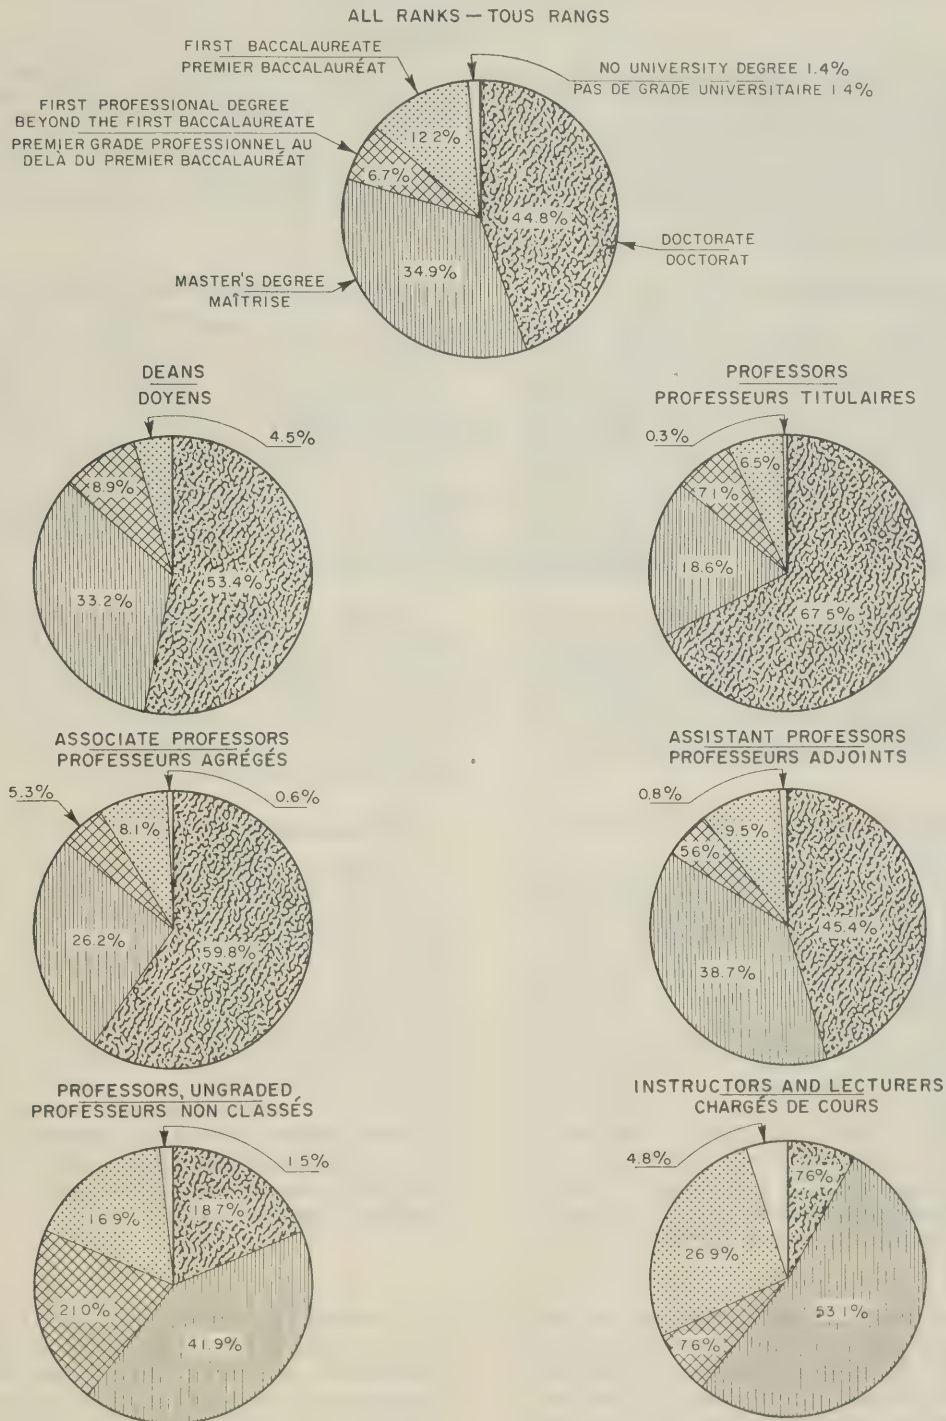

Voici les pourcentages des 10,096 hommes et 1,463 femmes rémunérés à l'échelle laïque, selon les divers grades universitaires (à l'exclusion de 81

PERCENTAGE DISTRIBUTION OF UNIVERSITY TEACHERS
BY HIGHEST EARNED DEGREE, 1965-1966*

RÉPARTITION PROCENTUELLE DES PROFESSEURS D'UNIVERSITÉ
SUIVANT LE PLUS HAUT GRADE UNIVERSITAIRE ACQUIS, 1965-1966*

*DATA FROM TABLE 19. — D'APRÈS LE TABLEAU 19

EXCLUDES STAFF FOR WHOM NO INFORMATION WAS REPORTED — SANS LE PERSONNEL AU SUJET DUQUEL IL N'Y A PAS EU DE RAPPORT

(excluding 81 men and 22 women for whom no information on degrees was reported) was as follows: doctorate 48.3 p.c. of the men and 23.4 p.c. of the women; master's degree, 33.9 p.c. and 45.0 p.c.; first professional degree beyond the first baccalaureate, 6.8 p.c. and 5.6 p.c.; first baccalaureate, 10.0 p.c. and 21.0 p.c.; no university degree, 1.0 p.c. and 5.0 p.c. (See Table 17.)

Field

Division of the 9,125 teachers by field was as follows for 1965-66 (1963-64 percentages shown in parentheses): faculty administration 2.7 p.c. (2.7 p.c.), humanities 24.7 p.c. (23.9 p.c.), social sciences 29.0 p.c. (27.3 p.c.) biological sciences 17.1 p.c. (18.0 p.c.), and physical sciences 26.5 p.c. (28.1 p.c.). (See Table 18.)

Teacher-student Ratio (Table 25)

Estimated total enrolment of full-time undergraduate and graduate students, 1965-66 in the 76 institutions on which this report is based was 174,628. If this figure is compared with that of the 12,085 teachers with ranks of instructor and lecturer or higher reported as being full-time, it would appear that for all institutions included in this survey the ratio of such teachers to students was 1:14.5 (1:14.5 in 1963-64). Region variations were between 1:12.3 in Ontario and 1:16.0 in Quebec.

As it is known that a certain number of full-time staff below the rank of instructor or lecturer were omitted in the returns made, and as the teacher-student ratio may vary in those institutions not included, estimates for the total number of full-time teachers in all Canadian institutions have not been made.

Highest Earned University Degree (Table 26)

Of the total of 11,971 persons included in this survey for whom information on degrees was reported, 46.0 p.c. had a doctorate (44.4 p.c. in 1963-64). The percentages of doctorates held by all staff ranged from 52.0 p.c. in Ontario and 47.2 p.c. in the Western Provinces to 34.4 p.c. in Quebec and 33.4 p.c. in the Atlantic Provinces. The Western Provinces had the highest percentage of deans and full professors with doctorates (65.0 p.c. and 71.0 p.c. respectively) while Ontario had the highest percentage of associate professors and assistant professors with a Ph.D. or equivalent degree (66.8 p.c. and 52.7 p.c.). Among lecturers and instructors, the highest percentage of doctorates was in Quebec (9.8 p.c.). (See Table 26.)

About one third of the staff reported with doctorates (34.7 p.c.) or master's degrees (38.3 p.c.) earned them in the five-year period from 1961 to 1965. Although the majority of these persons were new additions to the teaching staff during the five years, others included in this group were older teachers who completed advanced degree requirements either while on leave or in addition to their teaching duties. (See Table 16 A.)

hommes et de 22 femmes dont les données relatives aux grades ne sont pas disponibles): doctorat, 48.3 p. 100 des hommes et 23.4 p. 100 des femmes; maîtrise, 33.9 et 45.0 p. 100; premier grade professionnel au-delà du premier baccalauréat, 6.8 et 5.6 p. 100; premier baccalauréat, 10.0 et 21.0 p. 100; aucun grade universitaire, 1.0 et 5.0 p. 100. (Voir tableau 17.)

Domaine

Voici la répartition procentuelle des 9,125 professeurs en 1965-66, selon le domaine: administration de faculté, 2.7 (2.7 en 1963-64); humanités, 24.7 (23.9); sciences sociales, 29.0 (27.3); sciences biologiques, 17.1 (18.0); et sciences physiques, 26.5 (28.1). (Voir tableau 18.)

Rapport professeurs étudiants (tableau 25)

Le nombre total d'étudiants sous-diplômés et diplômés à plein temps dans les 76 institutions observées ici était d'environ 174,628 en 1965-66. Si l'on compare ce chiffre aux 12,085 personnes à plein temps qui ont au moins le rang de chargés de cours, il semble que pour l'ensemble des institutions observées il y avait un professeur pour 1:14.5 étudiants (1:14.5 en 1963-64). La proportion variait de 1:12.3 en Ontario à 1:16.0 au Québec.

Comme on sait qu'un certain nombre de professeurs à plein temps de rang inférieur à celui de chargé de cours ont été omis dans les réponses et que le rapport des professeurs aux étudiants peut varier dans les institutions omises, on n'a pas estimé le nombre total de professeurs à plein temps dans toutes les institutions canadiennes.

Plus haut grade universitaire obtenu (tableau 26)

Sur les 11,971 professeurs observés, 46.0 p. 100 avaient un doctorat (44.4 p. 100 en 1963-64). Les pourcentages de doctorats détenus par tout le personnel variaient de 52.0 en Ontario et 47.2 dans les provinces de l'Ouest à 34.4 p. 100 au Québec et 33.4 dans les provinces Atlantiques. Les provinces de l'Ouest avaient le plus fort pourcentage de doctorats chez les doyens et les professeurs titulaires (65.0 et 71.0 p. 100 respectivement) et l'Ontario avait le plus haut pourcentage de doctorats chez les professeurs agrégés et les professeurs adjoints (66.8 et 52.7 p. 100). Le plus haut pourcentage de doctorats chez les chargés de cours (9.8) a été marqué au Québec. (Voir tableau 26.)

Environ le tiers du personnel ayant un doctorat (34.7 p. 100) ou une maîtrise (38.3 p. 100) les ont obtenus dans une période de cinq ans, soit de 1961-65. Bien que la majorité d'entre eux fussent de nouvelles recrues à l'enseignement durant les cinq années, les autres comprenaient des professeurs plus âgés qui ont répondu aux exigences en vue d'un grade supérieur soit à la faveur d'un congé ou pendant qu'ils enseignaient. (Voir tableau 16 A.)

Les notes sont données après ce tableau.

NOTES RELATED TO TABLES

¹ Including lay teachers, and religious teachers paid on the same scale as lay teachers.

² Data included for 76 institutions:

Atlantic Provinces

Memorial University of Newfoundland, St. John's
St. Dunstan's University, Charlottetown
Nova Scotia Technical College, Halifax
Dalhousie University, Halifax
University of King's College, Halifax
Mount Saint Vincent College, Halifax
Acadia University, Wolfville
St. Francis Xavier University, Antigonish
St. Mary's University, Halifax
Université de Moncton, Moncton
Mount Allison University, Sackville
St. Thomas' University, Chatham
University of New Brunswick, Fredericton
Collège de Bathurst, Bathurst

Quebec

Séminaire de Rimouski, Rimouski
Séminaire de Chicoutimi, Chicoutimi
Collège de Lévis, Lévis
Université Laval, Québec
Séminaire de Québec, Québec
Externat Classique St-Jean-Eudes, Québec
Bishop's University, Lennoxville
Université de Sherbrooke, Sherbrooke
Université de Montréal, Montréal
École Polytechnique, Montréal
Collège Jean-de-Bréboeuf, Montréal
Collège Sainte-Marie, Montréal
Faculté de Commerce (Laval), Québec
Collège St-Paul, Montréal
McGill University, Montréal
Sir George Williams University, Montréal
Collège de Rouyn, Rouyn
Séminaire St-Joseph, Mont-Laurier
Loyola College, Montréal
Marianopolis College, Montréal
Collège de Saint-Laurent, Ville Saint-Laurent
Institut Marguerite d'Youville, Montréal
École d'optométrie, Montréal

Ontario

Université d'Ottawa, Ottawa
Carleton University, Ottawa
Queen's University at Kingston, Kingston
Royal Military College, Kingston
University of Toronto, Toronto
Victoria University, Toronto
Trinity College, Toronto
St. Michael's College, Toronto
Osgoode Hall Law School, Toronto
McMaster University, Hamilton
McMaster Divinity College, Hamilton
University of Guelph
University of Western Ontario, London
University of Windsor, Windsor
York University, Toronto
Ontario College of Education, Toronto
Laurentian University of Sudbury, Sudbury
University of Waterloo, Waterloo
Waterloo Lutheran University, Waterloo
Lakehead College of Arts, Science and Technology, Port Arthur
Brock University, St. Catharines
Trent University, Peterborough
Ontario College of Optometry, Toronto

NOTES CONCERNANT LES TABLEAUX

¹ Sont compris les professeurs laïcs et les professeurs religieux rémunérés à l'égal des laïcs.

² Chiffres portant sur 76 institutions:

Provinces Atlantiques

Memorial University of Newfoundland, St. John's
St. Dunstan's University, Charlottetown
Nova Scotia Technical College, Halifax
Dalhousie University, Halifax
University of King's College, Halifax
Mount Saint Vincent College, Halifax
Acadia University, Wolfville
St. Francis Xavier University, Antigonish

Western Provinces

Brandon College, Brandon
 University of Manitoba, Winnipeg
 St. John's College, Winnipeg
 St. Paul's College, Winnipeg
 United College, Winnipeg
 University of Saskatchewan, Saskatoon
 St. Thomas More College, Saskatoon
 University of Alberta, Edmonton
 University of Alberta, Calgary
 University of British Columbia, Vancouver
 University of Victoria, Victoria
 Lethbridge Junior College, Lethbridge
 Camrose Junior College, Camrose
 Red Deer Junior College, Red Deer
 Manitoba Law School, Winnipeg
 Notre Dame University of Nelson, Nelson

⁸ Excluding associate deans, assistant deans, directors of schools and institutes. Including some principals of constituent colleges.

⁴ Including (when holding the rank of professor) associate deans, assistant deans, directors of schools and institutes.

⁵ In some small colleges the ranks of associate professor and assistant professor are not used; all above the rank of lecturer or instructor are classed as professors.

⁶ The median salary was not calculated if the number of persons in any distribution was less than 10, or unless there were more than 2 institutions in a distribution. As a result, per cent increases for such distributions could not be calculated. Quartiles were not calculated unless the number of persons in any distribution was 30 or more.

⁷ Including all deans, and others concerned primarily with faculty administration.

⁸ Excluding deans, and others concerned primarily with faculty administration.

⁹ Institutions included: **West**—British Columbia, Alberta, Saskatchewan, Manitoba; **Central**—Western Ontario, McMaster, Toronto, Victoria, Trinity, Queen's, McGill, Bishop's; **Maritimes**—New Brunswick, Mount Allison, St. Francis Xavier, Acadia, Dalhousie. Part-time teachers and religious teachers paid on a scale less than that applying to lay staff have been excluded.

¹⁰ Includes 36 ungraded professors not included elsewhere (2 in the Atlantic Provinces, 24 in Central Canada, and 10 in the West).

¹¹ Excluding religious teachers paid on the same scale as lay teachers. Data included for 28 institutions.

¹² For those receiving some allowance, i.e. excluding those reported as receiving no allowance.

¹³ This footnote has been deleted in this edition.

¹⁴ In cases where there were 1 or 2 in one group, detail of the distribution is not shown.

¹⁵ Including letters, social science, Islamic studies, mediaeval studies.

¹⁶ Including faculties teaching both pure and applied science.

¹⁷ Including psychology and education combined, and child study.

¹⁸ Including medical research, medical technology.

¹⁹ Including canon law.

²⁰ Including faculties or schools of fine and applied arts, forestry, hygiene and public health, journalism, library science, philosophy, secretarial science, veterinary science and graduate studies.

²¹ History and appreciation—including art, archaeology, architecture, drama, music.

Provinces de l'Ouest

Brandon College, Brandon
 University of Manitoba, Winnipeg
 St. John's College, Winnipeg
 St. Paul's College, Winnipeg
 United College, Winnipeg
 University of Saskatchewan, Saskatoon
 St. Thomas More College, Saskatoon
 University of Alberta, Edmonton
 University of Alberta, Calgary
 University of British Columbia, Vancouver
 University of Victoria, Victoria
 Lethbridge Junior College, Lethbridge
 Camrose Junior College, Camrose
 Red Deer Junior College, Red Deer
 Manitoba Law School, Winnipeg
 Notre Dame University of Nelson, Nelson

³ Ne sont pas compris les vice-doyens, les directeurs d'écoles et d'instituts. Sont compris quelques directeurs de collèges constituants.

⁴ Sont compris (s'ils ont le rang de professeur titulaire) les vice-doyens, les directeurs d'écoles et d'instituts.

⁵ Dans quelques petits collèges, le rang de professeur agrégé et celui de professeur adjoint n'existent pas; tous sont classés professeurs s'ils ne sont pas simplement chargés de cours.

⁶ Le traitement médian n'a pas été calculé lorsqu'une série comprenait moins de 10 personnes ou à moins qu'elle ne comptât plus de 2 institutions. Il en résulte que les augmentations procentuelles relatives à ces répartitions n'ont pu être calculées. Les quartiles ne sont pas calculés là où, dans une répartition le nombre de personnes est de 30 ou plus.

⁷ Sont compris tous les doyens et les autres personnes s'occupant avant tout de l'administration de la faculté.

⁸ Ne sont pas compris les doyens ni les autres personnes s'occupant avant tout de l'administration de la faculté.

⁹ Voici les institutions intéressées: **Ouest**—British Columbia, Alberta, Saskatchewan, Manitoba; **Centre**—Western Ontario, McMaster, Toronto, Victoria, Trinity, Queen's, McGill, Bishop's; **Maritimes**—New Brunswick, Mount Allison, St. Francis Xavier, Acadia, Dalhousie. On a exclu les professeurs à temps partiel et les professeurs religieux dont l'échelle de traitements était inférieure à celle du personnel laïc.

¹⁰ Comprend 36 professeurs non classés, non inclus ailleurs (2 dans les provinces Atlantiques, 24 dans le centre du Canada et 10 dans l'Ouest).

¹¹ Ne sont pas compris les professeurs religieux rémunérés à l'égal des laïcs. Chiffres portant sur 28 institutions.

¹² Pour ceux qui reçoivent une allocation c.-à-d. sans ceux déclarés comme ne recevant aucune allocation.

¹³ Ce renvoi a été supprimé de la présente édition.

¹⁴ La ventilation n'est pas faite quant le groupe ne comprend qu'un ou deux professeurs.

¹⁵ Y compris lettres, sciences sociales, études islamiques, études médiévales.

¹⁶ Y compris les facultés de sciences pures et appliquées.

¹⁷ Y compris la psychologie et la pédagogie réunies, et la psychologie de l'enfant.

¹⁸ Y compris recherche médicale, technologie médicale.

¹⁹ Y compris droit canonique.

²⁰ Y compris les facultés et les écoles de beaux-arts et d'arts appliqués, de sylviculture, d'hygiène et de santé publique, de journalisme, de bibliothéconomie, de philosophie, de science secrétariale, de science vétérinaire et d'études supérieures.

²¹ Histoire et appréciation—y compris art, archéologie, architecture, théâtre, musique.

Western Provinces — Concluded

- ²² Including Greek, Latin, mediaeval literature, oriental languages.
- ²³ Including Russian, Spanish, Italian, Portuguese, Icelandic, such combinations as modern languages, romance languages, Slavic languages, and also letters and linguistics.
- ²⁴ Including ethics, logic, natural theology.
- ²⁵ Including East Asiatic studies, Islamic studies, Slavic studies, religion, Asian studies, Celtic studies, Near Eastern studies.
- ²⁶ Including drama, elocution.
- ²⁷ Including journalism, library science.
- ²⁸ Economics and political science combined.
- ²⁹ Including accounting, industrial relations.
- ³⁰ Including child study.
- ³¹ Including dietetics.
- ³² Including secretarial science, public administration.
- ³³ Including anatomy, histology, embryology, entomology, palaeontology, physiology.
- ³⁴ Including botany and zoology combined as biology, and also genetics, natural history.
- ³⁵ Including medical technology.
- ³⁶ Including rehabilitation.
- ³⁷ Including forestry, hygiene and public health, veterinary science, optometry.
- ³⁸ Including biochemistry.
- ³⁹ Including mineralogy.
- ⁴⁰ Including astronomy, geodesy, statistics.
- ⁴¹ Including biophysics, geophysics, mathematical physics.
- ⁴² Including town planning.
- ⁴³ Including agricultural engineering, architectural engineering, forest engineering, structural engineering.
- ⁴⁴ Including geological engineering, metallurgical engineering, petroleum engineering.
- ⁴⁵ Including aerophysics, applied mathematics, applied physics.
- ⁴⁶ Comparable data for 1956-57 not available.
- ⁴⁷ Excluding M.D., D.D.S., D.V.M.
- ⁴⁸ Including licence.
- ⁴⁹ Including M.D., D.D.S., D.V.M. and second baccalaureate.
- ⁵⁰ Including first professional degree if it is the first baccalaureate.
- ⁵¹ Excludes staff with no degree.
- ⁵² Including both lay and religious teachers.
- ⁵³ Data included for all 68 institutions listed in Note 2.
- ⁵⁴ Excludes staff for whom no information was reported.
- ⁵⁵ Excludes staff with no degree and staff for whom no information was reported and hence totals do not equal those in Table 18.
- ⁵⁶ Less than 1 year.
- ⁵⁷ Estimated, for institutions included in this survey, on basis of returns made as of December 1 together with enrolments reported in the salary survey.

Provinces de l'Ouest — fin

- ²² Y compris le grec, le latin, la littérature médiévale et les langues orientales.
- ²³ Y compris le russe, l'espagnol, l'italien, le portugais, l'islandais, les groupements tels que les langues modernes, les langues romanes, les langues slaves, les lettres et la linguistique.
- ²⁴ Y compris morale, logique, théologie naturelle.
- ²⁵ Y compris études oriento-asiatiques, études islamiques, études slaves, religion, études asiatiques, études celtiques, études du Proche-Orient.
- ²⁶ Y compris théâtre, élocution.
- ²⁷ Y compris journalisme, bibliothéconomie.
- ²⁸ Sciences économiques et science politique réunies.
- ²⁹ Y compris comptabilité, relations industrielles.
- ³⁰ Y compris psychologie de l'enfant.
- ³¹ Y compris diététique.
- ³² Y compris science secrétariale, administration publique.
- ³³ Y compris anatomie, histologie, embryologie, entomologie, paléontologie, physiologie.
- ³⁴ Y compris botanique et zoologie réunies sous biologie, et aussi génétique et histoire naturelle.
- ³⁵ Y compris technologie médicale.
- ³⁶ Y compris réhabilitation.
- ³⁷ Y compris sylviculture, hygiène et santé publique, science vétérinaire, optométrie.
- ³⁸ Y compris biochimie.
- ³⁹ Y compris minéralogie.
- ⁴⁰ Y compris astronomie, géodésie, statistique.
- ⁴¹ Y compris biophysique, géophysique, physique mathématique.
- ⁴² Y compris urbanisme.
- ⁴³ Y compris génie agricole, génie architectural, génie forestier, génie des charpentes.
- ⁴⁴ Y compris génie géologique, génie métallurgique, génie pétrolier.
- ⁴⁵ Y compris aérophysique, mathématiques appliquées, physique appliquée.
- ⁴⁶ Données comparables pour 1956-1957 non disponibles.
- ⁴⁷ Non compris M.D., D.D.S., D.M.V.
- ⁴⁸ Y compris licence.
- ⁴⁹ Y compris M.D., D.D.S., D.M.V. et second baccalauréat.
- ⁵⁰ Y compris premier grade professionnel s'il s'agit du premier baccalauréat.
- ⁵¹ A l'exclusion du personnel sans grade.
- ⁵² Y compris les professeurs laïcs et religieux.
- ⁵³ Données portant sur les 68 institutions énumérées à la note 2.
- ⁵⁴ Sans le personnel au sujet duquel il n'y a pas eu de rapport.
- ⁵⁵ Ne comprend pas les professeurs sans grade, ni le personnel au sujet duquel il n'y a pas eu de rapport; c'est pourquoi les totaux ne correspondent pas à ceux du tableau 18.
- ⁵⁶ Moins d'un an.
- ⁵⁷ Estimation portant sur les institutions étudiées dans le présent rapport et fondée sur les déclarations du 1^{er} décembre, ainsi que sur les inscriptions déclarées au cours de l'enquête sur les traitements.

PUBLICATIONS COURANTES DE LA DIVISION DE L'ÉDUCATION

Hiver, 1968 - 69

Les personnes qui désirent recevoir l'avis des nouvelles publications sont priées d'écrire à la Division de l'éducation, B.F.S.

SALARIES AND QUALIFICATIONS OF TEACHERS IN UNIVERSITIES AND COLLEGES

TRAITEMENTS ET QUALIFICATION DES PROFESSEURS DES UNIVERSITIÉS ET COLLÈGES

1966-67

INTRODUCTION

Since 1937-38 DBS has surveyed annually a group of 17 universities and colleges and has reported limited salary data on these institutions. For 1966-67 the number has been increased to 19¹ with the addition of the University of Calgary and the Ontario Institute for Studies in Education. DBS is now issuing a detailed report on salaries and qualifications of university teachers every two years. The next detailed report is planned for 1967-68.

Persons interested in salary trends since 1937-38 should consult the DBS publication "University Teachers' Salaries, 1937-1960" for more detail of salary distributions for those years. Details of salary distributions at the 17 institutions for the years after 1959-60 appear in appropriate tables of the annual "Salaries and Qualifications of Teachers in Universities and Colleges". Tables 5 and 6 in the present publication repeat historical data on median salaries and staff numbers that were included in the above-noted publications, while Charts 1 and 2 present these data in graphic form.

Review of 1966-67 Data

Salaries

The median salary for all academic ranks at the 19 institutions showed an increase of 9.0 per cent from 1965-66 to 1966-67, as compared with 6.0 per cent increase from 1964-65 to 1965-66. The 1966-67 median for deans was \$20,107 (up 8.4 per cent over 1965-66), for full professors \$16,201 (8.1 per cent), for associate professors \$12,345 (8.0 per cent), for assistant professors \$9,629 (7.5 per cent), and for lecturers and instructors \$7,604 (6.2 per cent). For all full-time teaching staff at the 19 institutions, including a group of 64 ungraded professors, the 1966-67 median was \$11,175, up 9.0 per cent over the figure of \$10,250 for 1965-66, 15.6 per cent over the 1964-65 median of \$9,668, and 22.8 per cent over the median of \$9,103 for 1963-64.

The median salary for all staff included from institutions in the Atlantic Provinces was \$9,844 (up 10.6 per cent from 1965-66), in Central Canada \$11,419 (11.0 per cent), and in the Western Provinces \$11,219 (6.0 per cent). Since 1963-64 median salaries have risen by 24.3 per cent in the Atlantic Provinces, 20.8 per cent in Central Canada, and 24.0 per

Depuis 1937-38, le B.F.S. a recensé annuellement un groupe de 17 universités et collèges et a publié des données limitées sur les traitements accordés dans ces institutions. En 1966-67, le nombre d'institutions observées a augmenté à 19¹ avec l'addition de l'Université de Calgary et de l'*Ontario Institute for Studies in Education*. Le B.F.S. publie maintenant un rapport détaillé sur les traitements et qualification des professeurs d'université tous les deux ans. Le prochain rapport détaillé est censé paraître en 1967-68.

Les personnes intéressées à la courbe des traitements depuis 1937-38 voudront bien consulter la publication du B.F.S. intitulée "Traitements des professeurs d'université, 1937-1960" afin d'obtenir plus de détails sur la répartition des traitements durant ces années. Les détails relatifs à la répartition des traitements dans les 17 institutions pour les années postérieures à 1959-60 paraissent dans les tableaux appropriés du rapport annuel intitulé "Traitements et qualification des professeurs des universités et collèges". Les tableaux 5 et 6 de la présente publication donnent de nouveau les données chronologiques concernant les traitements médians et le personnel qui ont figuré dans les publications précitées, tandis que les graphiques 1 et 2 donnent ces données sous une forme graphique.

Revue des données de 1966-67

Traitements

Les traitements médians des professeurs à tous les échelons dans les 19 institutions ont marqué une augmentation de 9 p. 100 de 1965-66 à 1966-67, au regard d'une augmentation de 6 p. 100 de 1964-65 à 1965-66. En 1966-67, la médiane des doyens était de \$20,107 (hausse de 8.4 p. 100 sur 1965-66), celle des professeurs titulaires de \$16,201 (8.1 p. 100), celle des professeurs agrégés de \$12,345 (8 p. 100), celle des professeurs adjoints, \$9,629 (7.5 p. 100) et celle des chargés de cours, \$7,604 (6.2 p. 100). Le traitement médian de tout le personnel enseignant à plein temps dans les 19 institutions, y compris un groupe de 64 professeurs non classés, était de \$11,175, hausse de 9 p. 100 sur les \$10,250 de 1965-66, de 15.6 p. 100 sur les \$9,668 de 1964-65 et de 22.8 p. 100 sur les \$9,103 de 1963-64.

Le traitement médian de tout le personnel des institutions des provinces de l'Atlantique était de \$9,844 (hausse de 10.6 p. 100 sur 1965-66), celui des institutions du centre du Canada était de \$11,419 (+11 p. 100) et celui des institutions des provinces de l'Ouest était de \$11,219 (+6 p. 100). Depuis 1963-64 les traitements médians ont augmenté de 24.3 p. 100 dans les

¹ Institutions included:

Atlantic Provinces:

Acadia, Dalhousie, St. Francis Xavier, Mount Allison, New Brunswick;

Central Canada:

Bishop's, McGill, Queen's, Toronto, Trinity, Victoria, McMaster, Western Ontario, Ontario Institute for Studies in Education (included in Toronto prior to 1966-67);

Western Provinces:

Manitoba, Saskatchewan, Alberta, Calgary (included in Alberta prior to 1966-67), British Columbia.

¹ Institutions comprises:

Provinces de l'Atlantique:

Acadia, Dalhousie, St. Francis Xavier, Mount Allison, Nouveau-Brunswick;

Canada central:

Bishop's, McGill, Queen's, Toronto, Trinity, Victoria, McMaster, Western Ontario, Ontario Institute for Studies in Education (compris avec l'Université de Toronto avant 1966-67);

Provinces de l'Ouest:

Manitoba, Saskatchewan, Alberta, Calgary (compris avec l'Université d'Alberta avant 1966-67), Colombie-Britannique.

cent in the Western Provinces. Although these percentage increases were comparable, median salaries for institutions in the Atlantic Provinces remained appreciably lower than those for the other two regions.

One main reason for the high percentage increase in median salaries from 1965-66 to 1966-67 was the fact that all institutions increased salary scale floors for 1966-67 for the ranks of full professor and associate professor, and all but two increased their floors for assistant professors. Of the institutions included from Central Canada and the Western Provinces for 1966-67, all but two had floors of at least \$14,000 for full professors, all but one \$10,500 or more for associate professors, and all but two had at least \$8,200 for assistant professors.

For 1966-67, the universities reporting the highest floors were Alberta and Calgary for full professors (\$15,225), Saskatchewan for associate professors (\$11,500), and St. Francis Xavier and British Columbia for assistant professors (\$9,000).

Further details on salary scales, and on average salaries and ranges, at about 40 individual institutions may be found in *The CAUT Bulletin*, published by the Canadian Association of University Teachers, 77 Metcalfe St., Ottawa 4, Ontario. Data on 1966-67 scales appeared in the October 1966 issue and on 1966-67 averages and ranges in the February 1967 edition. Similar data for 1965-66 were published in the October 1965 and February 1966 numbers.

Number of Staff

Table 2 indicates the expansion in full-time teaching staff at all but one of the institutions. Data for St. Francis Xavier University have not been included as, in addition to lay staff, this institution has religious staff paid on a lower scale than that applying to lay staff. Data on such religious staff are not included in this report.

The increase in full-time teaching staff at these institutions considered together has kept pace, and indeed has slightly exceeded, the rise in student enrolment since 1961-62. The staff-student ratio, which was 1:14.7 in 1961-62, was 1:13.7 in 1966-67. During this period full-time teaching staff increased by 76.7 per cent while full-time university-grade enrolment increased by 64.2 per cent.

Even for the past two years, when problems of securing staff were thought to be becoming more acute, the increase in staff at these institutions has exceeded the increase in enrolment. Total full-time teaching staff increased 13.8 per cent from 1965-66 to 1966-67 and 28.4 per cent from 1964-65 to 1966-67. The increase in full-time university-grade enrolment at these institutions was slightly less (up 10.1 per cent from 1965-66 to 1966-67 and 22.3 per cent from 1964-65 to 1966-67).

provinces de l'Atlantique, de 20.8 p. 100 dans le Canada central et de 24 p. 100 dans les provinces de l'Ouest. Bien que ces augmentations procen-tuelles puissent soutenir la comparaison, les traitements médians des institutions des provinces de l'Atlantique sont sensiblement moins élevés que ceux des autres régions.

Un des motifs principaux des fortes augmentations procen-tuelles visant les traitements médians de 1965-66 à 1966-67 provient du fait que toutes les institutions ont augmenté en 1966-67, l'échelle des traitements des professeurs titulaires et des professeurs agrégés, et que toutes, sauf deux, ont augmenté le traitement minimum des professeurs adjoints. Parmi les institutions du Canada central et des provinces de l'Ouest, toutes, sauf deux, ont accordé en 1966-67 des traitements minimums d'au moins \$14,000 aux professeurs titulaires, toutes, sauf une, un traitement de \$10,500 ou plus aux professeurs agrégés et toutes, sauf deux, un traitement de \$8,200 aux professeurs adjoints.

En 1966-67, les universités déclarant les minimums les plus élevés sont celles de l'Alberta et de Calgary, dont les professeurs titulaires touchent \$15,225, celle de la Saskatchewan, dont les professeurs agrégés reçoivent \$11,500 et les universités St. Francis Xavier et de la Colombie-Britannique, dont les professeurs adjoints touchent \$9,000.

On trouvera dans l'*ACPU Bulletin* publié par l'Association canadienne des professeurs d'université, 77, rue Metcalfe, Ottawa 4 (Ontario) des détails supplémentaires quant aux échelles et à la moyenne des traitements dans 40 institutions environ. Les chiffres touchant les échelles de traitement de 1966-67 ont paru dans le numéro d'octobre 1966, et ceux visant les moyennes, dans le numéro de février 1967. Des données semblables pour l'année 1965-66 ont paru dans les numéros d'octobre 1965 et de février 1966.

Personnel

Le tableau 2 porte sur l'accroissement du personnel enseignant à plein temps dans toutes ces institutions sauf une. On n'a pas inclus les données de l'Université St. Francis Xavier, vu qu'elle compte, en plus de son personnel laïc, un personnel religieux qui reçoit un traitement inférieur à celui du personnel laïc. Les données concernant le personnel religieux ne figurent pas par conséquent dans le présent rapport.

Le personnel enseignant à plein temps dans ces institutions réunies a augmenté au même rythme et l'a en fait surpassé légèrement, que les inscriptions depuis 1961-62. Le rapport enseignant-étudiants, qui était de 1:14.7 en 1961-62 était de 1:13.7 en 1966-67. Dans l'intervalle, il a augmenté de 76.7 p. 100, tandis que les inscriptions universitaires ont augmenté de 64.2 p. 100.

Même au cours des deux dernières années, où l'on croyait que le problème du recrutement des professeurs s'aggravait, l'augmentation des effectifs enseignants dans ces institutions a surpassé celle des inscriptions. Le nombre d'enseignants à plein temps s'est accru de 13.8 p. 100 entre 1965-66 et 1966-67 et de 28.4 p. 100 entre 1964-65 et 1966-67. L'accroissement du nombre des inscriptions universitaires à plein temps a été un peu moins marqué, atteignant 10.1 p. 100 de 1965-66 à 1966-67 et 22.3 p. 100 de 1964-65 à 1966-67.

PREFACE

This eight in the series of detailed reports on salaries and qualifications of Canadian university teachers has again been planned in consultation with the Canadian Association of University Business Officers, the Canadian Association of University Teachers, the Association of Universities and Colleges of Canada and other interested agencies. The data were supplied by university and college business officers. Their assistance is greatly appreciated.

Similar reports were issued for 1956-57, 1957-58, 1958-59, 1960-61, 1962-63, 1963-64 and 1965-66. For 1959-60 a survey covering 17 institutions was published, which in addition provided data for these same 17 institutions from 1937-38. Table 2 in this publication gives summary data from 1943-44 to 1967-68 for these 17 institutions.

As well as being used by the Pay Research Bureau, data collected for the DBS university salary survey are also used in reports issued by the National Research Council and by the Canadian Association of University Teachers.

The present report shows the relationship between salary and rank, faculty, field, subject, region, size of institution, control of institution, highest earned university degree, and years since award of first and highest earned degree for 65 institutions. In a number of the cross-classifications, data are given separately for men and women. There are, as well, figures on the age of university teachers, related to rank, field, subject and highest degree.

Questions concerning the content of this publication or suggestions for further analyses should be sent to Mr. N. LeSeelleur Acting Director, or Mr. Pierre Boulet, Chief of the Higher Education Section, Education Division.

WALTER E. DUFFETT,

Dominion Statistician.

PRÉFACE

Le présent rapport est le huitième d'une série de rapports détaillés sur les traitements et la qualification des professeurs des universités canadiennes. Cette fois encore, il a été rédigé avec le concours de l'Association canadienne du personnel administratif universitaire, de l'Association canadienne des professeurs d'université, de l'Association des universités et collèges du Canada et d'autres organismes intéressés. Les données proviennent des représentants des universités et collèges et leur collaboration est très appréciée.

Des rapports semblables ont paru pour 1956-57, 1957-58, 1958-59, 1960-61, 1962-63, 1963-64 et 1965-66. Le rapport de 1959-60 comprenait 17 institutions et donnait leurs statistiques chronologiques à partir de 1937-38. Le tableau 2 de la présente publication donne les chiffres récapitulatifs de ces 17 institutions de 1943-44 à 1967-68.

En plus de servir au Bureau d'étude des traitements, les données recueillies pour l'enquête du B.F.S. sur les traitements universitaires servent aussi aux rapports publiés par le Conseil national de recherches et l'Association canadienne des professeurs d'université.

Le présent rapport indique la relation entre les traitements et le rang professoral, la faculté, la discipline choisie, la matière, la région, l'importance de l'institution et sa direction, le plus haut grade universitaire obtenu et les années depuis l'obtention du premier et du dernier grade à l'égard de 65 institutions. Certains tableaux donnent une ventilation selon le sexe. D'autres établissent la relation entre l'âge des professeurs d'université et leur rang professoral, la discipline, la matière et le plus haut grade.

Toute question relative au contenu de la présente publication ou toute proposition d'analyses supplémentaires doit être adressée à M. N. LeSeelleur, directeur suppléant, ou à M. Pierre Boulet, chef de la Section de l'enseignement supérieur, Division de l'éducation.

WALTER E. DUFFETT,

Statisticien fédéral.

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

.. figures not available.

... figures not appropriate or not applicable.

— nil or zero.

n.e.c. not elsewhere classified.

SIGNES CONVENTIONNELS

Voici la signification des signes conventionnels employés dans les tableaux du présent rapport:

.. nombres indisponibles.

... n'ayant pas lieu de figurer.

— néant ou zéro.

n.d.a. non dénommé ailleurs.

HIGHLIGHTS

The median salary for staff paid at rates applicable to lay teaching personnel (all medians used in these "highlights" refer to this group) was \$11,403 for all full-time staff included in the 1967-68 survey. Medians by rank ranged from a high of \$20,979 for deans to \$7,990 for lecturers and instructors.

The median salary for men in 1967-68 was \$11,777, higher by \$2,495 than that for women.

Median regional salaries, 1967-68 for all staff surveyed were for the Western Provinces (\$11,596), Ontario (\$11,844), Quebec (\$11,196) and the Atlantic Provinces (\$10,027).

The median salary tended to decrease as size of institution decreased. For all staff at institutions with 5,000 and over full-time students it was \$12,018 in 1967-68. The median for institutions with enrolments of 2,000 to 4,999 was \$10,591, for those with 1,000 to 1,999 students \$10,145, 500 to 999 students \$10,050 and for institutions with less than 500 full-time students \$11,208.

The median salary for staff at state (provincial or federal) institutions was \$11,836 in 1967-68, \$11,535 for all independent institutions, with the median for church-related institutions being \$10,188. Since 1956-57, the medians for state and independent institutions have been quite close and have been considerably higher than the median for church-related institutions.

As in past years, the median salary for staff in the biological sciences (including medicine) was higher than that for other teaching fields. This 1967-68 median, \$12,764 may be compared with other teaching fields: e.g. \$11,892 for the physical sciences, \$11,204 for the social sciences, and \$10,139 for the humanities. The median for those engaged primarily in faculty administration was \$20,077.

In 1967-68, of the total of 16,703 teachers included from 65 reporting institutions, 86.6 p.c. were men. In 1957-58, 89.3 p.c. of a total of 4,881 staff members included from 58 reporting institutions were men.

Full-time staff at a selected group of 17 institutions from 1956-57 to 1967-68 increased 206.1 p.c., from 2,979 to 9,119. The increase from 1965-66 to 1967-68 was 28.9 p.c., or from 7,074 to 9,119.

FAITS SAILLANTS

Le traitement médian du personnel rémunéré au barème des laïcs (toutes les médianes de ces faits saillants réfèrent à ce groupe) était de \$11,403 pour tout le personnel à plein temps inclus dans le relevé de 1967-68. Les médianes selon le rang professoral ont varié de \$20,979 pour les doyens à \$7,990 pour les chargés de cours.

Le traitement médian des hommes en 1967-68 était de \$11,777 soit \$2,495 de plus que celui des femmes.

Les traitements médians régionaux, en 1967-68, de tout le personnel observé étaient dans les provinces de l'Ouest (\$11,596), en Ontario (\$11,844), au Québec (\$11,196) et dans les provinces Atlantiques (\$10,027).

Le traitement médian diminuait au même rythme que l'importance de l'institution. Dans les institutions comptant 5,000 étudiants et plus à plein temps, la médiane de tout le personnel était de \$12,018 en 1967-68, dans les institutions de 2,000 à 4,999 étudiants, elle était de \$10,591, dans celles de 1,000 à 1,999 étudiants, de \$10,145, dans celles de 500 à 999 étudiants, de \$10,050, et dans celles de moins de 500 étudiants à plein temps, de \$11,208.

Dans les institutions provinciales ou fédérales, le traitement médian était de \$11,836 en 1967-68 soit un peu plus élevé que la médiane de toutes les institutions indépendantes \$11,535, et celui des institutions religieuses, de \$10,188. Depuis 1956-57, les médianes des institutions d'État et indépendantes ont été assez semblables et ont surpassé considérablement celle des institutions religieuses.

Comme dans le passé, le traitement médian du personnel des sciences biologiques (y compris la médecine) a été plus élevé que celui du personnel des autres disciplines. La médiane de 1967-68, \$12,764 peut être comparée à celles des autres disciplines: e.g. \$11,892 dans les sciences physiques, \$11,204 dans les sciences sociales et \$10,139 dans les humanités. La médiane du personnel préposé surtout à l'administration des facultés était de \$20,077.

En 1967-68, sur les 16,703 instituteurs inclus dans les 65 institutions qui ont fait rapport, 86.6 p. 100 étaient des hommes. En 1957-58, 89.3 p. 100 d'un total de 4,881 dans 58 institutions étaient des hommes.

Le personnel de plein temps d'un groupe de 17 institutions, de 1956-57 à 1967-68 a augmenté de 206.1 p. 100, de 2,979 à 9,119. L'accroissement de 1965-66 à 1967-68 a été de 28.9 p. 100, soit de 7,074 à 9,119.

Some 1.2 p.c. (192 of 16,378) of the 1967-68 staff of all 65 reporting institutions included, were aged 65 or over and 704 (4.3 p.c.) were 60 or over. The median age for all staff reported in this 1967-68 survey was 36 years compared with 41 years for 1956-57.

The median passage of time since the award of the first degree was 13 years for 1967-68 staff. It was 16 years in 1956-57.

Where highest earned university degree for 1967-68 staff members is considered, 46.9 p.c. were reported with doctorates, 31.7 p.c. master's degrees, 7.0 p.c. a first professional degree beyond a first baccalaureate, 10.0 p.c. a first baccalaureate, 2.0 p.c., no university degree and 2.4 p.c., no information. The percentage of staff with doctorates has risen slightly since 1957-58, when it was 41.1 p.c.

Environ 1.2 p. 100 (192 sur 16,378) du personnel de 1967-68 dans les 65 institutions qui ont fait rapport étaient âgés de 65 ans et plus et 704 (4.3 p. 100) de 60 ans et plus. L'âge médian de tout le personnel observé lors du relevé de 1967-68 était de 36 ans (41 ans en 1956-57).

Le nombre médian d'années depuis l'obtention du premier grade était de 13 ans pour le personnel de 1967-68 (16 en 1956-57).

L'examen du plus haut grade universitaire obtenu par le personnel de 1967-68 révèle que 46.9 p. 100 détenaient un doctorat, 31.7 p. 100 une maîtrise, 7.0 p. 100 un premier grade professionnel au delà d'un premier baccalauréat, 10.0 p. 100 un premier baccalauréat, 2.0 p. 100 aucun grade et 2.4 p. 100 sans information. La proportion du personnel ayant un doctorat a augmenté légèrement depuis 1957-58 alors que 41.1 p. 100 étaient docteurs.

INTRODUCTION

Scope of Data

This report is based on questionnaire forms for the 1967-68 academic year sent to 73 universities and colleges. Returns were received from 65 (listed in Note 2, following the last table) with enrolment equalling about 93 p.c. of the total enrolment of full-time undergraduate and graduate students in Canadian institutions of higher education. All but one of the salary tables are limited to data relating to lay teachers and religious teachers paid on the same scale as lay teachers; the exception is Table 3. Tables showing non-salary data include both lay and religious teachers.

Data are presented for a total of 16,703 teachers, all of them full-time and with academic ranks of lecturer or instructor or higher. These include 16,378 in receipt of salaries based on scales applying to lay personnel and 325 religious teachers in receipt of allowances below the scales applying to lay personnel.

Cautions in Interpreting Data

1. Not all Canadian institutions of higher education are included. At the beginning of the 1965-66 academic year there were about 380 institutions offering courses of university grade. Those omitted are almost all small (with less than 500 enrolment) and many of them employ religious personnel paid on a salary scale less than that for lay persons. As nearly as can be determined, all institutions with 1,000 or more full-time university-grade students are included.

2. Figures for the separate years are not strictly comparable as a few institutions are not included for all these years in all tables. The data in Table 2 are comparable.

3. The median is not the arithmetic average, but is the theoretical point in a distribution for which 50 p.c. of the cases are higher and 50 p.c. lower.

4. The range between the 1st and 3rd quartiles includes 50 p.c. of all cases. Thus 25 p.c. are below the 1st quartile and 25 p.c. are above the 3rd.

5. Fluctuations in numbers of institutions by size of enrolment are due in part to movement from one enrolment category to another during the years under review.

6. All salary data refer to basic annual salary rates. Many teachers receive extra income for teaching evening, extension or summer classes, and many earn income from non-university sources. Such extra income was not included in this report.

Portée du rapport

Le présent rapport est basé sur les questionnaires envoyés à 73 universités et collèges pour l'année scolaire 1967-68. Les inscriptions des 65 qui ont répondu (en voir la liste au renvoi 2 après le dernier tableau) représentent environ 93 p. 100 de tous les étudiants à temps plein inscrits aux institutions canadiennes d'enseignement supérieur. A l'exception du tableau 3, tous les tableaux des traitements ne concernent que les professeurs laïcs et les professeurs religieux rémunérés à l'échelle des laïcs. Les tableaux qui n'ont pas trait aux traitements portent sur les professeurs tant laïques que religieux.

Les données se rapportent à 16,703 professeurs, tous à plein temps et ayant au moins le rang de chargé de cours. Sur ce nombre, 16,378 reçoivent un traitement conforme à l'échelle des laïcs et 325 professeurs religieux reçoivent un traitement inférieur à cette échelle.

Interprétation prudente des données

1. Le rapport n'envisage pas toutes les institutions canadiennes d'enseignement supérieur. Au début de l'année scolaire 1965-66, environ 380 institutions donnaient des cours à l'échelon universitaire. La plupart des institutions omises étaient de petites institutions (moins de 500 étudiants); plusieurs d'entre elles employaient des religieux dont l'échelle des traitements était inférieure à celle des laïques. Autant qu'on a pu le constater, toutes les institutions de 1,000 étudiants universitaires à plein temps ou plus sont représentées.

2. Les chiffres des différentes années ne sont pas strictement comparables, car quelques institutions sont omises pour certaines années dans les tableaux. Les données du tableau 2 sont comparables.

3. La médiane n'est pas la moyenne arithmétique mais bien le point théorique d'une série de valeurs dont la moitié sont supérieures et l'autre moitié inférieures à ce point.

4. L'écart entre le 1er et le 3e quartile comprend la moitié de tous les cas, de sorte que le quart des cas sont en-deça du 1er quartile et le quart au-dessus du 3e.

5. La fluctuation du nombre d'institutions selon le nombre des inscriptions tient en partie du passage d'une catégorie d'inscriptions à une autre durant les années observées.

6. Tous les traitements indiqués sont les traitements annuels de base. Plusieurs professeurs augmentent leur revenu en enseignant aux cours du soir, d'extension ou d'été et plusieurs ont un revenu para-universitaire. Ces suppléments ne paraissent pas dans le présent rapport.

Effective Data of Salary Figures Reported

All salary data refer to basic annual salary rates in the fall of 1967.

Medians and the Situation at the End of the Academic Year

Salaries

Information was asked for to the nearest dollar. The salary distributions used in this report are \$1,000 except for data in Table 2 where a \$500 interval was used so that the figures would be consistent with those published in "University Teachers' Salaries, 1937-1960." Medians were calculated to the nearest \$100.

Although salary scales for the ensuing year are generally set prior to the start of that academic year, the medians should relatively accurately reflect the situation at the end of the academic year.

Age

The form used asked for the year of birth of each staff member. In the tables used here, age is considered as that attained by each individual during the calendar year 1967. These ages are grouped in five-year intervals. Thus all persons born in 1904, for example, were 63 years of age some time in 1967, and were all 63 and not yet 64 at the end of the year. These persons would be included in the interval 60-64.

A median or quartile reported as 63, for example, indicates that the point falls anywhere from 63.0 to 63.9 in the distribution.

If one assumes that there was an even distribution of birthdays throughout each month of each year, half of the persons would be, to use 1904 again as an example, 63 years of age at June 30, 1967. It could then be assumed that at December 31, 1967, the median age would be 63.5 years, and at June 30, 1968, 64 years. While the medians were not calculated in this manner in this report, one might add one year to each median year of age given to arrive at approximate figures for the end of the academic year 1967-68, assuming that it is June 30.

Years Since Award of First Degree

Information was requested on the year in which the first degree was obtained. As with age, the number of years was measured in relation to the calendar year 1967, and distributed in five year intervals. Medians and quartiles were calculated in the same manner as were those for age.

If the assumption is made that all degrees were received at regular spring convocations (even if actually some would be received at other times during the year), one year could be added to the medians reported to give the picture at the end of the academic year (June 30).

Date de référence des traitements déclarés

Toutes les données sur les traitements sont basées sur la rémunération annuelle de base en vigueur à l'automne de 1967.

Les médianes et la situation à la fin de l'année scolaire

Traitements

Les traitements, qu'on devait déclarer à un dollar près, sont groupés ici par intervalles de \$1,000, sauf au tableau 2 où on a choisi un intervalle de \$500 pour que les chiffres correspondent à ceux qui ont paru dans "Traitements des professeurs d'université, 1937-1960". On a calculé la médiane à 100 dollars près.

Même si l'échelle des traitements pour l'année à venir est normalement établie avant le commencement de l'année scolaire, les médianes doivent refléter de façon relativement précise la situation à la fin de l'année scolaire.

Âge

Le questionnaire demandait l'année de naissance de chaque membre du personnel. Dans les tableaux, l'âge est celui qu'a atteint chaque individu au cours de l'année civile 1967. Les âges sont groupés par intervalles de cinq ans. Ainsi, les personnes nées en 1904 ont atteint 63 ans en 1967 et, à la fin de l'année, elles avaient toutes 63 ans révolus, mais non encore 64 ans. Ces personnes sont comprises dans le groupe de 60-64 ans.

La médiane ou le quartile de 63, par exemple, indique que le point se situe entre 63.0 et 63.9 dans la série.

Si les dates de naissance se répartissaient également entre les douze mois de chaque année, le moitié des personnes nées en 1904, pour reprendre l'exemple, auraient atteint leur 63^e année le 30 juin 1967. Il en découle qu'au 31 décembre 1967 l'âge médian serait de 63.5 ans et, au 30 juin 1968, de 64 ans. Dans le présent rapport, l'âge médian n'a pas été calculé de cette manière, mais il suffit d'ajouter un an à chaque âge médian indiqué pour avoir l'âge approximatif à la fin de l'année scolaire (30 juin) 1967-68.

Nombre d'années depuis l'obtention du premier grade

L'année d'obtention du premier grade a été demandée. Comme pour l'âge, le nombre d'années a été calculé par rapport à l'année civile 1967, et le classement fait par groupes quinquennaux. Les médianes et quartiles ont été calculés de la même façon que ceux de l'âge.

Si l'on suppose que tous les grades ont été obtenus au printemps (même si certains l'ont été à d'autres époques de l'année), il suffit d'ajouter un an aux médianes indiquées pour connaître la situation à la fin de l'année scolaire (30 juin).

SUMMARY

Salaries (Tables 1-17)

Rank

For the 16,703 university teachers with academic rank, reported as receiving salary at rates applicable to lay personnel, the median salary in 1967-68 was \$11,403, 14.9 p.c. higher than the median for 1965-66. For deans it was \$20,714, for professors \$17,081, for associate professors \$12,998, for assistant professors \$10,228, for ungraded professors \$10,425 and for lecturers and instructors \$7,990. The 1967-68 median for ungraded professors (a small and heterogeneous group) was 28.5 p.c. higher than for 1965-66. For other ranks the increase ranged from 12.4 p.c. for lecturers and instructors to 15.5 p.c. for deans. (See Tables A and 1, and Chart 1.)

Sex

For all ranks combined the median salary for women was \$2,495 lower than that for men. Women were concentrated in the more junior ranks, as will be noted later, and hence the median for them was less. Even for the higher ranks the median for women tended to be lower. However, equality in salaries was closest for the higher ranks. (See Tables 1, 7-11, 12, 17.)

Field

Those engaged primarily in faculty administration (all deans and 84 others were so classified) had a median salary of \$19,933, 17.5 p.c. above that for 1965-66. Of the others, teachers in the biological sciences (including medicine) had the highest median salary—\$12,764 followed by those in the physical sciences—\$11,891, the social sciences—\$11,175, and the humanities—\$10,038. In these four teaching fields, percentage increases ranged from 14.6 p.c. in the biological sciences to 18.9 p.c. in the physical sciences. (See Tables A, 1 and 12, and Chart 1.)

Religious Teachers

The bases on which allowances were reported for religious teachers varied widely. Some figures given were estimates of average expenses, some were amounts actually paid, some were nominal book entries. Data on 325 such teachers show that 54 of them received no allowance. Median allowance for the other 271 was \$8,429 (\$8,060 for men, for women; see footnote 6). The median of allowances reported in 1965-66 was \$2,355, but this figure is not comparable with the 1967-68 median due to different institutions being included in the two years and different methods of reporting the allowances. (See Table 3.)

SOMMAIRE

Traitements (tableaux 1-17)

Rang professoral

Le traitement médian des 16,703 professeurs d'université de rang professoral rémunérés au barème laïc a été de \$11,403 en 1967-68 et dépassait de 14.9 p. 100 la médiane de 1965-66. Il était de \$20,714 pour les doyens, de \$17,081 pour les professeurs titulaires, de \$12,998 pour les professeurs agrégés, de \$10,228 pour les professeurs adjoints, de \$10,425 pour les professeurs non classés et de \$7,990 pour les chargés de cours. La médiane de 1967-68 pour les professeurs non classés (petit groupe hétérogène) était de 28.5 p. 100 supérieure à celle de 1965-66. L'augmentation des autres rangs variait de 12.4 p. 100 pour les chargés de cours à 15.5 p. 100 pour les doyens. (Voir tableaux A et 1, et graphique 1.)

Sexe

Dans l'ensemble des rangs professoraux, le traitement médian des femmes était inférieur de \$2,495 à celui des hommes. Les femmes se trouvaient surtout aux rangs inférieurs, comme on le soulignera plus loin, ce qui a baissé leur médiane; mais même aux rangs supérieurs, le traitement médian des femmes était en général moins élevé. L'égalité de traitement était plus apparente aux rangs les plus élevés. (Voir tableaux 1, 7-11, 12, 17.)

Domaine

Les professeurs qui s'occupaient surtout de l'administration des facultés (tous les doyens et 84 autres) ont touché un traitement médian de \$19,933 une augmentation de 17.5 p. 100 sur 1965-66. Chez les autres, le plus haut traitement médian a été celui des professeurs de sciences biologiques (y compris la médecine), soit \$12,764, venaient ensuite celui des professeurs de sciences physiques, \$11,891, des sciences sociales, \$11,175 et des humanités, \$10,038. Dans ces quatre domaines, l'augmentation procentuelle allait de 14.6 dans les sciences biologiques à 18.9 p. 100 dans les sciences physiques. (Voir tableaux A, 1 et 12 et graphique 1.)

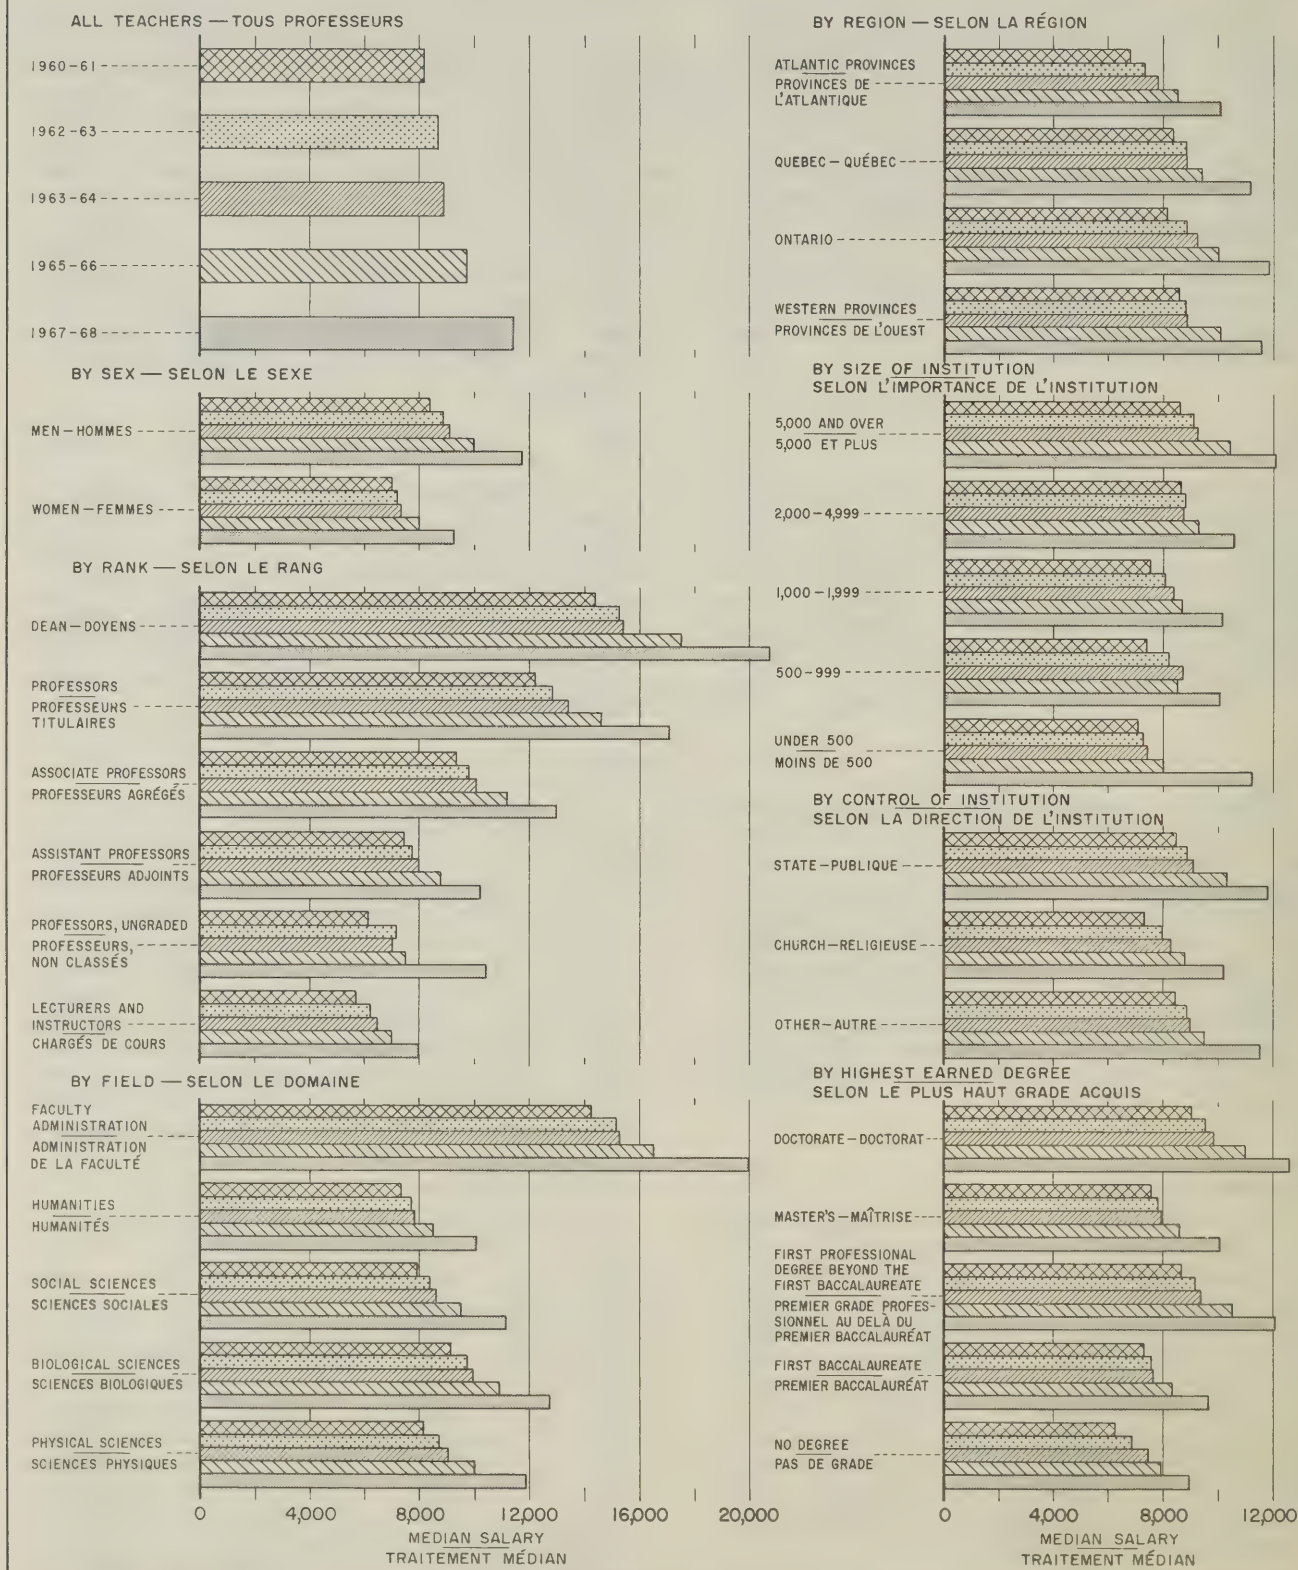

Professeurs religieux

La rémunération des professeurs religieux a été déclarée selon des fondements très variés. Certains chiffres étaient des estimations des dépenses moyennes, d'autres donnaient le montant effectivement payé et d'autres étaient un poste purement comptable. Les données sur 325 professeurs indiquent que 54 d'entre eux ne recevaient pas de rémunération. La rémunération médiane des 271 autres était de \$8,429 (\$8,060 pour les hommes, pour les femmes voir renvoi 6). En 1965-66, cette médiane était de \$2,355 mais ce chiffre n'est pas comparable à la médiane de 1967-68 parce que des institutions différentes ont été incluses pendant ces deux années et que des méthodes différentes ont servi à déclarer la rémunération. (Voir tableau 3.)

CHART - I

GRAPHIQUE - I

MEDIAN SALARIES OF UNIVERSITY TEACHERS, 1960-61 TO 1967-68 TRAITEMENTS MÉDIANS DES PROFESSEURS D'UNIVERSITÉ, 1960-61 À 1967-68

Historical Comparisons

The DBS publication "University Teachers' Salaries, 1937-1960," allows historical comparisons to be made of median salaries paid in 17 major institutions. The median for all ranks in this group for 1967-68 was \$12,063 (\$1,813 higher than for all personnel included in the present report). (See Table 2 and Chart 2.)

Region

For 1965-66, median salaries of all staff included from Western Provinces, Ontario, Quebec and the Atlantic Provinces were \$10,100, \$10,000, \$9,400 and \$8,500, respectively. The highest median in 1967-68 was for Ontario (\$11,844), the Western Provinces at (\$11,596), Quebec (\$11,196) and the Atlantic Provinces (\$10,027). Comparing the 1967-68 and 1965-66 medians, the increase for Quebec was 16.0 p.c., for Ontario, 15.5 p.c., for the Atlantic Provinces, 15.2 p.c. and for the Western Provinces, 12.9 p.c. (See Tables A, 4 and 13, and Chart 1.)

Size of Institution

Fourteen institutions in 1967-68 had full-time enrolments of over 5,000. The 2,000-4,999 category decreased in 1967-68 to 15 institutions from 17 in 1965-66, while 8 institutions with 1,000-1,999 students were included in 1967-68 as compared with 7 in 1965-66. The number of institutions with 500-999 students decreased from 16 to 14 from 1965-66 to 1967-68 and 14 institutions in 1967-68 reported less than 500 students as contrasted with 27 in 1965-66.

In 1965-66, the median for all staff combined was highest for the 5,000 and over group (\$12,018 in 1967-68). Next highest for 1967-68 was the 500 or less group (\$11,208) followed by the 2,000-4,999 category (\$10,591). Next were institutions with 1,000-1,999 students (\$10,145) and finally institutions with 500 to 999 students (\$10,050).

Increases from 1965-66 to 1967-68 for all ranks combined ranged from 12.2 p.c. for institutions with 2,000-4,999 students to 28.6 p.c. for institutions with less than 500 students. (See Tables A, 5 and 14, and Chart 1.)

Control of Institution

Since the first survey 1956-57, medians for all staff combined, at independent and at state institutions have been higher than the medians for church-related institutions. This situation again prevailed for 1967-68, the median for state institutions (\$11,836) being higher than that for independent institutions (\$11,535). The median for church related institutions was (\$10,188).

Comparaisons chronologiques

La publication du B.F.S., "Traitements des professeurs d'université, 1937-1960", permet de comparer chronologiquement les traitements médians dans 17 grandes institutions. La médiane de tous les rangs professoraux de ce groupe, en 1967-68, a été de \$12,063 (\$1,813 de plus que celle de tout le personnel compris dans le présent rapport. (Voir tableau 2 et graphique 2.)

Région

En 1965-66, les traitements médians de tout le personnel (compris dans le présent rapport) des provinces de l'Ouest, de l'Ontario, du Québec et des provinces Atlantiques étaient de \$10,100, \$10,000, \$9,400 et \$8,500 respectivement. La médiane la plus élevée en 1967-68 était celle de l'Ontario (\$11,844), légèrement supérieure à celle des provinces de l'Ouest, (\$11,596). La médiane du Québec a été de \$11,196 et celle des provinces Atlantiques, de \$10,027. Si l'on compare les médianes de 1967-68 et de 1965-66, l'augmentation a été de 16.0 p. 100 au Québec, pour l'Ontario, 15.5 p. 100, dans les provinces Atlantiques, 15.2 p. 100, dans les provinces de l'Ouest, 12.9 p. 100. (Voir tableaux A, 4 et 13, et graphique 1.)

Importance de l'institution

En 1967-68, quatorze institutions comptaient plus de 5,000 étudiants à plein temps. Le nombre de celles qui ont entre 2,000 et 4,999 étudiants est passé de 17 à 15 entre 1965-66 et 1967-68, tandis que 8 institutions ayant de 1,000 à 1,999 étudiants étaient comprises en 1967-68, contre 7 en 1965-66. Le nombre d'institutions ayant de 500 à 999 étudiants est passé de 16 à 14 de 1965-66 à 1967-68; 14 ont déclaré avoir moins de 500 étudiants en 1967-68 contre 27 en 1965-66.

En 1965-66, la médiane de tout le personnel réuni a été la plus élevée dans les institutions de 5,000 étudiants et plus (\$12,018 en 1967-68.) Viennent ensuite celles de moins de 500 étudiants (\$11,208), de 2,000-4,999 étudiants (\$10,591) de 1,000-1,999 étudiants (\$10,145) et de 500-999 étudiants (\$10,050).

Les hausses de 1965-66 à 1967-68 pour tous les rangs professoraux réunis ont varié de 12.2 p. 100 pour les institutions de 2,000-4,999 à 28.6 p. 100 pour celles de moins de 500 étudiants. (Voir tableaux A, 5, et 14 et graphique 1.)

Direction de l'institution

Depuis la première enquête (en 1956-57), les médianes de tout le personnel réuni, dans les institutions indépendantes et les institutions d'état, ont été plus élevées que celles des institutions religieuses. La situation est demeurée la même en 1967-68, la médiane des institutions d'état (\$11,836) étant plus forte que celle des institutions indépendantes (\$11,535). La médiane des institutions religieuses a été de (\$10,188.)

CHART -2

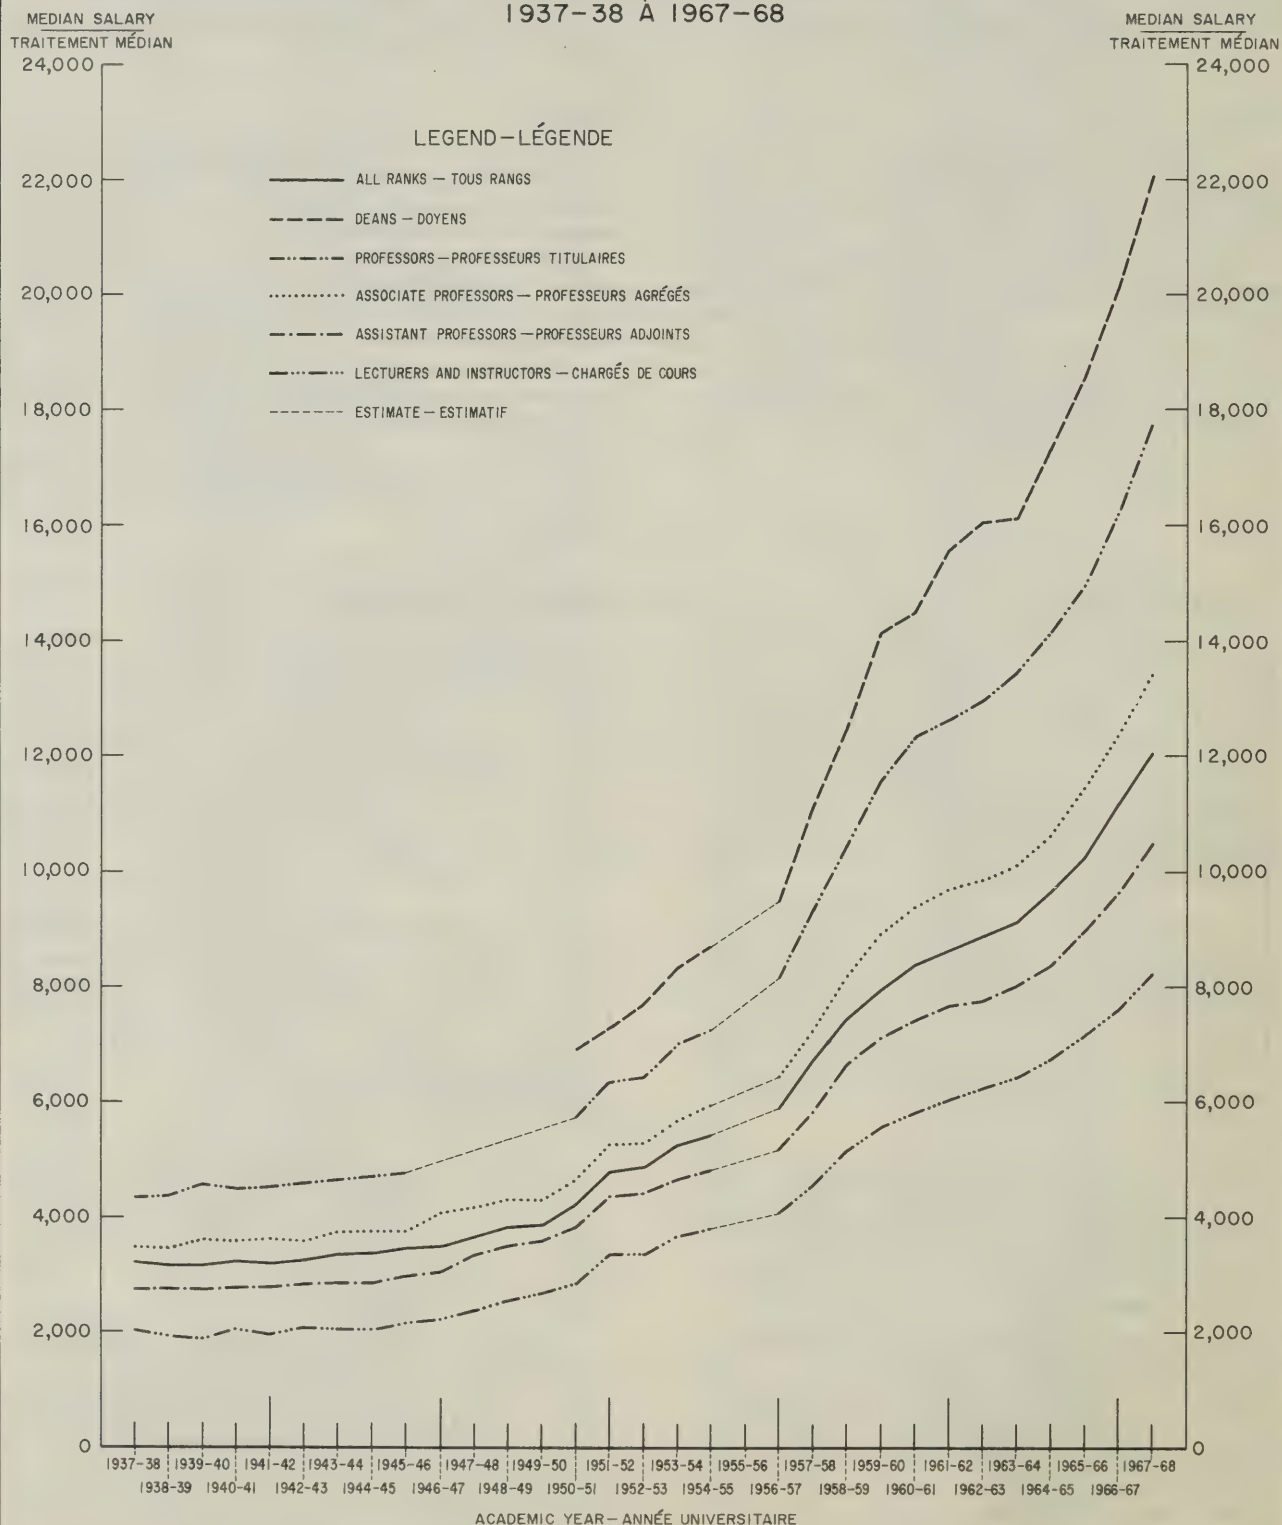

GRAPHIQUE -2

MEDIAN SALARIES OF TEACHERS AT 17 UNIVERSITIES BY RANK

1937-38 TO 1967-68

TRAITEMENTS MÉDIANS DES PROFESSEURS DE 17 UNIVERSITÉS SELON LE RANG

1937-38 À 1967-68

From 1965-66 to 1967-68, independent institutions showed the greatest increase (17.6 p.c.). Increases for church-related and state institutions were 13.6 p.c. and 12.9 p.c., respectively. (See Tables 6 and 15 and Chart 1.)

Faculty

There is no uniformity in the organization of universities into faculties, schools and institutes, so data grouped in this way are only relatively significant. A tabulation is presented, however, which indicates that highest salaries were paid in faculties of dentistry (median \$15,068), followed by faculties of medicine (\$14,096), agriculture (\$12,769) and law (\$12,558). Other faculties for which information is available with median salaries over \$12,000 include in descending order, engineering, pharmacy, education and commerce. Those with medians below \$12,000 were again in descending order, social work, architecture, theology, arts and science, music, household science, physical education, nursing and physiotherapy and occupational therapy.

Subject

If the four teaching fields of humanities, social sciences, biological sciences, and physical sciences are subdivided into "pure" and "applied" areas and by subject (ignoring faculty organization), further comparisons of salaries may be made.

In the **humanities**, median salaries by subject were in this order: fine arts \$10,812; theology \$10,600; classical languages and literature \$10,567; philosophy \$10,392; modern languages and literature (including English and French) \$10,030; music \$9,933; and fine and applied arts, \$9,584. (See Table 8.)

In the **social sciences**, the order was as follows: law, \$12,300; education, \$12,088; commerce and business administration, \$11,733; social work, \$11,300; economics and political science, \$11,275; psychology, \$11,239; geography, \$11,018; sociology, \$10,819; history, \$10,450; household science, \$9,875; physical education, \$9,712. (See Table 9.)

Median salaries in the **biological sciences** were: dentistry, \$15,060; medicine, \$13,866; agriculture, \$12,850; pure biological science (including botany and zoology), \$12,289; pharmacy, \$12,016; nursing, \$8,350; and physiotherapy and occupational therapy, \$8,150. (See Table 10.)

De 1965-66 à 1967-68, les institutions indépendantes ont marqué la plus forte augmentation (17.6 p. 100). L'augmentation, dans le cas des institutions religieuses et des institutions d'état, a été de 13.6 p. 100 et de 12.9 p. 100 respectivement. (Voir tableaux 6 et 15 et graphique 1.)

Faculté

Vu le manque d'uniformité dans l'organisation des universités en facultés, écoles et instituts, les données ainsi groupées n'ont qu'une valeur relative. On a cependant dressé un tableau qui montre que les traitements médians les plus élevés ont été payés, suivant l'ordre décroissant, par les facultés d'art dentaire (\$15,068), de médecine (\$14,096), d'agriculture (\$12,769) et de droit (\$12,558). Les autres facultés pour lesquelles les données sont connues et où les traitements médians dépassent \$12,000, étaient, dans le même ordre, de génie, de pharmacie, de pédagogie et de commerce. Les facultés payant un traitement médian inférieur à \$12,000 étaient, dans le même ordre, de service social, d'architecture, de théologie, des arts et sciences, de musique des sciences domestiques, d'éducation physique, de sciences infirmières, de physiothérapie et d'ergothérapie.

Matière

La division des humanités, sciences sociales, sciences biologiques et sciences physiques en sciences "pures" et "appliquées" et selon la matière (sans tenir compte de l'organisation en facultés) permet d'autres comparaisons de traitements.

Dans les **humanités**, les traitements médians par matière étaient les suivants: beaux-arts, \$10,812; théologie, \$10,600; langues et littérature classiques, \$10,567; philosophie, \$10,392; langues et littérature modernes (y compris les langues et la littérature anglaises et françaises), \$10,030; musique, \$9,933; et beaux-arts et arts industriels, \$9,584. (Voir tableau 8.)

Dans les **sciences sociales**, l'ordre était le suivant: droit, \$12,300; pédagogie, \$12,088; commerce et affaires, \$11,733; service social, \$11,300; économie et sciences politiques, \$11,275; psychologie, \$11,239; géographie, \$11,018; sociologie et anthropologie, \$10,819; histoire, \$10,450; sciences ménagères, \$9,875; culture physique et hygiène, \$9,712. (Voir tableau 9.)

Les traitements médians dans les **sciences biologiques** étaient les suivants: art dentaire \$15,060; médecine, \$13,866; agriculture, \$12,850; sciences biologiques et sciences pures (dont la botanique et la zoologie), \$12,289; pharmacie, \$12,016; soins infirmiers, \$8,350; et physiothérapie et ergothérapie, \$8,150. (Voir tableau 10.)

In the **physical sciences**, mining engineering led with a median salary of \$13,800; followed by civil engineering, \$12,608; chemical engineering, \$12,550; geology, \$12,288; mechanical engineering, \$12,216; electrical engineering, \$12,200; chemistry, \$12,044; physics, \$12,005; architecture, \$12,000; mathematics, \$11,034. (See Table 11.)

While some of the above medians may seem too high or too low in relation to others, it should be borne in mind that they are influenced by the distribution of faculty by rank in each subject area. Some areas may have a much larger proportion of junior staff to instruct greatly increasing enrolment in them. Other areas, especially professional, may require a larger proportion of highly paid senior staff.

Years Since Award of First Degree

As a substitute for a measure of teaching experience, universities and colleges were asked to report for each teacher the year in which he obtained his first university degree—from which was calculated the number of years since that award. The median salary of those less than five years away from the first degree was \$8,000. The greater the number of years since that award, the greater the median salary—up to the 40-44 years group \$17,020. (See Table 12, Chart 3.)

For men only, the highest median in 1967-68 was for those 40-44 years beyond the first degree (\$17,266). The highest median for women was for the 35-39 year group, it being \$13,825. (See Table 12 and Chart 3.)

Although the number of those engaged primarily in faculty administration who had received their first degrees less than 20 years previously rose from 62 out of a total of 297 in 1965-66 to 90 out of 324 in 1967-68 the proportion remained small. Median salaries ranged from \$19,600 for those 20-24 years beyond that date to \$21,250 for those 35-39 years beyond. In the humanities, median salaries ranged from \$7,573 for those less than 5 years beyond the first degree to \$15,500 for those 35-39 years beyond. Comparable figures for the social sciences were \$8,412 and \$16,900 (40-44 years); for the biological sciences \$7,650 and \$17,600 (35-39 years); and for the physical sciences \$8,084 and \$16,500 (40-44 years). Medians for women were in all cases lower than those for men. (See Table 12.)

In the Atlantic Provinces the median salary for those less than 5 years beyond the first degree was \$7,028 and the highest median, \$14,516 was for those 35-39 years beyond that award. In Quebec the range was from \$8,166 to \$17,025 (in the 35-39 years group); in Ontario \$8,014 to \$17,950 (40-44 years group); and the Western Provinces \$8,066 to \$16,610 (in the 35-39 years group). (See Table 13.)

Dans les **sciences physiques**, le génie minier se classe en tête avec un salaire médian de \$13,800; suivi du génie civil, \$12,608; du génie chimique, \$12,550; de la géologie, \$12,288; du génie mécanique, \$12,216; du génie électrique, \$12,200; de la chimie, \$12,044; de la physique \$12,005; de l'architecture, \$12,000; des mathématiques, \$11,034. (Voir tableau 11.)

Certaines de ces médianes peuvent sembler trop élevées ou trop basses par rapport aux autres, mais il faut se rappeler qu'elles reflètent la répartition de la faculté selon le rang professoral dans chaque domaine. Certains domaines peuvent avoir une proportion beaucoup plus forte de professeurs de rang inférieur pour instruire un nombre toujours croissant d'étudiants. D'autres domaines, particulièrement les domaines professionnels, peuvent exiger une plus grande proportion de personnel de rang élevé mieux rémunéré.

Années depuis l'obtention du premier grade

A titre d'indice des années d'enseignement, les universités et collèges devaient déclarer l'année d'obtention du premier grade universitaire de chaque professeur, ce qui a permis de calculer le nombre d'années depuis ce premier grade. Le traitement médian de ceux qui comptaient moins de 5 ans depuis le premier grade était de \$8,000. Plus le nombre d'années depuis l'obtention du premier grade augmentaient plus le traitement médian augmentait, jusqu'au groupe de 40-44 ans (\$17,020). (Voir tableau 12, et graphique 3.)

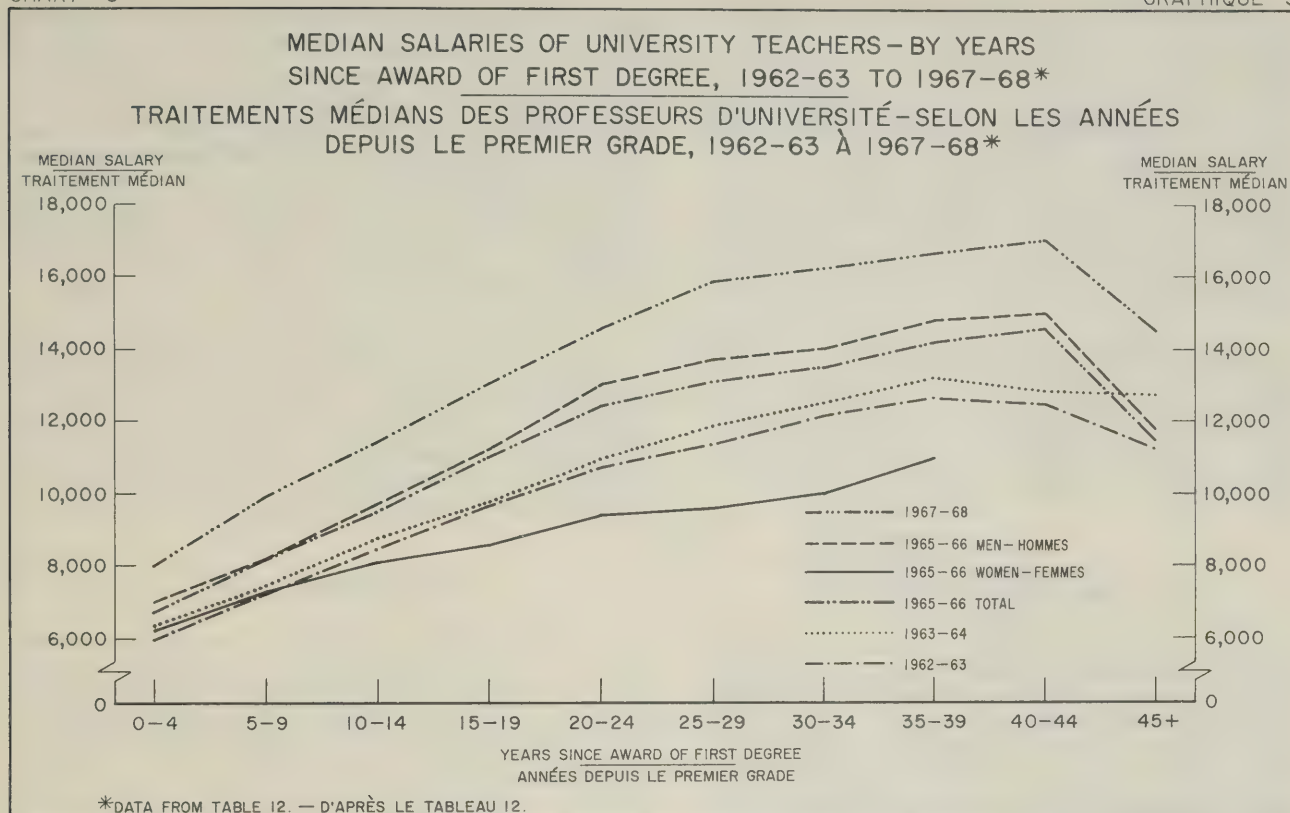

Chez les hommes, la médiane la plus élevée en 1967-68 était celle du groupe de 40-44 ans depuis le premier grade (\$17,266). Chez les femmes, c'était celle du groupe de 35-39 ans (\$13,825). (Voir tableau 12 et graphique 3.)

Bien que le nombre des administrateurs de facultés qui aient obtenu leur premier grade moins de 20 ans auparavant ait augmenté de 62 sur un total de 297 en 1965-66 à 90 sur 324 en 1967-68, la proportion est restée négligeable. Les traitements médians variaient de \$19,600 pour ceux de 20-24 ans à \$21,250 pour le groupe de 35-39 ans. Dans les humanités, ils variaient de \$7,573 pour le groupe de moins de 5 ans depuis le premier grade à \$15,500 pour ceux de 35-39 ans. Voici les chiffres comparables des autres facultés: sciences sociales, \$8,412 et \$16,900 (40-44 ans); sciences biologiques, \$7,650 et \$17,600 (35-39 ans); et sciences physiques, \$8,084 et \$16,500 (40-44 ans). Dans tous les cas, les médianes des femmes étaient inférieures à celles des hommes. (Voir tableau 12.)

Dans les provinces Atlantiques, les traitements médians des professeurs de moins de 5 ans depuis le premier grade étaient de \$7,028 et la plus haute médiane, de \$14,516 pour ceux de 35-39 ans depuis ce grade. Au Québec, l'écart était de \$8,166 à \$17,025 (pour le groupe de 35-39 ans); en Ontario, il était de \$8,014 à \$17,950 (40-44 ans); et dans les provinces de l'Ouest, de \$8,066 à \$16,610 (35-39 ans). (Voir tableau 13.)

CHART - 3

GRAPHIQUE - 3

Comparison by size of institution reveals that in universities with enrolment over 5,000 the range of median salaries was from \$8,291 for those less than 5 years beyond the first degree to \$17,550 for those 40-44 years beyond. The range for institutions with 2,000-4,999 students was from \$7,611 to \$15,825 (35-39 years group); for those with 1,000-1,999 students, \$7,756 to \$14,775 (35-39 years group); 500-999 students \$7,587 to \$14,550 (40-44 years group); and under 500 students \$8,000 to \$16,050 (30-34 years group). (See Table 14.)

In institutions under state (provincial or federal) control median salaries ranged from \$8,067 for teachers less than 5 years beyond the first degree to \$18,075 (40-44 years beyond). For church-related institutions the range was from \$7,500 to \$15,550 (40-44 years beyond), and for independent institutions it was from \$8,082 to \$16,467 (40-44 years beyond). (See Table 15.)

Highest University Degree

The median salary of teachers with a Ph.D. or equivalent degree (\$12,739) was higher than the median for those with a first professional degree beyond the first baccalaureate (e.g. usually such degrees as M.D., D.D.S., D.V.M., B.L.S., B.Ed., B.S.W.)—\$12,057 and it in turn was higher than that for those with a master's degree (\$10,058) and a first baccalaureate (\$9,611). (See Table 16 and Chart 1.)

La comparaison selon l'importance de l'institution révèle que, dans celles de 5,000 étudiants et plus, l'écart du traitement médian allait de \$8,291 pour les professeurs de moins de 5 ans depuis le premier grade à \$17,550 pour ceux de 40-44 ans. Dans les institutions de 2,000 à 4,999 étudiants, l'écart était de \$7,611 à \$15,825 (35-39 ans); dans celles de 1,000 à 1,999 étudiants, de \$7,756 à \$14,775 (35-39 ans); dans celles de 500 à 999 étudiants, de \$7,587 à \$14,550 (40-44 ans); et dans celles de moins de 500 étudiants, de \$8,000 à \$16,050 (30-34 ans). (Voir tableau 14.)

Dans les institutions provinciales ou fédérales, le traitement médian variait de \$8,067 pour les professeurs de moins de 5 ans depuis le premier grade à \$18,075 (40-44 ans). Dans les institutions religieuses, l'écart allait de \$7,500 à \$15,550 (40-44 ans) et dans les institutions indépendantes, de (\$8,082 à \$16,467 (40-44 ans). (Voir tableau 15.)

Le plus haut grade universitaire

Le traitement médian des professeurs qui détenaient un Ph.D. ou un grade équivalent (\$12,739) dépassait celui des professeurs qui détenaient un premier grade professionnel supérieur au premier baccalauréat (D.M., D.D.S., D.V.M., B.Biblio., B.Péd., B.S.S.) (\$12,057). Ce dernier dépassait celui des professeurs détenant une maîtrise (\$10,058) et un premier baccalauréat (\$9,611). (Voir tableau 16 et graphique 1.)

Another form of salary comparison among professions is to relate salaries to the number of years that have elapsed since the award of the highest earned university degree. For those with a doctorate, the range was from \$10,760 for the 0-4 years group to \$18,116 for those 25-29 years beyond the Ph.D. or equivalent degree. Ranges for other degrees were: masters—\$8,937 (0-4) to \$15,867 (30-34); first professional degree beyond the first baccalaureate—\$8,516 (0-4) to \$17,062 (25-29); and first baccalaureate—\$7,562 (0-4) to \$14,225 (35-39). (See Table 16 A and Chart 4.)

The median salary for men with a Ph.D. degree was \$12,979, and that for women \$11,054. For those with a master's degree the medians were \$10,245 for men and \$9,259 for women. Medians were higher for men than for women in each of the other degree groups. (See Tables 16 A and 17.)

Age (Tables 18-23)

The median age for staff in various categories has not changed appreciably since the survey for 1956-57. The fact that the median has not gone up, as would normally be the case if there were few additions to staff, implies that a large number of young teachers are being added to the staff complement. This is borne out by an examination of data for recent years.

The median age of the 16,703 lay and religious teachers in the 65 universities and colleges reporting was 38 years (in 1965-66 it was 38 years). Of those for whom data on age were given, 2.0 p.c. were under 25 (2.2 p.c. in 1965-66) and 1.2 p.c. were at age 65 or over (1.4 p.c. in 1965-66). Those 55 years and over, most of whom might be expected to retire within 10 years, equalled 8.5 p.c. (10.2 p.c. in 1965-66). Those engaged in faculty administration (almost all of them deans) had a median age of 50 years; in the humanities, 37; in the social sciences, 36; in the biological sciences, 40; and in the physical sciences, 36 years. (See Table 18.)

The median age of teachers with a doctorate was 38 years; a master's degree, 35 years; a first professional degree beyond a first baccalaureate, 38 years; a first baccalaureate, 35 years; and no university degree 40 years. (See Table 19.)

Comparison of the age distributions of those teaching various subjects reveals that the median age of teachers of fine arts, music, theology, education, social work, agriculture, dentistry, medicine, physiotherapy and occupational therapy, and mining engineering was 2 or more years above the median age for all teachers; while it was 2 or more years below for teachers of political science, law, physical and health education, and mathematics. (See Tables 20-23.)

Une autre façon de comparer les traitements parmi les professions est de relier les traitements au nombre d'années écoulées depuis l'obtention du plus haut grade universitaire. Pour ceux qui avaient un doctorat, l'écart allait de \$10,760 pour le groupe de 0-4 ans à \$18,116 pour celui des 25-29 ans après l'obtention du doctorat ou d'un grade équivalent. Voici les écarts des autres grades: maîtrise, \$8,937 (0-4) à \$15,867 (30-34); premier grade professionnel après le premier baccalauréat, \$8,516 (0-4) à \$17,062 (25-29); et premier baccalauréat, \$7,562 (0-4) à \$14,225 (35-39). (Voir tableau 16A et graphique 4.)

Le traitement médian des professeurs détenant un Ph.D. a été de \$12,979 chez les hommes et de \$11,054 chez les femmes. Pour ceux qui avaient une maîtrise, les médianes ont été de \$10,245 et de \$9,259. Les médianes pour les hommes étaient plus élevées que celles des femmes dans chacun des autres groupes de grade. (Voir tableaux 16A et 17.)

Âge (tableaux 18-23)

L'âge médian du personnel des diverses catégories n'a guère changé depuis le rapport de 1956-57. La médiane n'ayant pas monté, comme il serait normal si peu de professeurs s'ajoutaient au personnel, il s'ensuit que le professorat s'enrichit d'un grand nombre de jeunes professeurs. C'est ce que révèle l'examen des données des récentes années.

L'âge médian des 16,703 professeurs laïcs et religieux des 65 universités et collèges déclarants était de 38 ans (38 ans en 1965-66). Parmi ceux dont les données sur l'âge sont connues, 2.0 p. 100 avaient moins de 25 ans (2.2 p. 100 en 1965-66) et 1.2 p. 100 avaient 65 ans et plus (1.4 p. 100 en 1965-66). Ceux de 55 ans et plus, dont la plupart prendront sans doute leur retraite d'ici 10 ans, représentaient 8.5 p. 100 (10.2 p. 100 en 1965-66). L'âge médian des administrateurs de facultés (la plupart doyens) était de 50 ans; dans les humanités, de 37 ans; dans les sciences sociales, de 36 ans; dans les sciences biologiques, de 40 ans; et dans les sciences physiques, de 36 ans. (Voir tableau 18.)

L'âge moyen des professeurs détenant un doctorat était de 38 ans; une maîtrise, 35 ans; un premier grade professionnel au-delà du premier baccalauréat, 38 ans; un premier baccalauréat, 35 ans; et aucun grade universitaire, 40 ans. (Voir tableau 19.)

La comparaison de l'âge des professeurs selon les matières enseignées révèle que l'âge médian des professeurs de beaux-arts, de musique, de théologie, de pédagogie, de service social, d'agriculture d'art dentaire, de médecine, de physiothérapie et d'ergothérapie, et de génie minier était de 2 ans ou plus au-dessus de l'âge médian de tous les professeurs, tandis qu'il était de 2 ans ou plus en-dessous dans le cas des professeurs de sciences politiques, de droit, d'éducation physique et d'hygiène, et de mathématiques. (Voir tableaux 20-23.)

CHART-4

GRAPHIQUE-4

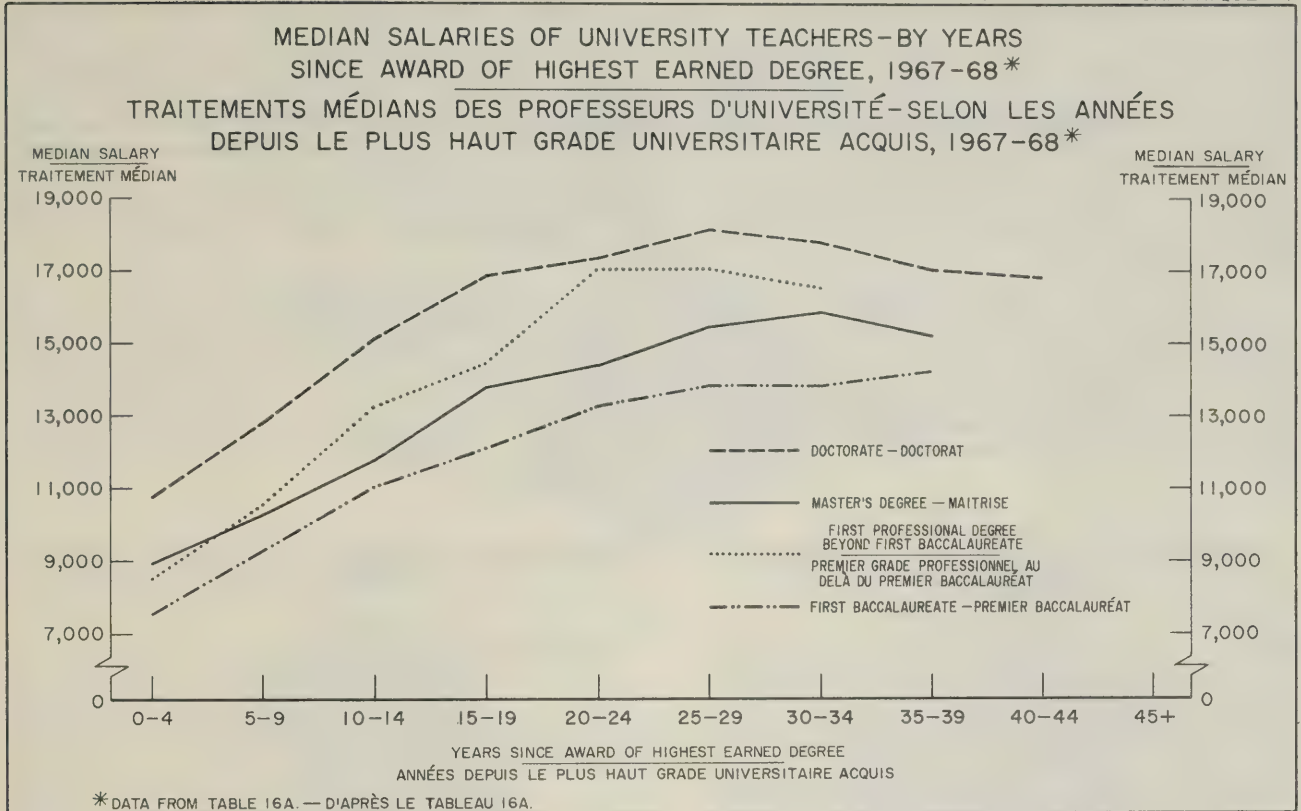

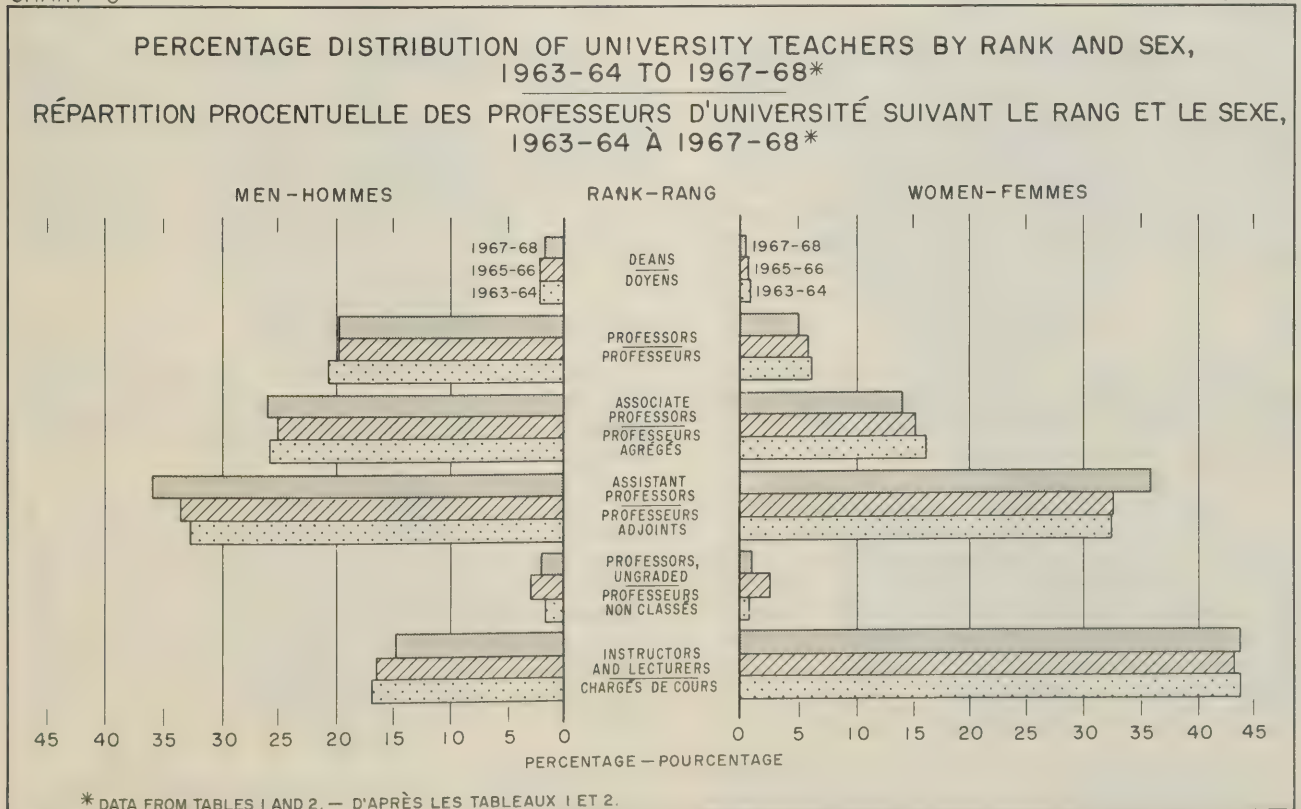

CHART-5

GRAPHIQUE-5

Years Since Award of First Degree (Table 24)

For the 16,703 teachers in all 65 institutions the median passage of time since award of the first degree was 13 years (compared with 14 years in 1965-66). For deans (1965-66 medians in parenthesis) it was 28 (28), for professors 24 (25), associate professors 16 (16), assistant professors 10 (10), ungraded professors 12 (12), and lecturers and instructors 6 (6).

Comparison by field shows that, on the average, those engaged in faculty administration had obtained the first university degree 26 years earlier. In the humanities the median was 13, in the social sciences 12, in the biological sciences 15, and in the physical sciences 13. (See Table 24.)

Distribution of University Teachers by Rank, Sex and Field**Rank**

Of the 16,132 teachers (excluding deans and ungraded professors) reported in the four main teaching categories, 18.4 p.c. were "full" professors, 25.2 p.c. associate professors, 37 p.c. assistant professors, and 19.4 p.c. instructors and lecturers. The percentages in 1965-66 were 19, 25, 35, and 21. (See Table 18.)

Degree

By highest earned university degree, 16,305 teachers (excluding 398 for whom no information was reported) were distributed as follows: doctorate 48.0 p.c., master's degree 32.5 p.c., first professional degree beyond the first baccalaureate 7.2 p.c., baccalaureate 10.2 p.c., and no university degree 1.9 p.c. In 1965-66 the percentages were 44.8, 34.9, 6.7, 12.2 and 1.4. (See Table 19 and Chart 6.)

Sex

Of the total of 16,703 full-time teachers reported in 1967-68, men numbered 14,469 (86.6 p.c.) and women 2,234 (13.4 p.c.). In 1965-66 the percentages were 87.3 and 12.7.

Of the men, 1.7 p.c. were deans; of the women, 0.5 p.c. The proportions in the other ranks were: professor, 19.7 p.c. of the men and 5.0 p.c. of the women; associate professor, 25.9 p.c. and 14.2 p.c.; assistant professor, 35.9 p.c. and 35.8 p.c.; ungraded professors, 1.9 p.c. and 0.8 p.c.; and lecturer or instructor, 14.9 p.c. and 43.7 p.c. (See Tables 1 and 3, and Chart 5.)

The proportions of the 13,853 men and the 2,128 women paid on a basis applicable to lay personnel, holding the various university degrees

Années depuis l'obtention du premier grade (tableau 24)

Pour les 16,703 professeurs des 65 institutions, le nombre médian d'années depuis le premier grade était de 13 ans (14 ans en 1965-66); pour les doyens, il était de 28 (28); pour les professeurs titulaires, 24 (25) pour les professeurs agrégés, 16 (16); pour les professeurs adjoints, 10 (10); pour les professeurs non classés, 12 (12); et pour les chargés de cours, 6 (6).

La comparaison par domaine indique que, en moyenne, les administrateurs de faculté avaient obtenu leur premier grade universitaire 26 ans auparavant. Dans les humanités, la médiane était de 13; dans les sciences sociales, 12; dans les sciences biologiques, 15; et dans les sciences physiques, 13. (Voir tableau 24.)

Répartition des professeurs selon le rang, le grade, le sexe et le domaine**Rang professoral**

Sur les 16,132 professeurs (à l'exclusion des doyens et des professeurs non classés) déclarés dans les quatre rangs principaux, 18.4 p. 100 étaient titulaires, 25.2 p. 100 agrégés, 37 p. 100 adjoints et 19.4 p. 100 chargés de cours. Les pourcentages en 1965-66 étaient de 19, 25, 35 et 21. (Voir tableau 18.)

Grade

Voici la répartition procentuelle des 16,305 professeurs (à l'exclusion de 398 pour lesquels aucun renseignement n'a été reçu) selon le plus haut grade universitaire: doctorat, 48.0, maîtrise, 32.5, premier grade professionnel au-delà du premier baccalauréat, 7.2, baccalauréat, 10.2, et aucun grade universitaire, 1.9. En 1965-66, les pourcentages étaient 44.8, 34.9, 6.7, 12.2 et 1.4. (Voir tableau 19 et graphique 6.)

Sexe

Les 16,703 professeurs à plein temps déclarés en 1967-68 comprenaient 14,469 (86.6 p. 100) hommes et 2,234 (13.4 p. 100) femmes. En 1965-66, les pourcentages étaient 87.3 et 12.7.

Chez les hommes, 1.7 p. 100 étaient doyens, et chez les femmes, 0.5 p. 100. Les proportions des autres rangs étaient les suivantes: professeurs titulaires, 19.7 p. 100 des hommes et 5.0 p. 100 des femmes; professeurs agrégés, 25.9 et 14.2 p. 100; professeurs adjoints, 35.9 et 35.8 p. 100; professeurs non classés, 1.9 et 0.8 p. 100 et chargés de cours, 14.9 et 43.7 p. 100. (Voir tableaux 1 et 3 et graphique 5.)

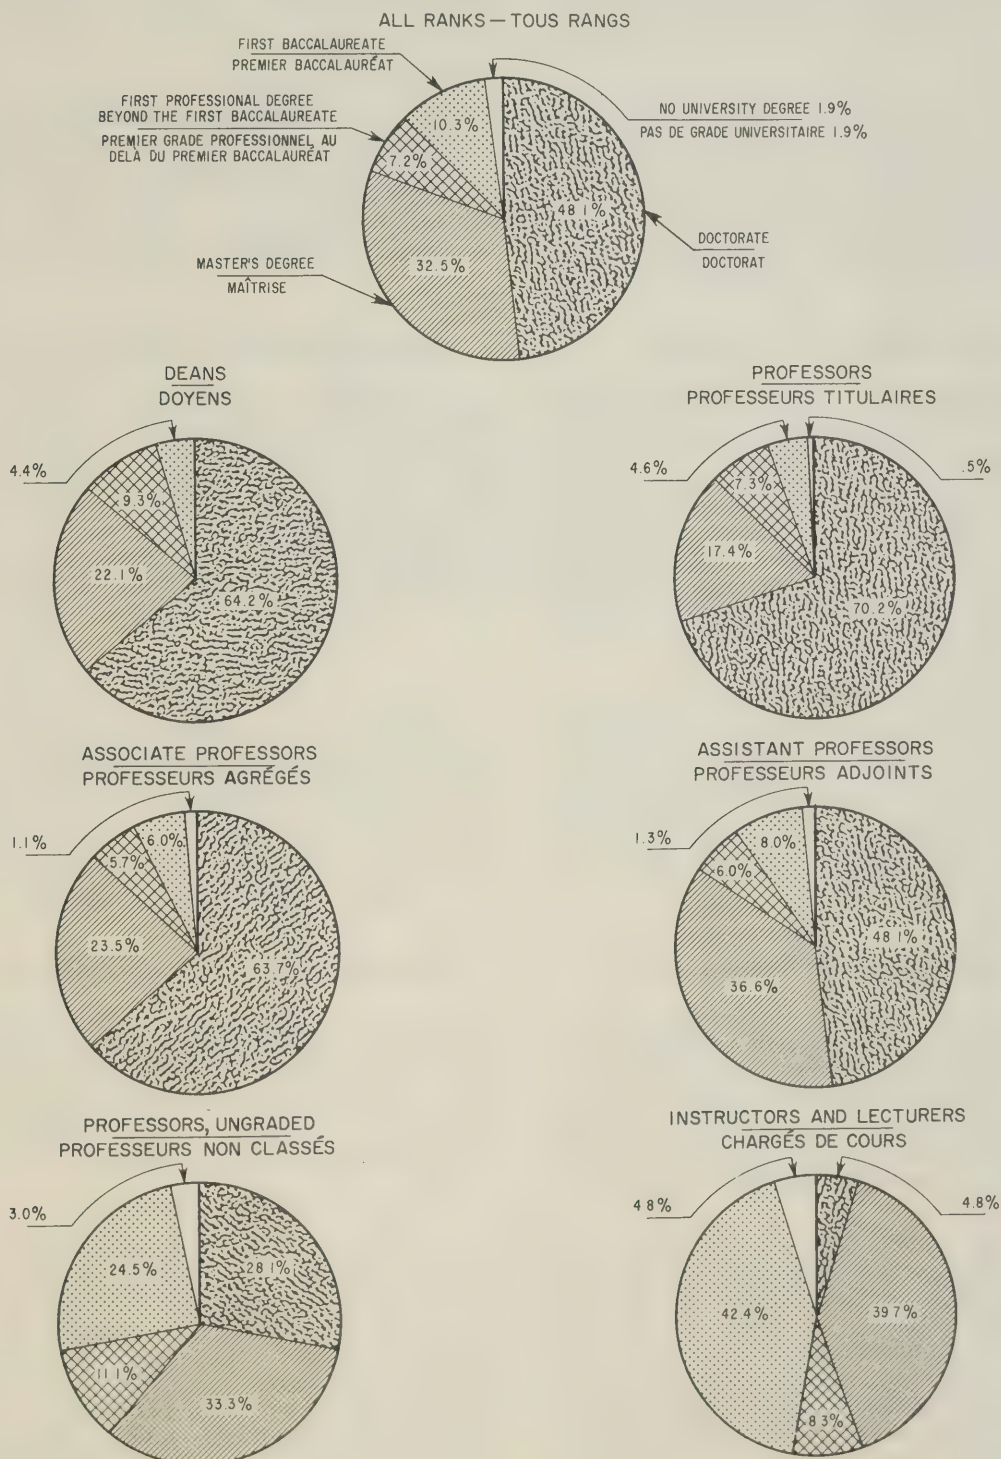

Voici les pourcentages des 13,853 hommes et 2,128 femmes rémunérés à l'échelle laïque, selon les divers grades universitaires (à l'exclusion de 334

CHART - 6

PERCENTAGE DISTRIBUTION OF UNIVERSITY TEACHERS
BY HIGHEST EARNED DEGREE, 1967-1968 *

RÉPARTITION PROCENTUELLE DES PROFESSEURS D'UNIVERSITÉ
SUIVANT LE PLUS HAUT GRADE UNIVERSITAIRE ACQUIS, 1967-1968 *

* DATA FROM TABLE 19. — D'APRÈS LE TABLEAU 19.

EXCLUDES STAFF FOR WHOM NO INFORMATION WAS REPORTED. — SANS LE PERSONNEL AU SUJET DUQUEL IL N'Y A PAS EU DE RAPPORT

(excluding 344 men and 53 women for whom no information on degrees was reported) was as follows: doctorate 51.7 p.c. of the men and 24.6 p.c. of the women; master's degree, 30.6 p.c. and 43.4 p.c.; first professional degree beyond the first baccalaureate, 7.3 p.c. and 6.6 p.c.; first baccalaureate, 9.0 p.c. and 18.8 p.c.; no university degree, 1.4 p.c. and 6.6 p.c. (See Table 17.)

Field

Division of the 16,703 teachers by field was as follows for 1967-68 (1965-66 percentages shown in parentheses): faculty administration 2.3 p.c. (2.7 p.c.), humanities 24.1 p.c. (24.7 p.c.), social sciences 31.0 p.c. (29.0 p.c.) biological sciences 18.0 p.c. (17.1 p.c.), and physical sciences 24.6 p.c. (26.5 p.c.). (See Table 18.)

Teacher-student Ratio (Table 25)

Estimated total enrolment of full-time undergraduate and graduate students, 1967-68 in the 65 institutions on which this report is based was 241,506. If this figure is compared with that of the 16,378 teachers with ranks of instructor and lecturer or higher reported as being full-time, it would appear that for all institutions included in this survey the ratio of such teachers to students was 1: 14.7 (1: 14.5 in 1965-66). Region variations were between 1: 12.2 in Ontario and 1: 19.5 in Quebec.

As it is known that a certain number of full-time staff below the rank of instructor or lecturer were omitted in the returns made, and as the teacher student ratio may vary in those institutions not included, estimates for the total number of full-time teachers in all Canadian institutions have not been made.

Highest Earned University Degree (Table 26)

Of the total of 16,703 persons included in this survey for whom information on degrees was reported, 48.0 p.c. had a doctorate (46.0 p.c. in 1965-66). The percentages of doctorates held by all staff ranged from 51.9 p.c. in Ontario and 44.4 p.c. in the Western Provinces to 34.4 p.c. in Quebec and 34.9 p.c. in the Atlantic Provinces.

About 40 p.c. of the staff reported with doctorates (38.4 p.c.) or master's degrees (41.6 p.c.) earned them in the five-year period from 1963 to 1967. Although the majority of these persons were new additions to the teaching staff during the five years, others included in this group were older teachers who completed advanced degree requirements either while on leave or in addition to their teaching duties. (See Table 16 A.)

hommes et de 53 femmes dont les données relatives aux grades ne sont pas disponibles): doctorat, 51.7 p. 100 des hommes et 24.6 p. 100 des femmes; maîtrise, 30.6 et 43.6 p. 100; premier grade professionnel au-delà du premier baccalauréat, 7.3 et 6.6 p. 100; premier baccalauréat, 9.0 et 18.8 p. 100; aucun grade universitaire, 1.4 et 6.6 p. 100. (Voir tableau 17.)

Domaine

Voici la répartition procentuelle des 16,703 professeurs en 1967-68, selon le domaine: administration de faculté, 2.3 (2.7 en 1965-66); humanités, 24.1 (24.7); sciences sociales, 31.0 (29.0); sciences biologiques, 18.0 (17.1); et sciences physiques, 24.6 (26.5). (Voir tableau 18.)

Rapport professeurs étudiants (tableau 25)

Le nombre total d'étudiants sous-diplômés et diplômés à plein temps dans les 65 institutions observées ici était d'environ 241,506 en 1967-68. Si l'on compare ce chiffre aux 16,378 personnes à plein temps qui ont au moins le rang de chargés de cours, il semble que pour l'ensemble des institutions observées, il y avait un professeur pour 1: 14.5 étudiants (1: 14.7 en 1965-66). La proportion variait de 1: 12.2 en Ontario à 1: 19.5 au Québec.

Comme on sait qu'un certain nombre de professeurs à plein temps de rang inférieur à celui de chargé de cours ont été omis dans les réponses et que le rapport des professeurs aux étudiants peut varier dans les institutions omises, on n'a pas estimé le nombre total de professeurs à plein temps dans toutes les institutions canadiennes.

Plus haut grade universitaire obtenu (tableau 26)

Sur les 16,703 professeurs observés, 48.0 p. 100 avaient un doctorat (46.0 p. 100 en 1965-66). Les pourcentages de doctorats détenus par tout le personnel variaient de 51.9 en Ontario et 44.4 dans les provinces de l'Ouest à 34.4 p. 100 au Québec et 34.9 dans les provinces Atlantiques.

Environ 40 p. 100 du personnel ayant un doctorat (38.4 p. 100) ou une maîtrise (41.6 p. 100) les ont obtenus dans une période de cinq ans, soit de 1963-67. Bien que la majorité d'entre eux fussent de nouvelles recrues à l'enseignement durant les cinq années, les autres comprenaient des professeurs plus âgés qui ont répondu aux exigences en vue d'un grade supérieur soit à la faveur d'un congé ou pendant qu'ils enseignaient. (Voir tableau 16 A.)

NOTES RELATED TO TABLES

¹ Including lay teachers, and religious teachers paid on the same scale as lay teachers.

² Data included for 65 institutions;

Atlantic Provinces

Memorial University of Newfoundland, St. John's
St. Dunstan's University, Charlottetown
Nova Scotia Technical College, Halifax
Dalhousie University, Halifax
University of King's College, Halifax
Mount Saint Vincent College, Halifax
Acadia University, Wolfville
St. Francis Xavier University, Antigonish
St. Mary's University, Halifax
Université de Moncton, Moncton
Mount Allison University, Sackville
St. Thomas' University, Chatham
University of New Brunswick, Fredericton
Collège de Bathurst, Bathurst

Quebec

Collège de Lévis, Lévis
Université Laval, Québec
Séminaire de Québec, Québec
Bishop's University, Lennoxville
Université de Sherbrooke, Sherbrooke
Université de Montréal, Montréal
École Polytechnique, Montréal
Collège Sainte-Marie, Montréal
McGill University, Montréal
Sir George Williams University, Montréal
Collège de Rouyn, Rouyn
Loyola College, Montréal
Marianopolis College, Montréal

Ontario

Université d'Ottawa, Ottawa
Carleton University, Ottawa
Queen's University at Kingston, Kingston
Royal Military College, Kingston
University of Toronto, Toronto
Victoria University, Toronto
Trinity College, Toronto
St. Michael's College, Toronto
Osgoode Hall Law School, Toronto
McMaster University, Hamilton
McMaster Divinity College, Hamilton
University of Guelph
University of Western Ontario, London
University of Windsor, Windsor
York University, Toronto
Ontario College of Education, Toronto
Laurentian University of Sudbury, Sudbury
University of Waterloo, Waterloo
Waterloo Lutheran University, Waterloo
Lakehead University of Arts, Science and Technology, Port Arthur
Brock University, St. Catharines
Trent University, Peterborough
Ontario Institute for Studies in Education

Western Provinces

Brandon College, Brandon
University of Manitoba, Winnipeg
St. John's College, Winnipeg
St. Paul's College, Winnipeg
University of Winnipeg
University of Saskatchewan, Saskatoon
St. Thomas More College, Saskatoon
University of Alberta, Edmonton
University of Calgary
University of British Columbia, Vancouver

NOTES CONCERNANT LES TABLEAUX

¹ Sont compris les professeurs laïcs et les professeurs religieux rémunérés à l'égal des laïcs.

² Chiffres portant sur 65 institutions;

Provinces Atlantiques

Memorial University of Newfoundland, St. John's
St. Dunstan's University, Charlottetown
Nova Scotia Technical College, Halifax
Dalhousie University, Halifax
University of King's College, Halifax
Mount Saint Vincent College, Halifax
Acadia University, Wolfville

Western Provinces — Continued

University of Victoria, Victoria
 University of Lethbridge
 Red Deer Junior College, Red Deer
 Notre Dame University of Nelson, Nelson
 Simon Fraser University, Burnaby

- ³ Excluding associate deans, assistant deans, directors of schools and institutes. Including some principals of constituent colleges.
- ⁴ Including (when holding the rank of professor) associate deans, assistant deans, directors of schools and institutes.
- ⁵ In some small colleges the ranks of associate professor and assistant professor are not used; all above the rank of lecturer or instructor are classed as professors.
- ⁶ The median salary was not calculated if the number of persons in any distribution was less than 10, or unless there were more than 2 institutions in a distribution. As a result, per cent increases for such distributions could not be calculated. Quartiles were not calculated unless the number of persons in any distribution was 30 or more.
- ⁷ Including all deans, and others concerned primarily with faculty administration.
- ⁸ Excluding deans, and others concerned primarily with faculty administration.
- ⁹ Institutions included: **West**—British Columbia, Alberta, Calgary, Saskatchewan, Manitoba; **Central**—Western Ontario, Ontario Institute for Studies in Education, McMaster, Toronto, Victoria, Trinity, Queen's, McGill, Bishop's; **Maritimes**—New Brunswick, Mount Allison, St. Francis Xavier, Acadia, Dalhousie. Part-time teachers and religious teachers paid on a scale less than that applying to lay staff have been excluded.
- ¹⁰ For those receiving some allowance, i.e. excluding those reported as receiving no allowance.
- ¹¹ This footnote has been deleted in this edition.
- ¹² In cases where there were 1 or 2 in one group, detail of the distribution is not shown.
- ¹³ Including letters, social science, Islamic studies, mediaeval studies.
- ¹⁴ Including faculties teaching both pure and applied science.
- ¹⁵ Including psychology and education combined, and child study.
- ¹⁶ Including medical research, medical technology.
- ¹⁷ Including canon law.
- ¹⁸ Including faculties or schools of fine and applied arts, forestry, hygiene and public health, journalism, library science, philosophy, secretarial science, veterinary science and graduate studies.
- ¹⁹ History and appreciation—including art, archaeology, architecture, drama, music.
- ²⁰ Including Greek, Latin, mediaeval literature, oriental languages.
- ²¹ Including Russian, Spanish, Italian, Portuguese, Icelandic, such combinations as modern languages, romance languages, Slavic languages, and also letters and linguistics.
- ²² Including ethics, logic, natural theology.
- ²³ Including East Asiatic studies, Islamic studies, Slavic studies, religion, Asian studies, Celtic studies, Near Eastern studies.
- ²⁴ Including drama, elocution.
- ²⁵ Including journalism, library science.
- ²⁶ Economics and political science combined.

Provinces de l'Ouest — suite

University of Victoria, Victoria
 University of Lethbridge
 Red Deer Junior College, Red Deer
 Notre Dame University of Nelson, Nelson
 Simon Fraser University, Burnaby

- ³ Ne sont pas compris les vice-doyens, les directeurs d'écoles et d'instituts. Sont compris quelques directeurs de collèges constituants.
- ⁴ Sont compris (s'ils ont le rang de professeur titulaire) les vice-doyens, les directeurs d'écoles et d'instituts.
- ⁵ Dans quelques petits collèges le rang de professeur agrégé et celui de professeur adjoint n'existent pas; tous sont classés professeurs s'ils ne sont pas simplement chargés de cours.
- ⁶ Le traitement médian n'a pas été calculé lorsqu'une série comprenait moins de 10 personnes ou à moins qu'elle ne comptât plus de 2 institutions. Il en résulte que les augmentations procentuelles relatives à ces répartitions n'ont pu être calculées. Les quartiles ne sont pas calculés là où, dans une répartition le nombre de personnes est de 30 ou plus.
- ⁷ Sont compris tous les doyens et les autres personnes s'occupant avant tout de l'administration de la faculté.
- ⁸ Ne sont pas compris les doyens ni les autres personnes s'occupant avant tout de l'administration de la faculté.
- ⁹ Voici les institutions intéressées: **Ouest**—British Columbia, Alberta, Calgary, Saskatchewan, Manitoba; **Centre**—Western Ontario, Ontario Institute for Studies in Education, McMaster, Toronto, Victoria, Trinity, Queen's, McGill, Bishop's; **Maritimes**—New Brunswick, Mount Allison, St. Francis Xavier, Acadia, Dalhousie. On a exclu les professeurs à temps partiel et les professeurs religieux dont l'échelle de traitements était inférieure à celle du personnel laïc.
- ¹⁰ Pour ceux qui reçoivent une allocation c.-à-d. sans ceux déclarés comme ne recevant aucune allocation.
- ¹¹ Ce renvoi a été supprimé de la présente édition.
- ¹² La ventilation n'est pas faite quand le groupe ne comprend qu'un ou deux professeurs.
- ¹³ Y compris lettres, sciences sociales, études islamiques, études médiévales.
- ¹⁴ Y compris les facultés de sciences pures et appliquées.
- ¹⁵ Y compris la psychologie et la pédagogie réunies et la psychologie de l'enfant.
- ¹⁶ Y compris recherche médicale, technologie médicale.
- ¹⁷ Y compris droit canonique.
- ¹⁸ Y compris les facultés et les écoles de beaux-arts et d'arts appliqués, de sylviculture, d'hygiène et de santé publique, de journalisme, de bibliothéconomie, de philosophie, de science secrétariale, de science vétérinaire et d'études supérieures.
- ¹⁹ Histoire et appréciation—y compris art, archéologie, architecture, théâtre, musique.
- ²⁰ Y compris le grec, le latin, la littérature médiévale et les langues orientales.
- ²¹ Y compris le russe, l'espagnol, l'italien, le portugais, l'islandais, les groupements tels que les langues modernes, les langues romanes, les langues slaves, les lettres et la linguistique.
- ²² Y compris morale, logique, théologie naturelle.
- ²³ Y compris études oriento-asiatiques, études islamiques, études slaves, religion, études asiatiques, études celtiques, études du Proche-Orient.
- ²⁴ Y compris théâtre, élocution.
- ²⁵ Y compris journalisme, bibliothéconomie.
- ²⁶ Sciences économiques et science politique réunies.

Western Provinces — Concluded

- ²⁷ Including accounting, industrial relations
- ²⁸ Including child study.
- ²⁹ Including dietetics.
- ³⁰ Including secretarial science, public administration.
- ³¹ Including anatomy, histology, embryology, entomology, palaeontology, physiology.
- ³² Including botany and zoology combined as biology, and also genetics, natural history.
- ³³ Including medical technology.
- ³⁴ Including rehabilitation.
- ³⁵ Including forestry, hygiene and public health, veterinary science, optometry.
- ³⁶ Including biochemistry.
- ³⁷ Including mineralogy.
- ³⁸ Including astronomy, geodesy, statistics.
- ³⁹ Including biophysics, geophysics, mathematical physics.
- ⁴⁰ Including town planning.
- ⁴¹ Including agricultural engineering, architectural engineering, forest engineering, structural engineering.
- ⁴² Including geological engineering, metallurgical engineering, petroleum engineering.
- ⁴³ Including aerophysics, applied mathematics, applied physics.
- ⁴⁴ Comparable data for 1956-57 not available.
- ⁴⁵ Excluding M.D., D.D.S., D.V.M.
- ⁴⁶ Including licence.
- ⁴⁷ Including M.D., D.D.S., D.V.M. and second baccalaureate.
- ⁴⁸ Including first professional degree if it is the first baccalaureate.
- ⁴⁹ Excludes staff with no degree.
- ⁵⁰ Including both lay and religious teachers.
- ⁵¹ Data included for all 65 institutions listed in Note 2.
- ⁵² Excludes staff for whom no information was reported.
- ⁵³ Excludes staff with no degree and staff for whom no information was reported and hence totals do not equal those in Table 18.
- ⁵⁴ Less than 1 year.
- ⁵⁵ Estimated, for institutions included in this survey, on basis of returns made as of December 1 together with enrolments reported in the salary survey.

Provinces de l'Ouest — fin

- ²⁷ Y compris comptabilité, relations industrielles.
- ²⁸ Y compris psychologie de l'enfant.
- ²⁹ Y compris diététique.
- ³⁰ Y compris science secrétariale, administration publique.
- ³¹ Y compris anatomie, histologie, embryologie, entomologie, paléontologie, physiologie.
- ³² Y compris botanique et zoologie réunies sous biologie, et aussi génétique et histoire naturelle.
- ³³ Y compris technologie médicale.
- ³⁴ Y compris réhabilitation.
- ³⁵ Y compris sylviculture, hygiène et santé publique, science vétérinaire, optométrie.
- ³⁶ Y compris biochimie.
- ³⁷ Y compris minéralogie.
- ³⁸ Y compris astronomie, géodésie, statistique.
- ³⁹ Y compris biophysique, géophysique, physique mathématique.
- ⁴⁰ Y compris urbanisme.
- ⁴¹ Y compris génie agricole, génie architectural, génie forestier, génie des charpentes.
- ⁴² Y compris génie géologique, génie métallurgique, génie pétrolier.
- ⁴³ Y compris aérophysique, mathématiques appliquées, physique appliquée.
- ⁴⁴ Données comparables pour 1956-57 non disponibles.
- ⁴⁵ Non compris M.D., D.D.S., D.M.V.
- ⁴⁶ Y compris licence.
- ⁴⁷ Y compris M.D., D.D.S., D.M.V. et second baccalauréat.
- ⁴⁸ Y compris premier grade professionnel s'il s'agit du premier baccalauréat.
- ⁴⁹ A l'exclusion du personnel sans grade.
- ⁵⁰ Y compris les professeurs laïcs et religieux.
- ⁵¹ Données portant sur les 65 institutions énumérées à la note 2.
- ⁵² Sans le personnel au sujet duquel il n'y a pas eu de rapport.
- ⁵³ Ne comprend pas les professeurs sans grade, ni le personnel au sujet duquel il n'y a pas eu de rapport; c'est pourquoi les totaux ne correspondent pas à ceux du tableau 18.
- ⁵⁴ Moins d'un an.
- ⁵⁵ Estimation portant sur les institutions étudiées dans le présent rapport et fondée sur les déclarations du 1^{er} décembre, ainsi que sur les inscriptions déclarées au cours de l'enquête sur les traitements.

PUBLICATIONS COURANTES DE LA DIVISION DE L'ÉDUCATION

PREFACE

This is the ninth in the series of detailed reports on salaries and qualifications of Canadian university teachers. The data were supplied by university and college business officers. Their assistance is greatly appreciated.

Similar reports were issued for 1956-57, 1957-58, 1958-59, 1960-61, 1962-63, 1963-64, 1965-66 and 1967-68. For 1959-60 a survey covering 17 institutions was published, which in addition provided data for these same 17 institutions from 1937-38. Table 2 in this publication gives summary data from 1944-45 to 1968-69 for these 17 institutions. Since 1965-66, Table 2 includes data for 19 institutions.

As well as being used by the Pay Research Bureau, data collected for the DBS university salary survey are also used in reports issued by the National Research Council and by the Canadian Association of University Teachers.

The present report shows the relationship between salary and rank, faculty, field, subject, region, size of institution, control of institution, highest earned university degree, and years since award of first and highest earned degree for 64 institutions. In a number of the cross-classifications, data are given separately for men and women. There are, as well, figures on the age of university teachers, related to rank, field, subject and highest degree.

Questions concerning the content of this publication or suggestions for further analyses should be sent to Mr. N. LeSeigneur Acting Director, or Mr. Pierre Boulet, Chief of the Higher Education Section, Education Division.

WALTER E. DUFFETT,

Dominion Statistician.

PRÉFACE

Le présent rapport est le neuvième d'une série de rapports détaillés sur les traitements et la qualification des professeurs des universités canadiennes. Les données proviennent des représentants des universités et collèges et leur collaboration est très appréciée.

Des rapports semblables ont paru pour 1956-57, 1957-58, 1958-59, 1960-61, 1962-63, 1963-64, 1965-66 et 1967-68. Le rapport de 1959-60 comprenait 17 institutions et donnait leurs statistiques chronologiques à partir de 1937-38. Le Tableau 2 de la présente publication donne les chiffres récapitulatifs de ces 17 institutions de 1944-45 à 1968-69. Depuis 1965-66, le Tableau 2 donne les chiffres pour 19 institutions.

En plus de servir au Bureau d'étude des traitements, les données recueillies pour l'enquête du B.F.S. sur les traitements universitaires servent aussi aux rapports publiés par le Conseil national de recherches et l'Association canadienne des professeurs d'université.

Le présent rapport indique la relation entre les traitements et le rang professoral, la faculté, la discipline choisie, la matière, la région, l'importance de l'institution et sa direction, le plus haut grade universitaire obtenu et les années depuis l'obtention du premier et du dernier grade à l'égard de 64 institutions. Certains tableaux donnent une ventilation selon le sexe. D'autres établissent la relation entre l'âge des professeurs d'université et leur rang professoral, la discipline, la matière et le plus haut grade.

Toute question relative au contenu de la présente publication ou toute proposition d'analyses supplémentaires doit être adressée à M. N. LeSeigneur, directeur suppléant, ou à M. Pierre Boulet, chef de la Section de l'enseignement supérieur, Division de l'éducation.

WALTER E. DUFFETT,

Statisticien fédéral.

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

.. figures not available.

... figures not appropriate or not applicable.

— nil or zero.

n.e.c. not elsewhere classified.

SIGNES CONVENTIONNELS

Voici la signification des signes conventionnels employés dans les tableaux du présent rapport:

.. nombres indisponibles.

... n'ayant pas lieu de figurer.

— néant ou zéro.

n.d.a. non dénommé ailleurs.

HIGHLIGHTS

The median salary for staff paid at rates applicable to lay teaching personnel (all medians used in these "highlights" refer to this group) was \$12,224 for all full-time staff included in the 1968-69 survey. Medians by rank ranged from a high of \$22,555 for deans to \$8,649 for lecturers and instructors.

The median salary for men in 1968-69 was \$12,591, higher by \$2,534 than that for women.

Median regional salaries, 1968-69 for all staff surveyed were for Ontario (\$12,783), the Western Provinces (\$12,272), Quebec (\$12,075) and the Atlantic Provinces (\$10,596).

The median salary tended to decrease as size of institution decreased. For all staff at institutions with 5,000 and over full-time students it was \$12,563 in 1968-69. The median for institutions with enrolments of 2,000 to 4,999 was \$11,511, for those with 1,000 to 1,999 students \$11,068, 500 to 999 students \$10,033 and for institutions with less than 500 full-time students \$12,533.

The median salary for staff at state (provincial or federal) institutions was \$12,529 in 1968-69, \$12,507 for all independent institutions, with the median for church-related institutions being \$11,030. Since 1956-57, the medians for state and independent institutions have been quite close and have been considerably higher than the median for church-related institutions.

As in past years, the median salary for staff in the biological sciences (including medicine) was higher than that for other teaching fields. This 1968-69 median, \$13,698 may be compared with other teaching fields: e.g. \$12,764 for the physical sciences, \$12,030 for the social sciences, and \$10,828 for the humanities. The median for those engaged primarily in faculty administration was \$21,233.

In 1968-69, of the total of 18,864 teachers included from 64 reporting institutions, 86.8 p.c. were men. In 1957-58, 89.3 p.c. of a total of 4,881 staff members included from 58 reporting institutions were men.

Full-time staff at a selected group of 19 institutions from 1966-67 to 1967-68 increased 15.0 p.c., from 8,066 to 9,279. The increase from 1967-68 to 1968-69 was 11.6 p.c., or from 9,279 to 10,354.

FAITS SAILLANTS

Le traitement médian du personnel rémunéré au barème des laïcs (toutes les médianes de ces faits saillants réfèrent à ce groupe) était de \$12,224 pour tout le personnel à plein temps inclus dans le relevé de 1968-69. Les médianes selon le rang professoral ont varié de \$22,555 pour les doyens à \$8,649 pour les chargés de cours.

Le traitement médian des hommes en 1968-69 était de \$12,591 soit \$2,534 de plus que celui des femmes.

Les traitements médians régionaux, en 1968-69, de tout le personnel observé étaient en Ontario (\$12,783), dans les provinces de l'Ouest (\$12,272), au Québec (\$12,075) et dans les provinces Atlantiques (\$10,596).

Le traitement médian diminuait au même rythme que l'importance de l'institution. Dans les institutions comptant 5,000 étudiants et plus à plein temps, la médiane de tout le personnel était de \$12,563 en 1968-69, dans les institutions de 2,000 à 4,999 étudiants, elle était de \$11,511, dans celles de 1,000 à 1,999 étudiants, de \$11,068, dans celles de 500 à 999 étudiants, de \$10,033, et dans celles de moins de 500 étudiants à plein temps, de \$12,533.

Dans les institutions provinciales ou fédérales, le traitement médian était de \$12,529 en 1968-69 soit un peu plus élevé que la médiane de toutes les institutions indépendantes \$12,507, et celui des institutions religieuses, de \$11,030. Depuis 1956-57, les médianes des institutions d'État et indépendantes ont été assez semblables et ont surpassé considérablement celle des institutions religieuses.

Comme dans le passé, le traitement médian du personnel des sciences biologiques (y compris la médecine) a été plus élevé que celui du personnel des autres disciplines. La médiane de 1968-69, \$13,698 peut être comparée à celles des autres disciplines: e.g. \$12,764 dans les sciences physiques, \$12,030 dans les sciences sociales et \$10,828 dans les humanités. La médiane du personnel préposé surtout à l'administration des facultés était de \$21,233.

En 1968-69, sur les 18,864 instituteurs inclus dans les 64 institutions qui ont fait rapport, 86.8 p. 100 étaient des hommes. En 1957-58, 89.3 p. 100 d'un total de 4,881 dans 58 institutions étaient des hommes.

Le personnel de plein temps d'un groupe de 19 institutions, de 1966-67 à 1967-68 a augmenté de 15.0 p. 100, de 8,066 à 9,279. L'accroissement de 1967-68 à 1968-69 a été de 11.6 p. 100, soit de 9,279 à 10,354.

Some 1.0 p.c. (192 of 18,864) of the 1968-69 staff of all 64 reporting institutions included, were aged 65 or over and 742 (3.9 p.c.) were 60 or over. The median age for all staff reported in this 1968-69 survey was 38 years compared with 36 years for 1967-68.

The median passage of time since the award of the first degree was 13 years for 1968-69 staff. It was 16 years in 1956-57.

Where highest earned university degree for 1968-69 staff members is considered, 49.4 p.c. were reported with doctorates, 32.8 p.c. master's degrees, 5.8 p.c. a first professional degree beyond a first baccalaureate, 9.8 p.c. a first baccalaureate, 1.7 p.c., no university degree and 0.5 p.c., no information. The percentage of staff with doctorates has risen slightly since 1967-68, when it was 46.9 p.c.

Environ 1.0 p. 100 (192 sur 18,864) du personnel de 1968-69 dans les 64 institutions qui ont fait rapport étaient âgés de 65 ans et plus et 742 (3.9 p. 100) de 60 ans et plus. L'âge médian de tout le personnel observé lors du relevé de 1968-69 était de 38 ans (36 ans en 1967-68).

Le nombre médian d'années depuis l'obtention du premier grade était de 13 ans pour le personnel de 1968-69 (16 en 1956-57).

L'examen du plus haut grade universitaire obtenu par le personnel de 1968-69 révèle que 49.4 p. 100 détenaient un doctorat, 32.8 p. 100 une maîtrise, 5.8 p. 100 un premier grade professionnel au delà d'un premier baccalauréat, 9.8 p. 100 un premier baccalauréat, 1.7 p. 100 aucun grade et 0.5 p. 100 sans information. La proportion du personnel ayant un doctorat a augmenté légèrement depuis 1967-68 alors que 46.9 p. 100 étaient docteurs.

INTRODUCTION

Scope of Data

This report is based on questionnaire forms for the 1968-69 academic year sent to 73 universities and colleges. Returns were received from 64 (listed in Note 2, following the last table) with enrolment equalling about 98 p.c. of the total enrolment of full-time undergraduate and graduate students in Canadian institutions of higher education. All but one of the salary tables are limited to data relating to lay teachers and religious teachers paid on the same scale as lay teachers: the exception is Table 3. Tables showing non-salary data include both lay and religious teachers.

Data are presented for a total of 18,864 teachers, all of them full-time and with academic ranks of lecturer or instructor or higher. These include 18,665 in receipt of salaries based on scales applying to lay personnel and 199 religious teachers in receipt of allowances below the scales applying to lay personnel.

Cautions in Interpreting Data

1. Not all Canadian institutions of higher education are included. At the beginning of the 1965-66 academic year there were about 380 institutions offering courses of university grade. Those omitted are almost all small (with less than 500 enrolment) and many of them employ religious personnel paid on a salary scale less than that for lay persons. As nearly as can be determined, all institutions with 1,000 or more full-time university-grade students are included.

2. Figures for the separate years are not strictly comparable as a few institutions are not included for all these years in all tables. The data in Table 2 are comparable.

3. The median is not the arithmetic average, but is the theoretical point in a distribution for which 50 p.c. of the cases are higher and 50 p.c. lower.

4. The range between the 1st and 3rd quartiles includes 50 p.c. of all cases. Thus 25 p.c. are below the 1st quartile and 25 p.c. are above the 3rd.

5. Fluctuations in numbers of institutions by size of enrolment are due in part to movement from one enrolment category to another during the years under review.

6. All salary data refer to basic annual salary rates. Many teachers receive extra income for teaching evening, extension or summer classes, and many earn income from non-university sources. Such extra income was not included in this report.

Portée du rapport

Le présent rapport est basé sur les questionnaires envoyés à 73 universités et collèges pour l'année académique 1968-69. Les inscriptions des 64 qui ont répondu (en voir la liste au renvoi 2 après le dernier tableau) représentent environ 98 p. 100 de tous les étudiants à temps plein inscrits aux institutions canadiennes d'enseignement supérieur. A l'exception du Tableau 3, tous les tableaux des traitements ne concernent que les professeurs laïcs et les professeurs religieux rémunérés à l'échelle des laïcs. Les tableaux qui n'ont pas trait aux traitements portent sur les professeurs tant laïques que religieux.

Les données se rapportent à 18,864 professeurs, tous à plein temps et ayant au moins le rang de chargé de cours. Sur ce nombre, 18,665 reçoivent un traitement conforme à l'échelle des laïcs et 199 professeurs religieux reçoivent un traitement inférieur à cette échelle.

Interprétation prudente des données

1. Le rapport n'envisage pas toutes les institutions canadiennes d'enseignement supérieur. Au début de l'année académique 1965-66, environ 380 institutions donnaient des cours à l'échelon universitaire. La plupart des institutions omises étaient de petites institutions (moins de 500 étudiants); plusieurs d'entre elles employaient des religieux dont l'échelle des traitements était inférieure à celle des laïques. Autant qu'on a pu le constater, toutes les institutions de 1,000 étudiants universitaires à plein temps ou plus sont représentées.

2. Les chiffres des différentes années ne sont pas strictement comparables, car quelques institutions sont omises pour certaines années dans les tableaux. Les données du Tableau 2 sont comparables.

3. La médiane n'est pas la moyenne arithmétique mais bien le point théorique d'une série de valeurs dont la moitié sont supérieures et l'autre moitié inférieures à ce point.

4. L'écart entre le 1er et le 3e quartile comprend la moitié de tous les cas, de sorte que le quart des cas sont en-deça du 1er quartile et le quart au-dessus du 3e.

5. La fluctuation du nombre d'institutions selon le nombre des inscriptions tient en partie du passage d'une catégorie d'inscriptions à une autre durant les années observées.

6. Tous les traitements indiqués sont les traitements annuels de base. Plusieurs professeurs augmentent leur revenu en enseignant aux cours du soir, d'extension ou d'été et plusieurs ont un revenu para-universitaire. Ces suppléments ne paraissent pas dans le présent rapport.

Effective Data of Salary Figures Reported

All salary data refer to basic annual salary rates in the fall of 1968.

Medians and the Situation at the End of the Academic Year

Salaries

Information was asked for to the nearest dollar. The salary distributions used in this report are \$1,000 except for data in Table 2 where a \$500 interval was used so that the figures would be consistent with those published in "University Teachers' Salaries, 1937-1960." Medians were calculated to the nearest \$100.

Although salary scales for the ensuing year are generally set prior to the start of that academic year, the medians should relatively accurately reflect the situation at the end of the academic year.

Age

The form used asked for the year of birth of each staff member. In the tables used here, age is considered as that attained by each individual during the calendar year 1968. These ages are grouped in five-year intervals. Thus all persons born in 1905, for example, were 63 years of age some time in 1968, and were all 63 and not yet 64 at the end of the year. These persons would be included in the interval 60-64.

A median or quartile reported as 63, for example, indicates that the point falls anywhere from 63.0 to 63.9 in the distribution.

If one assumes that there was an even distribution of birthdays throughout each month of each year, half of the persons would be, to use 1905 again as an example, 63 years of age at June 30, 1968. It could then be assumed that at December 31, 1968, the median age would be 63.5 years, and at June 30, 1969, 64 years. While the medians were not calculated in this manner in this report, one might add one year to each median year of age given to arrive at approximate figures for the end of the academic year 1968-69, assuming that it is June 30.

Years Since Award of First Degree

Information was requested on the year in which the first degree was obtained. As with age, the number of years was measured in relation to the calendar year 1968, and distributed in five year intervals. Medians and quartiles were calculated in the same manner as were those for age.

If the assumption is made that all degrees were received at regular spring convocations (even if actually some would be received at other times during the year), one year could be added to the medians reported to give the picture at the end of the academic year (June 30).

Date de référence des traitements déclarés

Toutes les données sur les traitements sont basées sur la rémunération annuelle de base en vigueur à l'automne de 1968.

Les médianes et la situation à la fin de l'année académique

Traitements

Les traitements, qu'on devait déclarer à un dollar près, sont groupés ici par intervalles de \$1,000, sauf au Tableau 2 où on a choisi un intervalle de \$500 pour que les chiffres correspondent à ceux qui ont paru dans "Traitements des professeurs d'université, 1937-1960". On a calculé la médiane à 100 dollars près.

Même si l'échelle des traitements pour l'année à venir est normalement établie avant le commencement de l'année académique, les médianes doivent refléter de façon relativement précise la situation à la fin de l'année académique.

Âge

Le questionnaire demandait l'année de naissance de chaque membre du personnel. Dans les tableaux, l'âge est celui qu'a atteint chaque individu au cours de l'année civile 1968. Les âges sont groupés par intervalles de cinq ans. Ainsi, les personnes nées en 1905 ont atteint 63 ans en 1968 et, à la fin de l'année, elles avaient toutes 63 ans révolus, mais non encore 64 ans. Ces personnes sont comprises dans le groupe de 60-64 ans.

La médiane ou le quartile de 63, par exemple, indique que le point se situe entre 63.0 et 63.9 dans la série.

Si les dates de naissance se répartissaient également entre les douze mois de chaque année, le moitié des personnes nées en 1905, pour reprendre l'exemple, auraient atteint leur 63^e année le 30 juin 1968. Il en découle qu'au 31 décembre 1968 l'âge médian serait de 63.5 ans et, au 30 juin 1969, de 64 ans. Dans le présent rapport, l'âge médian n'a pas été calculé de cette manière, mais il suffit d'ajouter un an à chaque âge médian indiqué pour avoir l'âge approximatif à la fin de l'année académique (30 juin) 1968-69.

Nombre d'années depuis l'obtention du premier grade

L'année d'obtention du premier grade a été demandée. Comme pour l'âge, le nombre d'années a été calculé par rapport à l'année civile 1968, et le classement fait par groupes quinquennaux. Les médianes et quartiles ont été calculés de la même façon que ceux de l'âge.

Si l'on suppose que tous les grades ont été obtenus au printemps (même si certains l'ont été à d'autres époques de l'année), il suffit d'ajouter un an aux médianes indiquées pour connaître la situation à la fin de l'année académique (30 juin).

SUMMARY

Salaries (Tables 1-17)

Rank

For the 18,665 university teachers with academic rank, reported as receiving salary at rates applicable to lay personnel, the median salary in 1968-69 was \$12,224, 7.2 p.c. higher than the median for 1967-68. For deans it was \$22,555, for professors \$18,516 for associate professors \$14,058, for assistant professors \$11,030, for ungraded professors \$11,581 and for lecturers and instructors \$8,649. The 1968-69 median for ungraded professors (a small and heterogeneous group) was 11.1 p.c. higher than for 1967-68. For other ranks the increase ranged from 7.8 p.c. for assistant professors to 8.8 p.c. for deans. (See Tables A and 1, and Chart 1.)

Sex

For all ranks combined the median salary for women was \$2,534 lower than that for men. Women were concentrated in the more junior ranks, as will be noted later, and hence the median for them was less. Even for the higher ranks the median for women tended to be lower. However, equality in salaries was closest for the higher ranks. (See Tables 1, 7-11, 12, 17.)

Field

Those engaged primarily in faculty administration (all deans and 118 others were so classified) had a median salary of \$21,233, 6.0 p.c. above that for 1967-68. Of the others, teachers in the biological sciences (including medicine) had the highest median salary—\$13,698, followed by those in the physical sciences—\$12,764, the social sciences—\$12,030, and the humanities—\$10,828. In these four teaching fields, percentage increases ranged from 6.0 p.c. in faculty administration to 7.9 p.c. in the biological sciences. (See Tables A, 1 and 12, and Chart 1.)

Religious Teachers

The bases on which allowances were reported for religious teachers varied widely. Some figures given were estimates of average expenses, some were amounts actually paid, some were nominal book entries. Data on 199 such teachers show that 46 of them received no allowance. Median allowance for the other 153 was \$10,864 (\$11,227 for men, for women; see footnote 6). The median of allowances reported in 1967-68 was \$8,429 but this figure is not comparable with the 1968-69 median due to different institutions being included in the two years and different methods of reporting the allowances. (See Table 3.)

SOMMAIRE

Traitements (Tableaux 1-17)

Rang professoral

Le traitement médian des 18,665 professeurs d'université de rang professoral rémunérés au barème laïc a été de \$12,224 en 1968-69 et dépassait de 7.2 p. 100 la médiane de 1967-68. Il était de \$22,555 pour les doyens, de \$18,516 pour les professeurs titulaires, de \$14,058 pour les professeurs agrégés, de \$11,030 pour les professeurs adjoints, de \$11,581 pour les professeurs non classés et de \$8,649 pour les chargés de cours. La médiane de 1968-69 pour les professeurs non classés (petit groupe hétérogène) était de 11.1 p. 100 supérieure à celle de 1967-68. L'augmentation des autres rangs variait de 7.8 p. 100 pour les professeurs adjoints à 8.8 p. 100 pour les doyens. (Voir Tableaux A et 1, et Graphique 1.)

Sexe

Dans l'ensemble des rangs professoraux, le traitement médian des femmes était inférieur de \$2,534 à celui des hommes. Les femmes se trouvaient surtout aux rangs inférieurs, comme on le soulignera plus loin, ce qui a baissé leur médiane; mais même aux rangs supérieurs, le traitement médian des femmes était en général moins élevé. L'égalité de traitement était plus apparente aux rangs les plus élevés. (Voir Tableaux 1, 7-11, 12, 17.)

Domaine

Les professeurs qui s'occupaient surtout de l'administration des facultés (tous les doyens et 118 autres) ont touché un traitement médian de \$21,233, une augmentation de 6.0 p. 100 sur 1967-68. Chez les autres, le plus haut traitement médian a été celui des professeurs de sciences biologiques (y compris la médecine), soit \$13,698, venaient ensuite celui des professeurs de sciences physiques, \$12,764, des sciences sociales, \$12,030 et des humanités, \$10,828. Dans ces quatre domaines, l'augmentation procentuelle allait de 6.0 p. 100 pour l'administration des facultés à 7.9 p. 100 dans les sciences biologiques (Voir Tableau A, 1 et 12 et Graphique 1.)

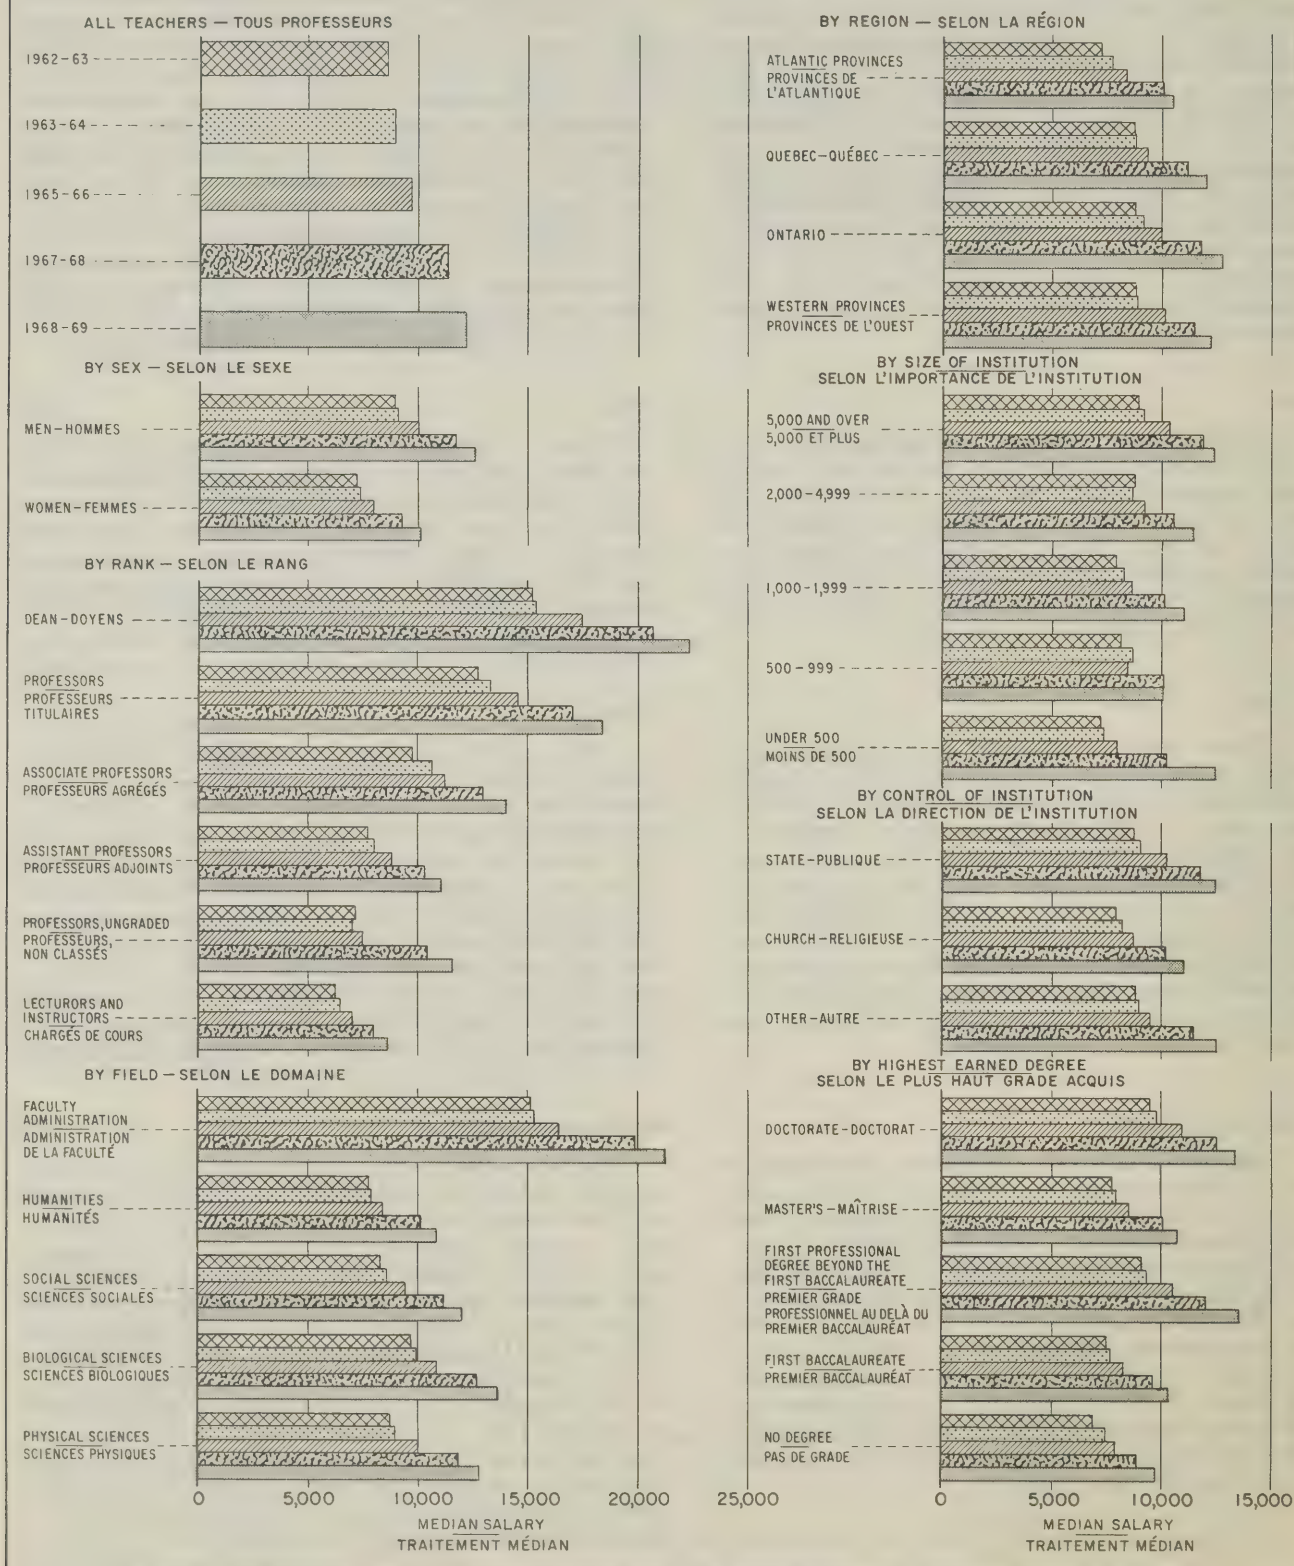

Professeurs religieux

La rémunération des professeurs religieux a été déclarée selon des fondements très variés. Certains chiffres étaient des estimations des dépenses moyennes, d'autres donnaient le montant effectivement payé et d'autres étaient un poste purement comptable. Les données sur 199 professeurs indiquent que 46 d'entre eux ne recevaient pas de rémunération. La rémunération médiane des 153 autres était de \$10,864 (\$11,227 pour les hommes, pour les femmes voir renvoi 6). En 1967-68 cette médiane était de \$8,429 mais ce chiffre n'est pas comparable à la médiane de 1968-69 parce que des institutions différentes ont été incluses pendant ces deux années et que des méthodes différentes ont servi à déclarer la rémunération. (Voir Tableau 3.)

CHART-1

GRAPHIQUE-1

MEDIAN SALARIES OF UNIVERSITY TEACHERS, 1962-63 TO 1968-69
TRAITEMENTS MÉDIANS DES PROFESSEURS D'UNIVERSITÉ, 1962-63 À 1968-69

Historical Comparisons

The DBS publication "University Teachers' Salaries, 1937-1960," allows historical comparisons to be made of median salaries paid in 19 major institutions. The median for all ranks in this group for 1968-69 was \$12,847 (\$623 higher than for all personnel included in the present report). (See Table 2 and Chart 2.)

Region

For 1967-68 median salaries of all staff included from Western Provinces, Ontario, Quebec and the Atlantic Provinces were \$11,596, \$11,844, \$11,196, and \$10,027, respectively. The highest median in 1968-69 was for Ontario (\$12,783), the Western Provinces at (\$12,272), Quebec (\$12,075) and the Atlantic Provinces (\$10,596). Comparing the 1968-69 and 1967-68 medians, the increase for Ontario was 7.9 p.c., for Quebec 7.8 p.c., for the Western Provinces, 5.8 p.c. and for the Atlantic Provinces, 5.6 p.c. (See Tables A, 4 and 13, and Chart 1.)

Size of Institution

Eighteen institutions in 1968-69 had full time enrolments of over 5,000. The 2,000-4,999 category decreased in 1968-69 to 13 institutions from 15 in 1967-68 while 13 institutions with 1,000-1,999 students were included in 1968-69 as compared with 8 in 1967-68. The number of institutions with 500-999 students decreased from 14 to 9 from 1967-68 to 1968-69 and 11 institutions in 1968-69 reported less than 500 students as contrasted with 14 in 1967-68.

In 1967-68 the median for all staff combined was highest for the 5,000 and over group (\$12,563 in 1968-69). Next highest for 1968-69 was the 500 or less group (\$12,533) followed by the 2,000-4,999 category (\$11,511). Next were institutions with 1,000-1,999 students (\$11,068) and finally institutions with 500 to 999 students (\$10,033).

Increases from 1967-68 to 1968-69 for all ranks combined ranged from 0.0 p.c. for institutions with 500-999 students to 11.8 p.c. for institutions with less than 500 students. (See Tables A, 5 and 14, and Chart 1.)

Control of Institution

Since the first survey 1956-57, medians for all staff combined, at independent and at state institutions have been higher than the medians for church-related institutions. This situation again prevailed for 1968-69, the median for state institutions (\$12,529) being higher than that for independent institutions (\$12,507). The median for church related institutions was (\$11,030).

Comparaisons chronologiques

La publication du B.F.S., "Traitements des professeurs d'université, 1937-1960", permet de comparer chronologiquement les traitements médians dans 19 grandes institutions. La médiane de tous les rangs professoraux de ce groupe, en 1968-69, a été de \$12,847 (\$623 de plus que celle de tout le personnel compris dans le présent rapport. (Voir Tableau 2 et Graphique 2.)

Région

En 1967-68, les traitements médians de tout le personnel (compris dans le présent rapport) des provinces de l'Ouest, de l'Ontario, du Québec et des provinces Atlantiques étaient de \$11,596, \$11,844, \$11,196 et \$10,027 respectivement. La médiane la plus élevée en 1968-69 était celle de l'Ontario (\$12,783), supérieure à celle des provinces de l'Ouest, (\$12,272). La médiane du Québec a été de \$12,075 et celle des provinces Atlantiques, de \$10,596. Si l'on compare les médianes de 1968-69 et de 1967-68, l'augmentation a été de 7.9 p. 100 en Ontario, au Québec, 7.8 p. 100, dans les provinces de l'Ouest, 5.8 p. 100, dans les provinces Atlantiques, 5.6 p. 100. (Voir Tableaux A, 4 et 13, et Graphique 1.)

Importance de l'institution

En 1968-69, dix-huit institutions comptaient plus de 5,000 étudiants à plein temps. Le nombre de celles qui ont entre 2,000 et 4,999 étudiants est passé de 15 à 13 entre 1967-68 et 1968-69, tandis que 13 institutions ayant de 1,000 à 1,999 étudiants étaient comprises en 1968-69, contre 8 en 1967-68. Le nombre d'institutions ayant de 500 à 999 étudiants est passé de 14 à 9 de 1967-68 à 1968-69; 11 ont déclaré avoir moins de 500 étudiants en 1968-69, contre 14 en 1967-68.

En 1967-68, la médiane de tout le personnel réuni a été la plus élevée dans les institutions de 5,000 étudiants et plus (\$12,563 en 1968-69.) Viennent ensuite celles de moins de 500 étudiants (\$12,533), de 2,000-4,999 étudiants (\$11,511) de 1,000-1,999 étudiants (\$11,068) et de 500-999 étudiants (\$10,033).

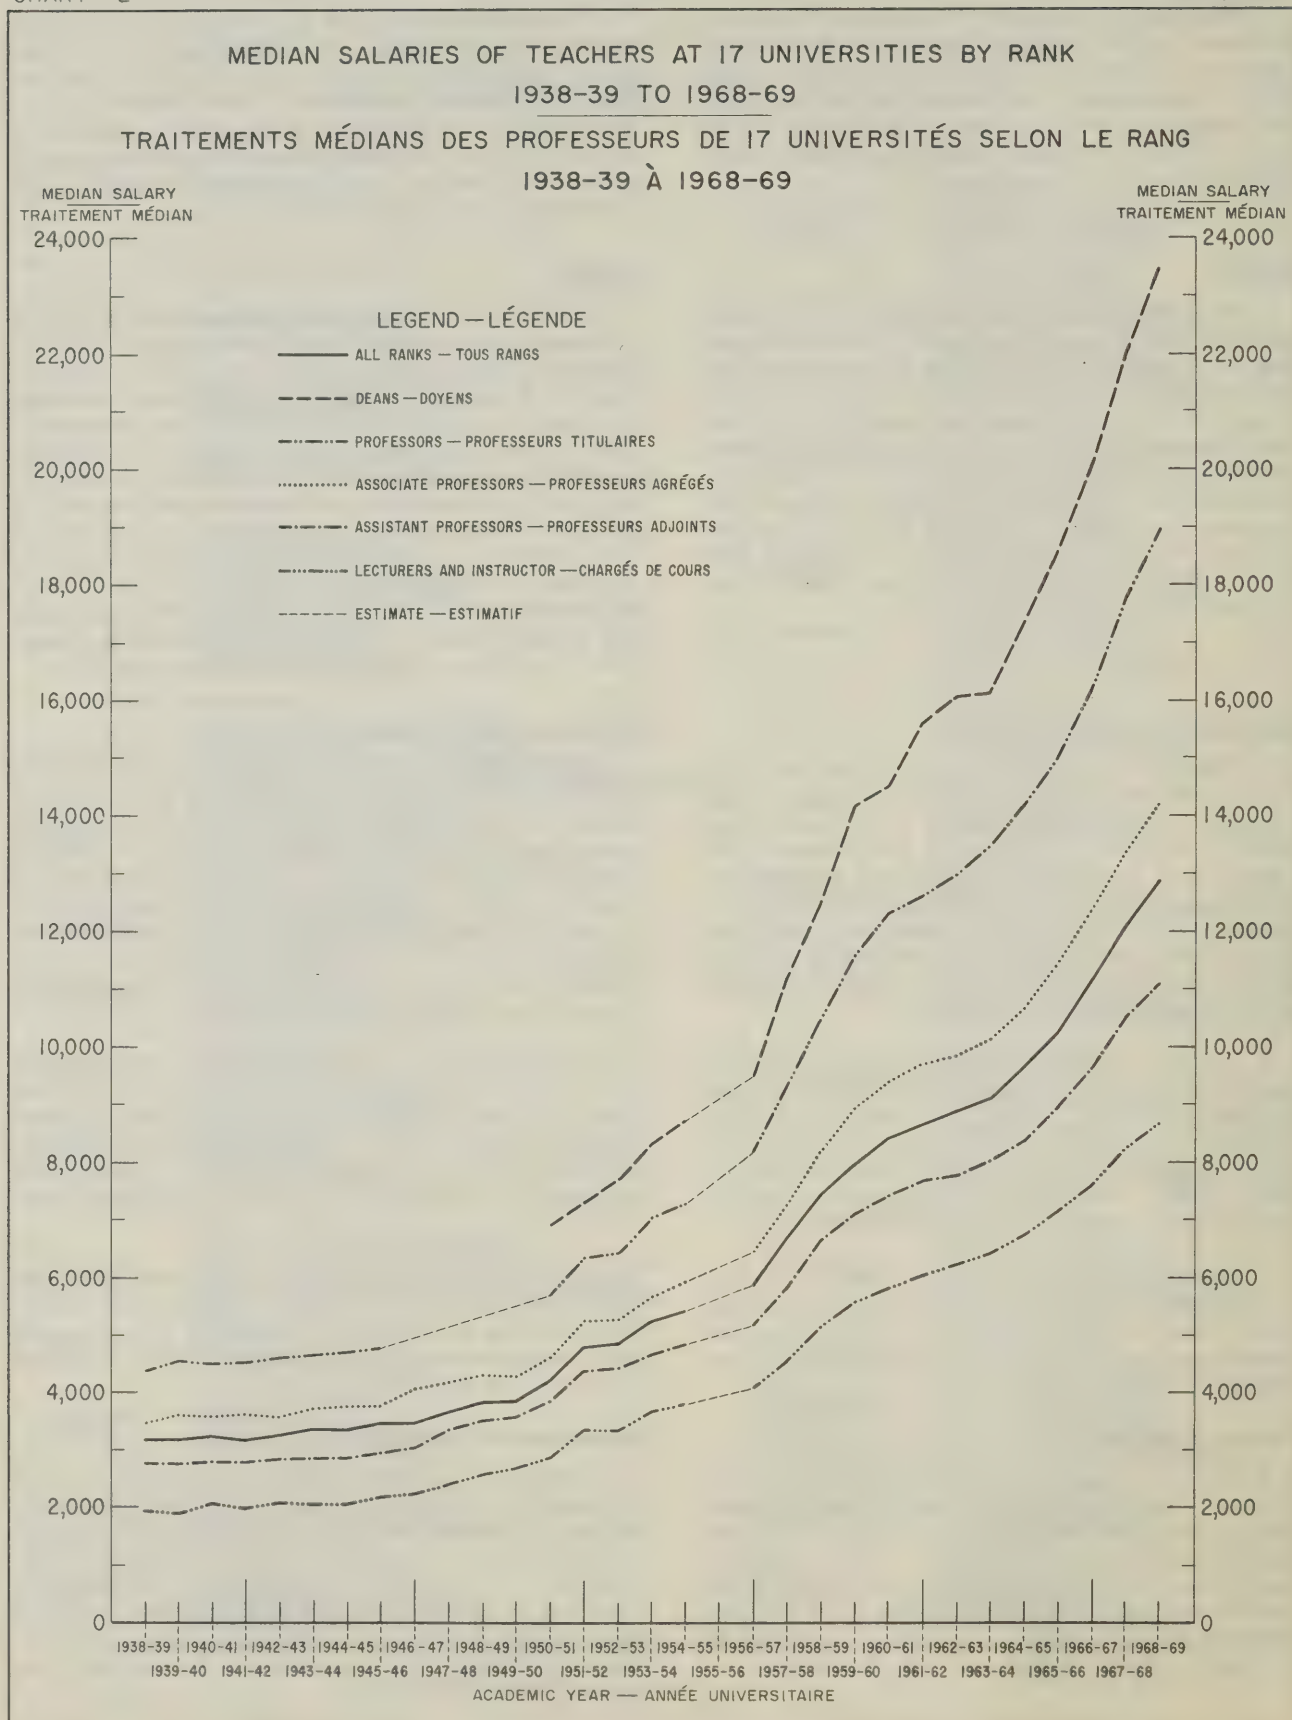

Les hausses de 1967-68 à 1968-69 pour tous les rangs professoraux réunis ont varié de 0.0 p. 100 pour les institutions de 500-999 à 11.8 p. 100 pour celles de moins de 500 étudiants. (Voir Tableaux A, 5, et 14 et Graphique 1.)

Direction de l'institution

Depuis la première enquête (en 1956-57), les médianes de tout le personnel réuni, dans les institutions indépendantes et les institutions d'état, ont été plus élevées que celles des institutions religieuses. La situation est demeurée la même en 1968-69, la médiane des institutions d'état (\$12,529) étant plus forte que celle des institutions indépendantes (\$12,507). La médiane des institutions religieuses a été de (\$11,030).

CHART - 2

GRAPHIQUE - 2

From 1967-68 to 1968-69, independent institutions showed the greatest increase (8.4 p.c.). Increases for church-related and state institutions were 8.2 p.c. and 5.8 p.c., respectively. (See Tables 6 and 15 and Chart 1.)

Faculty

There is no uniformity in the organization of universities into faculties, schools and institutes, so data grouped in this way are only relatively significant. A tabulation is presented, however, which indicates that highest salaries were paid in faculties of dentistry (median \$16,100), followed by faculties of medicine (\$15,064), agriculture (\$13,800), pharmacy (\$13,650) and law (\$13,555). Other faculties for which information is available with median salaries over \$13,000 include in descending order, engineering, and social work.

Subject

If the four teaching fields of humanities, social sciences, biological sciences, and physical sciences are subdivided into "pure" and "applied" areas and by subject (ignoring faculty organization), further comparisons of salaries may be made.

In the **humanities**, median salaries by subject were in this order: theology \$11,750; classical languages and literature \$11,570; fine arts \$11,400; philosophy \$11,150; modern languages and literature (including English and French) \$10,823; music \$10,592; and fine and applied arts, \$10,588. (See Table 8.)

In the **social sciences**, the order was as follows: law, \$13,225; education, \$12,961; commerce and business administration, \$12,273; social work, \$12,133; economics and political science, \$12,079; psychology, \$12,070; geography, \$11,750; history, \$11,369; sociology, \$11,280; household science, \$10,580; physical education, \$10,475. (See Table 9.)

Median salaries in the **biological sciences** were: dentistry, \$16,084; medicine, \$15,087; agriculture, \$13,733; pure biological science (including botany and zoology), \$13,255; pharmacy, \$13,200; physiotherapy and occupational therapy, \$9,075; nursing, \$8,933. (See Table 10.)

In the **physical sciences**, mining engineering led with a median salary of \$14,680; followed by chemical engineering, \$13,900; civil engineering,

De 1967-68 à 1968-69, les institutions indépendantes ont marqué la plus forte augmentation (8.4 p. 100). L'augmentation, dans le cas des institutions religieuses et des institutions d'état, a été de 8.2 p. 100 et de 5.8 p. 100 respectivement. (Voir Tableaux 6 et 15 et Graphique 1.)

Faculté

Vu le manque d'uniformité dans l'organisation des universités en facultés, écoles et instituts, les données ainsi groupées n'ont qu'une valeur relative. On a cependant dressé un tableau qui montre que les traitements médians les plus élevés ont été payés, suivant l'ordre décroissant, par les facultés d'art dentaire (\$16,100), de médecine (\$15,064), d'agriculture (\$13,800), de pharmacie (\$13,650) et de droit (\$13,555). Les autres facultés pour lesquelles les données sont connues et où les traitements médians dépassent \$13,000, étaient dans le même ordre, de génie et de service social.

Matière

La division des humanités, sciences sociales, sciences biologiques et sciences physiques en sciences "pures" et "appliquées" et selon la matière (sans tenir compte de l'organisation en facultés) permet d'autres comparaisons de traitements.

Dans les **humanités**, les traitements médians par matière étaient les suivants: théologie, \$11,750; langues et littérature classiques, \$11,570; philosophie, \$11,150; langues et littérature modernes (y compris les langues et la littérature anglaises et françaises), \$10,823; musique, \$10,592; et beaux-arts et arts industriels, \$10,588. (Voir Tableau 8.)

Dans les **sciences sociales**, l'ordre était le suivant: droit, \$13,225; pédagogie, \$12,961; commerce et affaires, \$12,273; service social, \$12,133; économie et sciences politiques, \$12,079; psychologie, \$12,070; géographie, \$11,750; histoire, \$11,369; sociologie et anthropologie, \$11,280; sciences ménagères, \$10,580; culture physique et hygiène, \$10,475. (Voir Tableau 9.)

Les traitements médians dans les sciences **biologiques** étaient les suivants: art dentaire \$16,084; médecine, \$15,087; agriculture, \$13,733; sciences biologiques et sciences pures (dont la botanique et la zoologie), \$13,255; pharmacie, \$13,200; physiothérapie et ergothérapie, \$9,075; et soins infirmiers, \$8,933. (Voir Tableau 10.)

Dans les **sciences physiques**, le génie minier se classe en tête avec un salaire médian de \$14,680; suivi du génie chimique, \$13,900; du génie civil

\$13,360; geology, \$13,267; mechanical engineering, \$13,078; chemistry, \$12,820; physics, \$12,807; architecture, \$12,675; electrical engineering, \$12,650; mathematics \$11,578. (See Table 11.)

While some of the above medians may seem too high or too low in relation to others, it should be borne in mind that they are influenced by the distribution of faculty by rank in each subject area. Some areas may have a much larger proportion of junior staff to instruct greatly increasing enrolment in them. Other areas, especially professional, may require a larger proportion of highly paid senior staff.

Years Since Award of First Degree

As a substitute for a measure of teaching experience, universities and colleges were asked to report for each teacher the year in which he obtained his first university degree—from which was calculated the number of years since that award. The median salary of those less than five years away from the first degree was \$8,567. The greater the number of years since that award, the greater the median salary—up to the 40-44 years group \$18,050). (See Table 12, Chart 3.)

For men only, the highest median in 1968-69 was for those 35-39 years beyond the first degree (\$18,539). The highest median for women was for the 40-44 year group, it being \$14,150. (See Table 12 and Chart 3.)

Although the number of those engaged primarily in faculty administration who had received their first degrees less than 20 years previously rose from 90 out of a total of 324 in 1967-68 to 115 out of 400 in 1968-69 the proportion remained small. Median salaries ranged from \$20,800 for those 20-24 years beyond that date to \$22,550 for those 40-44 years beyond. In the humanities, median salaries ranged from \$8,154 for those less than 5 years beyond the first degree to \$16,225 for those 40-44 years beyond. Comparable figures for the social sciences were \$9,069 and \$17,350 (40-44 years); for the biological sciences \$8,008 and \$19,616 (40-44 years); and for the physical sciences \$9,073 and \$18,250 (30-34 years). Medians for women were in all cases lower than those for men. (See Table 12.)

In the Atlantic Provinces the median salary for those less than 5 years beyond the first degree was \$8,116 and the highest median, \$15,750 was for those 35-39 years beyond that award. In Quebec the range was from \$8,583 to \$18,483 (in the 35-39 years group); in Ontario \$8,883 to \$19,050 (40-44 years group); and the Western Provinces \$8,690 to \$17,750 (in the 35-39 years group). (See Table 13.)

\$13,360; de la géologie, \$13,267; du génie mécanique, \$13,078; de la chimie, \$12,820; de la physique \$12,807; de l'architecture, \$12,675; du génie électrique, \$12,650; des mathématiques, \$11,578. (Voir Tableau 11.)

Certaines de ces médianes peuvent sembler trop élevées ou trop basses par rapport aux autres, mais il faut se rappeler qu'elles reflètent la répartition de la faculté selon le rang professoral dans chaque domaine. Certains domaines peuvent avoir une proportion beaucoup plus forte de professeurs de rang inférieur pour instruire un nombre toujours croissant d'étudiants. D'autres domaines, particulièrement les domaines professionnels, peuvent exiger une plus grande proportion de personnel de rang élevé mieux rémunéré.

Années depuis l'obtention du premier grade

A titre d'indice des années d'enseignement, les universités et collèges devaient déclarer l'année d'obtention du premier grade universitaire de chaque professeur, ce qui a permis de calculer le nombre d'années depuis ce premier grade. Le traitement médian de ceux qui comptaient moins de 5 ans depuis le premier grade était de \$8,567. Plus le nombre d'années depuis l'obtention du premier grade augmentaient plus le traitement médian augmentait, jusqu'au groupe de 40-44 ans (\$18,050). (Voir Tableau 12, et Graphique 3.)

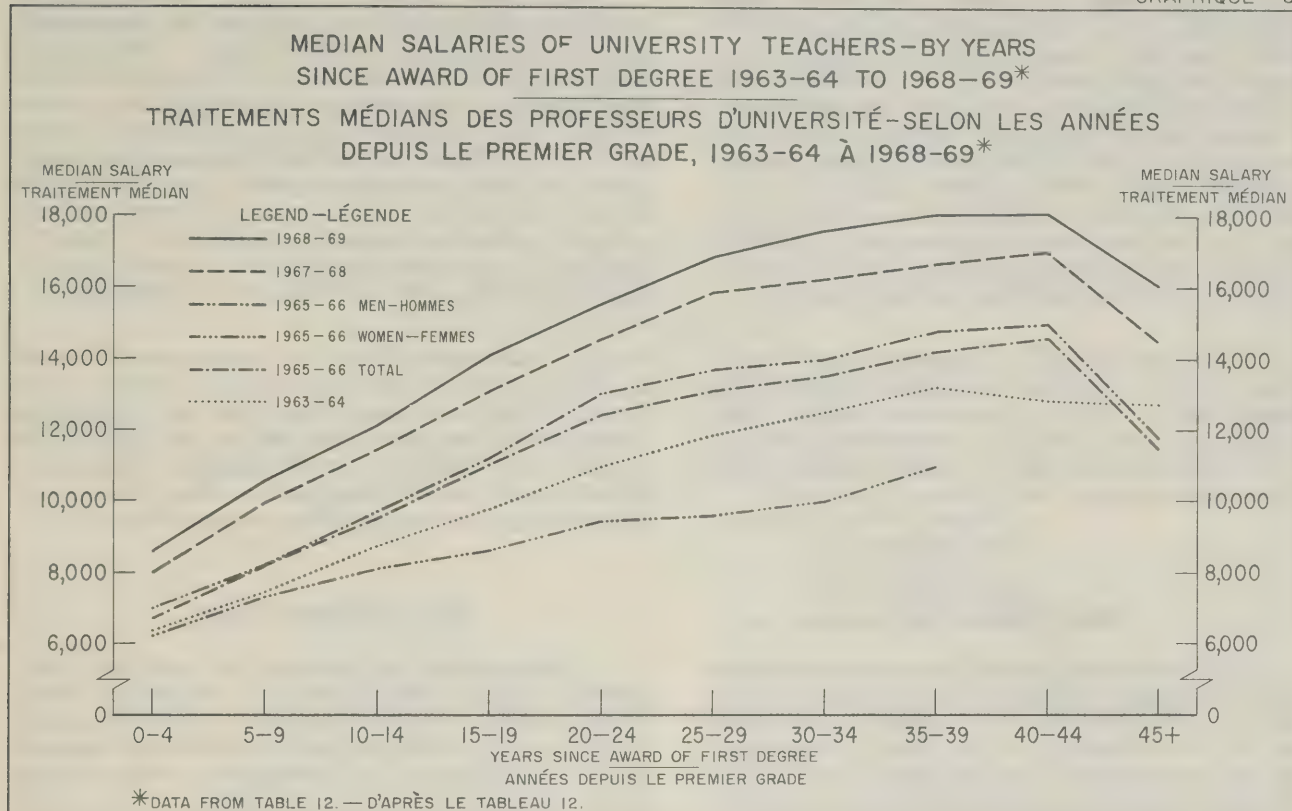

Chez les hommes, la médiane la plus élevée en 1968-69 était celle du groupe de 35-39 ans depuis le premier grade (\$18,539). Chez les femmes, c'était celle du groupe de 40-44 ans (\$14,150). Voir Tableau 12 et Graphique 3.)

Bien que le nombre des administrateurs de facultés qui aient obtenu leur premier grade moins de 20 ans auparavant ait augmenté de 90 sur un total de 324 en 1967-68 à 115 sur 400 en 1968-69, la proportion est restée négligeable. Les traitements médians variaient de \$20,800 pour ceux de 20-24 ans à \$22,550 pour le groupe de 40-44 ans. Dans les humanités, ils variaient de \$8,154 pour le groupe de moins de 5 ans depuis le premier grade à \$16,225 pour ceux de 40-44 ans. Voici les chiffres comparables des autres facultés: sciences sociales, \$9,069 et \$17,350 (40-44 ans); sciences biologiques, \$8,008 et \$19,616 (40-44 ans); et sciences physiques, \$9,073 et \$18,250 (30-34 ans). Dans tous les cas, les médianes des femmes étaient inférieures à celles des hommes. (Voir Tableau 12.)

Dans les provinces Atlantiques, les traitements médians des professeurs de moins de 5 ans depuis le premier grade étaient de \$8,116 et la plus haute médiane, de \$15,750 pour ceux de 35-39 ans depuis ce grade. Au Québec, l'écart était de \$8,583 à \$18,483 (pour le groupe de 35-39 ans); en Ontario, il était de de \$8,883 à \$19,050 (40-44 ans); et dans les provinces de l'Ouest, de \$8,690 à \$17,750 (35-39 ans). (Voir Tableau 13.)

CHART — 3

GRAPHIQUE — 3

Comparison by size of institution reveals that in universities with enrolment over 5,000 the range of median salaries was from \$8,797 for those less than 5 years beyond the first degree to \$18,562 for those 40-44 years beyond. The range for institutions with 2,000-4,999 students was from \$8,547 to \$17,400 (35-39 years group); for those with 1,000-1,999 students, \$8,529 to \$16,750 (35-39 years group); 500-999 students \$8,020 to \$15,850 (30-34 years group); and under 500 students \$8,150 to \$14,650 (30-34 years group). (See Table 14.)

In institutions under state (provincial or federal) control median salaries ranged from \$8,581 for teachers less than 5 years beyond the first degree to \$18,950 (40-44 years beyond). For church-related institutions the range was from \$8,072 to \$17,450 (35-39 years beyond), and for independent institutions it was from \$9,033 to \$18,023 (30-34 years beyond). (See Table 15.)

Highest University Degree

The median salary of teachers with a Ph.D. or equivalent degree (\$13,481) was less than the median for those with a first professional degree beyond the first baccalaureate (e.g. usually such degrees as M.D., D.D.S., D.V.M., B.L.S., B.Ed., B.S.W.)—\$13,667. However it was higher than for those with a master's degree (\$10,758) and a first baccalaureate (\$10,311). (See Table 16 and Chart 1.)

La comparaison selon l'importance de l'institution révèle que, dans celles de 5,000 étudiants et plus, l'écart du traitement médian allait de \$8,797 pour les professeurs de moins de 5 ans depuis le premier grade à \$18,562 pour ceux de 40-44 ans. Dans les institutions de 2,000 à 4,999 étudiants, l'écart était de \$8,547 à \$17,400 (35-39 ans); dans celles de 1,000 à 1,999 étudiants, de \$8,529 à \$16,750 (35-39 ans); dans celles de 500 à 999 étudiants, de \$8,020 à \$15,850 (30-34 ans); et dans celles de moins de 500 étudiants, de \$8,150 à \$14,650 (30-34 ans). (Voir Tableau 14.)

Dans les institutions provinciales ou fédérales, le traitement médian variait de \$8,581 pour les professeurs de moins de 5 ans depuis le premier grade à \$18,950 (40-44 ans). Dans les institutions religieuses, l'écart allait de \$8,072 à \$17,450 (35-39 ans) et dans les institutions indépendantes, de \$9,033 à \$18,023 (30-34 ans). (Voir Tableau 15.)

Le plus haut grade universitaire

Le traitement médian des professeurs qui détenaient un Ph.D. ou un grade équivalent (\$13,481) était inférieur à celui des professeurs qui détenaient un premier grade professionnel supérieur au premier baccalauréat (D.M., D.D.S., D.V.M., B.Biblio., B.Ped., B.S.S.) (\$13,667). Le premier dépassait celui des professeurs détenant une maîtrise (\$10,758) et un premier baccalauréat (\$10,311). (Voir Tableau 16 et Graphique 1.)

Another form of salary comparison among professions is to relate salaries to the number of years that have elapsed since the award of the highest earned university degree. For those with a doctorate, the range was from \$11,500 for the 0-4 years group to \$19,567 for those 30-34 years beyond the Ph.D. or equivalent degree. Ranges for other degrees were: masters—\$9,542 (0-4) to \$17,350 (30-34); first professional degree beyond the first baccalaureate—\$9,100 (0-4) to \$19,575 (30-34); and first baccalaureate—\$8,042 (0-4) to \$15,550 (35-39). (See Table 16A and Chart 4.)

The median salary for men with a Ph.D. degree was \$13,745, and that for women \$12,016. For those with a master's degree the medians were \$11,007 for men and \$9,959 for women. Medians were higher for men than for women in each of the other degree groups. (See Tables 16A and 17.)

Age (Tables 18-23)

The median age for staff in various categories has not changed appreciably since the survey for 1956-57. The fact that the median has not gone up, as would normally be the case if there were few additions to staff, implies that a large number of young teachers are being added to the staff complement. This is borne out by an examination of data for recent years.

The median age of the 18,864 lay and religious teachers in the 64 universities and colleges reporting was 38 years (in 1967-68 it was 38 years). Of those for whom data on age were given, 1.6 p.c. were under 25 (2.0 p.c. in 1967-68) and 1.0 p.c. were at age 65 or over (1.2 p.c. in 1967-68). Those 55 years and over, most of whom might be expected to retire within 10 years, equalled 8.4 p.c. (8.5 p.c. in 1967-68). Those engaged in faculty administration (almost all of them deans) had a median age of 49 years; in the humanities, 36; in the social sciences, 36; in the biological sciences, 39; and in the physical sciences, 36 years. (See Table 18).

The median age of teachers with a doctorate was 39 years; a master's degree, 36 years; a first professional degree beyond a first baccalaureate, 39 years; a first baccalaureate, 36 years; and no university degree, 42 years. (See Table 19.)

Years Since Award of First Degree (Table 24)

For the 18,864 teachers in all 64 institutions the median passage of time since award of the first degree was 13 years (compared with 13 years

Une autre façon de comparer les traitements parmi les professions est de relier les traitements au nombre d'années écoulées depuis l'obtention du plus haut grade universitaire. Pour ceux qui avaient un doctorat, l'écart allait de \$11,500 pour le groupe de 0-4 ans à \$19,567 pour celui des 30-34 ans après l'obtention du doctorat ou d'un grade équivalent. Voici les écarts des autres grades: maîtrise, \$9,542 (0-4) à \$17,350 (30-34); premier grade professionnel après le premier baccalauréat, \$9,100 (0-4) à \$19,575 (30-34); et premier baccalauréat, \$8,042 (0-4) à \$15,550 (35-39). (Voir Tableau 16A et Graphique 4.)

Le traitement médian des professeurs détenant un Ph.D. a été de \$13,745 chez les hommes et de \$12,016 chez les femmes. Pour ceux qui avaient une maîtrise, les médianes ont été de \$11,007 et de \$9,959. Les médianes pour les hommes étaient plus élevées que celles des femmes dans chacun des autres groupes de grade. (Voir Tableaux 16A et 17.)

Âge (Tableaux 18-23)

L'âge médian du personnel des diverses catégories n'a guère changé depuis le rapport de 1956-57. La médiane n'ayant pas monté, comme il serait normal si peu de professeurs s'ajoutaient au personnel, il s'ensuit que le professorat s'enrichit d'un grand nombre de jeunes professeurs. C'est ce que révèle l'examen des données des récentes années.

L'âge médian des 18,864 professeurs laïcs et religieux des 64 universités et collèges déclarants était de 38 ans (38 ans en 1967-68). Parmi ceux dont les données sur l'âge sont connues, 1.6 p. 100 avaient moins de 25 ans (2.0 p. 100 en 1967-68) et 1.0 p. 100 avaient 65 ans et plus (1.2 p. 100 en 1967-68). Ceux de 55 ans et plus, dont la plupart prendront sans doute leur retraite d'ici 10 ans, représentaient 8.4 p. 100 (8.5 p. 100 en 1967-68). L'âge médian des administrateurs de facultés (la plupart doyens) était de 49 ans; dans les humanités, de 36 ans; dans les sciences sociales, de 36 ans; dans les sciences biologiques, de 39 ans; et dans les sciences physiques, de 36 ans. (Voir Tableau 18.)

L'âge moyen des professeurs détenant un doctorat était de 39 ans; une maîtrise, 36 ans; un premier grade professionnel au-delà du premier baccalauréat, 39 ans; un premier baccalauréat, 36 ans; et aucun grade universitaire, 42 ans. (Voir Tableau 19.)

Années depuis l'obtention du premier grade (Tableau 24)

Pour les 18,864 professeurs des 64 institutions, le nombre médian d'années depuis le premier grade était de 13 ans (13 ans en 1967-68); pour les doyens,

CHART — 4

GRAPHIQUE — 4

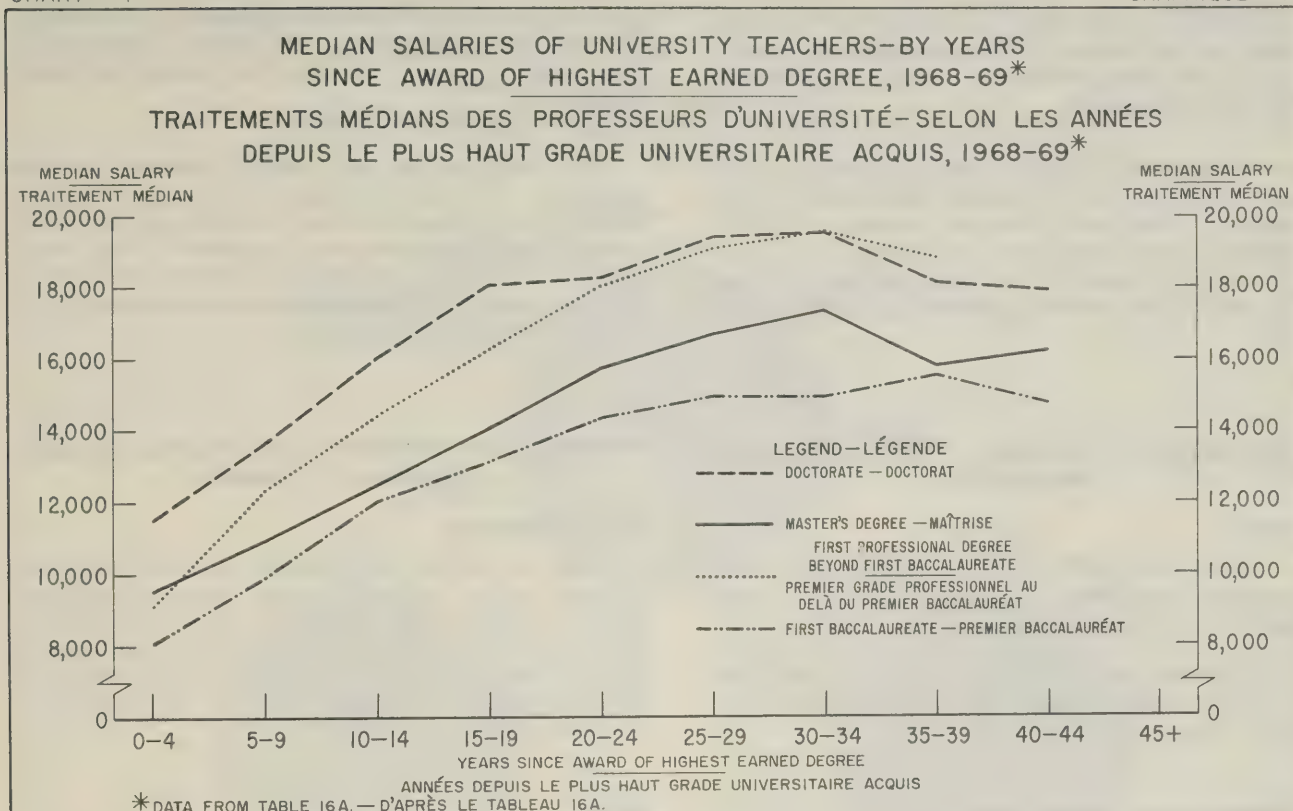

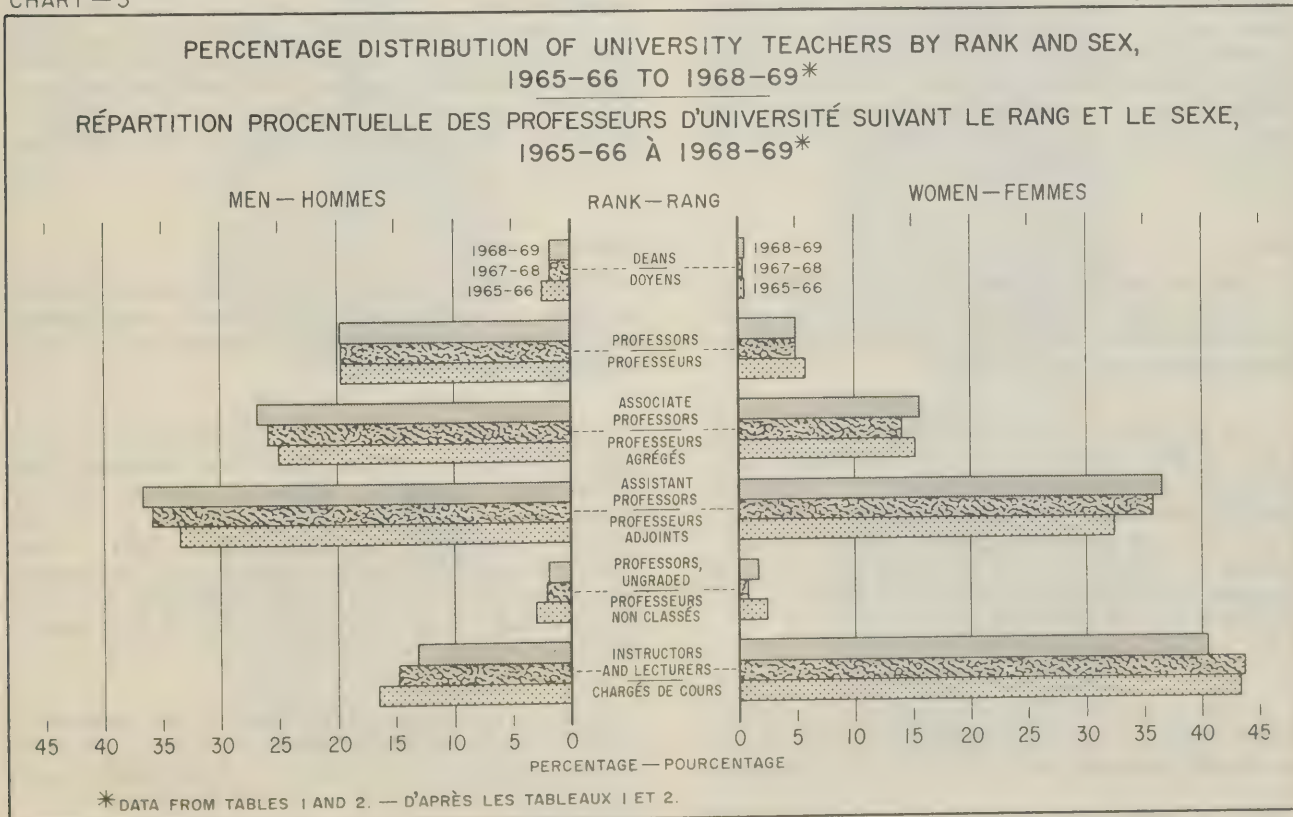

CHART — 5

GRAPHIQUE — 5

in 1967-68). For deans (1967-68 medians in parenthesis) it was 27 (28), for professors 24 (24), associate professors 16 (16), assistant professors 10 (10), ungraded professors 11 (12), and lecturers and instructors 6 (6).

Comparison by field shows that, on the average, those engaged in faculty administration had obtained the first university degree 25 years earlier. In the humanities the median was 13, in the social sciences 12, in the biological sciences 15, and in the physical sciences 13. (See Table 24.)

Distribution of University Teachers by Rank, Sex and Field

Rank

Of the 18,233 teachers (excluding deans and ungraded professors) reported in the four main teaching categories, 18.5 p.c. were "full" professors, 26.3 p.c. associate professors, 37.8 p.c. assistant professors, and 17.4 p.c. instructors and lecturers. The percentages in 1967-68 were 18.4, 25.2, 37 and 19.4. (See Table 18.)

Degree

By highest earned university degree, 18,792 teachers (excluding 72 for whom no information was reported) were distributed as follows: doctorate 49.5 p.c., master's degree 33.1 p.c., first professional degree beyond the first baccalaureate 5.8 p.c., baccalaureate 9.8 p.c., and no university degree 1.8 p.c. In 1967-68 the percentages were 48.0, 32.5, 7.2, 10.2 and 1.9. (See Table 19 and Chart 6.)

Sex

Of the total of 18,864 full-time teachers reported in 1968-69, men numbered 16,371 (86.8 p.c.) and women 2,493 (13.2 p.c.). In 1967-68 the percentages were 86.6 and 13.4.

Of the men, 1.7 p.c. were deans; of the women, 0.6 p.c. The proportions in the other ranks were: professor, 19.9 p.c. of the men and 4.7 p.c. of the women; associate professor, 26.8 p.c. and 15.7 p.c.; assistant professor, 36.6 p.c. and 36.5 p.c.; ungraded professors, 1.8 p.c. and 1.7 p.c.; and lecturer or instructor, 13.2 p.c. and 40.8 p.c. (See Tables 1 and 3, and Chart 5.)

The proportions of the 16,141 men and the 2,453 women paid on a basis applicable to lay personnel, holding the various university degrees

il était de 27 (28); pour les professeurs titulaires, 24 (24); pour les professeurs agrégés, 16 (16); pour les professeurs adjoints, 10 (10); pour les professeurs non classés, 11 (12); et pour les chargés de cours, 6 (6).

La comparaison par domaine indique que, en moyenne, les administrateurs de faculté avaient obtenu leur premier grade universitaire 25 ans auparavant. Dans les humanités, la médiane était de 13; dans les sciences sociales, 12; dans les sciences biologiques, 15; et dans les sciences physiques, 13. (Voir Tableau 24.)

Répartition des professeurs selon le rang, le grade, le sexe et le domaine

Rang professoral

Sur les 18,233 professeurs (à l'exclusion des doyens et des professeurs non classés) déclarés dans les quatre rangs principaux, 18.5 p. 100 étaient titulaires, 26.3 p. 100 agrégés, 37.8 p. 100 adjoints et 17.4 p. 100 chargés de cours. Les pourcentages en 1967-68 étaient de 18.4, 25.2, 37 et 19.4. (Voir Tableau 18.)

Grade

Voici la répartition procentuelle de 18,792 professeurs (à l'exclusion de 72 pour lesquels aucun renseignement n'a été reçu) selon le plus haut grade universitaire: doctorat, 49.5, maîtrise, 33.1, premier grade professionnel au-delà du premier baccalauréat, 5.8, baccalauréat, 9.8, et aucun grade universitaire, 1.8. En 1967-68, les pourcentages étaient 48.0, 32.5, 7.2, 10.2 et 1.9. (Voir Tableau 19 et Graphique 6.)

Sexe

Les 18,864 professeurs à plein temps déclarés en 1968-69 comprenaient 16,371 (86.8 p. 100) hommes et 2,493 (13.2 p. 100) femmes. En 1967-68, les pourcentages étaient 86.6 et 13.4.

Chez les hommes, 1.7 p. 100 étaient doyens, et chez les femmes, 0.6 p. 100. Les proportions des autres rangs étaient les suivantes: professeurs titulaires, 19.9 p. 100 des hommes et 4.7 p. 100 des femmes; professeurs agrégés, 26.8 et 15.7 p. 100; professeurs adjoints, 36.6 et 36.5 p. 100; professeurs non classés, 1.8 et 1.7 p. 100 et chargés de cours, 13.2 et 40.8 p. 100. (Voir Tableaux 1 et 3 et Graphique 5.)

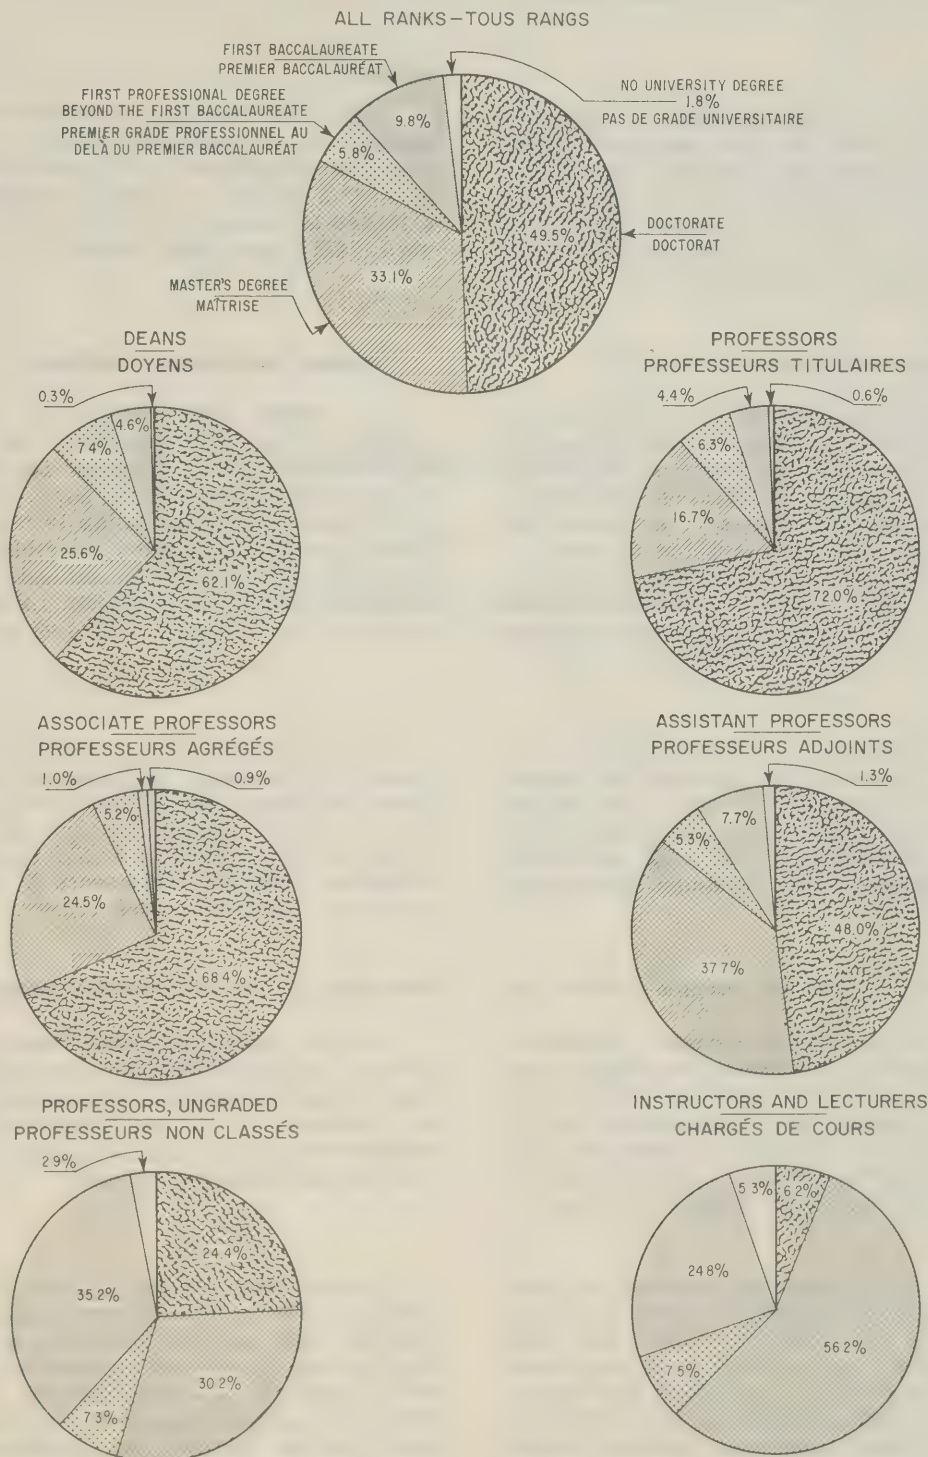

Voici les pourcentages des 16,141 hommes et 2,453 femmes rémunérés à l'échelle laïque, selon les divers grades universitaires (à l'exclusion de 63

CHART - 6

GRAPHIQUE - 6

PERCENTAGE DISTRIBUTION OF UNIVERSITY TEACHERS
BY HIGHEST EARNED DEGREE, 1968-69*

RÉPARTITION PROCENTUELLE DES PROFESSEURS D'UNIVERSITÉ
SUIVANT LE PLUS HAUT GRADE UNIVERSITAIRE ACQUIS, 1968-1969*

* DATA FROM TABLE 19. — D'APRÈS LE TABLEAU 19.

EXCLUDES STAFF FOR WHOM NO INFORMATION WAS REPORTED. — SANS LE PERSONNEL AU SUJET DUQUEL IL N'Y A PAS EU DE RAPPORT.

(excluding 63 men and 8 women for whom no information on degrees was reported) was as follows: doctorate 53.2 p.c. of the men and 25.5 p.c. of the women; master's degree, 31.1 p.c. and 45.4 p.c.; first professional degree beyond the first baccalaureate, 6.1 p.c. and 4.1 p.c.; first baccalaureate, 8.3 p.c. and 20.0 p.c.; no university degree, 1.3 p.c. and 5.0 p.c. (See Table 17.)

Field

Division of the 18,864 teachers by field was as follows for 1968-69 (1967-68 percentages shown in parenthesis): faculty administration 2.2 p.c. (2.3 p.c.), humanities 23.5 p.c. (24.1 p.c.), social sciences 31.7 p.c. (31.0 p.c.), biological sciences 18.4 p.c. (18.0 p.c.), and physical sciences 24.2 p.c. (24.6 p.c.). (See Table 18.)

Teacher-student Ratio (Table 25)

Estimated total enrolment of full-time undergraduate and graduate students, 1968-69 in the 64 institutions on which this report is based was 265,000. If this figure is compared with that of the 18,665 teachers with ranks of instructor and lecturer or higher reported as being full-time, it would appear that for all institutions included in this survey the ratio of such teachers to students was 1:14.2 (1:14.7 in 1967-68). Region variations were between 1:12.1 in Ontario and 1:17.9 in Quebec.

As it is known that a certain number of full-time staff below the rank of instructor or lecturer were omitted in the returns made, and as the teacher student ratio may vary in those institutions not included, estimates for the total number of full-time teachers in all Canadian institutions have not been made.

Highest Earned University Degree (Table 26)

Of the total of 18,792 persons included in this survey for whom information on degrees was reported, 49.5 p.c. had a doctorate (48.0 p.c. in 1967-68). The percentages of doctorates held by all staff ranged from 52.8 p.c. in Ontario and 51.6 p.c. in the Western Provinces to 46.9 p.c. in Quebec and 35.9 p.c. in the Atlantic Provinces.

About 40 p.c. of the staff reported with doctorates (38.8 p.c.) or master's degrees (41.0 p.c.) earned them in the five-year period from 1964 to 1968. Although the majority of these persons were new additions to the teaching staff during the five years, others included in this group were older teachers who completed advanced degree requirements either while on leave or in addition to their teaching duties. (See Table 16 A.)

hommes et de 8 femmes dont les données relatives aux grades ne sont pas disponibles): doctorat, 53.2 p. 100 des hommes et 25.5 p. 100 des femmes; maîtrise, 31.1 et 45.4 p. 100; premier grade professionnel au-delà du premier baccalauréat, 6.1 et 4.1 p. 100; premier baccalauréat, 8.3 et 20.0 p. 100; aucun grade universitaire, 1.3 et 5.0 p. 100. (Voir Tableau 17.)

Domaine

Voici la répartition procentuelle des 18,864 professeurs en 1968-69, selon le domaine: administration de faculté, 2.2 (2.3 en 1967-68); humanités, 23.5 (24.1); sciences sociales, 31.7 (31.0); sciences biologiques, 18.4 (18.0); et sciences physiques, 24.2 (24.6). (Voir Tableau 18.)

Rapport professeurs étudiants (Tableau 25)

Le nombre total d'étudiants sous-diplômés et diplômés à plein temps dans les 64 institutions observées ici était d'environ 265,000 en 1968-69. Si l'on compare ce chiffre aux 18,665 personnes à plein temps qui ont au moins le rang de chargés de cours, il semble que pour l'ensemble des institutions observées, il y avait un professeur pour 1: 14.2 étudiants (1: 14.7 en 1967-68). La proportion variait de 1: 12.1 en Ontario à 1: 17.9 au Québec.

Comme on sait qu'un certain nombre de professeurs à plein temps de rang inférieur à celui de chargé de cours ont été omis dans les réponses et que le rapport des professeurs aux étudiants peut varier dans les institutions omises, on n'a pas estimé le nombre total de professeurs à plein temps dans toutes les institutions canadiennes.

Plus haut grade universitaire obtenu (Tableau 26)

Sur les 18,792 professeurs observés, 49.5 p. 100 avaient un doctorat (48.0 p. 100 en 1967-68). Les pourcentages de doctorats détenus par tout le personnel variaient de 52.8 en Ontario et 51.6 dans les provinces de l'Ouest à 46.9 p. 100 au Québec et 35.9 dans les provinces Atlantiques.

Environ 40 p. 100 du personnel ayant un doctorat (38.8 p. 100) ou une maîtrise (41.0 p. 100) les ont obtenus dans une période de cinq ans, soit de 1964-68. Bien que la majorité d'entre eux fussent de nouvelles recrues à l'enseignement durant les cinq années, les autres comprenaient des professeurs plus âgés qui ont répondu aux exigences en vue d'un grade supérieur soit à la faveur d'un congé ou pendant qu'ils enseignaient. (Voir Tableau 16 A.)

STATISTICAL TABLES

NOTES RELATED TO TABLES

¹ Including lay teachers, and religious teachers paid on the same scale as lay teachers.

² Data included for 64 institutions:

Atlantic Provinces

Memorial University of Newfoundland, St. John's
St. Dunstan's University, Charlottetown
Nova Scotia Technical College, Halifax
Dalhousie University, Halifax
University of King's College, Halifax
Mount Saint Vincent College, Halifax
Acadia University, Wolfville
St. Francis Xavier University, Antigonish
St. Mary's University, Halifax
Prince of Wales College, Charlottetown.
Université de Moncton, Moncton
Mount Allison University, Sackville
St. Thomas' University, Chatham
University of New Brunswick, Fredericton
Collège de Bathurst, Bathurst

Quebec

Collège de Lévis, Lévis
Université Laval, Québec
Séminaire de Québec, Québec
Bishop's University, Lennoxville
Université de Sherbrooke, Sherbrooke
Université de Montréal, Montréal
École Polytechnique, Montréal
Collège Sainte-Marie, Montréal
McGill University, Montréal
Sir George Williams University, Montréal
Loyola College, Montréal
Marianopolis College, Montréal
École des hautes études commerciales, Montréal.

Ontario

Université d'Ottawa, Ottawa
Carleton University, Ottawa
Queen's University at Kingston, Kingston
Royal Military College, Kingston
University of Toronto, Toronto
Victoria University, Toronto
Trinity College, Toronto
St. Michael's College, Toronto
Althouse College of Education, London
McMaster University, Hamilton
McMaster Divinity College, Hamilton
University of Guelph, Guelph.
University of Western Ontario, London
University of Windsor, Windsor
York University, Toronto
Ontario College of Education, Toronto
Laurentian University of Sudbury, Sudbury
University of Waterloo, Waterloo

NOTES CONCERNANT LES TABLEAUX

¹ Sont compris les professeurs laïcs et les professeurs religieux rémunérés à l'égal des laïcs.

² Chiffres portant sur 64 institutions:

Provinces Atlantiques

Memorial University of Newfoundland, St. John's
St. Dunstan's University, Charlottetown
Nova Scotia Technical College, Halifax
Dalhousie University, Halifax
University of King's College, Halifax
Mount Saint Vincent College, Halifax
Acadia University, Wolfville
St. Francis Xavier University, Antigonish
St. Mary's University, Halifax
Prince of Wales College, Charlottetown.
Université de Moncton, Moncton
Mount Allison University, Sackville
St. Thomas' University, Chatham
University of New Brunswick, Fredericton
Collège de Bathurst, Bathurst

Québec

Collège de Lévis, Lévis
Université Laval, Québec
Séminaire de Québec, Québec
Bishop's University, Lennoxville
Université de Sherbrooke, Sherbrooke
Université de Montréal, Montréal
École Polytechnique, Montréal
Collège Sainte-Marie, Montréal
McGill University, Montréal
Sir George Williams University, Montréal
Loyola College, Montréal
Marianopolis College, Montréal
École des hautes études commerciales, Montréal.

Ontario

Université d'Ottawa, Ottawa
Carleton University, Ottawa
Queen's University at Kingston, Kingston
Royal Military College, Kingston
University of Toronto, Toronto
Victoria University, Toronto
Trinity College, Toronto
St. Michael's College, Toronto
Althouse College of Education, London
McMaster University, Hamilton
McMaster Divinity College, Hamilton
University of Guelph, Guelph.
University of Western Ontario, London
University of Windsor, Windsor
York University, Toronto
Ontario College of Education, Toronto
Université Laurentienne de Sudbury, Sudbury
University of Waterloo, Waterloo
Waterloo Lutheran University, Waterloo
Lakehead University of Arts, Science and Technology,
Port Arthur
Brock University, St. Catharines
Trent University, Peterborough
Ontario Institute for Studies in Education, Toronto.

Provinces de l'Ouest

Brandon College, Brandon
University of Manitoba, Winnipeg
University of Winnipeg, Winnipeg.
University of Saskatchewan, Saskatoon
St. Thomas More College, Saskatoon
University of Alberta, Edmonton

Western Provinces – Continued

University of Victoria, Victoria
 University of Lethbridge, Lethbridge.
 Red Deer Junior College, Red Deer
 Notre Dame University of Nelson, Nelson
 Simon Fraser University, Burnaby

- ³ Excluding associate deans, assistant deans, directors of schools and institutes. Including some principals of constituent colleges.
- ⁴ Including (when holding the rank of professor) associate deans, assistant deans, directors of schools and institutes.
- ⁵ In some small colleges the ranks of associate professor and assistant professor are not used; all above the rank of lecturer or instructor are classed as professors.
- ⁶ The median salary was not calculated if the number of persons in any distribution was less than 10, or unless there were more than 2 institutions in a distribution. As a result, per cent increases for such distributions could not be calculated. Quartiles were not calculated unless the number of persons in any distribution was 30 or more.
- ⁷ Including all deans, and others concerned primarily with faculty administration.
- ⁸ Excluding deans, and others concerned primarily with faculty administration.
- ⁹ Institutions included: **West**—British Columbia, Alberta, Calgary, Saskatchewan, Manitoba; **Central**—Western Ontario, Ontario Institute for Studies in Education, McMaster, Toronto, Victoria, Trinity, Queen's, McGill, Bishop's; **Maritimes**—New Brunswick, Mount Allison, St. Francis Xavier, Acadia, Dalhousie. Part-time teachers and religious teachers paid on a scale less than that applying to lay staff have been excluded.
- ¹⁰ For those receiving some allowance, i.e. excluding those reported as receiving no allowance.
- ¹¹ This footnote has been deleted in this edition.
- ¹² In cases where there were 1 or 2 in one group, detail of the distribution is not shown.
- ¹³ Including letters, social science, Islamic studies, mediaeval studies.
- ¹⁴ Including faculties teaching both pure and applied science.
- ¹⁵ Including psychology and education combined, and child study.
- ¹⁶ Including medical research, medical technology.
- ¹⁷ Including canon law.
- ¹⁸ Including faculties or schools of fine and applied arts, forestry, hygiene and public health, journalism, library science, philosophy, secretarial science, veterinary science and graduate studies.
- ¹⁹ History and appreciation—including art, archaeology, architecture, drama, music.
- ²⁰ Including Greek, Latin, mediaeval literature, oriental languages.
- ²¹ Including Russian, Spanish, Italian, Portuguese, Icelandic, such combinations as modern languages, romance languages, Slavic languages, and also letters and linguistics.
- ²² Including ethics, logic, natural theology.
- ²³ Including East Asiatic studies, Islamic studies, Slavic studies, religion, Asian studies, Celtic studies, Near Eastern studies.
- ²⁴ Including drama, elocution.
- ²⁵ Including journalism, library science.
- ²⁶ Economics and political science combined.

Provinces de l'Ouest – suite

University of Victoria, Victoria
 University of Lethbridge, Lethbridge.
 Red Deer Junior College, Red Deer
 Notre Dame University of Nelson, Nelson
 Simon Fraser University, Burnaby

- ³ Ne sont pas compris les vice-doyens, les directeurs d'écoles et d'instituts. Sont compris quelques directeurs de collèges constituants.
- ⁴ Sont compris (s'ils ont le rang de professeur titulaire) les vice-doyens, les directeurs d'écoles et d'instituts.
- ⁵ Dans quelques petits collèges le rang de professeur agrégé et celui de professeur adjoint n'existent pas; tous sont classés professeurs s'ils ne sont pas simplement chargés de cours.
- ⁶ Le traitement médian n'a pas été calculé lorsqu'une série comprenait moins de 10 personnes ou à moins qu'elle ne comptât plus de 2 institutions. Il en résulte que les augmentations procentuelles relatives à ces répartitions n'ont pu être calculées. Les quartiles ne sont pas calculés là où, dans une répartition le nombre de personnes est de 30 ou plus.
- ⁷ Sont compris tous les doyens et les autres personnes s'occupant avant tout de l'administration de la faculté.
- ⁸ Ne sont pas compris les doyens ni les autres personnes s'occupant avant tout de l'administration de la faculté.
- ⁹ Voici les institutions intéressées: **Ouest**—British Columbia, Alberta, Calgary, Saskatchewan, Manitoba; **Centre**—Western Ontario, Ontario Institute for Studies in Education, McMaster, Toronto, Victoria, Trinity, Queen's, McGill, Bishop's; **Maritimes**—New Brunswick, Mount Allison, St. Francis Xavier, Acadia, Dalhousie. On a exclu les professeurs à temps partiel et les professeurs religieux dont l'échelle de traitements était inférieure à celle du personnel laïc.
- ¹⁰ Pour ceux qui reçoivent une allocation c.-à-d. sans ceux déclarés comme ne recevant aucune allocation.
- ¹¹ Ce renvoi a été supprimé de la présente édition.
- ¹² La ventilation n'est pas faite quand le groupe ne comprend qu'un ou deux professeurs.
- ¹³ Y compris lettres, sciences sociales, études islamiques, études médiévales.
- ¹⁴ Y compris les facultés de sciences pures et appliquées.
- ¹⁵ Y compris la psychologie et la pédagogie réunies et la psychologie de l'enfant.
- ¹⁶ Y compris recherche médicale, technologie médicale.
- ¹⁷ Y compris droit canonique.
- ¹⁸ Y compris les facultés et les écoles de beaux-arts et d'arts appliqués, de sylviculture, d'hygiène et de santé publique, de journalisme, de bibliothéconomie, de philosophie, de science secrétariale, de science vétérinaire et d'études supérieures.
- ¹⁹ Histoire et appréciation—y compris art, archéologie, architecture, théâtre, musique.
- ²⁰ Y compris le grec, le latin, la littérature médiévale et les langues orientales.
- ²¹ Y compris le russe, l'espagnol, l'italien, le portugais, l'islandais, les groupements tels que les langues modernes, les langues romanes, les langues slaves, les lettres et la linguistique.
- ²² Y compris morale, logique, théologie naturelle.
- ²³ Y compris études oriento-asiatiques, études islamiques, études slaves, religion, études asiatiques, études celtiques, études du Proche-Orient.
- ²⁴ Y compris théâtre, élocution.
- ²⁵ Y compris journalisme, bibliothéconomie.
- ²⁶ Sciences économiques et science politique réunies.

Western Provinces — Concluded

- ²⁷ Including accounting, industrial relations
- ²⁸ Including child study.
- ²⁹ Including dietetics.
- ³⁰ Including secretarial science, public administration.
- ³¹ Including anatomy, histology, embryology, entomology, palaeontology, physiology.
- ³² Including botany and zoology combined as biology, and also genetics, natural history.
- ³³ Including medical technology.
- ³⁴ Including rehabilitation.
- ³⁵ Including forestry, hygiene and public health, veterinary science, optometry.
- ³⁶ Including biochemistry.
- ³⁷ Including mineralogy.
- ³⁸ Including astronomy, geodesy, statistics.
- ³⁹ Including biophysics, geophysics, mathematical physics.
- ⁴⁰ Including town planning.
- ⁴¹ Including agricultural engineering, architectural engineering, forest engineering, structural engineering.
- ⁴² Including geological engineering, metallurgical engineering, petroleum engineering.
- ⁴³ Including aerophysics, applied mathematics, applied physics.
- ⁴⁴ Comparable data for 1956-57 not available.
- ⁴⁵ Excluding M.D., D.D.S., D.V.M.
- ⁴⁶ Including licence.
- ⁴⁷ Including M.D., D.D.S., D.V.M. and second baccalaureate.
- ⁴⁸ Including first professional degree if it is the first baccalaureate.
- ⁴⁹ Excludes staff with no degree.
- ⁵⁰ Including both lay and religious teachers.
- ⁵¹ Data included for all 64 institutions listed in Note 2.
- ⁵² Excludes staff for whom no information was reported.
- ⁵³ Excludes staff with no degree and staff for whom no information was reported and hence totals do not equal those in Table 18.
- ⁵⁴ Less than 1 year.
- ⁵⁵ Estimated, for institutions included in this survey, on basis of returns made as of December 1 together with enrolments reported in the salary survey.

Provinces de l'Ouest — fin

- ²⁷ Y compris comptabilité, relations industrielles.
- ²⁸ Y compris psychologie de l'enfant.
- ²⁹ Y compris diététique.
- ³⁰ Y compris science secrétariale, administration publique.
- ³¹ Y compris anatomie, histologie, embryologie, entomologie, paléontologie, physiologie.
- ³² Y compris botanique et zoologie réunies sous biologie, et aussi génétique et histoire naturelle.
- ³³ Y compris technologie médicale.
- ³⁴ Y compris réhabilitation.
- ³⁵ Y compris sylviculture, hygiène et santé publique, science vétérinaire, optométrie.
- ³⁶ Y compris biochimie.
- ³⁷ Y compris minéralogie.
- ³⁸ Y compris astronomie, géodésie, statistique.
- ³⁹ Y compris biophysique, géophysique, physique mathématique.
- ⁴⁰ Y compris urbanisme.
- ⁴¹ Y compris génie agricole, génie architectural, génie forestier, génie des charpentes.
- ⁴² Y compris génie géologique, génie métallurgique, génie pétrolier.
- ⁴³ Y compris aérophysique, mathématiques appliquées, physique appliquée.
- ⁴⁴ Données comparables pour 1956-57 non disponibles.
- ⁴⁵ Non compris M.D., D.D.S., D.M.V.
- ⁴⁶ Y compris licence.
- ⁴⁷ Y compris M.D., D.D.S., D.M.V. et second baccalauréat.
- ⁴⁸ Y compris premier grade professionnel s'il s'agit du premier baccalauréat.
- ⁴⁹ A l'exclusion du personnel sans grade.
- ⁵⁰ Y compris les professeurs laïcs et religieux.
- ⁵¹ Données portant sur les 64 institutions énumérées à la note 2.
- ⁵² Sans le personnel au sujet duquel il n'y a pas eu de rapport.
- ⁵³ Ne comprend pas les professeurs sans grade, ni le personnel au sujet duquel il n'y a pas eu de rapport; c'est pourquoi les totaux ne correspondent pas à ceux du Tableau 18.
- ⁵⁴ Moins d'un an.
- ⁵⁵ Estimation portant sur les institutions étudiées dans le présent rapport et fondée sur les déclarations du 1^{er} décembre, ainsi que sur les inscriptions déclarées au cours de l'enquête sur les traitements.

PREFACE

This is the tenth in the series of detailed reports on salaries and qualifications of Canadian university teachers. The data were supplied by university and college business officers. Their assistance is greatly appreciated.

Similar reports were issued for 1956-57, 1957-58, 1958-59, 1960-61, 1962-63, 1963-64, and 1965-66. As of 1967-68 this report has been an annual publication. For 1959-60 a survey covering 17 institutions was published, which in addition provided data for these same 17 institutions from 1937-38. Table 2 in this publication gives summary data from 1945-46 to 1969-70 for these 17 institutions. Since 1965-66, Table 2 includes data for 19 institutions.

As well as being used by the Pay Research Bureau, data collected for the DBS university salary survey are also used in reports issued by the National Research Council and by the Canadian Association of University Teachers.

The present report shows the relationship between salary and rank, faculty, field, subject, region, size of institution, control of institution, highest earned university degree, and years since award of first and highest earned degree for 65 institutions. In a number of the cross-classifications, data are given separately for men and women. There are, as well, figures on the age of university teachers, related to rank, field, subject and highest degree.

Questions concerning the content of this publication or suggestions for further analyses should be sent to Dr. M. Wisenthal, Director, Education Division.

WALTER E. DUFFETT,

Dominion Statistician.

PRÉFACE

Le présent rapport est le dixième d'une série de rapports détaillés sur les traitements et la qualification des professeurs des universités canadiennes. Les données proviennent des représentants des universités et collèges et leur collaboration est très appréciée.

Des rapports semblables ont paru pour 1956-57, 1957-58, 1958-59, 1960-61, 1962-63, 1963-64, 1965-66 et 1967-68. Depuis 1967-68, ce rapport paraît annuellement. Le rapport de 1959-60 comprenait 17 institutions et donnait leurs statistiques chronologiques à partir de 1937-38. Le Tableau 2 de la présente publication donne les chiffres récapitulatifs de ces 17 institutions de 1945-46 à 1969-70. Depuis 1965-66, le Tableau 2 donne les chiffres pour 19 institutions.

En plus de servir au Bureau d'étude des traitements, les données recueillies pour l'enquête du B.F.S. sur les traitements universitaires servent aussi aux rapports publiés par le Conseil national de recherches et l'Association canadienne des professeurs d'université.

Le présent rapport indique la relation entre les traitements et le rang professoral, la faculté, la discipline choisie, la matière, la région, l'importance de l'institution et sa direction, le plus haut grade universitaire obtenu et les années depuis l'obtention du premier et du dernier grade à l'égard de 65 institutions. Certains tableaux donnent une ventilation selon le sexe. D'autres établissent la relation entre l'âge des professeurs d'université et leur rang professoral, la discipline, la matière et le plus haut grade.

Toute question relative au contenu de la présente publication ou toute proposition d'analyses supplémentaires doit être adressée au Dr. M. Wisenthal, directeur, Division de l'éducation.

WALTER E. DUFFETT,

Statisticien fédéral.

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

.. figures not available.

... figures not appropriate or not applicable.

— nil or zero.

n.e.c. not elsewhere classified.

SIGNES CONVENTIONNELS

Voici la signification des signes conventionnels employés dans les tableaux du présent rapport:

.. nombres indisponibles.

... n'ayant pas lieu de figurer.

— néant ou zéro.

n.d.a. non dénommé ailleurs.

TABLE OF CONTENTS

HIGHLIGHTS

The median salary for staff paid at rates applicable to lay teaching personnel (all medians used in these "highlights" refer to this group) was \$13,265 for all full-time staff included in the 1969-70 survey. Medians by rank ranged from a high of \$24,067 for deans to \$9,441 for lecturers and instructors.

The median salary for men in 1969-70 was \$13,593, higher by \$2,698 than that for women.

Median regional salaries, 1969-70 for all staff surveyed were for Ontario (\$14,030), the Western Provinces (\$13,288), Quebec (\$13,016) and the Atlantic Provinces (\$11,535).

The median salary tended to decrease as size of institution decreased. For all staff at institutions with 5,000 and over full-time students it was \$13,499 in 1969-70. The median for institutions with enrolments of 2,000 to 4,999 was \$11,845, for those with 1,000 to 1,999 students \$12,041, 500 to 999 students \$11,800 and for institutions with less than 500 full-time students \$13,925.

The median salary for staff at state (provincial or federal) institutions was \$13,375 in 1969-70 \$13,405 for all independent institutions, with the median for church-related institutions being \$11,492. Since 1956-57, the medians for state and independent institutions have been quite close and have been considerably higher than the median for church-related institutions.

As in past years, the median salary for staff in the biological sciences (including medicine) was higher than that for other teaching fields. This 1969-70 median, \$14,886 may be compared with other teaching fields: e.g. \$13,762 for the physical sciences, \$13,003 for the social sciences, and \$11,858 for the humanities. The median for those engaged primarily in faculty administration was \$23,100.

In 1969-70, of the total of 21,840 teachers included from 65 reporting institutions, 86.9 p.c. were men. In 1957-58, 89.3 p.c. of a total of 4,881 staff members included from 58 reporting institutions were men.

Full-time staff at a selected group of 19 institutions from 1967-68 to 1968-69 increased 11.6 p.c., from 9,279 to 10,354. The increase from 1968-69 to 1969-70 was 7.3 p.c., or from 10,354 to 11,114.

FAITS SAILANTS

Le traitement médian du personnel rémunéré au barème des laïcs (toutes les médianes de ces faits saillants réfèrent à ce groupe) était de \$13,265 pour tout le personnel à plein temps inclus dans le relevé de 1969-70. Les médianes selon le rang professoral ont varié de \$24,067 pour les doyens à \$9,441 pour les chargés de cours.

Le traitement médian des hommes en 1969-70 était de \$13,593 soit \$2,698 de plus que celui des femmes.

Les traitements médians régionaux, en 1969-70, de tout le personnel observé étaient en Ontario (\$14,030), dans les provinces de l'Ouest (\$13,288), au Québec (\$13,016) et dans les provinces Atlantiques (\$11,535).

Le traitement médian diminuait au même rythme que l'importance de l'institution. Dans les institutions comptant 5,000 étudiants et plus à plein temps, la médiane de tout le personnel était de \$13,499 en 1969-70; dans les institutions de 2,000 à 4,999 étudiants, elle était de \$11,485, dans celles de 1,000 à 1,999 étudiants, de \$12,041, dans celles de 500 à 999 étudiants, de \$11,800, et dans celles de moins de 500 étudiants à plein temps, de \$13,925.

Dans les institutions provinciales ou fédérales, le traitement médian était de \$13,375 en 1969-70 soit un peu moins que la médiane de toutes les institutions indépendantes \$13,405, et celui des institutions religieuses, de \$11,492. Depuis 1956-57, les médianes des institutions d'État et indépendantes ont été assez semblables et ont surpassé considérablement celle des institutions religieuses.

Comme dans le passé, le traitement médian du personnel des sciences biologiques (y compris la médecine) a été plus élevé que celui du personnel des autres disciplines. La médiane de 1969-70, \$14,886 peut être comparée à celles des autres disciplines: e.g. \$13,762 dans les sciences physiques, \$13,003 dans les sciences sociales et \$11,858 dans les humanités. La médiane du personnel préposé surtout à l'administration des facultés était de \$23,100.

En 1969-70, sur les 21,840 instituteurs inclus dans les 65 institutions qui ont fait rapport, 86.9 p. 100 étaient des hommes. En 1957-58, 89.3 p. 100 d'un total de 4,881 dans 58 institutions étaient des hommes.

Le personnel à plein temps d'un groupe de 19 institutions, de 1967-68 à 1968-69 a augmenté de 11.6 p. 100, de 9,279 à 10,354. L'accroissement de 1968-69 à 1969-70 a été de 7.3 p. 100, soit de 10,354 à 11,114.

Some 1.0 p.c. (220 of 21,840) of the 1969-70 staff of all 65 reporting institutions included were aged 65 or over and 590 (2.7 p.c.) were 60 or over. The median age for all staff reported in this 1969-70 survey was 37 years compared with 38 years for 1968-69.

The median passage of time since the award of the first degree was 13 years for 1969-70 staff. It was 16 years in 1956-57.

Where highest earned university degree for 1969-70 staff members is considered, 50.2 p.c. were reported with doctorates, 33.2 p.c. master's degrees, 6.0 p.c. a first professional degree beyond a first baccalaureate, 9.4 p.c. a first baccalaureate and 1.2 p.c., no university degree. The percentage of staff with doctorates has risen slightly since 1967-68, when it was 46.9 p.c.

Environ 1.0 p. 100 (220 sur 21,840) du personnel de 1969-70 dans les 65 institutions qui ont fait rapport étaient âgés de 65 ans et plus et 590 (2.7 p. 100) de 60 ans et plus. L'âge médian de tout le personnel observé lors du relevé de 1969-70 était de 37 ans (38 ans en 1968-69).

Le nombre médian d'années depuis l'obtention du premier grade était de 13 ans pour le personnel de 1969-70 (16 en 1956-57).

L'examen du plus haut grade universitaire obtenu par le personnel de 1969-70 révèle que 50.2 p. 100 détenaient un doctorat, 33.2 p. 100 une maîtrise, 6.0 p. 100 un premier grade professionnel au delà d'un premier baccalauréat, 9.4 p. 100 un premier baccalauréat, et 1.2 p. 100 aucun grade. La proportion du personnel ayant un doctorat a augmenté légèrement depuis 1967-68 alors que 46.9 p. 100 étaient docteurs.

INTRODUCTION

Scope of Data

This report is based on questionnaire forms for the 1969-70 academic year sent to 65 universities and colleges. Returns were received from 65 (listed in Note 2, following the last table) with enrolment equalling about 98 p.c. of the total enrolment of full-time undergraduate and graduate students in Canadian institutions of higher education. All but one of the salary tables are limited to data relating to lay teachers and religious teachers paid on the same scale as lay teachers; the exception is Table 3. Tables showing non-salary data include both lay and religious teachers.

Data are presented for a total of 21,840 teachers, all of them full-time and with academic ranks of lecturer or instructor or higher. These include 21,742 in receipt of salaries based on scales applying to lay personnel and 98 religious teachers in receipt of allowances below the scales applying to lay personnel.

Cautions in Interpreting Data

1. Not all Canadian institutions of higher education are included. At the beginning of the 1965-66 academic year there were about 380 institutions offering courses of university grade. Those omitted are almost all small (with less than 500 enrolment) and many of them employ religious personnel paid on a salary scale less than that for lay persons. As nearly as can be determined, all institutions with 1,000 or more full-time university-grade students are included.

2. Figures for the separate years are not strictly comparable as a few institutions are not included for all these years in all tables. The data in Table 2 are comparable.

3. The median is not the arithmetic average, but is the theoretical point in a distribution for which 50 p.c. of the cases are higher and 50 p.c. lower.

4. The range between the 1st and 3rd quartiles includes 50 p.c. of all cases. Thus 25 p.c. are below the 1st quartile and 25 p.c. are above the 3rd.

5. Fluctuations in numbers of institutions by size of enrolment are due in part to movement from one enrolment category to another during the years under review.

6. All salary data refer to basic annual salary rates. Many teachers receive extra income for teaching evening, extension or summer classes, and many earn income from non-university sources. Such extra income was not included in this report.

Portée du rapport

Le présent rapport est basé sur les questionnaires envoyés à 65 universités et collèges pour l'année académique 1969-70. Les inscriptions des 65 qui ont répondu (en voir la liste au renvoi 2 après le dernier tableau) représentent environ 98 p. 100 de tous les étudiants à temps plein inscrits aux institutions canadiennes d'enseignement supérieur. A l'exception du Tableau 3, tous les tableaux des traitements ne concernent que les professeurs laïcs et les professeurs religieux rémunérés à l'échelle des laïcs. Les tableaux qui n'ont pas trait aux traitements portent sur les professeurs tant laïques que religieux.

Les données se rapportent à 21,840 professeurs, tous à plein temps et ayant au moins le rang de chargé de cours. Sur ce nombre, 21,742 reçoivent un traitement conforme à l'échelle des laïcs et 98 professeurs religieux reçoivent un traitement inférieur à cette échelle.

Interprétation prudente des données

1. Le rapport n'envisage pas toutes les institutions canadiennes d'enseignement supérieur. Au début de l'année académique 1965-66, environ 380 institutions donnaient des cours à l'échelon universitaire. La plupart des institutions omises étaient de petites institutions (moins de 500 étudiants); plusieurs d'entre elles employaient des religieux dont l'échelle des traitements était inférieure à celle des laïques. Autant qu'on a pu le constater, toutes les institutions de 1,000 étudiants universitaires à plein temps ou plus sont représentées.

2. Les chiffres des différentes années ne sont pas strictement comparables, car quelques institutions sont omises pour certaines années dans les tableaux. Les données du Tableau 2 sont comparables.

3. La médiane n'est pas la moyenne arithmétique mais bien le point théorique d'une série de valeurs dont la moitié sont supérieures et l'autre moitié inférieures à ce point.

4. L'écart entre le 1er et le 3e quartile comprend la moitié de tous les cas, de sorte que le quart des cas sont en-deça du 1er quartile et le quart au-dessus du 3e.

5. La fluctuation du nombre d'institutions selon le nombre des inscriptions tient en partie du passage d'une catégorie d'inscriptions à une autre durant les années observées.

6. Tous les traitements indiqués sont les traitements annuels de base. Plusieurs professeurs augmentent leur revenu en enseignant aux cours du soir, d'extension ou d'été et plusieurs ont un revenu para-universitaire. Ces suppléments ne paraissent pas dans le présent rapport.

Effective Data of Salary Figures Reported

All salary data refer to basic annual salary rates in the fall of 1969.

Medians and the Situation at the End of the Academic Year

Salaries

Information was asked for to the nearest dollar. The salary distributions used in this report are \$1,000 except for data in Table 2 where a \$500 interval was used so that the figures would be consistent with those published in "University Teachers' Salaries, 1937-1960." Medians were calculated to the nearest \$100.

Although salary scales for the ensuing year are generally set prior to the start of that academic year, the medians should relatively accurately reflect the situation at the end of the academic year.

Age

The form used asked for the year of birth of each staff member. In the tables used here, age is considered as that attained by each individual during the calendar year 1969. These ages are grouped in five-year intervals. Thus all persons born in 1906, for example, were 63 years of age some time in 1969 and were all 63 and not yet 64 at the end of the year. These persons would be included in the interval 60-64.

A median or quartile reported as 63, for example, indicates that the point falls anywhere from 63.0 to 63.9 in the distribution.

If one assumes that there was an even distribution of birthdays throughout each month of each year, half of the persons would be, to use 1906 again as an example, 63 years of age at June 30, 1969. It could then be assumed that at December 31, 1969, the median age would be 63.5 years, and at June 30, 1970, 64 years. While the medians were not calculated in this manner in this report, one might add one year to each median year of age given to arrive at approximate figures for the end of the academic year 1969-70, assuming that it is June 30.

Years Since Award of First Degree

Information was requested on the year in which the first degree was obtained. As with age, the number of years was measured in relation to the calendar year 1969, and distributed in five year intervals. Medians and quartiles were calculated in the same manner as were those for age.

If the assumption is made that all degrees were received at regular spring convocations (even if actually some would be received at other times during the year), one year could be added to the medians reported to give the picture at the end of the academic year (June 30).

Date de référence des traitements déclarés

Toutes les données sur les traitements sont basées sur la rémunération annuelle de base en vigueur à l'automne de 1969.

Les médianes et la situation à la fin de l'année académique

Traitements

Les traitements, qu'on devait déclarer à un dollar près, sont groupés ici par intervalles de \$1,000, sauf au Tableau 2 où on a choisi un intervalle de \$500 pour que les chiffres correspondent à ceux qui ont paru dans "Traitements des professeurs d'université, 1937-1960". On a calculé la médiane à 100 dollars près.

Même si l'échelle des traitements pour l'année à venir est normalement établie avant le commencement de l'année académique, les médianes doivent refléter de façon relativement précise la situation à la fin de l'année académique.

Âge

Le questionnaire demandait l'année de naissance de chaque membre du personnel. Dans les tableaux, l'âge est celui qu'a atteint chaque individu au cours de l'année civile 1969. Les âges sont groupés par intervalles de cinq ans. Ainsi, les personnes nées en 1906 ont atteint 63 ans en 1969 et, à la fin de l'année, elles avaient toutes 63 ans révolus, mais non encore 64 ans. Ces personnes sont comprises dans le groupe de 60-64 ans.

La médiane ou le quartile de 63, par exemple, indique que le point se situe entre 63.0 et 63.9 dans la série.

Si les dates de naissance se répartissaient également entre les douze mois de chaque année, le moitié des personnes nées en 1906, pour reprendre l'exemple, auraient atteint leur 63^e année le 30 juin 1969. Il en découle qu'au 31 décembre 1969 l'âge médian serait de 63.5 ans et, au 30 juin 1970, de 64 ans. Dans le présent rapport, l'âge médian n'a pas été calculé de cette manière, mais il suffit d'ajouter un an à chaque âge médian indiqué pour avoir l'âge approximatif à la fin de l'année académique (30 juin) 1969-70.

Nombre d'années depuis l'obtention du premier grade

L'année d'obtention du premier grade a été demandée. Comme pour l'âge, le nombre d'années a été calculé par rapport à l'année civile 1969, et le classement fait par groupes quinquennaux. Les médianes et quartiles ont été calculés de la même façon que ceux de l'âge.

Si l'on suppose que tous les grades ont été obtenus au printemps (même si certains l'ont été à d'autres époques de l'année), il suffit d'ajouter un an aux médianes indiquées pour connaître la situation à la fin de l'année académique (30 juin).

¹ Data for men and women separately were not collected in 1956-57. — Les données distinctes pour les hommes et les femmes n'ont pas été recueillies en 1956-57.

² Median not calculated; number less than 10. — Médiane non calculée: nombre inférieur à 10.

SUMMARY**Salaries (Tables 1-17)****Rank**

For the 21,742 university teachers with academic rank, reported as receiving salary at rates applicable to lay personnel, the median salary in 1969-70 was \$13,265, 8.5 p.c. higher than the median for 1968-69. For deans it was \$24,067, for professors \$19,870 for associate professors \$15,012, for assistant professors \$11,837, for ungraded professors \$14,050 and for lecturers and instructors \$9,441. For other ranks the increase ranged from 9.2 p.c. for lecturers and instructors to 6.7 p.c. for deans. (See Tables A and 1, and Chart 1.)

Sex

For all ranks combined the median salary for women was \$2,698 lower than that for men. Women were concentrated in the more junior ranks, as will be noted later, and hence the median for them was less. Even for the higher ranks the median for women tended to be lower. However, equality in salaries was closest for the higher ranks. (See Tables 1, 7-11, 12, 17.)

Field

Those engaged primarily in faculty administration (all deans and 96 others were so classified) had a median salary of \$23,100, 8.8 p.c. above that for 1968-69. Of the others, teachers in the biological sciences (including medicine) had the highest median salary—\$14,886, followed by those in the physical sciences—\$13,762, the social sciences—\$13,003, and the humanities—\$11,858. In these four teaching fields, percentage increases ranged from 7.8 p.c. in physical sciences to 9.5 p.c. in the humanities. (See Tables A, 1 and 12, and Chart 1.)

Religious Teachers

The bases on which allowances were reported for religious teachers varied widely. Some figures given were estimates of average expenses, some were amounts actually paid, some were nominal book entries. Data on 98 such teachers show that 34 of them received no allowance. (See note 6 and Table 3.)

SOMMAIRE**Traitements (Tableaux 1-17)****Rang professoral**

Le traitement médian des 21,742 professeurs d'université de rang professoral rémunérés au barème laïc a été de \$13,265 en 1969-70 et dépassait de 8.5 p. 100 la médiane de 1968-69. Il était de \$24,067 pour les doyens, de \$19,870 pour les professeurs titulaires, de \$15,012 pour les professeurs agrégés, de \$11,837 pour les professeurs adjoints, de \$14,050 pour les professeurs non classés et de \$9,441 pour les chargés de cours. L'augmentation des autres rangs variait de 9.2 p. 100 pour les chargés de cours à 6.7 p. 100 pour les doyens. (Voir Tableaux A et 1, et Graphique 1.)

Sexe

Dans l'ensemble des rangs professoraux, le traitement médian des femmes était inférieur de \$2,698 à celui des hommes. Les femmes se trouvaient surtout aux rangs inférieurs, comme on le soulignera plus loin, ce qui a baissé leur médiane; mais même aux rangs supérieurs, le traitement médian des femmes était en général moins élevé. L'égalité de traitement était plus apparente aux rangs les plus élevés. (Voir Tableaux 1, 7-11, 12, 17.)

Domaine

Les professeurs qui s'occupaient surtout de l'administration des facultés (tous les doyens et 96 autres) ont touché un traitement médian de \$23,100, une augmentation de 8.8 p. 100 sur 1968-69. Chez les autres, le plus haut traitement médian a été celui des professeurs de sciences biologiques (y compris la médecine), soit \$14,886, venaient ensuite celui des professeurs de sciences physiques, \$13,762, des sciences sociales, \$13,003 et des humanités, \$11,858. Dans ces quatre domaines, l'augmentation procen-tuelle allait de 7.8 p. 100 pour les sciences physiques à 9.5 p. 100 dans les humanités. (Voir Tableau A, 1 et 12 et Graphique 1.)

Professeurs religieux

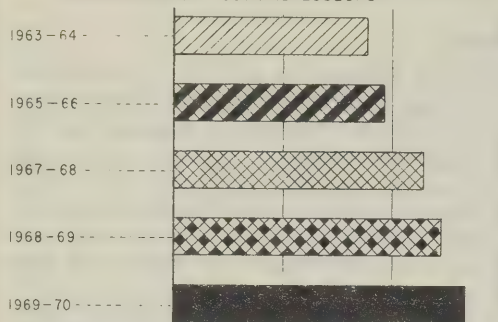

La rémunération des professeurs religieux a été déclarée selon des fondements très variés. Certains chiffres étaient des estimations des dépenses moyennes, d'autres donnaient le montant effectivement payé et d'autres étaient un poste purement comptable. Les données sur 98 professeurs indiquent que 34 d'entre eux ne recevaient pas de rémunération. (Voir note 6, et Tableau 3.)

Historical Comparisons

The DBS publication "University Teachers' Salaries, 1937-1960," allows historical comparisons to be made of median salaries paid in 19 major institutions. The median for all ranks in this group for 1969-70 was \$13,839 (\$574 higher than for all personnel included in the present report). (See Table 2 and Chart 2.)

Region

For 1968-69 median salaries of all staff included from Western Provinces, Ontario, Quebec and the Atlantic Provinces were \$12,272; \$12,783, \$12,075 and \$10,596 respectively. The highest median in 1969-70 was for Ontario (\$14,030), the Western Provinces at (\$13,288), Quebec (\$13,016) and the Atlantic Provinces (\$11,535). Comparing the 1969-70 and 1968-69 medians, the increase for Ontario was 9.7 p.c., for the Atlantic Provinces, 9.4 p.c., for the Western Provinces, 8.3 p.c. and for Quebec, 8.0 p.c. (See Table A, 4 and 13 and Chart 1.)

Size of Institution

Twenty five institutions in 1969-70 had full time enrolments of over 5,000. The 2,000-4,999 category remained in 1969-70 to 13 institutions from 13 in 1968-69 while 13 institutions with 1,000-1,999 students were included in 1969-70 as compared with 13 in 1968-69. The number of institutions with 500-999 students decreased from 9 to 8 from 1968-69 to 1969-70 and 6 institutions in 1969-70 reported less than 500 students as contrasted with 11 in 1968-69.

In 1969-70, the median for all staff combined was highest for the 500 or less group (\$13,925), the 5,000 and over group (\$13,499), followed by the 1,000 to 1,999 group (\$12,041). Next were institutions with 2,000 to 4,999 students, (\$11,845), and finally, institutions with 500 to 999 students (\$11,800).

Increases from 1968-69 to 1969-70 for all ranks combined ranged from 2.9 p.c. for institutions with 2,000 to 4,999 students to 17.6 p.c. for institutions with 500 to 999 students. (See Tables A, 5 and 14, and Chart 1.)

Control of Institution

Since the first survey 1956-57, medians for all staff combined, at independent and at state institutions have been higher than the medians for church-related institutions. This situation again prevailed for 1969-70, the median for state institutions being (\$13,375), and that for independent institutions (\$13,405). The median for church related institutions was (\$11,496).

Comparaisons chronologiques

La publication du B.F.S., "Traitements des professeurs d'université, 1937-1960", permet de comparer chronologiquement les traitements médians dans 19 grandes institutions. La médiane de tous les rangs professoraux de ce groupe, en 1969-70, a été de \$13,839 (\$574 de plus que celle de tout le personnel compris dans le présent rapport. (Voir Tableau 2 et Graphique 2.)

Région

En 1968-69, les traitements médians de tout le personnel (compris dans le présent rapport) des provinces de l'Ouest, de l'Ontario, du Québec et des provinces Atlantiques étaient de \$12,272; \$12,783, \$12,075 et \$10,596 respectivement. La médiane la plus élevée en 1969-70 était celle de l'Ontario (\$14,030), supérieure à celle des provinces de l'Ouest, (\$13,288). La médiane du Québec a été de \$13,016 et celle des provinces Atlantiques, de \$11,535. Si l'on compare les médianes de 1969-70 et de 1968-69, l'augmentation a été de 9.7 p.100 en Ontario, 9.4 p. 100 pour les provinces Atlantiques, 8.3 p. 100 pour les provinces de l'Ouest, et 8.0 p. 100 au Québec. (Voir Tableaux A, 4 et 13, et Graphique 1.)

Importance de l'institution

En 1969-70, vingt-cinq institutions comptaient plus de 5,000 étudiants à plein temps. Le nombre de celles qui ont entre 2,000 et 4,999 étudiants est demeuré à 13 entre 1968-69 et 1969-70, tandis que 13 institutions ayant de 1,000 à 1,999 étudiants étaient comprises en 1969-70, contre 13 en 1968-69. Le nombre d'institutions ayant de 500 à 999 étudiants est passé de 9 à 8 de 1968-69 à 1969-70; 6 ont déclaré avoir moins de 500 étudiants en 1969-70, contre 11 en 1968-69.

En 1969-70, la médiane de tout le personnel réuni a été la plus élevée dans les institutions de moins de 500 étudiants (\$13,925). Viennent ensuite celles de plus de 5,000 étudiants (\$13,499), de 1,000 à 1,999 étudiants, (\$12,041), de 2,000 à 4,999 étudiants, (\$11,845), et de 500 à 999 étudiants, (\$11,800).

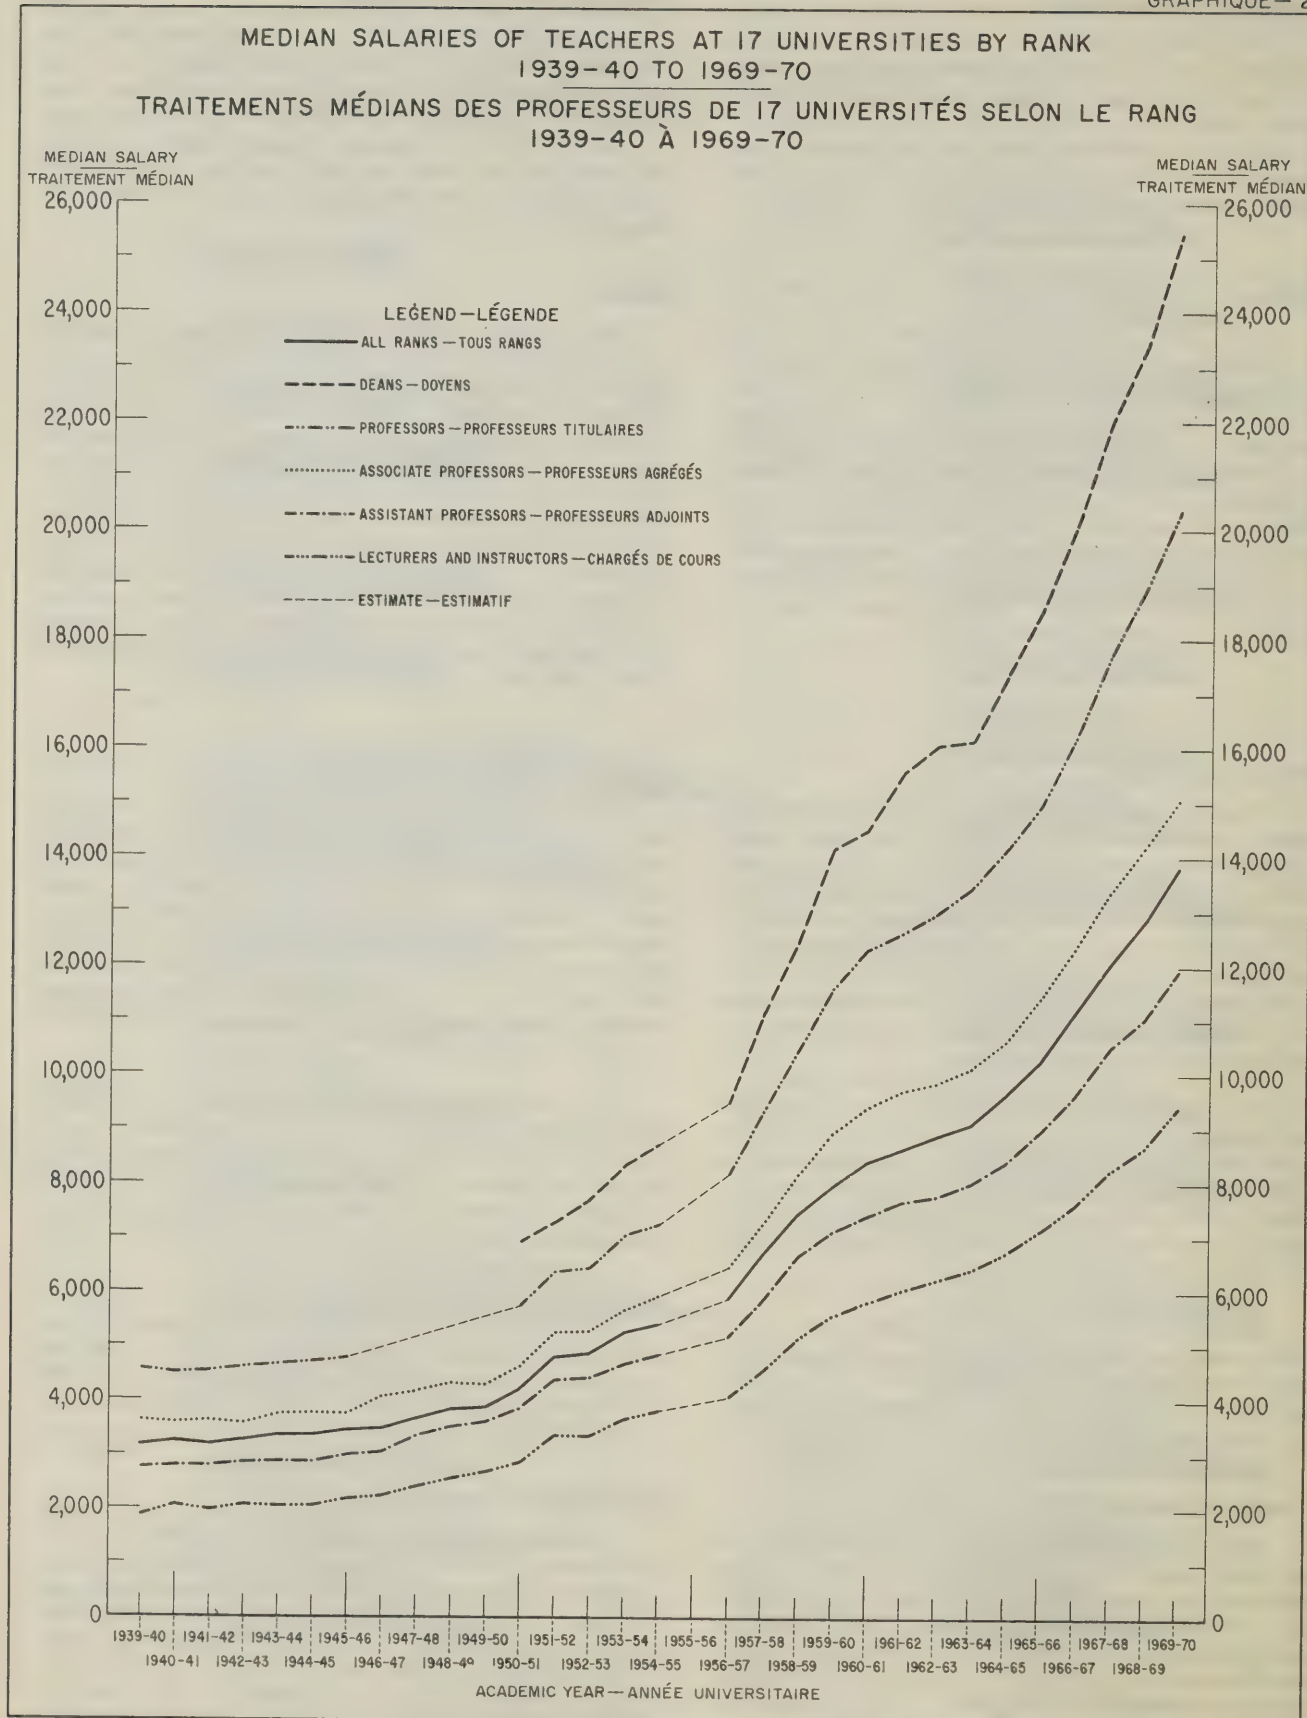

Les hausses de 1968-69 à 1969-70 pour tous les rangs professoraux réunis ont varié de 2.9 p. 100 pour les institutions de 2,000 à 4,999 à 17.6 p. 100 pour celles de 500 à 999 étudiants. (Voir Tableaux A, 5, et 14 et Graphique 1.)

Direction de l'institution

Depuis la première enquête (en 1956-57), les médianes de tout le personnel réuni, dans les institutions indépendantes et les institutions d'état, ont été plus élevées que celles des institutions religieuses. La situation est demeurée la même en 1968-69, la médiane des institutions d'état était (\$13,375) et celle des institutions indépendantes (\$13,405). La médiane des institutions religieuses a été de (\$11,496).

CHART - 2

GRAPHIQUE - 2

From 1968-69 to 1969-70, independent institutions showed the greatest increase (7.2 p.c.). Increases for church-related and state institutions were 4.2 p.c. and 6.7 p.c., respectively. (see Tables 6 and 15 and Chart 1.)

Faculty

There is no uniformity in the organization of universities into faculties, schools and institutes, so data grouped in this way are only relatively significant. A tabulation is presented, however, which indicates that highest salaries were paid in faculties of dentistry (median \$17,675), followed by faculties of medicine (\$16,524), law, (\$14,750), agriculture, (\$14,740), and engineering, (\$14,437). Other faculties for which information is available with median salaries over \$14,000 include pharmacy and social work.

Subject

If the four teaching fields of humanities, social sciences, biological sciences, and physical sciences are subdivided into "pure" and "applied" areas and by subject (ignoring faculty organization), further comparisons of salaries may be made.

In the **humanities**, median salaries by subject were in this order: theology \$12,716; philosophy, \$12,545; fine arts, \$12,450; classical language and literature, \$12,175; fine and applied arts, \$11,844; music \$11,788; and modern language and literature (including english and french, \$11,570. (See Table 8).

In the **social sciences**, the order was as follows: law, \$14,333; education, \$13,580; economics and political science, \$13,560; commerce and business administration, \$13,500; psychology, \$13,216; social work, \$13,100; history, \$12,517; geography, \$12,425; sociology and anthropology, \$12,314; household science, \$11,856; physical education, \$11,394. (See Table 9).

Median salaries in the **biological sciences** were: dentistry, \$17,675; medicine, \$16,987; agriculture, \$15,050; pharmacy, \$14,233; pure biological science (including botany and zoology); \$14,158; nursing, \$9,920; physiotherapy and occupational therapy, \$9,900. (See Table 10.)

In the **physical sciences**, mining engineering led with a median salary of \$15,600; followed by chemical engineering, \$15,350; civil engineering,

De 1968-69 à 1969-70, les institutions indépendantes ont marqué la plus forte augmentation (7.2 p. 100). L'augmentation, dans le cas des institutions religieuses et des institutions d'état, a été de 4.2 p. 100 et de 6.7 p. 100 respectivement. (Voir Tableaux 6 et 15 et Graphique 1.)

Faculté

Vu le manque d'uniformité dans l'organisation des universités en facultés, écoles et instituts, les données ainsi groupées n'ont qu'une valeur relative. On a cependant dressé un tableau qui montre que les traitements médians les plus élevés ont été payés, suivant l'ordre décroissant, par les facultés d'art dentaire (\$17,675), de médecine (\$16,524), de droit, (\$14,750), d'agriculture (\$14,740) et de génie, (\$14,437). Les autres facultés pour lesquelles les données sont connues et où les traitements médians dépassent \$14,000, étaient celles de pharmacie et de service social.

Matière

La division des humanités, sciences sociales, sciences biologiques et sciences physiques en sciences "pures" et "appliquées" et selon la matière (sans tenir compte de l'organisation en facultés) permet d'autres comparaisons de traitements.

Dans les **humanités**, les traitements médians par matière étaient les suivants: théologie, \$12,716; philosophie, \$12,545; beaux arts; \$12,450; langues et littérature classiques \$12,175; beaux-arts et arts industriels, \$11,844; musique, \$11,788; langues et littérature modernes, (y compris les langues et la littérature anglaises et françaises), \$11,570. (Voir Tableau 8).

Dans les **sciences sociales**, l'ordre était le suivant: droit, \$14,333; pédagogie, \$13,580; économie et sciences politiques, \$13,560; commerce et affaires, \$13,500; psychologie, \$13,216; service social, \$13,100; histoire, \$12,517; géographie, \$12,425; sociologie et anthropologie, \$12,314; sciences ménagères, \$11,856; culture physique et hygiène \$11,394. (Voir Tableau 9.)

Les traitements médians dans les **sciences biologiques** étaient les suivants: art dentaire \$17,675; médecine, \$16,987; agriculture, \$15,050; pharmacie, \$14,233; sciences biologiques et sciences pures, (dont la botanique et la zoologie), \$14,158; soins infirmiers, \$9,920; physiothérapie et ergothérapie, \$9,900. (Voir Tableau 10.)

Dans les **sciences physiques**, le génie minier se classe en tête avec un salaire médian de \$15,600; suivi du génie chimique, \$15,350; du génie civil

\$14,475; geology, \$14,325; mechanical engineering, \$14,100; chemistry, \$13,920; electrical engineering, \$13,864; physics, \$13,850; architecture, \$13,308; mathematics, \$12,773. (See Table 11.)

While some of the above medians may seem too high or too low in relation to others, it should be borne in mind that they are influenced by the distribution of faculty by rank in each subject area. Some areas may have a much larger proportion of junior staff to instruct greatly increasing enrolment in them. Other areas, especially professional, may require a larger proportion of highly paid senior staff.

Years since Award of First Degree

As a substitute for a measure of teaching experience, universities and colleges were asked to report for each teacher the year in which he obtained his first university degree—from which was calculated the number of years since that award. The median salary of those less than five years away from the first degree was \$9,445. The greater the number of years since that award, the greater the median salary—up to the 40-44 years group (\$19,487). (See Table 12, Chart 3.)

For men only, the highest median in 1969-70 was for those 40-44 years beyond the first degree (\$19,850). The highest median for women was for the 40-44 year group, it being \$15,550. (See Table 12 and Chart 3.)

For those engaged primarily in faculty administration the median salaries ranged from \$12,550 for those 5-9 years beyond that date to \$24,900 for those 25-29 years beyond. In the humanities, median salaries ranged from \$9,023 for those less than 5 years beyond the first degree to \$17,300 for those 40-44 years beyond. Comparable figures for the social sciences were \$9,700 and \$18,750 (40-44 years); for the biological sciences \$8,881 and \$20,800 (40-44 years); and for the physical sciences \$10,003 and \$19,562 (40-44 years). Medians for women were in all cases lower than those for men. (See Table 12.)

In the Atlantic Provinces the median salary for those less than 5 years beyond the first degree was \$8,800 and the highest median, \$17,200 was for those 35-39 years beyond that award. In Quebec the range was from \$9,500 to \$19,100 (in the 40-44 years group); in Ontario \$10,000 to \$20,500 (40-44 years group); and the Western Provinces \$9,542 to \$18,800 (in the 40-44 years group). (See Table 13.)

\$14,475; de la géologie, \$14,325; du génie mécanique, \$14,100; de la chimie, \$13,920; du génie électrique, \$13,864; de la physique, \$13,850; de l'architecture, \$13,308; des mathématiques, \$12,773. (Voir Tableau 11.)

Certaines de ces médianes peuvent sembler trop élevées ou trop basses par rapport aux autres, mais il faut se rappeler qu'elles reflètent la répartition de la faculté selon le rang professoral dans chaque domaine. Certains domaines peuvent avoir une proportion beaucoup plus forte de professeurs de rang inférieur pour instruire un nombre toujours croissant d'étudiants. D'autres domaines, particulièrement les domaines professionnels, peuvent exiger une plus grande proportion de personnel de rang élevé mieux rémunéré.

Années depuis l'obtention du premier grade

A titre d'indice des années d'enseignement, les universités et collèges devaient déclarer l'année d'obtention du premier grade universitaire de chaque professeur, ce qui a permis de calculer le nombre d'années depuis ce premier grade. Le traitement médian de ceux qui comptaient moins de 5 ans depuis le premier grade était de \$9,445. Plus le nombre d'années depuis l'obtention du premier grade augmentait plus le traitement médian augmentait, jusqu'au groupe de 40-44 ans (\$19,487). (Voir Tableau 12, et Graphique 3.)

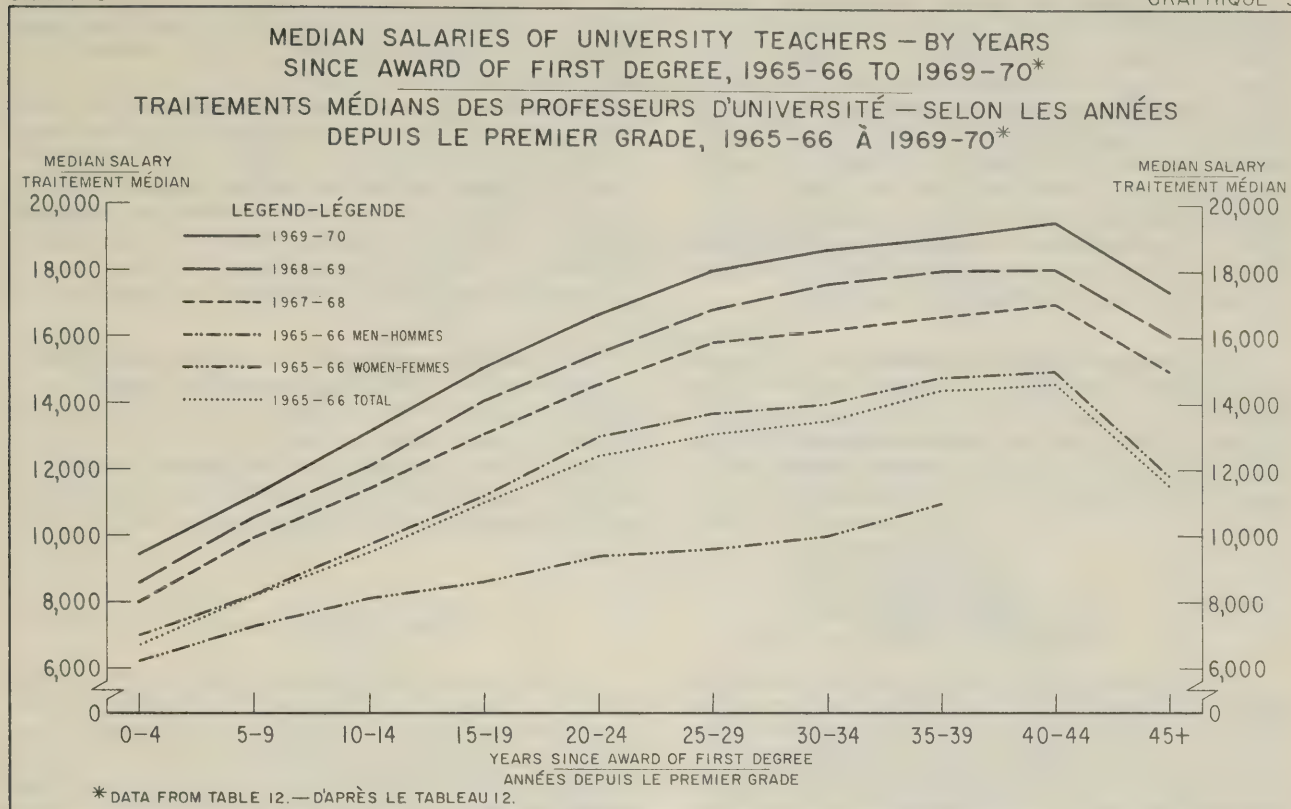

Chez les hommes, la médiane la plus élevée en 1969-70 était celle du groupe de 40-44 ans depuis le premier grade (\$19,850). Chez les femmes, c'était celle du groupe de 40-44 ans (\$15,550). Voir Tableau 12 et Graphique 3.)

Pour les administrateurs de facultés les traitements médians variaient de \$12,550 pour ceux de 5-9 ans à \$24,900 pour le groupe de 25-29 ans. Dans les humanités, ils variaient de \$9,023 pour le groupe de moins de 5 ans depuis le premier grade à \$17,300 pour ceux de 40-44 ans. Voici les chiffres comparables des autres facultés: sciences sociales, \$9,700 et \$18,750 (40-44 ans); sciences biologiques, \$8,881 et \$20,800 (40-44 ans); et sciences physiques, \$10,003 et \$19,562 (40-44 ans). Dans tous les cas, les médianes des femmes étaient inférieures à celles des hommes. (Voir Tableau 12.)

Dans les provinces Atlantiques, les traitements médians des professeurs de moins de 5 ans depuis le premier grade étaient de \$8,800 et la plus haute médiane, de \$17,200 pour ceux de 35-39 ans depuis ce grade. Au Québec, l'écart était de \$9,500 à \$19,100 (pour le groupe de 40-44 ans); en Ontario, il était de \$10,000 à \$20,500 (40-44 ans); et dans les provinces de l'Ouest, de \$9,542 à \$18,800 (40-44 ans). (Voir Tableau 13.)

CHART-3

GRAPHIQUE - 3

Comparison by size of institution reveals that in universities with enrolment over 5,000 the range of median salaries was from \$9,556 for those less than 5 years beyond the first degree to \$19,816 for those 40-44 years beyond. The range for institutions with 2,000-4,999 students was from \$8,985 to \$18,333 (35-39 years group); for those with 1,000-1,999 students, \$9,171 to \$18,160 (35-39 years group); 500-999 students \$8,700 to \$17,500 (30-34 years group); and under 500 students \$8,050 to \$17,350 (15-19 years group). (See Table 14.)

In institutions under state (provincial or federal) control median salaries ranged from \$9,413 for teachers less than 5 years beyond the first degree to \$20,050 (40-44 years beyond). For church-related institutions the range was from \$8,382 to \$17,975 (40-44 years beyond), and for independent institutions it was from \$9,865 to \$19,487 (35-39 years beyond). (See Table 15.)

Highest University Degree

The median salary of teachers with a Ph.D. or equivalent degree (\$14,461) was less than the median for those with a first professional degree beyond the first baccalaureate (e.g. usually such degrees as M.D., D.D.S., D.V.M., B.L.S., B.Ed., B.S.W.)—\$15,314. However it was higher than for those with a master's degree (\$11,493) and a first baccalaureate (\$10,946). (See Table 16 and Chart 1.)

La comparaison selon l'importance de l'institution révèle que, dans celles de 5,000 étudiants et plus, l'écart du traitement médian allait de \$9,556 pour les professeurs de moins de 5 ans depuis le premier grade à \$19,816 pour ceux de 40-44 ans. Dans les institutions de 2,000 à 4,999 étudiants, l'écart était de \$8,985 à \$18,333 (35-39 ans); dans celles de 1,000 à 1,999 étudiants, de \$9,171 à \$18,160 (35-39 ans); dans celles de 500 à 999 étudiants, de \$8,700 à \$17,500 (30-34 ans); et dans celles de moins de 500 étudiants, de \$8,050 à \$17,350 (15-19 ans). (Voir Tableau 14.)

Dans les institutions provinciales ou fédérales, le traitement médian variait de \$9,413 pour les professeurs de moins de 5 ans depuis le premier grade à \$20,050 (40-44 ans). Dans les institutions religieuses, l'écart allait de \$8,382 à \$17,975 (40-44 ans) et dans les institutions indépendantes, de \$9,865 à \$19,487 (35-39 ans). (Voir Tableau 15.)

Le plus haut grade universitaire

Le traitement médian des professeurs qui détenaient un Ph.D. ou un grade équivalent (\$14,461) était inférieur à celui des professeurs qui détenaient un premier grade professionnel supérieur au premier baccalauréat (D.M., D.D.S., D.V.M., B.Biblio., B.Ped., B.S.S.) (\$15,314). Le premier dépassait celui des professeurs détenant une maîtrise (\$11,493) et un premier baccalauréat (\$10,946). (Voir Tableau 16 et Graphique 1.)

Another form of salary comparison among professions is to relate salaries to the number of years that have elapsed since the award of the highest earned university degree. For those with a doctorate, the range was from \$12,225 for the 0-4 years group to \$20,950 for those 30-34 years beyond the Ph.D. or equivalent degree. Ranges for other degrees were: masters—\$10,204 (0-4) to \$18,750 (35-39); first professional degree beyond the first baccalaureate—\$10,100 (0-4) to \$22,500 (40-44); and first baccalaureate—\$8,752 (0-4) to \$17,000 (40-44). (See Table 16A and Chart 4.)

The median salary for men with a Ph.D. degree was \$14,620, and that for women \$12,970. For those with a master's degree the medians were \$11,640 for men and \$10,495 for women. Medians were higher for men than for women in each of the other degree groups. (See Tables 16A and 17.)

Age (Tables 18-23)

The median age for staff in various categories has not changed appreciably since the survey for 1956-57. The fact that the median has not gone up, as would normally be the case if there were few additions to staff, implies that a large number of young teachers are being added to the staff complement. This is borne out by an examination of data for recent years.

The median age of the 21,840 lay and religious teachers in the 65 universities and colleges reporting was 37 years (in 1968-69 it was 38 years). Of those for whom data on age were given, 1.3 p.c. were under 25 (1.6 p.c. in 1968-69) and 1.0 p.c. were at age 65 or over (1.0 p.c. in 1968-69). Those 55 years and over, most of whom might be expected to retire within 10 years, equalled 8.1 p.c. (8.4 p.c. in 1968-69). Those engaged in faculty administration (almost all of them deans) had a median age of 49 years; in the humanities, 37; in the social sciences, 36; in the biological sciences, 39; and in the physical sciences, 36 years. (See Table 18.)

The median age of teachers with a doctorate was 38 years; a master's degree, 35 years; a first professional degree beyond a first baccalaureate, 39 years; a first baccalaureate, 35 years; and no university degree, 41 years. (See Table 19.)

Years Since Award of First Degree (Table 24)

For the 21,840 teachers in all 65 institutions the median passage of time since award of the first degree was 13 years (compared with 13 years in 1968-69). For deans (1968-69 medians in parenthesis) it was 26 (27), for professors 23 (24).

Une autre façon de comparer les traitements parmi les professions est de relier les traitements au nombre d'années écoulées depuis l'obtention du plus haut grade universitaire. Pour ceux qui avaient un doctorat, l'écart allait de \$12,225 pour le groupe de 0-4 ans à \$20,950 pour celui des 30-34 ans après l'obtention du doctorat ou d'un grade équivalent. Voici les écarts des autres grades: maîtrise, \$10,204 (0-4) à \$18,750 (35-39); premier grade professionnel après le premier baccalauréat, \$10,100 (0-4) à \$22,500 (40-44); et premier baccalauréat, \$8,752 (0-4) à \$17,000 (40-44). (Voir Tableau 16A et Graphique 4.)

Le traitement médian des professeurs détenant un Ph.D. a été de \$14,620 chez les hommes et de \$12,970 chez les femmes. Pour ceux qui avaient une maîtrise, les médianes ont été de \$11,640 et de \$10,495. Les médianes pour les hommes étaient plus élevées que celles des femmes dans chacun des autres groupes de grade. (Voir Tableaux 16A et 17.)

Âge (Tableaux 18-23)

L'âge médian du personnel des diverses catégories n'a guère changé depuis le rapport de 1956-57. La médiane n'ayant pas monté, comme il serait normal si peu de professeurs s'ajoutaient au personnel, il s'ensuit que le professorat s'enrichit d'un grand nombre de jeunes professeurs. C'est ce que révèle l'examen des données des récentes années.

L'âge médian des 21,840 professeurs laïcs et religieux des 65 universités et collèges déclarants était de 37 ans (38 ans en 1968-69). Parmi ceux dont les données sur l'âge sont connues, 1.3 p. 100 avaient moins de 25 ans (1.6 p. 100 en 1968-69) et 1.0 p. 100 avaient 65 ans et plus (1.0 p. 100 en 1968-69). Ceux de 55 ans et plus, dont la plupart prendront sans doute leur retraite d'ici 10 ans, représentaient 8.1 p. 100 (8.4 p. 100 en 1968-69). L'âge médian des administrateurs de facultés (la plupart doyens) était de 49 ans; dans les humanités, de 37 ans; dans les sciences sociales, de 36 ans; dans les sciences biologiques, de 39 ans; et dans les sciences physiques, de 36 ans. (Voir Tableau 18.)

L'âge moyen des professeurs détenant un doctorat était de 38 ans; une maîtrise, 35 ans; un premier grade professionnel au-delà du premier baccalauréat, 39 ans; un premier baccalauréat, 35 ans; et aucun grade universitaire, 41 ans. (Voir Tableau 19.)

Années depuis l'obtention du premier grade (Tableau 24)

Pour les 21,840 professeurs des 65 institutions, le nombre médian d'années depuis le premier grade était de 13 ans (13 ans en 1968-69); pour les doyens, (la médiane pour 1968-69, entre parenthèses) il était de 26 (27); pour les professeurs titulaires, 23 (24);

CHART — 4

GRAPHIQUE — 4

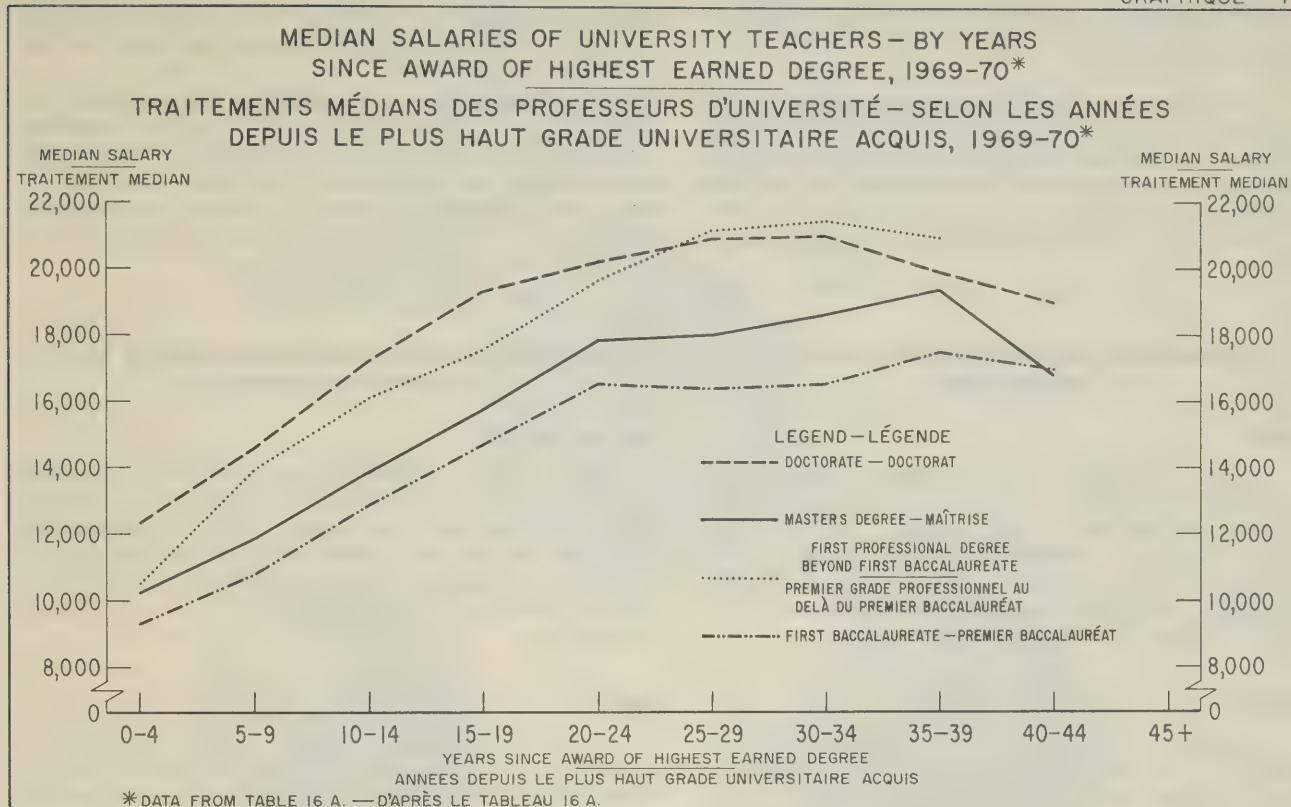

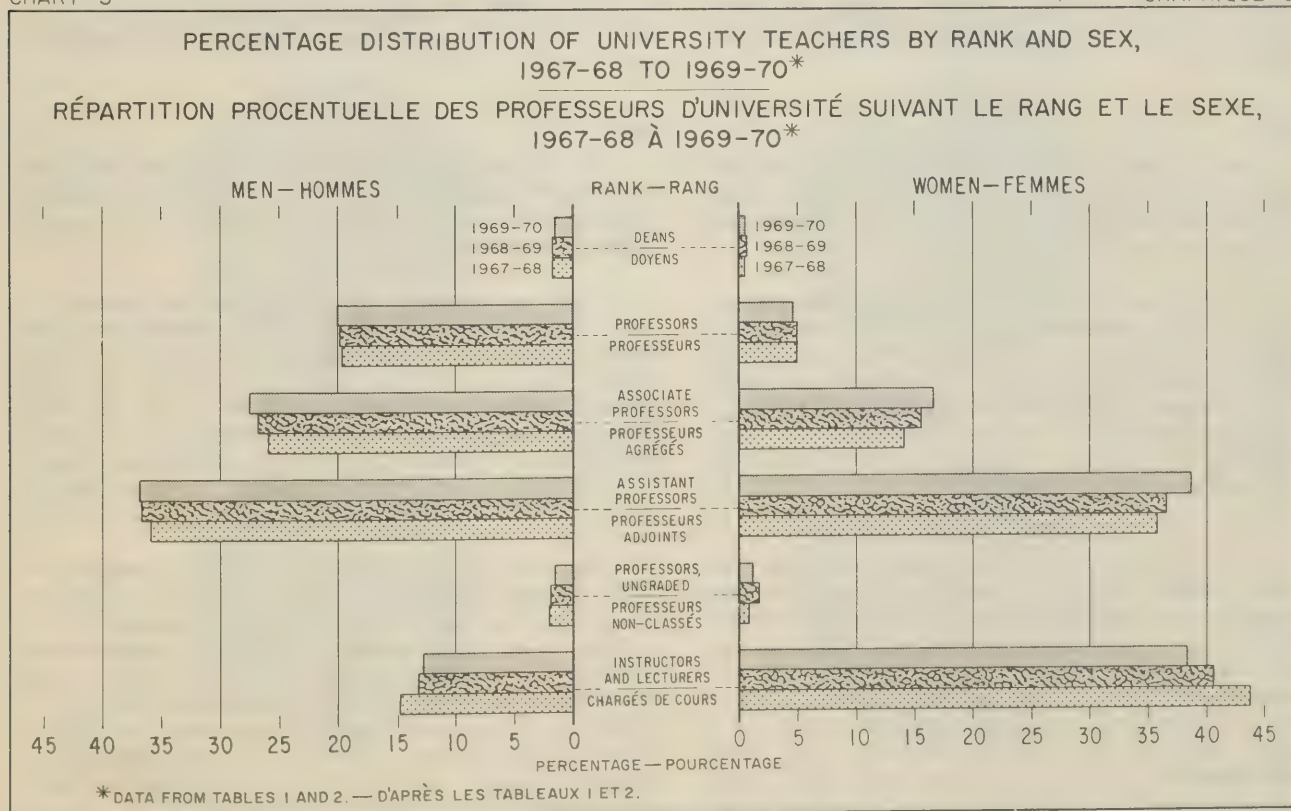

CHART — 5

GRAPHIQUE — 5

associate professors 15 (16), assistant professors 9 (10), ungraded professors 12 (11), and lecturers and instructors 6 (6).

Comparison by field shows that, on the average, those engaged in faculty administration had obtained the first university degree 24 years earlier, in the humanities the median was 13, in the social sciences 12, in the biological sciences 15, and in the physical sciences 13. (See Table 24.)

Distribution of University Teachers by Rank, Sex and Field

Rank

Of the 21,268 teachers (excluding deans and ungraded professors) reported in the four main teaching categories, 18.6 p.c. were "full" professors, 26.8 p.c. associate professors, 38.0 p.c. assistant professors, and 16.6 p.c. instructors and lecturers. The percentages in 1968-69 were 18.5, 26.3, 37.8 and 17.4. (See Table 18.)

Degree

By highest earned university degree, 21,832 teachers (excluding 8 for whom no information was reported) were distributed as follows: doctorate 50.3 p.c., master's degree 33.2 p.c., first professional degree beyond the first baccalaureate 6.0 p.c., baccalaureate 9.4 p.c., and no university degree 1.1 p.c. In 1968-69 the percentages were 49.5, 33.1, 5.8, 9.8 and 1.8. (See Table 19 and Chart 6.)

Sex

Of the total of 21,742 full-time teachers reported in 1969-70, men numbered 18,890 (86.9 p.c.) and women 2,852 (13.1 p.c.). In 1968-69 the percentages were 86.8 and 13.2.

Of the men, 1.5 p.c. were deans; of the women, 0.5 p.c. The proportions in the other ranks were: professor, 20.1 p.c. of the men and 4.6 p.c. of the women; associate professor, 27.5 p.c. and 16.7 p.c.; assistant professor, 36.8 p.c. and 38.7 p.c.; ungraded professors, 1.3 p.c. and 1.2 p.c.; and lecturer of instructor, 12.8 p.c. and 38.3 p.c. (See Tables 1 and 3, and Chart 5.)

The proportions of the 18,883 men and the 2,851 women paid on a basis applicable to lay personnel, holding the various university degrees (excluding 7 men and 1 woman for whom no information on degrees was reported) was as follows: doctorate 53.7 p.c. of the men and 27.0 p.c. of the women; master's degree, 31.1 p.c. and 46.7 p.c.: first professional degree beyond the first baccalaureate, 6.2 p.c. and 4.8 p.c. first baccalaureate, 8.1 p.c. and 18.6 p.c.; no university degree, 0.9 p.c. and 2.9 p.c. (See Table 17.)

pour les professeurs agrégés, 15 (16); pour les professeurs adjoints, 9 (10); pour les professeurs non classés, 12 (11); et pour les chargés de cours, 6 (6).

La comparaison par domaine indique que, en moyenne, les administrateurs de faculté avaient obtenu leur premier grade universitaire 24 ans auparavant. Dans les humanités, la médiane était de 13; dans les sciences sociales, 12; dans les sciences biologiques, 15; et dans les sciences physiques, 13. (Voir Tableau 24.)

Répartition des professeurs selon le rang, le grade, le sexe et le domaine

Rang professoral

Sur les 21,268 professeurs (à l'exclusion des doyens et des professeurs non classés) déclarés dans les quatre rangs principaux, 18.6 p. 100 étaient titulaires, 26.8 p. 100 agrégés, 38.0 p. 100 adjoints et 16.6 p. 100 charges de cours. Les pourcentages en 1968-69 étaient de 18.5, 26.3, 37.8 et 17.4. (Voir Tableau 18.)

Grade

Voici la répartition procentuelle de 21,832 professeurs (à l'exclusion de 8 pour lesquels aucun renseignement n'a été reçu) selon le plus haut grade universitaire: doctorat, 50.3, maîtrise, 33.2, premier grade professionnel au-delà du premier baccalauréat, 6.0 baccalauréat, 9.4, et aucun grade universitaire, 1.1. En 1968-69, les pourcentages étaient 49.5, 33.1, 5.8, 9.8 et 1.8. (Voir Tableau 19 et Graphique 6.)

Sexe

Les 21,742 professeurs à plein temps déclarés en 1969-70 comprenaient 18,890 (86.9 p. 100) hommes et 2,852 (13.1 p. 100) femmes. En 1968-69, les pourcentages étaient 86.8 et 13.2.

Chez les hommes, 1.5 p. 100 étaient doyens, et chez les femmes, 0.5 p. 100. Les proportions des autres rangs étaient les suivantes: professeurs titulaires, 20.1 p. 100 des hommes et 4.6 p. 100 des femmes; professeurs agrégés, 27.5 et 16.7 p. 100; professeurs adjoints, 36.8 et 38.7 p. 100; professeurs non classés, 1.3 et 1.2 p. 100 et chargés de cours, 12.8 et 38.3 p. 100. (Voir Tableaux 1 et 3 et Graphique 5.)

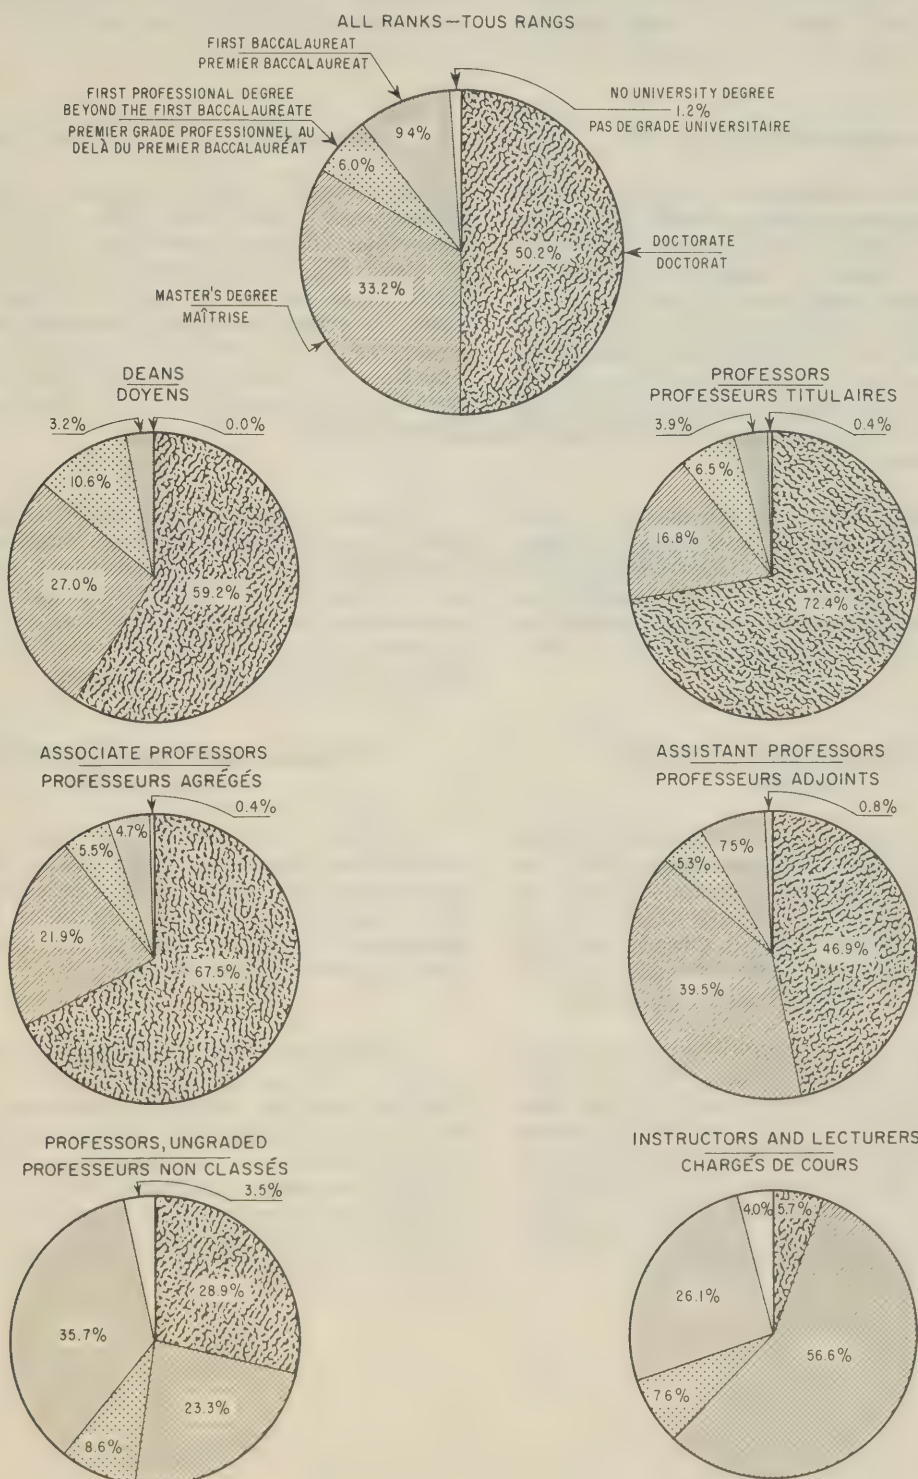

Voici les pourcentages des 18,883 hommes et 2,851 femmes rémunérés à l'échelle laïque, selon les divers grades universitaires (à l'exclusion de 7 hommes et de 1 femme dont les données relatives aux grades ne sont pas disponibles): doctorat, 53.7 p. 100 des hommes et 27.0 p. 100 des femmes; maîtrise, 31.1 et 46.7 p. 100; premier grade professionnel au delà du premier baccalauréat, 6.2 et 4.8 p. 100; premier baccalauréat, 8.1 et 18.6 p. 100; aucun grade universitaire, 0.9 et 2.9 p. 100. (Voir Tableau 17.)

CHART-6

GRAPHIQUE-6

PERCENTAGE DISTRIBUTION OF UNIVERSITY TEACHERS
BY HIGHEST EARNED DEGREE, 1969-70*

RÉPARTITION PROCENTUELLE DES PROFESSEURS D'UNIVERSITÉ
SUIVANT LE PLUS HAUT GRADE UNIVERSITAIRE ACQUIS, 1969-1970*

* DATA FROM TABLE 19. — D'APRÈS LE TABLEAU 19.

EXCLUDES STAFF FOR WHOM NO INFORMATION WAS REPORTED. — SANS LE PERSONNEL AU SUJET DUQUEL IL N'Y A PAS EU DE RAPPORT.

Field

Division of the 21,840 teachers by field was as follows for 1969-70 (1968-69 percentages shown in parenthesis): faculty administration 1.9 p.c. (2.2 p.c.), humanities 23.2 p.c. (23.5 p.c.), social sciences 32.9 p.c. (31.7 p.c.), biological sciences 18.0 p.c. (18.4 p.c.), and physical sciences 24.0 p.c. (24.2 p.c.). (See Table 18.)

Teacher-student Ratio (Table 25)

Estimated total enrolment of full-time undergraduate and graduate students, 1969-70 in the 65 institutions on which this report is based was 293,517. If this figure is compared with that of the 21,742 teachers with ranks of instructor and lecturer or higher reported as being full-time, it would appear that for all institutions included in this survey the ratio of such teachers to students was 1: 13.5 (1: 14.2 in 1968-69). Region variations were between 1: 13.0 in Ontario and 1: 14.5 in the Western Provinces.

As it is known that a certain number of full-time staff below the rank of instructor or lecturer were omitted in the returns made, and as the teacher student ratio may vary in those institutions not included, estimates for the total number of full-time teachers in all Canadian institutions have not been made.

**Highest Earned University Degree
(Table 26)**

Of the total of 21,832 persons included in this survey for whom information on degrees was reported, 50.2 p.c. had a doctorate (49.5 p.c. in 1968-69). The percentages of doctorates held by all staff ranged from 55.5 p.c. in Ontario and 52.4 p.c. in the Western Provinces to 44.8 p.c. in Quebec and 37.5 p.c. in the Atlantic Provinces.

About 40 p.c. of the staff reported with doctorates (39.3 p.c.) or master's degrees (41.2 p.c.) earned them in the five-year period from 1965 to 1969. Although the majority of these persons were new additions to the teaching staff during the five years, others included in this group were older teachers who completed advanced degree requirements either while on leave or in addition to their teaching duties. (See Table 16A.)

Domaine

Voici la répartition procentuelle des 21,840 professeurs en 1969-70, selon le domaine: administration de faculté, 1.9 (2.2 en 1968-69); humanités, 23.2 (23.5); sciences sociales, 32.9 (31.7); sciences biologiques, 18.0 (18.4); et sciences physiques, 24.0 (24.2). (Voir Tableau 18.)

Rapport professeurs étudiants (Tableau 25)

Le nombre total d'étudiants sous-diplômés et diplômés à plein temps dans les 65 institutions observées ici était d'environ 293,517 en 1969-70. Si l'on compare ce chiffre aux 21,742 personnes à plein temps qui ont au moins le rang de chargés de cours, il semble que pour l'ensemble des institutions observées, il y avait un professeur pour 1: 13.5 étudiants (1: 14.2 en 1968-69). La proportion variait de 1: 13.0 en Ontario à 1: 14.5 dans les provinces de l'Ouest.

Comme on sait qu'un certain nombre de professeurs à plein temps de rang inférieur à celui de chargé de cours ont été omis dans les réponses et que le rapport des professeurs aux étudiants peut varier dans les institutions omises, on n'a pas estimé le nombre total de professeurs à plein temps dans toutes les institutions canadiennes.

**Plus haut grade universitaire obtenu
(Tableau 26)**

Sur les 21,832 professeurs observés, 50.2 p. 100 avaient un doctorat (49.5 p. 100 en 1968-69). Les pourcentages de doctorats détenus par tout le personnel variaient de 55.5 en Ontario et 52.4 dans les provinces de l'Ouest à 44.8 p. 100 au Québec et 37.5 dans les provinces Atlantiques.

Environ 40 p. 100 du personnel ayant un doctorat (39.3 p. 100) ou une maîtrise (41.2 p. 100) les ont obtenus dans une période de cinq ans, soit de 1965-69. Bien que la majorité d'entre eux fussent de nouvelles recrues à l'enseignement durant les cinq années, les autres comprenaient des professeurs plus âgés qui ont répondu aux exigences en vue d'un grade supérieur soit à la faveur d'un congé ou pendant qu'ils enseignaient. (Voir Tableau 16A.)

NOTES RELATED TO TABLES

¹ Including lay teachers, and religious teachers paid on the same scale as lay teachers.

² Data included for 65 institutions:

Atlantic Provinces

University of Prince Edward Island, Charlottetown
Memorial University of Newfoundland, St. John's
Nova Scotia Technical College, Halifax
Dalhousie University, Halifax
University of King's College, Halifax
Mount Saint Vincent College, Halifax
Acadia University, Wolfville
St. Francis Xavier University, Antigonish
St. Mary's University, Halifax
Université de Moncton, Moncton
Mount Allison University, Sackville
St. Thomas' University, Chatham
University of New Brunswick, Fredericton
Collège de Bathurst, Bathurst
Collège Sainte-Anne, Church Point
Collège St-Louis, Edmundston

Quebec

Collège de Lévis, Lévis
Université Laval, Québec
Séminaire de Québec, Québec
Bishop's University, Lennoxville
Université de Sherbrooke, Sherbrooke
Université de Montréal, Montréal
École Polytechnique, Montréal
McGill University, Montréal
Sir George Williams University, Montréal
Loyola College, Montréal
Marianopolis College, Montréal
École des hautes études commerciales, Montréal
Université du Québec

Ontario

Université d'Ottawa, Ottawa
Carleton University, Ottawa
Queen's University at Kingston, Kingston
Royal Military College, Kingston
University of Toronto, Toronto
Victoria University, Toronto
Trinity College, Toronto
St. Michael's College, Toronto
Althouse College of Education, London
McMaster University, Hamilton
McMaster Divinity College, Hamilton
University of Guelph, Guelph
University of Western Ontario, London
University of Windsor, Windsor
York University, Toronto
Ontario College of Education, Toronto
Laurentian University of Sudbury, Sudbury
University of Waterloo, Waterloo
Waterloo Lutheran University, Waterloo
Lakehead University of Arts, Science and Technology,
Port Arthur
Brock University, St. Catharines
Trent University, Peterborough
Ontario Institute for Studies in Education, Toronto

Western Provinces

Brandon College, Brandon
University of Manitoba, Winnipeg
University of Winnipeg, Winnipeg
University of Saskatchewan, Saskatoon
St. Thomas More College, Saskatoon
University of Alberta, Edmonton
University of Calgary, Calgary
University of British Columbia, Vancouver

NOTES CONCERNANT LES TABLEAUX

¹ Sont compris les professeurs laïcs et les professeurs religieux rémunérés à l'égal des laïcs.

² Chiffres portant sur 65 institutions:

Provinces Atlantiques

University of Prince Edward Island, Charlottetown
Memorial University of Newfoundland, St. John's
Nova Scotia Technical College, Halifax
Dalhousie University, Halifax
University of King's College, Halifax
Mount Saint Vincent College, Halifax
Acadia University, Wolfville
St. Francis Xavier University, Antigonish
St. Mary's University, Halifax
Université de Moncton, Moncton
Mount Allison University, Sackville
St. Thomas' University, Chatham
University of New Brunswick, Fredericton
Collège de Bathurst, Bathurst
Collège Sainte-Anne, Church Point
Collège St-Louis, Edmundston

Québec

Collège de Lévis, Lévis
Université Laval, Québec
Séminaire de Québec, Québec
Bishop's University, Lennoxville
Université de Sherbrooke, Sherbrooke
Université de Montréal, Montréal
École Polytechnique, Montréal
McGill University, Montréal
Sir George Williams University, Montréal
Loyola College, Montréal
Marianopolis College, Montréal
École des hautes études commerciales, Montréal
Université du Québec

Ontario

Université d'Ottawa, Ottawa
Carleton University, Ottawa
Queen's University at Kingston, Kingston
Royal Military College, Kingston
University of Toronto, Toronto
Victoria University, Toronto
Trinity College, Toronto
St. Michael's College, Toronto
Althouse College of Education, London
McMaster University, Hamilton
McMaster Divinity College, Hamilton
University of Guelph, Guelph
University of Western Ontario, London
University of Windsor, Windsor
York University, Toronto
Ontario College of Education, Toronto
Université Laurentienne de Sudbury, Sudbury
University of Waterloo, Waterloo
Waterloo Lutheran University, Waterloo
Lakehead University of Arts, Science and Technology,
Port Arthur
Brock University, St. Catharines
Trent University, Peterborough
Ontario Institute for Studies in Education, Toronto

Provinces de l'Ouest

Brandon College, Brandon
University of Manitoba, Winnipeg
University of Winnipeg, Winnipeg
University of Saskatchewan, Saskatoon
St. Thomas More College, Saskatoon
University of Alberta, Edmonton
University of Calgary, Calgary
University of British Columbia, Vancouver

Western Provinces — Continued

University of Victoria, Victoria
 University of Lethbridge, Lethbridge.
 Red Deer Junior College, Red Deer
 Notre Dame University of Nelson, Nelson
 Simon Fraser University, Burnaby

- ³ Excluding associate deans, assistant deans, directors of schools and institutes. Including some principals of constituent colleges.
- ⁴ Including (when holding the rank of professor) associate deans, assistant deans, directors of schools and institutes.
- ⁵ In some small colleges the ranks of associate professor and assistant professor are not used; all above the rank of lecturer or instructor are classed as professors.
- ⁶ The median salary was not calculated if the number of persons in any distribution was less than 10, or unless there were more than 2 institutions in a distribution. As a result, per cent increases for such distributions could not be calculated. Quartiles were not calculated unless the number of persons in any distribution was 30 or more.
- ⁷ Including all deans, and others concerned primarily with faculty administration.
- ⁸ Excluding deans, and others concerned primarily with faculty administration.
- ⁹ Institutions included: **West**—British Columbia, Alberta, Calgary, Saskatchewan, Manitoba; **Central**—Western Ontario, Ontario Institute for Studies in Education, McMaster, Toronto, Victoria, Trinity, Queen's, McGill, Bishop's; **Maritimes**—New Brunswick, Mount Allison, St. Francis Xavier, Acadia, Dalhousie. Part-time teachers and religious teachers paid on a scale less than that applying to lay staff have been excluded.
- ¹⁰ For those receiving some allowance, i.e. excluding those reported as receiving no allowance.
- ¹¹ This footnote has been deleted in this edition.
- ¹² In cases where there were 1 or 2 in one group, detail of the distribution is not shown.
- ¹³ Including letters, social science, Islamic studies, mediaeval studies.
- ¹⁴ Including faculties teaching both pure and applied science.
- ¹⁵ Including psychology and education combined, and child study.
- ¹⁶ Including medical research, medical technology.
- ¹⁷ Including canon law.
- ¹⁸ Including faculties or schools of fine and applied arts, forestry, hygiene and public health, journalism, library science, philosophy, secretarial science, veterinary science and graduate studies.
- ¹⁹ History and appreciation—including art, archaeology, architecture, drama, music.
- ²⁰ Including Greek, Latin, mediaeval literature, oriental languages.
- ²¹ Including Russian, Spanish, Italian, Portuguese, Icelandic, such combinations as modern languages, romance languages, Slavic languages, and also letters and linguistics.
- ²² Including ethics, logic, natural theology.
- ²³ Including East Asiatic studies, Islamic studies, Slavic studies, religion, Asian studies, Celtic studies, Near Eastern studies.
- ²⁴ Including drama, elocution.
- ²⁵ Including journalism, library science.
- ²⁶ Economics and political science combined.

Provinces de l'Ouest — suite

University of Victoria, Victoria
 University of Lethbridge, Lethbridge.
 Red Deer Junior College, Red Deer
 Notre Dame University of Nelson, Nelson
 Simon Fraser University, Burnaby

- ³ Ne sont pas compris les vice-doyens, les directeurs d'écoles et d'instituts. Sont compris quelques directeurs de collèges constituants.
- ⁴ Sont compris (s'ils ont le rang de professeur titulaire) les vice-doyens, les directeurs d'écoles et d'instituts.
- ⁵ Dans quelques petits collèges le rang de professeur agrégé et celui de professeur adjoint n'existent pas; tous sont classés professeurs s'ils ne sont pas simplement chargés de cours.
- ⁶ Le traitement médian n'a pas été calculé lorsqu'une série comprenait moins de 10 personnes ou à moins qu'elle ne comptât plus de 2 institutions. Il en résulte que les augmentations procentuelles relatives à ces répartitions n'ont pu être calculées. Les quartiles ne sont pas calculés là où, dans une répartition le nombre de personnes est de 30 ou plus.
- ⁷ Sont compris tous les doyens et les autres personnes s'occupant avant tout de l'administration de la faculté.
- ⁸ Ne sont pas compris les doyens ni les autres personnes s'occupant avant tout de l'administration de la faculté.
- ⁹ Voici les institutions intéressées: **Ouest**—British Columbia, Alberta, Calgary, Saskatchewan, Manitoba; **Centre**—Western Ontario, Ontario Institute for Studies in Education, McMaster, Toronto, Victoria, Trinity, Queen's, McGill, Bishop's; **Maritimes**—New Brunswick, Mount Allison, St. Francis Xavier, Acadia, Dalhousie. On a exclu les professeurs à temps partiel et les professeurs religieux dont l'échelle de traitements était inférieure à celle du personnel laïc.
- ¹⁰ Pour ceux qui reçoivent une allocation c.-à-d. sans ceux déclarés comme ne recevant aucune allocation.
- ¹¹ Ce renvoi a été supprimé de la présente édition.
- ¹² La ventilation n'est pas faite quand le groupe ne comprend qu'un ou deux professeurs.
- ¹³ Y compris lettres, sciences sociales, études islamiques, études médiévales.
- ¹⁴ Y compris les facultés de sciences pures et appliquées.
- ¹⁵ Y compris la psychologie et la pédagogie réunies et la psychologie de l'enfant.
- ¹⁶ Y compris recherche médicale, technologie médicale.
- ¹⁷ Y compris droit canonique.
- ¹⁸ Y compris les facultés et les écoles de beaux-arts et d'arts appliqués, de sylviculture, d'hygiène et de santé publique, de journalisme, de bibliothéconomie, de philosophie, de science secrétariale, de science vétérinaire et d'études supérieures.
- ¹⁹ Histoire et appréciation—y compris art, archéologie, architecture, théâtre, musique.
- ²⁰ Y compris le grec, le latin, la littérature médiévale et les langues orientales.
- ²¹ Y compris le russe, l'espagnol, l'italien, le portugais, l'islandais, les groupements tels que les langues modernes, les langues romanes, les langues slaves, les lettres et la linguistique.
- ²² Y compris morale, logique, théologie naturelle.
- ²³ Y compris études oriento-asiatiques, études islamiques, études slaves, religion, études asiatiques, études celtiques, études du Proche-Orient.
- ²⁴ Y compris théâtre, élocution.
- ²⁵ Y compris journalisme, bibliothéconomie.
- ²⁶ Sciences économiques et science politique réunies.

Western Provinces — Concluded

- ²⁷ Including accounting, industrial relations
- ²⁸ Including child study.
- ²⁹ Including dietetics.
- ³⁰ Including secretarial science, public administration.
- ³¹ Including anatomy, histology, embryology, entomology, palaeontology, physiology.
- ³² Including botany and zoology combined as biology, and also genetics, natural history.
- ³³ Including medical technology.
- ³⁴ Including rehabilitation.
- ³⁵ Including forestry, hygiene and public health, veterinary science, optometry.
- ³⁶ Including biochemistry.
- ³⁷ Including mineralogy.
- ³⁸ Including astronomy, geodesy, statistics.
- ³⁹ Including biophysics, geophysics, mathematical physics.
- ⁴⁰ Including town planning.
- ⁴¹ Including agricultural engineering, architectural engineering, forest engineering, structural engineering.
- ⁴² Including geological engineering, metallurgical engineering, petroleum engineering.
- ⁴³ Including aerophysics, applied mathematics, applied physics.
- ⁴⁴ Comparable data for 1956-57 not available.
- ⁴⁵ Excluding M.D., D.D.S., D.V.M.
- ⁴⁶ Including licence.
- ⁴⁷ Including M.D., D.D.S., D.V.M. and second baccalaureate.
- ⁴⁸ Including first professional degree if it is the first baccalaureate.
- ⁴⁹ Excludes staff with no degree.
- ⁵⁰ Including both lay and religious teachers.
- ⁵¹ Data included for all 64 institutions listed in Note 2.
- ⁵² Excludes staff for whom no information was reported.
- ⁵³ Excludes staff with no degree and staff for whom no information was reported and hence totals do not equal those in Table 18.
- ⁵⁴ Less than 1 year.
- ⁵⁵ Estimated, for institutions included in this survey, on basis of returns made as of December 1 together with enrolments reported in the salary survey.

Provinces de l'Ouest — fin

- ²⁷ Y compris comptabilité, relations industrielles.
- ²⁸ Y compris psychologie de l'enfant.
- ²⁹ Y compris diététique.
- ³⁰ Y compris science secrétariale, administration publique.
- ³¹ Y compris anatomie, histologie, embryologie, entomologie, paléontologie, physiologie.
- ³² Y compris botanique et zoologie réunies sous biologie, et aussi génétique et histoire naturelle.
- ³³ Y compris technologie médicale.
- ³⁴ Y compris réhabilitation.
- ³⁵ Y compris sylviculture, hygiène et santé publique, science vétérinaire, optométrie.
- ³⁶ Y compris biochimie.
- ³⁷ Y compris minéralogie.
- ³⁸ Y compris astronomie, géodésie, statistique.
- ³⁹ Y compris biophysique, géophysique, physique mathématique.
- ⁴⁰ Y compris urbanisme.
- ⁴¹ Y compris génie agricole, génie architectural, génie forestier, génie des charpentes.
- ⁴² Y compris génie géologique, génie métallurgique, génie pétrolier.
- ⁴³ Y compris aérophysique, mathématiques appliquées, physique appliquée.
- ⁴⁴ Données comparables pour 1956-57 non disponibles.
- ⁴⁵ Non compris M.D., D.D.S., D.M.V.
- ⁴⁶ Y compris licence.
- ⁴⁷ Y compris M.D., D.D.S., D.M.V. et second baccalauréat.
- ⁴⁸ Y compris premier grade professionnel s'il s'agit du premier baccalauréat.
- ⁴⁹ A l'exclusion du personnel sans grade.
- ⁵⁰ Y compris les professeurs laïcs et religieux.
- ⁵¹ Données portant sur les 64 institutions énumérées à la note 2.
- ⁵² Sans le personnel au sujet duquel il n'y a pas eu de rapport.
- ⁵³ Ne comprend pas les professeurs sans grade, ni le personnel au sujet duquel il n'y a pas eu de rapport; c'est pourquoi les totaux ne correspondent pas à ceux du Tableau 18.
- ⁵⁴ Moins d'un an.
- ⁵⁵ Estimation portant sur les institutions étudiées dans le présent rapport et fondée sur les déclarations du 1^{er} décembre, ainsi que sur les inscriptions déclarées au cours de l'enquête sur les traitements.

CITIZENSHIP OF FULL-TIME STAFF BY DISCIPLINE

Information on the citizenship of full-time teaching staff of universities was sought, for the first time, in the survey conducted for the academic year 1969-70. Responses were received from all but 8 institutions. This response rate accounted for nearly 80 per cent of the total full-time teaching staff. Unfortunately 5 of the 8 non-responding universities are located in western Canada; thus, universities located in Manitoba, Saskatchewan, Alberta, and British Columbia are substantially under represented in the 80% sample.

Treatment of Non-responses

For purposes of creating a table which relates discipline taught to citizenship, it is necessary to assume that the distribution of citizenship for the non-respondents is the same as that for whom the information is provided. While this method of inflating the sample may lead to some slight distortion, it is highly unlikely that gross variations would result if the response rate were 100 per cent. It should be noted that information on discipline taught is available for the entire population covered by the survey.

Classification of Data

Citizenship

Full-time members of university teaching staffs were classified as citizens of either Canada, the United States, the United Kingdom, France or 'other countries'.

Disciplines

The original tabulation of subjects taught produced just under 100 disciplines; these have been collapsed into a more readily manageable number. The percentage distribution of faculty by discipline was compiled at the highly disaggregated level and combined into larger groups of the same general area of study and similar citizenship composition. The variations in distributions of citizenship of the sub-group were not large. The major exception to this pattern was the social sciences where sub-groups show striking variations. Anthropology, although a very small group (135 full-time faculty only) consists of 26 per cent Canadian, 60 per cent United States, and 14 per cent for all other countries. On the other hand, in Economics one finds that 52 per cent of the 656 full-time faculty is Canadian, 18 per cent U.S.A., 7 per cent U.K., 2 per cent France, and 21 per cent other countries. Sociology, with 528 full-time faculty, consists of 41 per cent Canadian, 39 per cent U.S.A., 6 per cent U.K., 1 per cent France and 13 per cent other countries.

In the Humanities gross variations are related to the nature of the discipline; this is particularly true for language and area studies. For example,

CITOYENNETÉ DU PERSONNEL ENSEIGNANT À PLEIN TEMPS PAR DISCIPLINE

Pour la première fois cette année, nous avons recueilli des données relatives à la citoyenneté du personnel enseignant à plein temps dans les universités en 1969-70. De toutes les institutions, 8 seulement n'ont pu fournir de réponses. Nous avons donc recueilli les données pour environ 80 p. 100 du total du personnel enseignant à plein temps. Malheureusement, 5 des 8 universités qui n'ont pas fait rapport, se situent dans l'ouest du pays. Par conséquent, le Manitoba, la Saskatchewan, l'Alberta et la Colombie-Britannique sont sous-estimés.

Les instituteurs n'ayant pas fourni ce renseignement

En vue de présenter un tableau faisant la relation entre le sujet enseigné et la citoyenneté du professeur, nous avons dû supposer que la distribution de la citoyenneté pour les institutions qui n'ont pas fourni ce renseignement était la même que celle des institutions qui nous ont donné les données. Bien que cette méthode d'augmenter l'échantillon puisse apporter de légères différences, il est très peu probable qu'une réponse à 100 p. 100 ait apporté des écarts exagérés. A remarquer que l'information sur les sujets enseignés est disponible pour l'ensemble de la population couverte par l'enquête.

Classement des données

Citoyenneté

Les enseignants à plein temps des universités ont été classés comme citoyens ou du Canada, des États-Unis, du Royaume-Uni, de la France ou des "autres pays".

Sujet

La compilation originale des sujets enseignés en fournissait un peu moins de 100; ils ont donc été réduits à un nombre un peu plus facile à traiter. La distribution procentuelle des professeurs par sujet a été calculée par discipline spécifique pour ensuite être combinée par groupes généraux. Les variations dans la distribution par citoyenneté des sous-groupes ne fut pas très grande. La faculté des sciences sociales est l'exception principale où les sous-groupes montrent des variations frappantes. L'anthropologie, même si c'est un groupe très petit (135 professeurs à plein temps), a 26 p. 100 de ses professeurs comme citoyens canadiens, 60 p. 100 citoyens américains, et 14 p. 100 citoyens des autres pays. Par contre, en économie on trouve 656 professeurs à plein temps, et de ceux-ci, 52 p. 100 sont du Canada, 18 p. 100 des États-Unis, 7 p. 100 du Royaume-Uni, 2 p. 100 de la France, et 21 p. 100 des autres pays. Enfin, sur 528 professeurs en sociologie, 41 p. 100 sont du Canada, 39 p. 100 des États-Unis, 6 p. 100 du Royaume-Uni, 1 p. 100 de la France, et 13 p. 100 des autres pays.

Dans les humanités, on retrouve de grandes variations par rapport aux disciplines; ceci s'applique surtout pour les langues et études régionales.

although citizens of France make up only 3 per cent of the total full-time faculty for all disciplines, they make up over 28 per cent of those teaching French and French literature. The total teaching force in English language and literature consists of 1,345 full-time staff; of these, 52 per cent are citizens of Canada, 28 per cent citizens of the U.S.A., 15 per cent U.K., and 5 per cent other countries.

Humanities. — History and appreciation of art, of music, of drama and related topics, classical studies, mediaeval languages and literature, oriental languages and literature, modern European languages and literature, philosophy, history, East Asian, Islamic, Slavic, Celtic, Near Eastern studies, etc.

Social sciences. — Anthropology, economics, political science and related, geography, psychology, sociology, public administration, social work, home economics, etc.

Pure science. — Biological sciences, chemistry, biochemistry, geology, mineralogy, mathematics, astronomy, geodesy, statistics, physics, biophysics, geophysics, mathematical physics, etc.

Engineering and applied science. — Engineering: chemical, civil, agricultural, architectural, structural, forestry, electrical, mechanical, mining, metallurgical, geological, petroleum, other engineering. Applied mathematics, applied physics, aerophysics.

Medicine and health professions. — Medicine, dentistry, hygiene and public health, medical technology, nursing, optometry, pharmacy, physiotherapy, etc.

Agriculture. — Agriculture.

Architectury, town planning. — Architecture, town planning.

Commerce, business administration. — Commerce, business administration, secretarial science.

Education, physical and health education. — Education, physical and health education.

Fine and applied arts. — Fine and applied arts including music.

Law. — Law.

Theology. — Theology, religion.

Veterinary medicine. — Veterinary medicine.

Others. — Forestry, journalism, library science.

Administration. — Administration.

Par exemple, même si seulement 3 p. 100 du total des professeurs à plein temps sont citoyens de la France, il faut noter que 28 p. 100 des professeurs enseignant la langue et littérature françaises sont citoyens de la France. Pour la langue et la littérature anglaises, le total des professeurs à plein temps s'élève à 1,345; de ceux-ci, 52 p. 100 sont citoyens canadiens, 28 p. 100 des États-Unis, 15 p. 100 du Royaume-Uni, et 5 p. 100 des autres pays.

Humanités. — Histoire et appréciation de l'art de la musique, du théâtre dramatique et études assimilées, langues et littérature médiévales, langues et littérature orientales, langues et littérature modernes et européennes, philosophie, histoire, études de l'Extrême-Orient, islamiques, slaves, celtiques et du Proche-Orient, etc.

Sciences sociales. — Anthropologie, économie, sciences politiques et géographie, psychologie, sociologie, administration publique, service social, sciences ménagères, etc.

Sciences pures. — Sciences biologiques, chimie, bio-chimie, géologie, minéralogie, mathématiques, astronomie, géodésie, statistiques, physique, bio-physique, géophysique, physique mathématique.

Génie et sciences appliquées. — Génie: chimique, civil, agricole, architectural, structurel, forestier, électrique, mécanique, minier, métallurgique géologique, pétrolier; autres: mathématiques appliquées, physique appliquée, aerophysique.

Médecine et professions de la santé. — Médecine, art dentaire, hygiène et santé publique, technologie médicale, sciences infirmières, optométrie, pharmacie, physiothérapie, etc.

Agriculture. — Agriculture.

Architecture et urbanisme. — Architecture, urbanisme.

Commerce et affaires. — Commerce, administration, sciences secrétaires.

Pédagogie, éducation physique. — Pédagogie, éducation physique.

Beaux-arts et arts appliqués. — La musique est incluse dans les beaux-arts et arts appliqués.

Droit. — Droit.

Théologie. — Théologie, religion.

Médecine vétérinaire — Médecine vétérinaire.

Autres. — Sylviculture, journalisme, bibliothéconomie.

Administration. — Administration.

TABLE 27. Estimated Distribution of Citizenship of Full-time Teaching Staff of Canadian Universities, 1969-70

TABLEAU 27. Estimation sur la distribution des professeurs à plein temps des universités canadiennes selon la citoyenneté, 1969-70

| Discipline | Citizens of: - Citoyenneté du: | | | | | Total |
|---------------------------------------------------------------------------------------------------------------------|--------------------------------|-------------------------------|---------------------------------|------------|----------------------------------|---------------|

PREFACE

This is the eleventh in the series of detailed reports on salaries and qualifications of Canadian university teachers.

The 1970 - 71 report presents statistical tables and commentary which link together academic and other socio-economic variables such as salary, rank, field, qualifications and other relevant characteristics of teaching staff in universities and colleges.

Questions concerning the content of this publication or suggestions for further analyses should be sent to Dr. Miles Wisenthal, Director, Education Division; or to M. Yvon Fortin, Assistant Director, Education Division.

WALTER E. DUFFETT,

Chief Statistician of Canada.

PREFACE

Le présent rapport est le onzième d'une série de rapports détaillés sur les traitements et la qualification des professeurs des universités canadiennes.

La publication 1970 - 71 illustre par des tableaux statistiques et des commentaires les rapports qui existent entre les caractéristiques académiques et les autres variables socio-économiques telles le traitement, le rang professoral, la discipline, les qualifications universitaires et diverses autres caractéristiques relatives au personnel enseignant dans les universités et collèges du Canada.

Toute question relative au contenu de la présente publication ou toute proposition d'analyses supplémentaires doit être adressée à M. Miles Wisenthal, Directeur, Division de l'éducation; ou à M. Yvon Fortin, Directeur adjoint, Division de l'éducation.

WALTER E. DUFFETT,

Le statisticien en chef du Canada.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
 - . . . figures not appropriate or not applicable.
 - nil or zero.
 - amount too small to be expressed.
 - p preliminary figures.
 - r revised figures.
 - x the median salary was not calculated if the number of persons in any distribution was less than 10. Quartiles were not calculated unless the number of persons in any distribution was 30 or more.
- n.e.c. not elsewhere classified.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
 - . . . n'ayant pas lieu de figurer.
 - néant ou zéro.
 - nombres infimes.
 - p nombres provisoires.
 - r nombres rectifiés.
 - x le traitement médian n'a pas été calculé lorsqu'une série comprenait moins de 10 personnes. Les quartiles ne sont pas calculés là où, dans une répartition le nombre de personnes est de 30 ou moins.
- n.d.a. non dénommé ailleurs.

FOREWORD

The primary objective of this publication is to present statistical tables and commentary which link together academic and other socio-economic variables like salary, rank, field, qualifications and other relevant characteristics of teaching staff in universities and colleges in Canada for 1970 - 71. Decision-makers at the institutional and governmental sectors will find these data helpful in planning for the future. Hopefully the data will also be useful to students and researchers.

In the last decade, exciting changes occurred in the domain of university education. In order to accommodate the tremendous increase in student enrolment, new universities were chartered, and the faculties and range of programs offered in universities and colleges were expanded appreciably. As a result, significant numbers of teachers and many young graduates were added to the staff of these institutions. The greatest growth in teaching staff numbers was in the social science fields, with humanities next. This reflects the up-surge in concern with societal and human issues in universities and the nation generally, during that period. Concomitant with the increase in numbers of staff, was the trend for teachers to have higher qualifications. The proportion of teaching staff with doctorate degrees increased from over 40% in the early part of the decade to over 50% in 1969 - 70. Median salaries increased to an all time high during the sixties reaching \$13,265 for all ranks in 1969 - 70. Many similarities, however, persisted over the decade; differential patterns in median salaries were consistently determined by sex, region, field and size of institution.

The 1970 - 71 information on university teaching staff in this publication represents the beginning of a new decade. Many of the trends of the last decade continue. Some of these are: traditional differential patterns in median salary remain; the low proportion of female teachers is still the case; the high proportion of teaching staff holding other than Canadian citizenship (especially in certain fields) persists. However, the number of doctorates as a percentage of the total teaching staff has increased.

Examination of the data in this publication provokes certain questions on change and policy innovations that could affect the nation's future in the

AVANT-PROPOS

La présente publication cherche surtout à illustrer par des tableaux statistiques et des commentaires les rapports qui existent entre les caractéristiques académiques et les autres variables socio-économiques telles le traitement, le rang professoral, la discipline, les qualifications universitaires et diverses autres caractéristiques relatives au personnel enseignant dans les universités et collèges du Canada en 1970 - 71. Les responsables de l'enseignement supérieur et des organismes gouvernementaux trouveront ces données utiles pour la planification académique. Il est également souhaité que ces données servent les besoins de la population étudiante et ceux de nos chercheurs en éducation.

Au cours de la dernière décennie, l'enseignement universitaire a subi des transformations fort intéressantes. Dans le but de répondre à l'accroissement considérable des effectifs scolaires, on octroie de nouvelles chartes universitaires, tandis que se multiplient les nouvelles facultés et s'élargit considérablement l'éventail des cours offerts dans les universités et collèges. Il en résulte qu'un nombre imposant d'enseignants et de jeunes gradués vient accroître les rangs du corps professoral des universités et collèges. Le nombre de professeurs enseignant les sciences sociales augmente le plus rapidement, suivi du nombre enseignant les humanités. Cette situation traduit l'inquiétude croissante suscitée par les problèmes sociaux et humains qui s'est manifestée dans les universités et le pays en général pendant cette période. Parallèlement à l'accroissement du personnel enseignant, la compétence des enseignants tend à être plus poussée. La proportion des enseignants titulaires d'un doctorat passe de plus de 40 % au début de la décennie à plus de 50 % en 1969 - 70. Au cours des années 60, le traitement médian augmente de façon sans précédent, et atteint \$13,265 pour l'ensemble des enseignants en 1969 - 70. Toutefois, un grand nombre de similitudes subsistent au cours de cette décennie; les variations de traitements médians reflètent constamment la différenciation des sexes, la disparité régionale, la diversité des matières d'enseignement et l'inégalité de la taille de l'établissement.

Les données de cette publication ayant trait au personnel enseignant de l'année 1970 - 71 représentent le début d'une nouvelle décennie. Un grand nombre de tendances observées durant la dernière décennie persistent: parmi celles-ci on dénote toujours les écarts traditionnels du traitement médian, la faible proportion des femmes professeurs, la forte proportion des enseignants de nationalité autre que canadienne (en particulier dans certains domaines). Notons toutefois l'augmentation du pourcentage d'enseignants titulaires d'un doctorat par rapport à l'ensemble du personnel enseignant.

Un examen des données présentées dans cette publication suscite un certain nombre de questions touchant les modifications et les changements de politiques

1970's. Examples are: what steps can be taken in Canada to ensure positions for new graduates seeking entry to universities and colleges as teachers? In this regard, can students be directed into certain fields where the demand for university teaching staff appears to be increasing? Will the number of teachers in the social sciences continue to rise at the previously observed rate? Will the proportion of female teaching staff increase? How will university teachers fulfil the increasing demands of the students as well as the essential task of advancing knowledge through research?

These and other pressing questions can only be answered through long-range planning by governments, universities, and other educational institutions. But fundamental to effective planning is the provision of a comprehensive and detailed information base. The data in this publication are provided for this purpose.

This publication has been prepared under the direction of Louise Desramaux, assisted by Jim Donnelly primarily, and other members of the Teacher Information Section. To these people of the Education Division, and to the business officers of the responding institutions, we are deeply indebted.

Miles Wisenthal,
Director, Education Division,
Statistics Canada.

susceptibles d'influer sur l'avenir du pays pendant les années 1970. Par exemple, on peut se demander quelles mesures il faudrait prendre pour assurer des postes aux nouveaux diplômés qui aspirent à l'enseignement universitaire et collégial? A cet égard, est-il possible d'orienter les étudiants vers certaines disciplines où le besoin en enseignants universitaires se fait plus pressant? Le nombre d'enseignants en sciences sociales continuera-t-il de s'accroître au même rythme que durant la décennie précédente? La proportion du personnel enseignant féminin augmentera-t-elle? Les enseignants universitaires pourront-ils satisfaire les demandes sans cesse plus nombreuses des étudiants tout en remplissant le rôle essentiel d'assurer le progrès des connaissances par la recherche?

La réponse à ces questions urgentes et à d'autres ne pourra être trouvée que par l'intermédiaire d'une planification à long terme par les organismes gouvernementaux responsables, par les universités et les autres établissements d'enseignement supérieur. Or, il est impossible de réaliser une planification juste si on ne dispose pas d'une information de base complète et détaillée. Le contenu de cette publication est destiné à faciliter un tel rôle.

Cette publication a été mise au point sous la direction de Louise Desramaux, secondée principalement par Jim Donnelly, et d'autres membres de la Section des enseignants. Nous sommes redevables à ces personnes de la Division de l'éducation ainsi qu'aux membres de l'administration des universités et collèges enquêtés.

Miles Wisenthal,
Le Directeur de la Division de l'éducation,
Statistique Canada.

INTRODUCTION

Purpose

The purpose of this publication is to present statistical profiles of salaries and qualifications of teaching staff in universities and colleges for the year 1970-71. More specifically data are cross-classified by citizenship, rank, sex, field, region, size and control of institution, faculty, subject, and highest earned university degree. In addition, historical comparisons are provided.

Scope of Data

This report is based on questionnaire forms for the 1970-71 academic year sent to 106 universities and colleges. Returns were received from 104 (listed below) with enrolment equalling about 99% of the total enrolment of full-time undergraduate and graduate students in Canadian institutions of higher education. All but one of the salary tables are limited to data relating to lay teachers and religious teachers paid on the same scale as lay teachers; the exception is Table 10. Tables showing non-salary data include both lay and religious teachers.

Data are presented for a total of 24,612 teachers, all of them full-time and with academic ranks of lecturer or instructor or higher. These include 24,286 in receipt of salaries based on scales applying to lay personnel and 326 religious teachers in receipt of allowances below the scales applying to lay personnel.

But

Cette publication a pour but de présenter des profils statistiques relatifs aux salaires et aux qualifications du personnel enseignant dans les universités et collèges pour l'année 1970-71. De plus, les données indiquent la relation entre la citoyenneté, le rang, le sexe, le domaine d'étude, la région, la taille et la direction de l'institution, la faculté, la discipline et le plus haut grade acquis à l'égard de 104 institutions. Des données historiques complètent le rapport.

Portée du rapport

Le présent rapport est basé sur les questionnaires envoyés à 106 universités et collèges pour l'année académique 1970-71. Les inscriptions des 104 qui ont répondu (en voir la liste ci-dessous) représentent environ 99 % de tous les étudiants à plein temps inscrits aux institutions canadiennes d'enseignement supérieur. A l'exception du Tableau 10, tous les tableaux des traitements ne concernent que les professeurs laïcs et les professeurs religieux rémunérés à l'échelle des laïcs. Les tableaux qui n'ont pas trait aux traitements portent sur les professeurs tant laïques que religieux.

Les données se rapportent à 24,612 professeurs, tous à plein temps et ayant au moins le rang de chargé de cours. Sur ce nombre, 24,286 reçoivent un traitement conforme à l'échelle des laïcs et 326 professeurs religieux reçoivent un traitement inférieur à cette échelle.

Table A (p.18) is a summary table showing: median salaries of teachers cross-classified by various social characteristics for 1970-71; and percent increase over the previous year.

Caution should be taken in interpreting the data in Table A. The median salary of full professors engaged in faculty administration show a 7.2% decrease in salary from the year 1969 - 70. This is explained by the following facts: a substantial number of small colleges have been added to the 1970 - 71 survey thereby including faculty administrators at a lower salary; and some larger institutions were inconsistent in their reporting of faculty administrators.

In the same table, the median salaries of teachers by size of institution show a decrease for most ranks in the smallest size group i.e. institutions with an enrolment of less than 500 students. This is explained by a jump in the number of institutions included in that size group - 6 institutions in 1969 - 70 to 45 institutions in 1970 - 71.

Le Tableau A (p.18) est un résumé démontrant le traitement médian du personnel enseignant pour l'année 1970-71 relatif à plusieurs caractéristiques sociales ainsi que l'augmentation procentuelle depuis l'année précédente.

Il faut interpréter les données du Tableau A avec prudence. Le traitement médian des professeurs titulaires avec fonctions administratives indique une diminution de 7.2 % depuis l'année 1969 - 70. En voici les explications; premièrement, un nombre appréciable de collèges de petite taille a été ajoutée à l'enquête de 1970 - 71 incluant par le fait même des professeurs avec fonctions administratives à des salaires moins rémunératifs; deuxièmement, certaines des plus grosses institutions ont manqué d'uniformité dans leur rapport de ces professeurs.

Au même tableau, le traitement médian des professeurs selon la taille de l'institution démontre une diminution générale pour les institutions ayant une inscription de moins de 500 étudiants. Ceci s'explique par un accroissement considérable d'institutions dans ce groupe; 6 institutions en 1969 - 70; 45 institutions en 1970 - 71.

Chart A is a summary chart showing the percentage distribution of university teachers by rank and sex for the years 1968-69 to 1970-71.

Table B and Chart B present a historical series of salaries on teachers at 19 universities by rank and region for the years 1946-47 to 1970-71.

This report was issued for the years 1956-57, 1957-58, 1958-59, 1960-61, 1962-63, 1963-64, and 1965-66. As of 1967-68 this report has been an annual publication. For 1959-60 a survey covering 17 institutions was published, which in addition provided data for these same 17 institutions from 1937-38. Table B in this publication gives summary data from 1945-46 to 1969-70 for these 17 institutions. Since 1965-66, Table B includes data for 19 institutions.

Table C indicates the ratio of full-time university teachers to full-time students, by region for the years 1965-66 to 1970-71.

Estimated total enrolment of full-time undergraduate and graduate students, 1970-71 in the 104 institutions on which this report is based was 308,106. If this figure is compared with that of the 24,612 teachers with ranks of instructor and lecturer or higher reported as being full-time, it would appear that for all institutions included in this survey the ratio of such teachers to students was 1:12.5 (1:13.5 in 1969-70). Region variations were between 1:10.9 in Quebec and 1:13.2 in the Eastern Provinces.

As it is known that a certain number of full-time staff below the rank of instructor or lecturer were omitted in the returns made, and as the teacher student ratio may vary in those institutions not included, estimates for the total number of full-time teachers in all Canadian institutions have not been made.

Cautions in Interpreting Data

1. Figures for the separate years are not strictly comparable as a few institutions are not included for all these years in all tables. The data in Table B are comparable.
2. The median is not the arithmetic average, but is the theoretical point in a distribution for which 50% of the cases are higher and 50% are lower.
3. The range between the 1st and 3rd quartiles includes 50% of all cases. Thus 25% are below the 1st quartile and 25% are above the 3rd.
4. All salary data refer to basic annual salary rates. Many teachers receive extra income for teaching evening, extension or summer classes, and many earn income from non-university sources. Such extra income was not included in this report.

Le Graphique A est un résumé indiquant la répartition procentuelle des professeurs d'université selon le rang et le sexe pour les années 1968-69 à 1970-71.

Le Tableau B et le Graphique B présente un aperçu historique des professeurs d'université à 19 universités selon le rang et la région pour les années 1946-47 à 1970-71.

Ce rapport a paru pour les années 1956-57, 1957-58, 1958-59, 1960-61, 1962-63, 1963-64, 1965-66 et 1967-68. Depuis 1967-68, ce rapport paraît annuellement. Le rapport de 1959-69 comprenait 17 institutions et donnait leurs statistiques chronologiques à partir de 1937-38. Le Tableau B de la présente publication donne les chiffres récapitulatifs de ces 17 institutions de 1945-46 à 1969-70. Depuis 1965-66, le Tableau B donne les chiffres pour 19 institutions.

Le Tableau C indique le rapport des professeurs d'université à plein temps aux étudiants à plein temps pour les années 1965-66 à 1970-71.

Le nombre total d'étudiants sous-diplômés et diplômés à plein temps dans les 104 institutions observées ici était d'environ 308,106 en 1970-71. Si l'on compare ce chiffre aux 24,612 personnes à plein temps qui ont au moins le rang de chargés de cours, il semble que pour l'ensemble des institutions observées, il y avait un professeur pour 1:12.5 étudiants (1:13.5 en 1969-70). La proportion variait de 1:10.9 au Québec à 1:13.2 dans les provinces de l'est.

Comme on sait qu'un certain nombre de professeurs à plein temps de rang inférieur à celui de chargé de cours ont été omis dans les réponses et que le rapport des professeurs aux étudiants peut varier dans les institutions omises, on n'a pas estimé le nombre total de professeurs à plein temps dans toutes les institutions canadiennes.

Interprétation prudente des données

1. Les chiffres des différentes années ne sont pas strictement comparables, car quelques institutions sont omises pour certaines années dans les tableaux. Les données du Tableau B sont comparables.
2. La médiane n'est pas la moyenne arithmétique mais bien le point théorique d'une série de valeurs dont la moitié sont supérieures et l'autre moitié inférieures à ce point.
3. L'écart entre le 1er et le 3e quartile comprend la moitié de tous les cas, de sorte que le quart des cas sont en-deça du 1er quartile et le quart au-dessus du 3e.
4. Tous les traitements indiqués sont les traitements annuels de base. Plusieurs professeurs augmentent leur revenu en enseignant aux cours du soir, d'extension ou d'été et plusieurs ont un revenu para-universitaire. Ces suppléments ne paraissent pas dans le présent rapport.

5. Up until now, the size of the institution has been grouped in five categories. Because of the expansion of the institutions, there are now six size categories. Care should be taken in comparing data relating to size of the institution from the 1970-71 publication to data published in previous years.

6. All salary data refer to basic annual salary rates in the fall of 1970.

Calculation methods

Salary

Respondents were requested to present the data to the nearest dollar. The salary distributions used in this report are \$1,000 except for data in Table 1 where a \$500 interval was used so that the figures would be consistent with those published in *University Teachers' Salaries, 1937-60*. Medians were calculated to the nearest \$100.

Although salary scales for the ensuing year are generally set prior to the start of that academic year, the medians should reflect the situation at the end of the academic year.

Age

The questionnaire requested the year of birth of each staff member. In the tables in this report, age is considered as that attained by each individual during the calendar year 1970. These ages are grouped in five-year intervals. Thus all persons born in 1907 for example, were 63 years of age some time in 1970 and were all 63 and not yet 64 at the end of the year. These persons would be included in the interval 60 - 64.

A median age or quartile reported as 63, for example, indicates that the point falls anywhere from 63.0 to 63.9 in the distribution.

If one assumes there was an even distribution of birthdays throughout each month of each year, half of the persons would be (to use 1970 again as an example) 63 years of age at June 30, 1970. It could then be assumed that at December 31, 1970, the median age would be 63.5 years, and at June 30, 1971, 64 years. To arrive at approximate figures for the end of the academic year 1970-71 (June 30) one might add one year to each median year of age given (although the medians were not calculated in this manner in this report).

Years Since Award of First Degree

Information was requested on the year in which the first degree was obtained. As with age, the number of years was measured in relation to the calendar year

5. Jusqu'à présent la taille des institutions a été groupée en cinq catégories. A cause de l'expansion des institutions, une autre catégorie a été ajoutée. Il faudra donc prendre garde en comparant les données 1970-71 relatives à la taille de l'institution aux données publiées par les années passées.

6. Toutes les données sur les traitements sont basées sur la rémunération annuelle de base en vigueur à l'automne de 1970.

Méthode de calculs

Traitements

Les traitements, qu'on devait déclarer à un dollar près, sont groupés ici par intervalles de \$1,000, sauf au Tableau 1 où on a choisi un intervalle de \$500 pour que les chiffres correspondent à ceux qui ont paru dans *Traitements des professeurs d'université, 1937-1960*. On a calculé la médiane à 100 dollars près.

Même si l'échelle des traitements pour l'année à venir est normalement établie avant le commencement de l'année académique, les médianes doivent refléter de façon relativement précise la situation à la fin de l'année académique.

Âge

Le questionnaire demandait l'année de naissance de chaque membre du personnel. Dans les tableaux, l'âge est celui qu'a atteint chaque individu au cours de l'année civile 1970. Les âges sont groupés par intervalles de cinq ans. Ainsi, les personnes nées en 1907 ont atteint 63 ans en 1970 et, à la fin de l'année, elles avaient toutes 63 ans révolus, mais non encore 64 ans. Ces personnes sont comprises dans le groupe de 60 - 64 ans.

La médiane ou le quartile de 63, par exemple, indique que le point se situe entre 63.0 et 63.9 dans la série.

Si les dates de naissance se répartissaient également entre les douze mois de chaque année, la moitié des personnes nées en 1907, pour reprendre l'exemple, auraient atteint leur 63^e année le 30 juin 1969. Il en découle qu'au 31 décembre 1970 l'âge médian serait de 63.5 ans et, au 30 juin 1971, de 64 ans. Dans le présent rapport, l'âge médian n'a pas été calculé de cette manière, mais il suffit d'ajouter un an à chaque âge médian indiqué pour avoir l'âge approximatif à la fin de l'année académique (30 juin) 1970-71.

Nombre d'années depuis l'obtention du premier grade

L'année d'obtention du premier grade a été demandée. Comme pour l'âge, le nombre d'années a été calculé par rapport à l'année civile 1970, et le classement

1970 and distributed in five year intervals. Medians and quartiles were calculated in the same manner as were those for age.

If the assumption is made that all degrees were received at regular spring convocations (although some would be received at other times), one year could be added to the medians reported to give the picture at the end of the academic year (June 30).

fait par groupes quinquennaux. Les médianes et quartiles ont été calculés de la même façon que ceux de l'âge.

Si l'on suppose que tous les grades ont été obtenus au printemps (même si certains l'ont été à d'autres époques de l'année), il suffit d'ajouter un an aux médianes indiquées pour connaître la situation à la fin de l'année académique (30 juin).

³ Estimated, for institutions included in this survey, on basis of returns made as of December 1 together with enrolments reported in the salary survey. — Estimation portant sur les institutions étudiées dans le présent rapport et fondée sur les déclarations du 1er décembre, ainsi que sur les inscriptions déclarées au cours de l'enquête sur les traitements.

SALARIES

- I. Field, Rank, Sex and Size of Institution
 - 1. Field
 - 2. Rank
 - 3. Sex
 - 4. Size of Institution
- II. Size of Institution
- III. Region and Rank
- IV. Control of Institution
- V. Faculty
- VI. Subject and Discipline
- VII. Religious Teachers

Tables 1 to 16 present statistical profiles of salaries of teaching staff, classified by field, rank, sex, region, size and control of institution, faculty, subject, years since award of first degree and highest earned degree.

I. Field, Rank, Sex, and Size of Institution (Tables A, 1, and 11; and Chart 1)

1. Field

Those engaged primarily in faculty administration (all deans and 55 others so classified) had a median salary of \$25,059, 8.5% above that for 1969-70. Of the others, teachers in the biological sciences (including medicine) had the highest median salary — \$16,054; followed by those in the physical sciences — \$14,641; the social sciences — \$13,895; and the humanities — \$12,819. In these four teaching fields, percentage increases ranged from 6.4% in physical sciences to 8.1% in the humanities.

2. Rank (Tables A and 1; and Chart 1)

For the 24,286 university teachers with academic rank, reported as receiving salary at rates applicable to lay personnel, the median salary in 1970-71 was \$14,248, 7.4% higher than the median for 1969-70. For deans it was \$25,950, for professors \$21,504, for associate professors \$16,057, for assistant professors \$12,701, for ungraded professors, \$12,545 and for lecturers and instructors \$10,002. For other ranks the increase ranged from 5.9% for lecturers and instructors to 7.8% for deans.

3. Sex (Tables 1, 5-9, 11 and 15)

For all ranks combined, the median salary for women was \$2,865 lower than that for men. Women were concentrated in the more junior ranks, as will be

SALAIRES

- I. Domaine, rang, sexe et taille de l'institution
 - 1. Domaine
 - 2. Rang
 - 3. Sexe
 - 4. Taille de l'institution
- II. Taille de l'institution
- III. Région et rang
- IV. Direction de l'institution
- V. Faculté
- VI. Matière et discipline
- VII. Professeurs religieux

Les tableaux 1 à 16 présentent les profils statistiques du personnel enseignant selon le domaine d'étude, le rang, le sexe, la région, la taille et la direction de l'institution, la faculté, le sujet et les années depuis l'obtention du premier et du plus haut grade.

I. Domaine d'étude, rang, sexe, et taille de l'institution (Tableaux A, 1, 11 et Graphique 1)

1. Domaine d'étude

Les professeurs qui s'occupaient surtout de l'administration des facultés (tous les doyens et 55 autres) ont touché un traitement médian de \$25,059, une augmentation de 8.5 % sur 1969-70. Chez les autres, le plus haut traitement médian a été celui des professeurs de sciences biologiques (y compris la médecine), soit \$16,054. Venaient ensuite celui des professeurs de sciences physiques, \$14,641 des sciences sociales, \$13,895 et des humanités, \$12,819. Dans ces quatre domaines, l'augmentation annuelle allait de 6.4 % pour les sciences physiques à 8.1 % dans les humanités.

2. Rang professoral (Tableaux A, 1 et Graphique 1)

Le traitement médian des 24,286 professeurs d'université de rang professoral rémunérés au barème laïc a été de \$14,248 en 1970-71 et dépassait de 7.4 % la médiane de 1969-70. Il était de \$25,950 pour les doyens, de \$21,504 pour les professeurs titulaires, de \$16,057 pour les professeurs agrégés, de \$12,701 pour les professeurs adjoints, de \$12,545 pour les professeurs non classés et de \$10,002 pour les chargés de cours. L'augmentation des autres rangs variait de 5.9 % pour les chargés de cours à 7.8 % pour les doyens.

3. Sexe (Tableaux 1, 5-9, 11 et 15)

Dans l'ensemble des rangs professoraux, le traitement médian des femmes était inférieur de \$2,865 à celui des hommes. Les femmes se trouvaient surtout aux rangs

noted later, and hence the median for them was less. Even for the higher ranks the median for women tended to be lower.

4. Size of Institution (Table 1)

For all staff at institutions with 10,000 and over full-time students, the median salary was \$14,769. The median for institutions of varying sizes ranged as follows: 5,000 to 9,999 students — \$14,072; 2,000 to 4,999 students — \$12,840; 1,000 to 1,999 students — \$13,433; 500 to 999 students — \$13,228; and less than 500 students — \$13,575. It should be noted that in the 500 and under group, many of the institutions included in the 1970-71 survey were not included in the 1969-70 survey (See text p. 13.)

inférieurs, comme on le soulignera plus loin, ce qui a baissé leur médiane; mais même aux rangs supérieurs, le traitement médian des femmes était en général moins élevé.

4. Taille de l'institution (Tableau 1)

Dans les institutions comptant 10,000 étudiants et plus à plein temps, la médiane de tout le personnel enseignant était de \$14,769 en 1970-71, dans les institutions de 5,000 à 9,999 étudiants, elle était de \$14,072; dans les institutions de 2,000 à 4,999 elle était de \$12,840; dans celles de 1,000 à 1,999 elle était de \$13,433; dans celles de 500 à 999 elle était de \$13,228; et dans celles de moins de 500 étudiants à plein temps, elle était de \$13,575. Il faut noter aussi que dans le groupe des institutions comptant moins de 500 étudiants, plusieurs de ces institutions n'étaient pas incluses dans l'enquête 1970-71 (Voir texte p. 13.)

¹ Including lay teachers, and religious teachers paid on the same scale as lay teachers.

² Excluding associate deans, assistant deans, directors of schools and institutes. Including some principals of constituent colleges.

³ Including (when holding the rank of professor) associate deans, assistant deans, directors of schools and institutes.

⁴ In some small colleges the ranks of associate professor and assistant professor are not used; all above the rank of lecturer or instructor are classed as professors.

⁵ Including all deans, and others concerned primarily with faculty administration.

⁶ Excluding deans, and others concerned primarily with faculty administration.

¹ Sont compris les professeurs laïcs et les professeurs religieux rémunérés à l'égal des laïcs.

² Ne sont pas compris les vice-doyens, les directeurs d'écoles et d'instituts. Sont compris quelques directeurs de collèges constituants.

³ Sont compris (s'ils ont le rang de professeur titulaire) les vice-doyens, les directeurs d'écoles et d'instituts.

⁴ Dans quelques petits collèges le rang de professeur agrégé et celui de professeur adjoint n'existent pas; tous sont classés professeurs s'ils ne sont pas simplement chargés de cours.

⁵ Sont compris tous les doyens et les autres personnes s'occupant avant tout de l'administration de la faculté.

⁶ Ne sont pas compris les doyens ni les autres personnes s'occupant avant tout de l'administration de la faculté.

II. Size of Institution (Tables A, 2, 14 and Chart 1)

Ten institutions in 1970 - 71 had full-time enrolments of over 10,000. The 5,000 - 9,999 category included 14 institutions while the 2,000 - 4,999 category decreased from 13 institutions to 12 from 1969 - 70 to 1970 - 71. Twelve institutions with 1,000 - 1,999 students were included in 1970 - 71 as compared with 13 institutions in 1969 - 70. The number of institutions with 500 - 999 students increased from 9 to 11 from 1969 - 70 to 1970 - 71 and 45 institutions in 1970 - 71 reported less than 500 students as contrasted with 6 in 1969 - 70.

In 1970 - 71, the median salary for all staff combined was highest for the 10,000 and over group (\$14,769), the 5,000 - 9,999 group (\$14,072), followed by the 500 and under group (\$13,575). Next were institutions with 1,000 - 1,999 students (\$13,433), institutions with 500 - 999 students (\$13,228) and finally, institutions with 2,000 - 4,999 students (\$12,840).

Increases in median salary from 1969 - 70 to 1970 - 71 for all ranks combined ranged from 8.4% for institutions with 2,000 - 4,999 students, to 12.1% for institutions with 500 - 999 students. The median salary for institutions with less than 500 students decreased from \$13,925 to \$13,575 from 1969 - 70 to 1970 - 71. This is explained by the increased number of institutions in that size range that were surveyed in 1970 - 71.

II. Taille de l'institution (Tableaux A, 2, 14 et Graphique 1)

En 1970 - 71, dix institutions comptaient plus de 10,000 étudiants à plein temps. Quatorze institutions comptaient entre 5,000 et 9,999 étudiants tandis que le nombre d'institutions ayant de 2,000 à 4,999 étudiants est passé de 13 à 12 de 1969 - 70 à 1970 - 71. Douze institutions ayant de 1,000 à 1,999 étudiants étaient comprises en 1970 - 71 contre 13 en 1969 - 70. Le nombre d'institutions ayant de 500 à 999 étudiants a passé de 9 à 11 de 1969 - 70 à 1970 - 71; 45 ont déclaré avoir moins de 500 étudiants en 1970 - 71 contre 6 en 1969 - 70.

En 1970 - 71, la médiane de tout le personnel réuni a été la plus élevée dans les institutions de 10,000 étudiants et plus (\$14,769). Viennent ensuite celles de 5,000 à 9,999 étudiants (\$14,072), de moins de 500 étudiants (\$13,575), de 1,000 à 1,999 étudiants (\$13,433) de 500 à 999 étudiants (\$13,228) et de 2,000 à 4,999 étudiants (\$13,840).

Les hausses de 1969 - 70 à 1970 - 71 du traitement médian pour tous les rangs professoraux réunis ont varié de 8.4 % pour les institutions de 2,000 à 4,999 étudiants à 12.1 % pour celles de 500 à 999 étudiants. Le traitement médian pour les institutions de moins de 500 étudiants a diminué de \$13,925 à \$13,575 de 1969 - 70 à 1970 - 71. Ceci est dû à une augmentation considérable d'institutions de cette taille qui ont été enquêtées en 1970 - 71.

III. Region and Rank

(Tables A, B, 3 and 12, and Charts B and 1)

Historical Comparisons

Table B in the introduction (p. 20) gives historical comparisons of salaries by rank and region covering the period 1945-46 to 1970-71. Chart B, in the introduction shows salaries by rank covering a period from 1939-40 to 1970-71.

Table B shows that the median for all ranks in this group for 1970-71 was \$14,887 (\$639 higher than for all personnel included in the present report).

From Table 3 the following data on salaries by region are represented:

For 1969-70 median salaries of all staff included from Western Provinces, Ontario, Quebec and the Atlantic Provinces were \$13,288, \$14,030, \$13,016 and \$11,535 respectively. The highest median in 1970-71 was for Ontario (\$15,039). Medians in other regions were: the Western Provinces at \$14,389; Quebec, \$13,802; and the Atlantic Provinces \$12,358. Comparing the 1970-71 and 1969-70 medians, the increase for Ontario was 7.2%, for the Atlantic Provinces, 7.1% for the Western Provinces, 8.3% and for Quebec, 6.0%.

III. La région et le rang

(Tableaux A, B, 3 et 12. Graphiques B et 1)

Comparaisons historiques

Le Tableau B de l'introduction (p. 20) indique chronologiquement les salaires selon le rang et la région depuis 1945-46 jusqu'à 1970-71. Le Graphique B aussi de l'introduction indique les salaires selon le rang depuis 1939-40 jusqu'à 1970-71.

Le Tableau B démontre que la médiane de tous les rangs professoraux de ce groupe, en 1970-71 a été de \$14,887, \$639. de plus que celle de tout le personnel compris dans le présent rapport.

Le Tableau 3 indique, selon la région, les données salariales suivantes:

En 1969-70, les traitements médians de tout le personnel (compris dans le présent rapport) des provinces de l'Ouest, de l'Ontario, du Québec et des provinces Atlantiques étaient de \$13,288, \$14,030, \$13,016 et \$11,535 respectivement. La médiane la plus élevée en 1970-71 était celle de l'Ontario (\$15,039), supérieure à celle des provinces de l'Ouest, (\$14,389). La médiane du Québec a été de \$13,802 et celle des provinces Atlantiques, de \$12,358. Si l'on compare les médianes de 1970-71 et de 1969-70 l'augmentation a été de 7.2% en Ontario, 7.1% pour les provinces Atlantiques, 8.3% pour les provinces de l'Ouest, et 6.0% au Québec.

IV. Control of Institution (Tables 4 and 12; and Chart 1)

Table 4 supplies data on salaries of teachers by control of institution and rank for 1970 - 71.

A distinct characteristic of the Canadian universities stems from the type of control which they presently have or had in the past. Many of them began under the aegis of one or another of the churches and, while increasing numbers of these churches have become non-denominational in recent years, some continue to be essentially church-related institutions. Others were created as state institutions by the provincial governments, and still others came into being as the result of the action at the local citizenry, without close ties to either church or state.

Since the first survey in 1956 - 57, medians for all staff combined, at independent and at state institutions have been higher than the medians for church-related institutions. This situation again prevailed for 1970 - 71, the median for state institutions being \$14,483 and that for independent institutions \$14,529. The median for church related institutions was \$12,260.

From 1969 - 70 to 1970 - 71, independent institutions showed the greatest increase, 8.4%. Increases for church-related and state institutions were 6.6% and 8.3%, respectively.

V. Faculty (Table 5)

There is no uniformity in the organization of universities into faculties, schools and institutes, so data grouped in this way are only relatively significant. A tabulation is presented, however, which indicates that highest salaries were paid in faculties of dentistry (median \$18,650), followed by faculties of medicine (\$18,009), agriculture (\$15,860), law (\$15,800) and engineering (\$15,354).

IV. La direction de l'institution (Tableaux 4 et 12; Graphique 1)

Le Tableau 4 indique les salaires du personnel enseignant selon la direction de l'institution et le rang pour 1970 - 71.

La direction des universités au Canada est une caractéristique particulière. Plusieurs d'entre elles se sont développées sous les bons auspices d'une institution religieuse et bien que plusieurs de ces institutions sont devenues non-confessionnelles durant les quelques dernières années, certaines universités sont demeurées essentiellement liées à l'une ou l'autre d'entre elles. Certaines universités ont été créées par les gouvernements provinciaux et d'autres ont été le résultat des efforts des localités sans attaches aucunes aux institutions religieuses ou au gouvernement.

Depuis la première enquête en 1956 - 57, les médianes de tout le personnel réuni, dans les institutions indépendantes et les institutions d'état, ont été plus élevées que celles des institutions religieuses. La situation est demeurée la même en 1970 - 71, la médiane des institutions d'état était \$14,483 et celle des institutions indépendantes \$14,529. La médiane des institutions religieuses a été de \$12,260.

De 1969 - 70 à 1970 - 71, les institutions indépendantes ont marqué la plus forte augmentation (8.4 %). L'augmentation, dans le cas des institutions religieuses et des institutions d'état, a été de 6.6 % et de 8.3 % respectivement.

V. Faculté (Tableau 5)

Vu le manque d'uniformité dans l'organisation des universités en facultés, écoles et instituts, les données ainsi groupées n'ont qu'une valeur relative. On a cependant dressé un tableau qui montre que les traitements médians les plus élevés ont été payés, suivant l'ordre décroissant, par les facultés d'art dentaire (\$18,650), de médecine (\$18,009), d'agriculture (\$15,860), de droit (\$15,800) et de génie (\$15,354).

¹ Voir renvoi 1 au Tableau 1.

² Y compris les facultés et les écoles de beaux-arts et d'arts appliqués, de sylviculture, d'hygiène et de santé publique, de journalisme, de bibliothéconomie, de philosophie, de science secrétariale, de science vétérinaire et d'études supérieures.

VI. Subject and Discipline (Tables 6, 7, 8 and 9)

Tables 6, 7, 8 and 9, present statistics on salaries by sex, subject and discipline.

In the humanities, median salaries by subject were in this order: humanities n.e.c. \$14,250; philosophy \$13,650; theology \$13,544; classical language and literature \$13,517; English \$12,658; fine arts \$12,565; music \$12,500; modern language and literature \$12,415; and French \$12,088. (See Table 6.)

In the social sciences the order was as follows: law \$15,475; education \$14,731; commerce, and business administration \$14,336; social work \$14,250; economics \$14,190; psychology \$13,482; history \$13,425; political science \$13,233; geography \$13,079; sociology and anthropology \$13,011; household science \$12,517; physical and health education \$12,425; secretarial science \$9,950. (See Table 7.)

Median salaries in the biological sciences were: dentistry \$18,250; medicine \$17,844; agriculture \$15,793; applied biological sciences n.e.c. \$15,088; zoology \$14,950; botany \$14,850; pharmacy \$14,450; biology \$14,345; physio and occupational therapy \$10,900; nursing \$10,667. (See Table 9.)

In the physical sciences, mining engineering led with a median of \$16,575; followed by chemical engineering \$16,400; civil engineering \$15,280; mechanical engineering \$15,425; geology \$15,238; physics \$14,878; chemistry \$14,688; engineering n.e.c. \$14,625; electrical engineering \$14,538; architecture \$14,310; physical science n.e.c. \$14,000; mathematics \$13,869; and computer science \$13,400. (See Table 10.)

While some of the above medians may seem too high or too low in relation to others, it should be borne in mind that they are influenced by the distribution of faculty by rank in each subject area. Some areas may have a much larger proportion of junior staff to instruct greatly increasing enrolments. Other areas, especially professional, may require a larger proportion of highly paid senior staff.

VI. Matière et discipline (Tableaux 6, 7, 8 et 9)

Les Tableaux 6, 7, 8 et 9 indiquent les salaires selon le sexe, la matière et la discipline.

Dans les humanités, les traitements médians par matière étaient les suivants: humanités (n.d.a.) \$14,250; philosophie \$13,650; théologie \$13,544; langues et littératures classiques \$13,517; anglais \$12,658; beaux-arts \$12,565; musique \$12,500; langues et littératures modernes \$12,415; français \$12,088. (Voir Tableau 6.)

Dans les sciences sociales, l'ordre était le suivant: droit \$15,475; pédagogie \$14,731; commerce et affaires \$14,336; service social \$14,250; économique \$14,190; psychologie \$13,482; histoire \$13,425; sciences politiques \$13,233; géographie \$13,079; sociologie et anthropologie \$13,011; sciences ménagères \$12,517; culture physique et hygiène \$12,425; secrétariat \$9,950. (Voir Tableau 7.)

Les traitements médians dans les sciences biologiques étaient les suivants: art dentaire \$18,250; médecine \$17,844; agriculture \$15,793; sciences biologiques appliquées (n.d.a.) \$15,088; zoologie \$14,950; botanique \$14,850; pharmacie \$14,450; biologie \$14,345; physiothérapie et ergothérapie \$10,900; soins infirmiers \$10,667. (Voir Tableau 9.)

Dans les sciences physiques, le génie minier se classe en tête avec un salaire médian de \$16,575; suivi du génie chimique \$16,400; du génie mécanique \$15,425; de la géologie \$15,238; de la physique \$14,878; de la chimie \$14,688; du génie (n.d.a.) \$14,625; du génie électrique \$14,538; de l'architecture \$14,310; des sciences physiques (n.d.a.) \$14,000; des mathématiques \$13,869 et de l'informatique \$13,400. (Voir Tableau 10.)

Certaines de ces médianes peuvent sembler trop élevées ou trop basses par rapport aux autres, mais il faut se rappeler qu'elles reflètent la répartition de la faculté selon le rang professoral dans chaque domaine. Certains domaines peuvent avoir une proportion beaucoup plus forte de professeurs de rang inférieur pour instruire un nombre toujours croissant d'étudiants. D'autres domaines, particulièrement les domaines professionnels, peuvent exiger une plus grande proportion de personnel de rang élevé mieux rémunéré.

⁷ Including town planning. — Y compris l'urbanisme.

⁸ Including agricultural engineering, architectural engineering, forest engineering, structural engineering. — Y compris le génie agricole, le génie architectural, le génie forestier, le génie des charpentes.

⁹ Including geological engineering, metallurgical engineering, petroleum engineering. — Y compris le génie géologique, le génie métallurgique, le génie pétrolier.

VII. Allowances for Religious Teachers (Table 10)

VII. Traitements des professeurs religieux (Tableau 10)

The bases on which allowances were reported for religious teachers varied widely. Some figures given were estimates of average expenses, some were amounts actually paid, some were nominal book entries. Data on 326 such teachers show that 78 of them received no allowance.

La rémunération des professeurs religieux a été déclarée selon des fondements très variés. Certains chiffres étaient des estimations des dépenses moyennes, d'autres donnaient le montant effectivement payé et d'autres étaient un poste purement comptable. Les données sur 326 professeurs indiquent que 78 d'entre eux ne recevaient pas de rémunération.

EDUCATIONAL QUALIFICATIONS

QUALIFICATIONS ACADÉMIQUES

I. Salary

1. Years Since Award of First Degree
 - (a) Sex and Field
 - (b) Region
 - (c) Control
 - (d) Size of Institution
2. Highest Earned University Degree
3. Years Since Award of Highest Earned Degree

II. Rank, Field and Region

1. Highest Earned University Degree by Rank and Region
2. Years Since Award of First Degree by Rank and Field
3. Summary Distribution of University Teachers by Degrees, Rank, Sex and Field

This section on educational qualifications of teachers is broken down as follows:

I. Salary

1. Years Since Award of First Degree
2. Highest Earned University Degree
3. Years Since Award of Highest Earned Degree

II. Rank, Field and Region

1. Highest Earned University Degree
2. Years Since Award of First Degree by Rank and Field
3. Summary Distribution of University Teachers by Degrees, Rank, Sex and Field

I. Salary

1. Years Since Award of First Degree

As a substitute for a measure of teaching experience, universities and colleges were asked to report for each teacher the year in which he obtained his first university degree — from which was calculated the number of years since that award. The median salary of those less than five years away from the first degree was \$9,700. The greater the number of years since that award, the greater the median salary (in the 40 - 44 years group the median salary was \$20,733).

I. Salaire

1. Années depuis l'obtention du premier grade
 - (a) Sexe et domaine
 - (b) Région
 - (c) Direction
 - (d) Taille de l'institution
2. Plus haut grade universitaire
3. Années depuis l'obtention du plus haut grade universitaire

II. Rang, domaine et région

1. Plus haut grade universitaire acquis
2. Années depuis l'obtention du plus haut grade universitaire selon le rang et le domaine
3. Résumé de la distribution des professeurs selon les grades, le rang, le sexe et le domaine

Cette section traite des qualifications académiques des professeurs. En voici les sous-sections:

I. Salaire

1. Années depuis l'obtention du premier grade
2. Plus haut grade acquis
3. Années depuis l'obtention du plus haut grade

II. Rang, domaine et région

1. Années depuis l'obtention du premier grade selon le rang et le domaine
2. Plus haut grade acquis selon le rang et la région
3. Résumé de la répartition des professeurs selon les grades universitaires, le rang, le sexe et le domaine

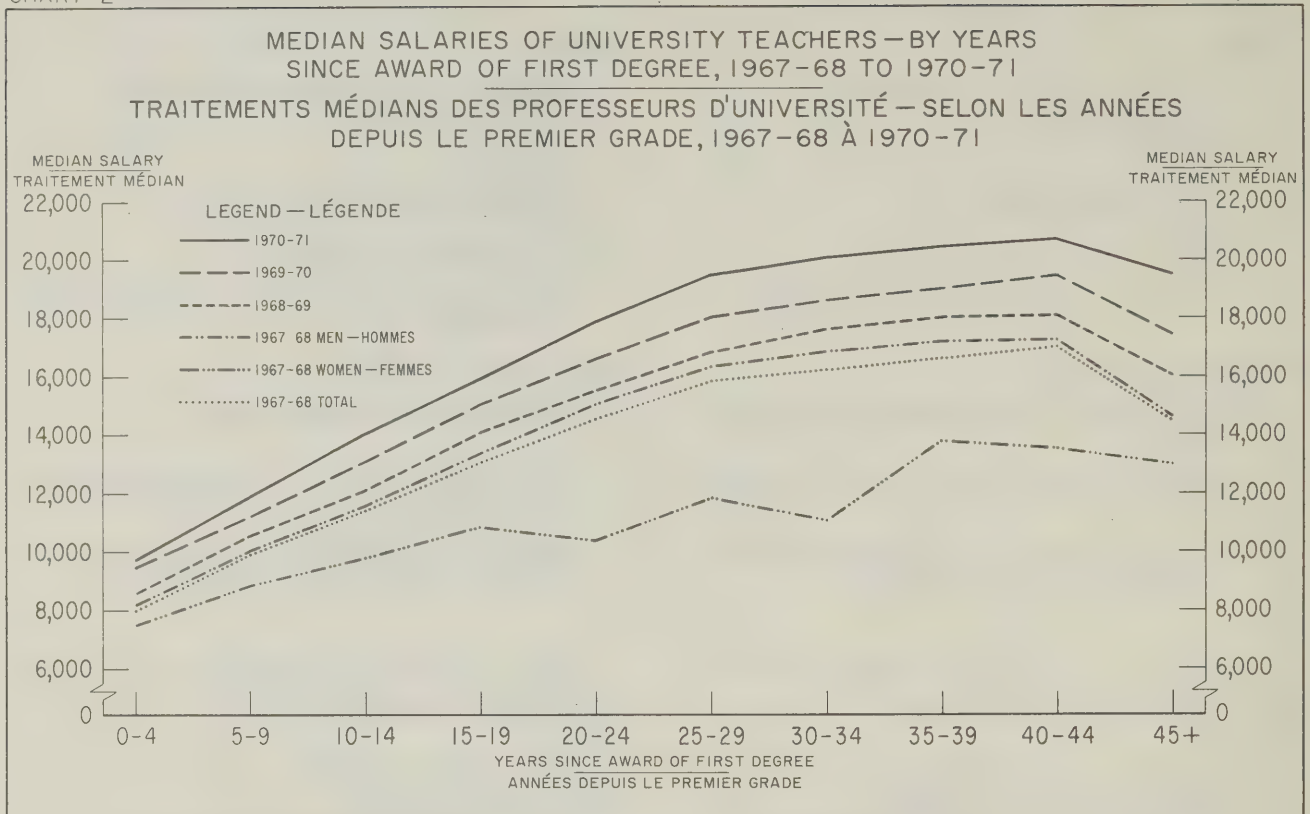

I. Salaire

1. Années depuis l'obtention du premier grade

A titre d'indice des années d'enseignement, les universités et collèges devaient déclarer l'année d'obtention du premier grade universitaire de chaque professeur, ce qui a permis de calculer le nombre d'années depuis ce premier grade. Le traitement médian de ceux qui comp- taient moins de 5 ans depuis le premier grade était de \$9,700. Plus le nombre d'années depuis l'obtention du premier grade augmentait plus le traitement médian augmentait, jusqu'au groupe de 40 - 44 ans (\$20,733).

CHART-2

GRAPHIQUE-2

(a) Sex and Field (Table 11; Chart 2)

For men only, the highest median in 1970-71 was for those 40-44 years beyond the first degree (\$21,267). The highest median for women was for the 40-44 year group, being \$16,900.

For those engaged primarily in faculty administration the median salaries ranged from \$12,700 for those 5-9 years beyond that date to \$26,900 for those 25-29 years beyond. In the humanities, median salaries ranged from \$9,367 for those less than 5 years beyond the first degree to \$19,100 for those 40-44 years beyond. Comparable figures for the social sciences were \$10,085 and \$20,083 (40-44 years); for the biological sciences \$9,117 and \$21,925 (30-34 years); and for the physical sciences \$10,275 and \$21,300 (40-44 years). Medians for women were in all cases lower than those for men.

(a) Sexe et domaine (Tableau 11; Graphique 2)

Chez les hommes, la médiane la plus élevée en 1970-71 était celle du groupe de 40-44 ans depuis le premier grade (\$21,267). Chez les femmes, c'était celle aussi du groupe de 40-44 ans (\$16,900).

Pour les administrateurs de facultés les traitements médians variaient de \$12,700 pour ceux de 5-9 ans à \$26,900 pour le groupe de 25-29 ans. Dans les humanités, ils variaient de \$9,367 pour le groupe de moins de 5 ans depuis le premier grade à \$19,100 pour ceux de 40-44 ans. Voici les chiffres comparables des autres facultés: sciences sociales, \$10,085 et \$20,083 (40-44 ans); sciences biologiques, \$9,117 et \$21,925 (30-34 ans); et sciences physiques, \$10,275 et \$21,300 (40-44 ans). Dans tous les cas, les médianes des femmes étaient inférieures à celles des hommes.

¹ See footnote 1, Table 1. - Voir renvoi 1 au Tableau 1.

(b) Region (Table 12)

In the Atlantic Provinces the median salary for those less than 5 years beyond the first degree was \$9,095 and the highest median, \$18,525 was for those 40-44 years beyond that award. In Quebec the range was from \$9,800 to \$20,875 (in the 40-44 years group); in Ontario \$10,532 to \$22,550 (45 and over group); and the Western Provinces \$9,650 to \$20,533 (in the 30-34 years group).

(b) Région (Tableau 12)

Dans les provinces Atlantiques, les traitements médians des professeurs de moins de 5 ans depuis le premier grade étaient de \$9,095 et la plus haute médiane, de \$18,525 pour ceux de 40-44 ans depuis ce grade. Au Québec, l'écart était de \$9,800 à \$20,875 (pour le groupe de 40-44 ans); en Ontario, il était de \$10,532 à \$22,550 (45 ans et plus; et dans les provinces de l'Ouest, de \$9,650 à \$20,533 (30-34 ans).

¹ See footnote 1, Table 1. — Voir renvoi 1 au Tableau 1.

(c) Control (Table 13)

In institutions under state (provincial or federal) control median salaries ranged from \$9,856 for teachers less than 5 years beyond the first degree to \$20,900 (35 - 39 years beyond). For church-related institutions the range was from \$8,879 to \$19,750 (40 - 44 years beyond), and for independent institutions it was from \$10,226 to \$21,250 (40 - 44 years beyond).

(c) La direction de l'institution (Tableau 13)

Dans les institutions provinciales ou fédérales, le traitement médian variait de \$9,856 pour les professeurs de moins de 5 ans depuis le premier grade à \$20,900 (35 - 39 ans). Dans les institutions religieuses, l'écart allait de \$8,879 à \$19,750 (40 - 44 ans) et dans les institutions indépendantes, de \$10,226 à \$21,250 (40 - 44 ans).

¹ See footnote 1, Table 1. — Voir renvoi 1 au Tableau 1.

(d) Size of Institution (Table 14)

Comparison by size of institution reveals that in universities with enrolment over 10,000 the range of median salaries was from \$10,021 for those less than 5 years beyond the first degree to \$21,267 for those 40 - 44 years beyond. The range for institutions with 5,000 - 9,999 students was from \$10,003 to \$20,600 (30 - 34 years group); for those with 2,000 - 4,999 students, \$9,350 to \$19,750 (40 - 44 years group); for those with 1,000 - 1,999 students, \$9,579 to \$19,750 (35 - 39 years group); for those with 500 - 999 students, \$10,522 to \$21,450, (30 - 34 years group) and under 500 students \$8,675 to \$18,250 (30 - 34 years group).

(d) La taille de l'institution (Tableau 14)

La comparaison selon l'importance de l'institution révèle que, dans celles où sont inscrits 10,000 étudiants et plus, l'écart du traitement médian allait de \$10,021 pour les professeurs qui avaient obtenu leur premier grade il y a moins de cinq ans à \$21,267 pour ceux qui avaient obtenu leur premier grade il y a 40 - 44 ans. Dans les institutions de 5,000 à 9,999 étudiants l'écart était de \$10,003 à \$20,600 (30 - 34 ans); dans celles de 2,000 à 4,999 étudiants, \$9,350 à \$19,750 (40 - 44 ans); dans celles de 1,000 à 1,999 étudiants \$9,579 à \$19,750 (35 - 39 ans); dans celles de 500 à 999 étudiants \$10,522 à \$21,450 (30 - 34 ans) et dans celles de moins de 500 étudiants \$8,675 à \$18,250 (30 - 34 ans).

¹ See footnote 1 Table 1. Voir renvoi 1 au Tableau 1.

2. Highest Earned University Degree (Tables 15 and 16)

Of the 24,286 full-time university teachers included in Table 15, 340 did not report their field. These teachers have been included in the section involving all fields but have been set apart in the calculations relating to distinct fields and have been grouped in a section called "field not reported".

The median salary of teachers with a Ph.D. or equivalent degree (\$15,535) was less than the median for those with a first professional degree beyond the first baccalaureate (e.g. usually such degrees as M.D., D.D.S., D.V.M., B.L.S., B.Ed. B.S.W.) — \$17,169. However it was higher than for those with a master's degree (\$12,428) and a first baccalaureate (\$12,006).

The median salary for men with a Ph.D. degree was \$15,698 and that for women \$13,829. For those with a master's degree the medians were \$12,682 for men and \$11,476 for women. Medians were higher for men than for women in each of the other degree groups.

3. Years Since Award of Highest Earned Degree (Table 17 and Chart 3)

Another form of salary comparison among professions is to relate salaries to the number of years that have elapsed since the award of the highest earned university degree. For those with a doctorate, the range was from \$13,095 for the 0-4 years group; to \$22,900 for those 30-34 years beyond the Ph.D. or equivalent degree. Ranges for other degrees were: masters — \$11,016 (0-4) to \$20,150 (35-39); first professional degree beyond the first baccalaureate — \$11,175 (0-4) to \$25,650 (30-34); and first baccalaureate — \$9,115 (0-4) to \$18,000 (40-44).

2. Le plus haut grade universitaire (Tableaux 15 et 16)

Parmi les 24,286 professeurs à plein temps inclus au Tableau 15, 340 n'ont pas déclaré leur domaine. Ces professeurs ont été inclus dans la section du tableau traitant de tous les domaines mais ont été exclus des calculs relatifs aux domaines particuliers et ont été groupés dans la section intitulée "domaine non déclaré".

Le traitement médian des professeurs qui détenaient un Ph.D. ou un grade équivalent (\$15,535) était inférieur à celui des professeurs qui détenaient un premier grade professionnel supérieur au premier baccalauréat (D.M., D.D.S., D.V.M., B.Biblio., B.Ped., B.S.S.) (\$17,169). Le premier dépassait celui des professeurs détenant une maîtrise (\$12,428) et un premier baccalauréat (\$12,006).

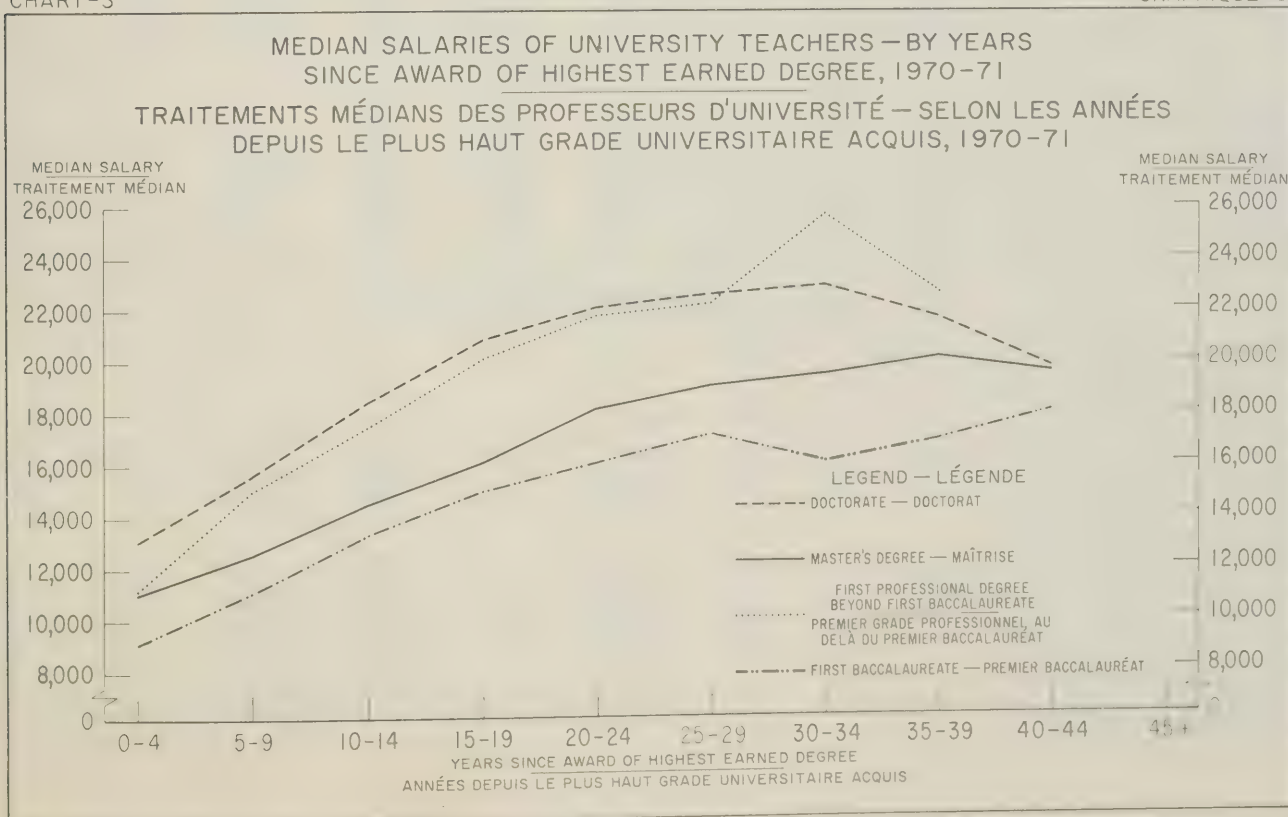

Le traitement médian des professeurs détenant un Ph.D. a été de \$15,698 chez les hommes et de \$13,829 chez les femmes. Pour ceux qui avaient une maîtrise, les médianes ont été de \$12,682 et de \$11,476. Les médianes pour les hommes étaient plus élevées que celles des femmes dans chacun des autres groupes de grade.

3. Années depuis l'obtention du plus haut grade universitaire (Tableau 17 et Graphique 3)

Une autre façon de comparer les traitements parmi les professions est de relier les traitements au nombre d'années écoulées depuis l'obtention du plus haut grade universitaire. Pour ceux qui avaient un doctorat, l'écart allait de \$13,095 pour le groupe de 0-4 ans à \$22,900 pour celui des 30-34 ans après l'obtention du doctorat ou d'un grade équivalent. Voici les écarts des autres grades: maîtrise, \$11,016 (0-4) à \$20,150 (35-39); premier grade professionnel après le premier baccalauréat, \$11,175 (0-4) à \$25,650 (30-34) et premier baccalauréat, \$9,115 (0-4) à \$18,000 (40-44).

II. Rank, Field and Region (Tables 18 and 19, Chart 4)

1. Highest Earned University Degree by Rank and Region (Table 18)

Of the total of 24,612 persons included in this survey for whom information on degrees was reported, 51.2% had a doctorate (50.2% in 1969 - 70). The percentages of doctorates held by all staff ranged from 56.6% in Ontario and 53.7% in the Western Provinces to 44.7% in Quebec and 38.6% in the Atlantic Provinces.

About 39% of the staff reported with doctorates (38.9%) or master's degrees (39.9%) earned them in the five-year period from 1966 to 1970. Although the majority of these persons were new additions to the teaching staff during the five years, others included in this group were older teachers who completed advanced degree requirements either while on leave or in addition to their teaching duties.

2. Years Since Award of First Degree by Rank and Field (Table 19)

As in Table 15, 340 teachers did not report their field, and were thus grouped separately.

For the 24,612 teachers in all 104 institutions the median passage of time since award of the first degree was 13 years, 10 months. For deans (1969 - 70 medians in parenthesis) it was 26 years, 4 months (26); for professors, 24 years, 1 month (23); associate professors, 16 years, 10 months (15); assistant professors and lecturers, 10 years, 4 months (9); ungraded professors, 11 years, 1 month (12); lecturers and instructors, 7 years, 1 month (6).

Comparison by field shows that, on the average, those engaged in faculty administration had obtained the first university degree 25 years earlier, in the humanities the median was 14 years, in the social sciences, 12 years, 3 months, in the biological sciences, 16 years, 2 months, and in the physical sciences, 13 years, 9 months.

II. Le rang, le domaine et la région (Tableaux 18 et 19; Graphique 4)

1. Plus haut grade universitaire acquis selon le rang et la région (Tableau 18)

Sur les 24,612 professeurs observés, 51.2 % avaient un doctorat (50.2 % en 1969 - 70). Les pourcentages de doctorats détenus par tout le personnel variaient de 56.6 en Ontario et 53.7 dans les provinces de l'Ouest à 44.7 au Québec et 38.6 dans les provinces Atlantiques.

Environ 39 % du personnel ayant un doctorat (38.9 %) ou une maîtrise (39.9 %) les ont obtenus dans une période de cinq ans, soit de 1966 - 70. Bien que la majorité d'entre eux fussent de nouvelles recrues à l'enseignement durant les cinq années, les autres comprenaient des professeurs plus âgés qui ont répondu aux exigences en vue d'un grade supérieur soit à la faveur d'un congé ou pendant qu'ils enseignaient.

2. Années depuis l'obtention du premier grade selon le rang et le domaine. (Tableau 19)

Ainsi qu'au Tableau 15, 340 professeurs n'ont pas déclaré leur domaine et ont été groupés séparément.

Pour les 24,612 professeurs des 104 institutions, le nombre médian d'années depuis le premier grade était de 13 ans, 10 mois pour les doyens, (la médiane pour 1969 - 70 entre parenthèses) il était de 26 ans, 4 mois (26) pour les professeurs titulaires, 24 ans, 1 mois (23) pour les professeurs agrégés, 16 ans, 10 mois (15) pour les professeurs adjoints, 10 ans, 4 mois (9) pour les professeurs non classés, 11 ans, 1 mois (12) et pour les chargés de cours, 7 ans, 1 mois (6).

La comparaison par domaine indique que, en moyenne, les administrateurs de faculté avaient obtenu leur premier grade universitaire 25 ans auparavant. Dans les humanités la médiane était de 14, dans les sciences sociales, 12-3, dans les sciences biologiques, 16-2, et dans les sciences physiques, 13-9.

PERCENTAGE DISTRIBUTION OF UNIVERSITY TEACHERS
BY HIGHEST EARNED DEGREE, 1970-71
RÉPARTITION PROCENTUELLE DES PROFESSEURS D'UNIVERSITÉ
SUIVANT LE PLUS HAUT GRADE UNIVERSITAIRE ACQUIS, 1970-71

ALL RANKS—TOUS RANGS

EXCLUDES STAFF FOR WHOM NO INFORMATION WAS REPORTED. — SANS LE PERSONNEL AU SUJET DUQUEL IL N'Y PAS EU DE RAPPORT.

3. Summary Distribution of University Teachers by Degrees, Rank, Sex and Field

Degree — By highest earned university degree, 24,612 teachers were distributed as follows: doctorate 51.2%, master's degree 40.0%, first professional degree beyond the first baccalaureate 6.4%, baccalaureate 8.5% and no university degree 0.9%. In 1969 - 70 the percentages were 50.3, 33.2, 6.0, 9.4, and 1.1. (See Table 19 and Chart 4.)

Rank — Of the 24,612 teachers (excluding deans and ungraded professors) reported in the four main teaching categories, 18.2% were "full" professors, 26.3% associate professors, 36.5% assistant professors, and 15.7% instructors and lecturers. The percentages in 1969 - 70 were 18.6, 26.8, 38.0 and 16.6. (See Table 1.)

Sex — Of the total of 24,286 full-time teachers, reported in 1970 - 71 and paid on a lay scale, men numbered 21,177 (87.2%) and women 3,109 (12.8%). In 1969 - 70 the percentages were 86.9 and 13.1.

Of the men, 1.5%, were deans; of the women, 0.5%. The proportions in the other ranks were: professor, 19.9% of the men and 4.8% of the women; associate professor, 27.9% and 16.6%; assistant professor, 36.4% and 39.8%; ungraded professor 1.8% and 1.9%; and lecturer or instructor, 12.5% and 36.4%. (See Tables 1 and 10 and Chart A.)

The proportions of the 21,177 men and the 3,109 women paid on a basis applicable to lay personnel, holding the various university degrees was as follows: doctorate 54.8% of the men and 28.0% of the women; master's degree, 30.8% and 46.5%; first professional degree beyond the first baccalaureate, 6.5% and 5.7%; first baccalaureate, 7.2% and 17.3%; no university degree 0.7% and 2.5%. (See Table 15.)

Field — Division of the 24,612 teachers by field was as follows for 1970 - 71 (1969 - 70 percentages shown in parenthesis): faculty administration 1.9% (1.9%); humanities 22.9% (23.2%); social sciences 33.1% (32.9%); biological sciences 18.5% (18.4%) and physical sciences 22.2% (24.0%). Those not reporting their field accounted for 1.4%. (See Table 20.)

3. Résumé de la répartition des professeurs selon les grades universitaires, le rang, le sexe et le domaine

Grade — Voici la répartition procentuelle de 24,612 professeurs selon le plus haut grade universitaire: doctorat, 51.2, maîtrise, 40.0, premier grade professionnel au-delà du premier baccalauréat, 6.4, baccalauréat, 8.5 et aucun grade universitaire, 0.9. En 1969 - 70 les pourcentages étaient 50.3, 33.2, 6.0, 9.4 et 1.1. (Voir Tableau 19 et Graphique 4.)

Rang professoral — Sur les 24,612 professeurs (à l'exclusion des doyens et des professeurs non classés) déclarés dans les quatre rangs principaux, 18.2 % étaient titulaires, 26.3 % agrégés, 36.5 % adjoints et 15.7 % chargés de cours. Les pourcentages en 1969 - 70 étaient de 18.6, 26.8, 38.0 et 16.6. (Voir Tableau 1.)

Sexe — Les 24,286 professeurs à plein temps déclarés en 1970 - 71 comprenaient 21,177 (87.2 %) hommes et 3,109 (12.8 %) femmes. En 1969 - 70, les pourcentages étaient 86.9 et 13.1.

Chez les hommes, 1.5 % étaient doyens, et chez les femmes, 0.5 %. Les proportions des autres rangs étaient les suivantes: professeurs titulaires, 19.9 % des hommes et 4.8 % des femmes; professeurs agrégés, 27.9 et 16.6 %; professeurs adjoints, 36.4 et 39.8 %; professeurs non classés, 1.8 et 1.9 % et chargés de cours, 12.5 et 36.4 %. (Voir Tableaux 1 et 10 et Graphique A.)

Voici les pourcentages des 21,177 hommes et 3,109 femmes rémunérés à l'échelle laïque, selon les divers grades universitaires: doctorat, 54.8 % des hommes et 28.0 % des femmes; maîtrise, 30.8 et 46.5 %; premier grade professionnel au delà du premier baccalauréat, 6.5 et 5.7 %; premier baccalauréat, 7.2 et 17.3 %; aucun grade universitaire, 0.7 et 2.5 %. (Voir Tableau 15.)

Domaine — Voici la répartition procentuelle des 24,612 professeurs en 1970 - 71 selon le domaine: administration de faculté, 1.9 (1.9) en 1969 - 70; humanités, 22.9 (23.2); sciences sociales, 33.1 (32.9); sciences biologiques, 18.5 (18.0); et sciences physiques, 22.2 (24.0). 1.4 % des professeurs n'ont pas déclaré leur domaine. (Voir Tableau 20.)

AGE

- I. General
 II. Field
 III. Subject and Field
 IV. Highest Earned University Degree

I. General

The median age for staff in various categories has not changed appreciably since the survey for 1956 - 57. The fact that the median has not gone up, as would normally be the case if there were few additions to staff, implies that a large number of young teachers are being added to the staff complement. This is borne out by an examination of data for recent years.

The median age of the 24,612 lay and religious teachers in the 104 universities and colleges reporting was 37 years, 7 months. Of those for whom data on age were given, 1.2% were under 25 (1.3% in 1969 - 70) and 6.9% were at age 65 or over (1.0% in 1969 - 70). Those 55 years and over, most of whom might be expected to retire within 10 years, equalled 4.6% (8.1% in 1969 - 70.)

II. Field

The same procedure was used in this table as for Tables 15 and 19, the 340 teachers not reporting their field were grouped separately.

Those engaged in faculty administration (almost all of them deans) had a median age of 49 years, 7 months; in the humanities 37 years, 10 months; in the social sciences, 36 years, 2 months; in the biological sciences, 39 years, 9 months; and in the physical sciences, 36 years, 7 months.

ÂGE

- I. Généralités
 II. Domaine
 III. Matière et domaine
 IV. Le plus haut grade universitaire

I. Généralités

L'âge médian du personnel des diverses catégories n'a guère changé depuis le rapport de 1956 - 57. La médiane n'ayant pas monté, comme il serait normal si peu de professeurs s'ajoutaient au personnel, il s'ensuit que le professorat s'enrichit d'un grand nombre de jeunes professeurs. C'est ce que révèle l'examen des données des récentes années.

L'âge médian des 24,612 professeurs laïcs et religieux des 104 universités et collèges déclarants était de 37 ans et 7 mois. Parmi ceux dont les données sur l'âge sont connues, 1.2 % avaient moins de 25 ans (1.3 % en 1969 - 70) et 0.9 % avaient 65 ans et plus (1.0 % en 1969 - 70). Ceux de 55 ans et plus, dont la plupart prendront sans doute leur retraite d'ici 10 ans, représentaient 4.6 % (8.1 % en 1969 - 70).

II. Domaine

La même méthode a été utilisée pour ce tableau que pour les Tableaux 15 et 19, les 340 professeurs n'ayant pas déclaré leur domaine ont été groupés séparément.

L'âge médian des administrateurs de facultés (la plupart des doyens) était de 49 ans, 7 mois; dans les humanités, de 37 ans, 10 mois; dans les sciences sociales, de 36 ans, 2 mois; dans les sciences biologiques, de 39 ans, 9 mois et dans les sciences physiques, de 36 ans, 7 mois.

TABLE 20. Age of University Teachers, by Rank, Field and Size of Institution, 1970 - 71^{1,2}TABLEAU 20. Âge des professeurs d'université, selon le rang, le domaine et l'importance de l'institution, 1970 - 71^{1,2}

⁸ Excludes staff for whom no information was reported. - Sans le personnel au sujet duquel il n'y a pas eu de rapport.

III. Subject and Field (Tables 21 - 24)

In the humanities, the median age varied from 36 years, 11 months in philosophy and English to 41 years, 4 months in theology.

In the social sciences, the lowest median age was held by academic staff in physical education at 33 years, while the highest was held by academic staff in the secretarial sciences at 42 years, 3 months.

The lowest median age in the biological sciences was in biology at 37 years, 8 months, while the highest was 42 years in agriculture and medicine.

The lowest median age in the physical sciences as well as in all the other fields was in computer science at 32 years, 1 month. Mining engineering at 40 years, 4 months, was the highest median in this group.

III. Matière et domaine (Tableaux 21 - 24)

Dans le domaine des humanités, l'âge médian varie entre 36 ans, 11 mois pour les professeurs de philosophie et d'anglais, et 41 ans, 4 mois pour les professeurs de théologie.

Dans les sciences sociales, l'âge médian détenu par les professeurs d'éducation physique est de 33 ans tandis que les professeurs du secrétariat détiennent un âge médian de 42 ans, 3 mois.

Dans les sciences biologiques, c'est en biologie que se trouve l'âge médian le moins élevé soit 37 ans, 8 mois tandis que l'âge médian le plus élevé se trouve en agriculture et en médecine soit 42 ans.

Les professeurs d'informatique détiennent l'âge médian le moins élevé non seulement dans les sciences physiques mais aussi dans tous les domaines soit 32 ans, 1 mois. C'est en génie minier que se trouve l'âge médian le plus élevé dans les sciences physiques soit 40 ans, 4 mois.

IV. Highest Earned University Degree (Table 25)

The median age of teachers with a doctorate was 38 years, 6 months, a master's degree, 35 years, 8 months, a first professional degree beyond a first baccalaureate, 39 years, 5 months; a first baccalaureate, 36 years, 3 months, and no university degree, 42 years, 1 month.

IV. Le plus haut grade universitaire (Tableau 25)

L'âge moyen des professeurs détenant un doctorat était de 38 ans, 6 mois; une maîtrise, 35 ans, 8 mois; un premier grade professionnel au-delà du premier baccalauréat, 39 ans, 5 mois; un premier baccalauréat, 36 ans, 3 mois; et aucun grade universitaire, 42 ans, 1 mois.

CITIZENSHIP

- I. Citizenship by Major Field of Specialization, 1969 - 70 and 1970 - 71.
- II. Citizenship of Full-time Teaching Staff Appointed in 1970.

I. Citizenship by Major Field of Specialization, 1969 - 70 and 1970 - 71 (Tables 26 - 28; Chart 5)

Information on the citizenship of full-time academic staff of universities was collected for the first time, in the survey for the academic year 1969 - 70. Since this was the first time this data item was requested, many universities did not have the information readily available and Statistics Canada could not delay the publication of the rest of the survey to allow additional time for universities to provide this data. Consequently, the rate of response was low, accounting for less than 60% of the full-time teaching staff and not 80% as stated in the publication *Salaries and Qualifications of Teachers in Universities and Colleges, 1969 - 70*.

Additional information has necessitated a revision of the estimated distribution of citizenship of full-time teaching staff of Canadian universities in 1969 - 70 and a more accurate table, Table 26, has been prepared for that academic year.

Because of the low response for 1969 - 70, data from the 1970 - 71 survey was used only for those institutions that had not reported citizenship in the 1969 - 70 survey but did include it in the 1970 - 71 survey. Although this extrapolation permits a more accurate approximation of the citizenship distribution of teaching staff for 1969 - 70, care should be taken in establishing comparisons between 1969 - 70 and 1970 - 71. The estimation was done in the following manner: the citizenship distribution of the teaching staff appointed prior to 1970 and recorded in the 1970 - 71 reports was inserted as the citizenship distribution of the academic staff that would have been reported in the 1969 - 70 survey.

Six universities across Canada did not report citizenship of academic staff either year. The citizenship of their staff was estimated for 1969 - 70 on the basis of the distribution of citizenship of all other universities.

Table 26 contains data classified according to major field of specialization (i.e., humanities, languages, social sciences, biological sciences, pure sciences, and physical sciences). Each field in turn represents an aggregate of the principal subjects taught, (see classifi-

CITOYENNETÉ

- I. Citoyenneté selon le domaine d'étude, 1969 - 70 et 1970 - 71.
- II. Citoyenneté du personnel enseignant à plein temps nommé en 1970.

I. Citoyenneté selon le domaine d'étude, 1969 - 70 et 1970 - 71 (Tableaux 26 - 28; Graphique 5)

Nous avons recueilli pour la première fois des données relatives à la citoyenneté du corps enseignant à plein temps des universités et collèges du Canada à l'occasion de l'enquête couvrant l'année universitaire 1969 - 70. Puisqu'il s'agissait de données nouvelles, plusieurs universités n'avaient pas les renseignements sous la main. Statistique Canada ne pouvait toutefois pas retarder plus longtemps la publication de son enquête afin de permettre aux institutions de fournir ces données. En conséquence, le taux de réponses fut faible, représentant moins de 60 % du corps enseignant à plein temps contrairement au 80 % mentionné dans la publication *Traitements et qualification des professeurs des universités et collèges 1969 - 70*.

Des renseignements additionnels nous ont obligés à reviser notre estimation sur la distribution du corps enseignant à plein temps selon la citoyenneté en 1969 - 70 et un tableau plus précis, Tableau 26, a été préparé pour cette année universitaire.

Nous avons compensé la faiblesse de la réponse pour l'année 1969 - 70 en nous servant de données recueillies en 1970 - 71 mais uniquement dans le cas des institutions qui n'avaient pas fourni la citoyenneté en 1969 - 70 et qui l'ont indiqué dans l'enquête 1970 - 71. Bien que cette extrapolation permette une meilleure approximation de la distribution du corps enseignant selon la citoyenneté en 1969 - 70, il faut prendre soin d'établir trop facilement des comparaisons entre 1969 - 70 et 1970 - 71. L'estimation fut calculée de la façon suivante: la distribution selon la citoyenneté du corps enseignant à plein temps engagé avant 1970, fournie dans l'enquête 1970 - 71, fut introduite comme la distribution selon la citoyenneté du corps enseignant qui aurait dû paraître dans l'enquête 1969 - 70.

Six universités à travers le Canada n'ont pas fourni la citoyenneté de leur corps enseignant dans l'une ou l'autre enquête. La citoyenneté de leur corps enseignant en 1969 - 70 fut répartie selon la distribution procentuelle de la citoyenneté du corps enseignant dans toutes les autres universités.

Les données du Tableau 26 ont été réparties selon les principaux domaines d'études (ex., humanités, langues, sciences humaines, sciences biologiques, sciences pures et sciences physiques). Chaque domaine d'études regroupe différentes disciplines enseignées (voir le classement des

cation of subjects according to field, on page 95). All estimates have been calculated at the level of the individual subjects within the field of specialization.

This revised table shows that 62.6% of the reported 21,840 members of teaching staff held Canadian citizenship in September 1969. This varied between areas of specialization from a high of 71.7% in the field of biological sciences to a low of 51.6% in the field of languages. Faculty administrative staff of the reported institutions who were Canadian citizens, comprised 87.6%. Holders of American and British citizenship account for most of the remainder of non-Canadian members of the teaching staff (14.1% and 10.3% respectively).

Table 27, on citizenship of full-time teaching staff in Canadian universities 1970 - 71, was prepared on the basis of information reported in the fall of 1970 by degree-granting institutions of higher education in Canada, including affiliated and associated colleges. Of the 24,612 full-time teaching staff of the 104 institutions included in the survey, 20,679 (84.2 %) reported their current citizenship status.

Citizenship was estimated for an additional 2,534 members of the teaching staff who did not report their citizenship, but who did report the country where they obtained their first degree. These estimates are based on proportions, citizenship to country of first degree, calculated for those who had reported citizenship.

As in Table 26, the data in Table 27 are classified by major field of specialization.

Table 27 shows that of the 24,612 reported teaching staff, 1,390 did not report either citizenship or country of first degree. Therefore, of a total of 23,222 members of the teaching staff on which calculations were based 61.8% held Canadian citizenship in the fall of 1970, the United States and United Kingdom's citizens accounting for 15.2% and 10.2% of the remaining members of the teaching staff, respectively.

As in 1969 - 70, the highest proportion of the 1970 - 71 teaching staff with Canadian citizenship is to be found in the field of the biological sciences (70.8%) and the lowest (50.5%) in the field of languages.

In the field of biological sciences, out of 1,794 teaching staff reported in medicine, 68.2% hold Canadian citizenship. In other health sciences, i.e., dentistry, pharmacy and nursing, the Canadian citizen-

disciplines selon le domaine d'études, à la page 95). La distribution a été calculée par discipline spécifique pour ensuite être regroupée par domaine d'études.

Ce tableau révisé indique que 62.6 % des 21,840 membres du corps enseignant des universités et collèges du Canada détenaient la citoyenneté canadienne en septembre 1969. La distribution de la citoyenneté varie selon le domaine d'études, de 71.7 % dans le domaine des sciences biologiques à 51.6 % dans le domaine des langues. La citoyenneté des membres du corps enseignant exerçant des fonctions administratives se chiffre à 87.6 %. La majorité des membres du corps enseignant qui ne sont pas citoyens canadiens sont soit citoyens des États-Unis (14.1 %), soit citoyens du Royaume-Uni (10.3 %).

Le Tableau 27 présentant la citoyenneté du personnel enseignant à plein temps des universités du Canada 1970 - 71 fut préparé à partir de renseignements cueillis pendant l'automne 1970 auprès des institutions d'enseignement supérieur du Canada, y compris les collèges associés et les collèges affiliés. Parmi les 24,612 membres du corps enseignant à plein temps dans les 104 institutions sur lesquelles portait l'enquête, 20,679 (soit 84.0 %), ont indiqué leur citoyenneté.

La citoyenneté des 2,534 membres du corps enseignant qui n'ont pas indiqué leur citoyenneté mais qui ont déclaré le pays d'obtention du premier grade fut estimée de la façon suivante. Nous avons supposé que la proportion, citoyenneté à pays d'obtention du premier grade, calculée pour ceux qui ont fourni la citoyenneté demeure constante et peut être étendue dans les cas où nous avons le pays d'obtention du premier grade sans avoir la citoyenneté.

Comme dans le Tableau 26, les données présentées dans le tableau 27 sont classées selon le domaine d'études principal.

Le Tableau 27 démontre que, parmi les 24,612 membres du corps enseignant, 1,390 ne déclarèrent ni leur citoyenneté ni le pays de l'obtention du premier grade. Donc, d'un total de 23,222 membres du corps enseignant sur lesquels se fondent nos calculs, 61.8 % détiennent la citoyenneté canadienne à l'automne 1970. Les citoyens des États-Unis représentent 15.2 % et les citoyens du Royaume-Uni, 10.2 % du corps enseignant des universités du Canada.

Ainsi qu'en 1969 - 70, l'enquête 1970 - 71 démontre que le plus haut pourcentage des membres du corps enseignant détenant la citoyenneté canadienne se trouve dans le domaine des sciences biologiques (70.8 %) et le plus faible (50.5 %) dans le domaine des langues.

Dans le domaine des sciences biologiques, parmi les 1,794 membres du corps enseignant en médecine, 68.2 % sont citoyens canadiens. Dans les autres sciences de la santé, art dentaire, pharmacie et sciences infirmières, le

ship remains above the 70.8% average reaching as high as 84.1% in nursing. Agriculture also stands high with 78.1% teaching staff declaring Canadian citizenship, out of 523 teaching staff reported.

While English represents about 40.3% (1,365) of the reported teaching staff in the field of languages, Canadian citizenship stands at 53.9%, with the United Kingdom at 14.8% and the United States at 26.3%.

Among the 731 professors in French language and literature, 53.7% are citizens of Canada, 23.0% of France and 10.0% of the United Kingdom.

In the field of social sciences, out of the 1,694 members of the teaching staff reported in education (comprising 20.7% of the field of social sciences) 71.2% hold Canadian citizenship. In sociology and anthropology (comprising only 9.3% of the field of social sciences) 41.3% of the teaching staff hold Canadian citizenship, while United States citizens account for 37.0%, the highest percentage of American citizenship reported in any subject.

Mathematics (32.9% of the teaching staff reported under pure sciences) may also be singled out with 52.9% of the teaching staff holding Canadian citizenship with the United Kingdom at 9.5% and the United States at 13.7%.

pourcentage de citoyens canadiens demeure au-dessus de la moyenne (70.8 %) et s'élève jusqu'à 84.1 % dans le cas des sciences infirmières. Parmi les 523 membres du corps enseignant les sciences agricoles, 78.1 % détiennent la citoyenneté canadienne.

La discipline de langue et littérature anglaises regroupe 40.3 % du corps enseignant dans le domaine des langues, soit 1,365 professeurs. La distribution du corps enseignant selon la citoyenneté se répartit en 53.9 % citoyens du Canada, 14.8 % du Royaume Uni et 26.3 % des États-Unis.

Parmi les 731 professeurs de langue et littérature françaises, 53.7 % sont citoyens du Canada, 23.0 % de la France et 10.0 % du Royaume-Uni.

Dans le domaine des sciences humaines, le nombre le plus élevé de membres du corps enseignant se trouve dans la discipline de l'éducation, soit 1,694 (représentant 20.7 % du domaine des sciences humaines). Dans cette discipline 71.2 % détiennent la citoyenneté canadienne. En sociologie et anthropologie (représentant 9.3 % des sciences humaines) la distribution du corps enseignant selon la citoyenneté se répartit en 41.3 % citoyens du Canada et 37.0 % citoyens des États-Unis, le plus haut pourcentage de citoyens des États-Unis enregistré dans une discipline.

La discipline des mathématiques qui représente 32.9 % du corps enseignant dans le domaine des sciences pures se distribue de la façon suivante: 52.9 % citoyens du Canada, 9.5 % du Royaume-Uni et 13.7 % des États-Unis.

CHART-6

GRAPHIQUE-6

II. Citizenship of Full-time Teaching Staff Appointed in 1970 (Table 29)

The members of teaching staff appointed in 1970 include those staff members who did not hold a university or college teaching position prior to 1970 as well as those staff members who transferred from one university to another.

In 1970, there were 4,038 appointments made in Canadian universities, 511 of them in the Eastern provinces, 977 in Quebec, 1,458 in Ontario and 1,092 in the Western Provinces. Of these 4,038 staff members, 600 did not report their citizenship but reported their country of first degree. Their citizenship was estimated on the proportions, citizenship to country of first degree, calculated for those who had reported citizenship. Another 235 staff members did not report either their citizenship or the country where they obtained their first degree.

The percentage of the newly appointed teaching staff holding Canadian citizenship varied considerably from region to region, from a high of 67.3% in Quebec to a low of 48.9% in the Western provinces. Table 29 shows that on a national basis, 55.1% of newly appointed teaching staff were Canadian citizens, while 19.1% were American, and 10.9% were British.

II. Citoyenneté du personnel enseignant à plein temps nommé en 1970 (Tableau 29)

Les membres du corps enseignant à plein temps nommés en 1970 comprennent les membres du corps enseignant qui ne détenaient pas un poste dans une université ou collège avant 1970 ainsi que les membres du corps enseignant qui sont passés d'une institution à une autre, au cours de cette année.

En 1970, on compte 4,038 nominations de professeurs dans les universités du Canada dont la distribution par région représente 511 dans les provinces de l'est, 977 au Québec, 1,458 en Ontario et 1,092 dans les provinces de l'ouest. Parmi ces 4,038 membres du corps enseignant, 600 n'ont pas fourni leur citoyenneté mais ont indiqué le pays d'obtention du premier grade. La proportion, citoyenneté à pays d'obtention du premier grade, calculé pour les enseignants qui ont fourni la citoyenneté, a été étendue pour nous permettre d'estimer la citoyenneté de ceux qui n'ont fourni que le pays d'obtention du premier grade. 235 membres du corps enseignant n'ont fourni ni la citoyenneté, ni le pays d'obtention du premier grade.

La distribution du corps enseignant nouvellement nommé en 1970 selon la citoyenneté canadienne varie considérablement d'une région à l'autre, s'élevant à 67.3% au Québec et tombant à 48.9% dans les provinces de l'ouest. Le Tableau 29 démontre qu'à travers le Canada, les nouvelles nominations de membres du corps enseignant distribuées selon la citoyenneté se répartissent en 55.1% citoyens du Canada, 19.1% des États-Unis et 10.9% du Royaume-Uni.
